

Pipped by orange aliens!

ORANGE men from outer space have invaded Hungary.

Meteorologist Gyula Bazso said yesterday that he and his colleagues had spotted four UFOs in the night sky.

An air force jet was sent up to intercept.

But the orange-coloured spherical objects, which measured 50 yards across, swiftly made off.

Bazso said one of the UFOs hit 2625 mph.

Little green spacemen were reported in Hungary and Russia some weeks ago.
