

UFO group meeting in Sheffield

YORKSHIRE is Britain's leading place for sightings of unidentified flying objects.

So claims Yorkshire UFO Society.

The North Yorkshire moors seems to attract most space visitors, but there have been sightings in Sheffield as recently as three weeks ago.

Now leading saucer

spotters want to turn people's gazes skywards in an effort to track down the unusual objects in the sky.

And they will be bringing films, photos and top speakers to the Foresters Hall, Trippet Lane, Wednesday, at 7.30 p.m. to con-

vince others that UFOs really do exist.

The Yorkshire UFO Society believes that strange phenomena in the Yorkshire skies warrant money for scientific research.

"Only about 10 per cent of all the calls and letters we receive attract our interest," said society president Graham Birdsall.

"And only one or two per cent which warrant it, are investigated." Photos are analysed at Sheffield University with the help of the Ministry of Defence.

The meeting next week will be addressed by leading investigators in the area, who will talk about local sightings.

Society members plan a 24-hour skywatch later in the year, with enthusiasts hoping that visitors will travel from all over the universe to take part.
