# Is there a Peeping Tom in space?

I HAVE not seen any UFOs and I doubt if I ever will. But I must protest against the way scientists dismiss the possibility of something existing outside our world.

None of us likes the idea of a prowler or Peeping Tom near our homes. If we think there may be someone, we draw the curtains, lock the doors and feel uneasy.

It gives us a sense of security to believe that our world is the be-all and end-all of existence, and to discount the idea that someone is watching us from out there in space.

I don't say there is someone. But until I have proof positive, and not a lot of scientific theories, my mind remains open on the subject.
