

LIGHT IN THE SKY

Sir, — May I appeal to readers living in the Greenford, Northolt and Northolt park areas.

I am investigating the appearance of an unusual light in the sky during the night, which has been seen, over a period of time, by friends of mine in Northolt.

The light was last seen on Tuesday July 26, just after midnight. The light is best described as flame, or orange, coloured, which expands and contracts but has little other movement.

This is a genuine enquiry, and any news of the light, should include time date and place as well as description.

DAVID MARLOWE
