

ASK

IN WHICH year were UFOs (flying saucers, etc.) most seen in England, say, during the past 30 years? Were any reported to have landed here?—
(Name and address supplied.)

● The biggest wave of reports was in 1967. Mr. Charles Bowen, editor of the *Flying Saucer Review*, recalls an incident in November 1963 when a number of boys near Hythe, Kent, reported seeing a descending "star-like object." They talked about "a bright golden light" floating over the ground. At that time, newspapers reported villagers in the district—at Saltwood—telling the police they had seen a headless figure in a field which vanished.
