The Switchblade Transforming Stunt Flier is a morphing flying machine that takes off vertically and hovers like a UFO. Then, press the Morph Button on the remote and watch the flier transform into a jet right in midair!

Air Hogs has come up with some amazing toys in the last 10 years. One of their newest is the **Switchblade Transforming Stunt Flier**, which comes in yellow and black OR red and gray. It's a morphing **flying machine** that takes off vertically and can hover like a UFO. Press the **Morph Button** on the remote and watch the **Switchblade Transforming Stunt Flier** transform into a jet right in midair!

Remote Controlled

The **Switchblade Transforming Stunt Flier** is powered by batteries and includes a remote control, plug-in charger, launcher (or you can use your hands), four extra propellers, instruction booklet and built-in LIPO battery (you charge it by plugging it into the remote!). The on-off switch is on the bottom of the plane. The plane can be morphed when not in motion by either using the button on the remote or by pushing a button located on the plane itself. It's a very durable toy that can take a lot of abuse until you **learn to fly** it like a pro.

Fly Away

The first step in playing with the **Switchblade Transforming Stunt Flier** is to pick a place to fly: your backyard, the local park or even in the middle of a high-school football field. Then, decide what motor configuration to use. The motor located on the wing is adjustable from hover to forward flight. Take your time to get used to the controls. Eventually you will get the hang of them and be able to maneuver your plane wherever you want it to go. With practice you will soon be **flying, hovering and landing** with no problem. If you are landing properly there will be no need for the extra propellers that are included in the kit.

This amazing transforming stunt flier comes in a handy, reusable carrying case that is a great place to store your plane; the plane itself has a wing span of 17 inches, a range of 300 feet and flies at a frequency of 27.045 MHZ. With its ability to **lkwlink launch, hover, morph and fly**, the **Switchblade Transforming Stunt Flier** is two great toys in one.

Thumbs Up

- To get this plane in the air you can use the launcher that is included or you can use your hands.
- It can be flown in either mode alone if you so choose. What more could a kid ask for but to have two toys in one!

Thumbs Down

- The remote uses 6 AA batteries which are not included.
