Lights in sky, marks on lawn create mystery

MILLERSBURG, Ohio (AP) — Holmes County residents reported strange lights in the sky, and a resident called the sheriff's department to investigate a circular depression on their front lawn, authorities said yesterday.

A family in Monroe Township discovered the ring, about 7 inches wide and 45 feet in diameter, Saturday afternoon, said a sheriff's

department news release. The family has no explanation for the markings, the release said.

In areas where the grass had been matted down, the ring was about a half-inch deep, the sheriff's department said.

Judy Neville told authorities

that other than the family dogs' unusual barking early Saturday morning, no one heard or saw anything out of the ordinary.

Deputy Sheriff Dale Renker is investigating the reports, the office said. Renker could not be reached for comment yesterday.
