*Mexican TV revealed an almost unbelievable story that in May, 2007, a baby 'alien' was found alive by a farmer in Mexico, according to news from Bild.com.*

Mexican TV revealed an almost unbelievable story that in May, 2007, a baby 'alien' was found alive by a farmer in Mexico, according to news from Bild.com.

However, after the discovery the farmer drowned it in a ditch out of fear.

Is it a real alien or just an elaborate hoax to explain the mysterious death?

Two years after it was found, scientists have finally been able to announce the results of their tests on this sinister-looking carcass.

The tests revealed that although it has some similar joints to humans, its skeleton has characteristics of a lizard; also its teeth do not have any roots like humans.

The farmer said that he had to hold it underwater for hours.

The scientists said that the creature was very intelligent.

According to the report by Bild.com there are frequent UFO sightings and reports of crop circles in the area where the creature was found. Perhaps it was left behind deliberately by aliens.
