

UFO fever grips Hungary

A MONTH after the Soviet Union was rocked by tales of visitors from outer space, Hungarians have been seeing UFOs and green men.

Pilots reported a "strange, spherical, orange-coloured" flying object, independent weekly Del-Kelet said, and two soldiers at an airport nearby saw a small green figure beam up into space.

"He lifted one of his arms and created a cone-shaped light-beam above his head, disappearing into a high-rising tunnel of light," the weekly said.

And a farmer is claiming to have seen two long-eared little green men.

"The man tried to hit them with his shovel but they paralysed him with an unknown power and disappeared," the report said.
