

Flying saucers

MAJOR GORDON COOPER has stated that one of the reasons why he became an astronaut was because he "had the idea that there might be

some interesting forms of life out in space for us to discover and get acquainted with. There have been far too many unexplained examples of unidentified objects sighted around this earth for us to rule out the possibility that some form of life exists beyond our own world."

It is reports made by qualified observers that are the real enigma of the flying saucer stories (Letters, Monday).
