An object formed by a frontal collision of two bullets with a probability of one billionth

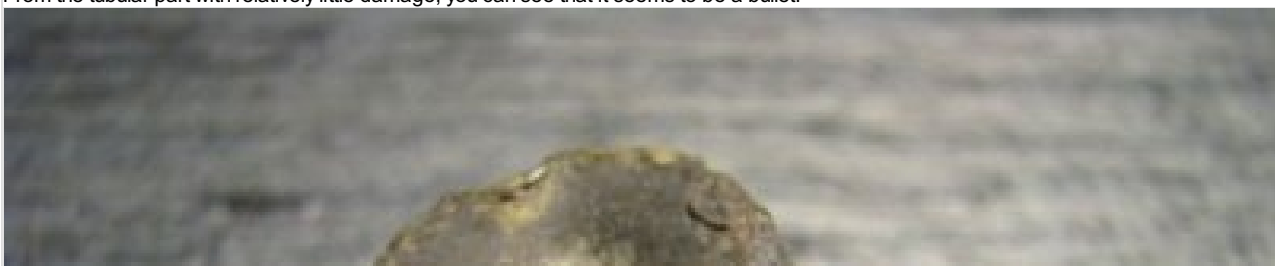

This article, originally posted in [Japanese](#) on 09:40 Mar 06, 2009, may contains some machine-translated parts.
If you would like to suggest a corrected translation, please click [here](#).

In 1854 [Crimean war](#) it was said that an object in which two bullets frontal collided was discovered, that is when Russia and France fought. It seems that the bullets collide with each other is a probability of $1 / 1,000,000,000$.

Pictures of the objects are as follows.

[English Russia >> One to a Billion](#)

From the tubular part with relatively little damage, you can see that it seems to be a bullet.

A bullet with a cracked tip and cracking spread.

Looking from the side it is a UFO-like object.

It is a pretty rare case object that frontal collision occurred more than 150 years ago.
