

Globe-Trotting Churchman Sets Up Worldwide UFO-Sighting Bureau

By **BUD GORDON**

"We are being visited by creatures from outer space. They are traveling inside the UFOs and they are surveying the earth and its people."

The man who said that — the flamboyant Rev. Carl McIntire of Collingswood, N.J. — is so sure he's right, he's started a worldwide bureau to collect information on UFO sightings and make it available to the public.

The Rev. McIntire, a globetrotting critic of traditional churches, is the pastor of the 2,000-member Bible Presbyterian Church in Collingswood. He's also host of the "20th Century Reformation Hour," a religious program carried on 600 radio stations throughout the U.S.

"The bureau is actually an arm of the 20th Century Reformation Hour — which has committees in all 50 states," Rev. McIntire told *The ENQUIRER*. "And those committees have, in turn, formed the 20th Century UFO Bureau."

"Besides our membership in the U.S., the 20th Century Reformation Hour is affiliated with church groups in 86 foreign countries and all our members are on-the alert for UFO information."

Rev. McIntire said the UFO bureau, started last September, is manned entirely by volunteers whose job is to find and interview people who have seen UFOs and collect all information available about every sighting.

"This information is sent to our office here in Collingswood, where it is cross-referenced against similar types of sightings and filed," Rev. McIntire said. "We've had 125 sightings reported since we started the bureau — the bulk of which have been in the U.S. But we've also had reports from England, Europe and South Africa."

Rev. McIntire said the UFO bureau has prepared a 32-page

... **'We Are Being Visited by Creatures From Outer Space'**

REV. CARL McINTIRE

... says "Our planet is under surveillance."

"information kit" on UFOs which it sends to people writing for information.

He added that the bureau also plans to plot a graph of worldwide UFO sightings to see if there is a pattern to the flights.

"We're keeping a very close watch on the situation," he said. "Because we believe that our planet is under surveillance from outer space at this very moment."
