Seen a Saucer? So Have Others

Reports of flying saucers are on the increase here, according to the folks at the Unidentified Flying Object Report Center. Allan Manak, chairman of the Cleveland Ufology Project, who mans the report center, said there have been more reports of unidentified flying objects in the past three months than there were all last year.

And, he said, this seems to be the biggest year since 1957 for sighting things in the sky. He had 15 calls last night, all reporting something that looked like the glowing end of a cigaret, traveling westward in the sky at a great rate of speed.

"Definitely extraterrestrial," Manak said. There is nothing to fear, he added. He'd like to hear from others who see unidentified flying objects. The number is 234-0861.
