

... and townsfolk see a saucer

THE market town of "mysterious vibrations" had a new visitor last night — a "flying saucer."

Scores of people said they saw a cigar-shaped, fiery object hovering in the sky over Warminster, Wilts., from 8.30 until 9 p.m.

"Then it suddenly looked shorter, as though turning on its axis, and vanished," said Mrs. Patricia Phillips, wife of the vicar of nearby Heytesbury.

Scientist David Holton, of Crockerton has been investigating "vibrations" heard by a dozen Warminster people since Christmas.

Said Mr. Holton last night: "Here is a series of happenings which cannot be explained." He is sure that Wiltshire will soon be invaded by craft from Outer Space.
