UFO Over Oklahoma

Police & Residents Watch in Amazement as Mysterious Object Changes Color in Sky

object about 8:30 p.m. last October 27 near the towns of Duncan and Comanche, some 50 miles southwest of Oklahoma City.

Rick Hart, 25, a patrolman in Duncan, had no doubt about what he saw.

"This was a UFO and it wasn't an aircraft or spaceship of any kind we know of in this country," he said. "Two other policemen and I observed this object for more than two hours and we had reports from people all across this area who saw the same thing."

In Comanche, a few miles away, Patrolman Beryl Blair, 45, told The ENQUIRER: "This wasn't an airplane, helicopter or a star. Joe Kenny, an auxiliary policeman, and I watched this object for more than 30 minutes and we got a good, long look at it."

Blair said the object had a red light on top.

"It also had an oscillating blue light at the bottom left side and an oscillating orange light on the bottom right. It looked like it was maybe 2,000 feet high.

"We followed it for about 7 miles but it was moving too fast for us to keep up with it."

Another observer in Comanche, Fireman Kenneth Lewis, 37, said: "It was something I'd never seen before. It seemed to be coming closer and changing colors all the time."

State Highway Trooper Allen told The ENQUIRER: "I pursued the object more than 20 miles. It wasn't like anything I've ever seen before."

By radio he requested radar confirmation from Fort Sill about 25 miles away.

"The thing had been hovering," Allen said. "But when I heard on the radio that radar sweeps were beginning, I saw it move out real fast. It took off like it was trying to get away from the radar beam.

"I followed it and saw it start flashing, changing colors."

Duncan Patrolman Hart saw changing colors too. "It seemed to change from red to green to blue and back to green again," he said.

Added Hart: "I'm dead serious about believing in UFOs now."

THEY SAW IT: Trooper Floyd Allen (above) was one of first to spot object. Patrolman Beryl Blair (below) watched it for more than 30 minutes.
