

Lights in the sky spark UFO puzzle

LOCAL members of the Yorkshire UFO Society had a close encounter when they witnessed a bright light over Morley.

Official investigators with the society, Mr. Philip Mantle and Mr. Marc Birdsall, are now appealing for anyone else who may have seen the strange object to come forward.

The incident happened on November 22 at about 12.30 a.m. as the two spotters were travelling along Dewsbury Road towards Tingley.

As they approached the bottom of Wide Lane, Mr. Birdsall noticed a bright yellow light over Morley, moving slowly in the direction of Bradford.

No sound could be

heard and both men estimated the light to be no more than half a mile away and only 400 feet off the ground.

Having stopped their car to observe it, they lost sight of it behind Tingley gas works. They stopped again at the motorway bridge on Tingley Common to try and re-locate the light, but it had disappeared.

Conditions at the time of the sighting were described as cold, clear and dry with a slight breeze.

Efforts to trace the source of the mysterious light, such as local airports, have proved unsuccessful. If anyone has any information about the light they can contact Mr. Mantle on Morley 522411.
