

Verified By Panel Of Six Doctors:

HUMAN WHO WAS INSIDE UFO DELIVERS MESSAGE FROM MEN OF ANOTHER PLANET

...Aliens Claim A-Bomb Blast Brought Them To Earth

By MARGUERITE SAIGEON and ELISE MONKS

Far beyond our sun, moon and stars, there's another world with inhabitants like us, and they want to help us.

That's the message for the people of our planet from the people of a faraway galaxy, says a South American who claims to have spent 1 1/2 hours aboard an alien spacecraft.

A few weeks ago, doctors in Bahia Blanca, Argentina, first reported the account of Dionisio Yanca's 1 1/2 hours aboard a spaceship — a story which months of investigation using truth serum has not been able to disprove or shake.

Last October, Yanca, a truckdriver who lives on the coast of Argentina south of Buenos Aires, was driving on the highway a few kilometers from the town of Bahia Blanca, when his truck broke down. Nearby he saw a spacecraft from which emerged a being dressed in white who took Yanca inside.

Since that time, a team of doctors under the direction of 37-year-old psychiatrist Dr. Eduardo Mata of Bahia Blanca, has been analyzing Yanca's tale, in an attempt to establish or disprove its authenticity.

"We have tested Mr. Yanca with truth serum — sodium pentothal — and found his version under the drug to agree in every detail with what he told us originally," said Dr. Mata in an exclusive interview with MIDNIGHT.

Just what did happen last

The UFO aboard which Yanca was taken was similar to a ship, stated the team's report. It had two arm-like devices extending from it which appar-

ently connected with high-tension wires at the side of the road.

Four beings — two men and two women — were on board, dressed in white outfits with orange gloves and boots.

"The people from this spacecraft are exactly human form," said Dr. Mata. "They have red hair and clear blue or hazel eyes. They appeared to be about 50 or 60 years old."

The beings, who claim to come from another galaxy, didn't just arrive last October.

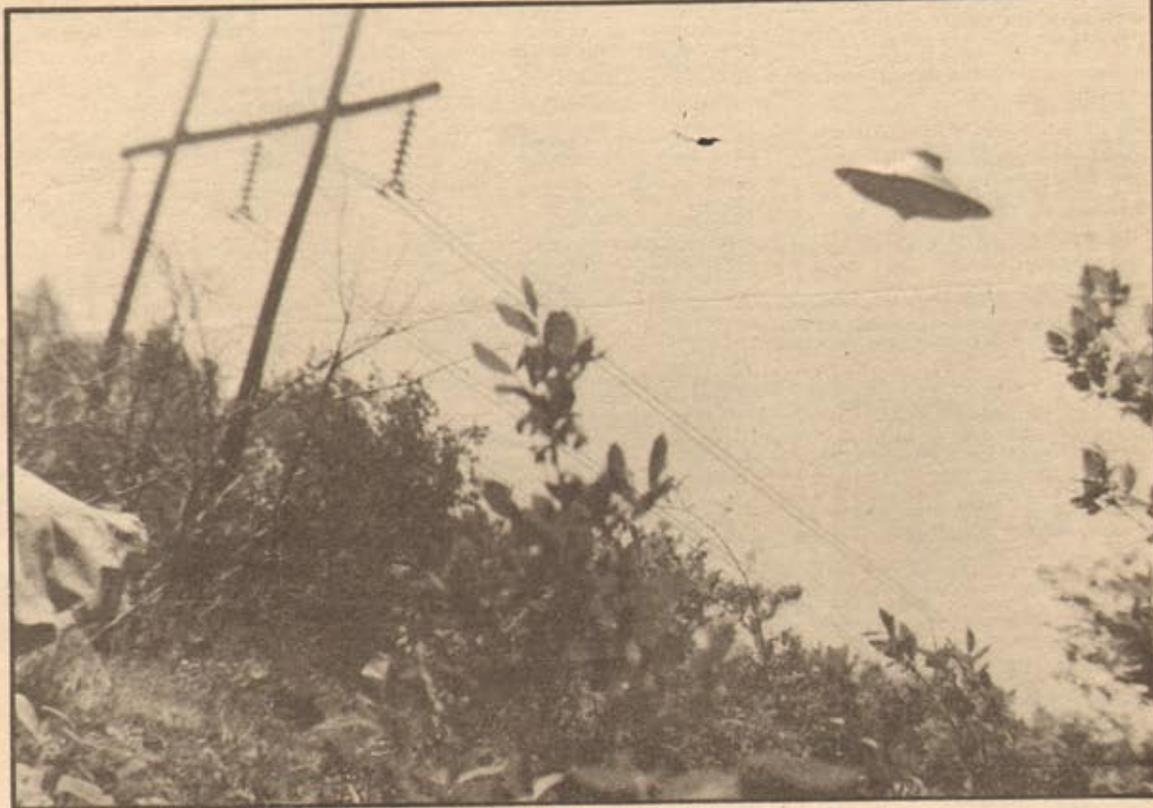

"The aliens have been interested in Earth since five years after the explosion of the atomic bomb in Hiroshima," said Dr. Mata.

For the first 10 years, the galaxy people were said to observe conditions on earth, testing to see if survival for them would be possible. They claimed to be familiar now with Earth's composition.

"Mr. Yanca didn't see any sort of breathing apparatus, therefore the aliens were able to tolerate our atmosphere," said Dr. Mata.

Since 1960, the inhabitants of the spacecraft have been mak-
ants. It was the 25-year-old Yanca's excellent health and high moral character which brought about his selection.

According to the doctors'

ARGENTINA TRUCK DRIVER, while injected with truth serum, says he actually was aboard a UFO and talked with alien beings.

report, Yanca was told that the aliens were not here to harm us. They wished only to see if future survival on earth is possible as "Earth is to undergo serious events."

"We do not know much about the nature of these serious happenings," said Dr. Mata, "except that they will be due, apparently, to man's selfish endeavors. He — man — will cause his own ultimate end."

Was this a reference to a third world war?

"The aliens did not mention anything about a war being the reason for the end of life on earth," said the doctor.

Unknown to Yanca, in what well may not be coincidence, electrical technicians in nearby Bahia Blanca noted an abnormally high consumption of power on the same day as Yanca described seeing the spacecraft connected to the high-tension wires.

Does Dr. Mata believe that Yanca spent 1 1/2 hours aboard

an alien spacecraft?

"Our investigation is still underway, and until it is completed I would rather not say what my true feelings are as to the credibility of the story," said Dr. Mata.

"As I have stated before," continued the psychiatrist, "Mr. Yanca was tested by us with truth serum, and we cannot find any discrepancy in his story."

"There is no doubt whatsoever that the truth serum is unquestionably reliable."
