

UFOod for thought

IN her new book about unidentified flying objects Jenny Randles, whose last book was recently serialised in the Yorkshire Evening Post, sets out a host of factual evidence for their presence.

In "UFO Reality" (Hale, £9.95) Miss Randles gives chapter and verse of the physical effects on witnesses, ground traces, radar trackings, movie films and artefacts left by UFOs all over the world.

Miss Randles makes no claim as to the origins of UFOs and is content to let the evidence — and there is much of it, all fascinating — speak for itself.

Much food for

thought here — even for the sceptics.

Evening Post.
