

Flying saucers

THE Students' Society for the Investigation of Unidentified Flying Objects are anxious to hear from anyone who has seen anything that he cannot explain easily.

We treat all reports with respect and, though we will of course try to find a natural

explanation of the sighting, like optical illusion, a weather balloon or a satellite, we do not ridicule anyone.

I ask anyone who has seen some unusual object to write to me (enclosing a stamped, self-addressed envelope). We are neither crackpots nor sceptics, and we keep an open mind on the subject of flying saucers.

STEWART MILLER,
Glare College, Cambridge.
