

Strange sights at Cononley

TONY DODD is not alone in his idea that inter-planetary craft are regular visitors to the Craven area.

For as soon as the Craven Times was off the presses last week our office was inundated with calls about UFO sightings.

One of the callers was Ruth Boyer, who lives at Aire View, Cononley.

She was in bed with her husband John when she woke suddenly.

She said: "I woke up at about 2 a.m., and was amazed to see two moons over Farnhill Pinnacle off the Keighley Road.

Double

"I woke my husband up and he got out of bed to have a look. I thought I was seeing double at first, but there were two round balls which looked as big as full moons.

"They were red, and if

it hadn't been for the moon, which was full, I would have thought I was seeing double. There were there for four or five minutes.

Light

"All of a sudden they went, just as if a light had gone out. They just looked like those that were pictured in the Craven Times.

"I knew it was something extra-terrestrial."

UFO investigator Tony Dodd was not surprised by the news of Mrs. Boyer's sighting.

What she is seeing is consistent with what is happening. They sometimes change colour. The can glow bright red or orange and change back to white."
