

Riddle of the TV men's UFO

A MYSTERY object speeding across the sky was seen by ITV viewers last night.

The sighting baffled television cameramen who filmed the UFO. They said: "It definitely wasn't a plane."

Amazing

They said the round, orange and yellow object was spinning. It flew around for two minutes, stopped and hovered for 15-20secs.

It was filmed by an ATV crew who were on a farming interview at Enstone, Oxfordshire.

"It was travelling at an amazing speed," said Noel Smart, aged 26. "It was so fast it was difficult to follow it."

Swamped

A news bulletin was interrupted so that the film sequence could be shown.

Later, callers swamped the ATV studios in Birmingham, saying they had seen the UFO, too.
