

Mystery lights over Bay

The Visitor,
Morecambe & Heysham & Lancaster

25-11
13 DEC 1989

TWO Morecambe residents have had a close encounter in the past month with some unusual aircraft, which they think are types of UFO.

Mr Keith Tassart, of Kings Crescent, Morecambe, said he saw some lights in the sky over the Bay when walking home one evening. When he took a closer look, it was triangular-shaped with a brightly-lit dome at the front. "I had my binoculars with me, so I could see it very clearly.

"There were lights down each wing too. When it took off it had a red light underneath. I would say it was no higher than 2,000 feet."

Mr Tassart said he knew it wasn't any ordinary aircraft because it hovered for several minutes before taking off, and did not make a sound.

A similar incident was recorded by Clair Allen (16), of Ruskin Avenue, Bare, who spotted what she is sure was a UFO in the sky over the Bay about three weeks ago.

"All I could see was a lot of lights. They were flashing, as if they were hitting off something.

"It was very low, and was there for about half-an-hour. I was terrified."
