A halo cloud over the Russian capital of Moscow has created a UFO buzz over the Internet.

YouTube screengrab

A UFO attacking Russia? Nope. A circular cloud in the shape of a halo has some UFO enthusiasts buzzing.

Oct. 14, 2009, 9:10 a.m. ET

**Mark Sappenfield**  
Editor

Monitor journalism changes lives because we open that too-small box that most people think they live in. We believe news can and should expand a sense of identity and possibility beyond narrow conventional expectations.

Our work isn't possible without your support.

## Why is Christian Science in our name?

Our name is about honesty. The Monitor is owned by The Christian Science Church, and we've always been transparent about that.

The Church publishes the Monitor because it sees good journalism as vital to progress in the world. Since 1908, we've aimed "to injure no man, but to bless all mankind," as our founder, Mary Baker Eddy, put it.

Here, you'll find award-winning journalism not driven by commercial influences – a news organization that takes seriously its mission to uplift the world by seeking solutions and finding reasons for credible hope.
