

Turning point in our lives

More £1-winning letters from people who believe in Unidentified Flying Objects.

WE WERE always a bit sceptical about UFOs—until we saw two! The first was in August, 1969. It was a clay-coloured object that resembled a boulder falling from the sky. However, as we looked at it, it stopped turning, and became motionless for about 5-10 seconds, then it started to climb at a fantastic speed and disappeared in seconds.

The second time was in April, 1970. We noticed a greyish, balloon-shaped object with something hanging from it of a lighter colour (similar to the old-fashioned balloons with baskets), travelling slowly across the sky.

STEWART BENNET and
JOANNA KENNEDY,
Hampstead, London.

I THINK I have seen a UFO. I was on my way to the shops with mummy. I happened to look into the sky, and I saw a funny-shaped object, going fast.

It was a long thing, like a stick with a ball on the end, going from light yellow to dark yellow.

DAWN BALDWIN (aged 9),
Banbury, Oxon.

IN September, 1970, coming home from the cinema, I looked up at the stars, and I saw a small red star begin to weave from side to side, rather like a leaf falling from a tree.

As it zig-zagged it began to change colour from red to white.

When it stopped, I noticed that it was shaped like a pear-drop, with the bottom winking on and off.

A few seconds later, the green light disappeared, and the top went white as it shot up vertically into a cloud.

R.A.G.,
Wartley, Worcs.
