

WELL—DID A SAUCER LAND THERE ?

DID a flying saucer—the size of a double-decker bus—land one night recently on or near the Wimbledon Common golf links ?

Anyone who saw such an object should get in touch with Mr. David Briggs, of 292 Haydon's-road, Wimbledon, who is area investigator for the British Unidentified Flying Object Association and Flying Saucer Review.

Mr Briggs, 28-year-old artist, says a constable told him a woman reported seeing the flying saucer land.

She had "never seen anything like it in her life."

The constable had since heard that other people had seen the object flying over the common that same night.
