[The Earth, the solar system, and the cosmos \[sound recording\] : unidentified flying objects / Arranged by Thornton Page, Philip Morrison, Walter Orr Roberts, and Carl Sagan. Three sessions.](#)

American Association for the Advancement of Science.

American Philosophical Society

6 reels.

Session I: UFO's and the Public -- Session II: UFO reports -- Session III: Retrospective, and future UFO studies.

[R. Leo Sprinkle papers, 1961-2004.](#)

Sprinkle, R. Leo, 1930-.

University of Wyoming - American Heritage Center

49.45 cubic ft. (50 boxes)

This collection contains the personal and professional correspondence of Leo Sprinkle as well as articles and manuscripts by other authors, an extensive collection of paranormal-related newsletters, Sprinkle's own published papers, and his original research. Most materials are about UFOs and the

psychology of UFO contactees. Other subjects include conventional psychology, paranormal activity, multiple personality disorder, parapsychology, reincarnation, and near-death experiences. All collection dates are approximate.

[Philip J. Klass Collection 1948-2000](#)

American Philosophical Society

36.0 Linear feet

An electrical engineer and senior editor for Aviation Week and Space Technology, Philip Klass began investigating UFOs in 1966 after participating in a panel discussion on the subject for the Institute of Electrical and Electronics Engineers (IEEE). From that time forward Klass has investigated UFO sightings in an effort to find a credible prosaic explanation, and became one of the most widely recognized UFO

"debunkers." A founding member of the Committee for the Scientific Investigation of Claims of the Paranormal (CSICOP), serving on the Executive Council and the UFO subcommittee, Klass has authored seven books and numerous articles on UFOs, including the Skeptics UFO Newsletter in 1989. In the early 1970s, he became interested in space based weapons, and began collecting material related to the Strategic Defense Initiative (SDI) for a possible book. The Klass Collection relate to his forty-plus years of investigating UFO sightings, and includes correspondence with many of the ... [Read More](#)

Bloecher, Ted.

New York Public Library

15.5 linear feet (39 boxes).

The Ted Bloecher papers consist of correspondence, personal journals, writings, theater memorabilia, and reference files reflecting the daily life of an actor and singer in New York City, gay life before and after the Stonewall Riots, and thirty years of UFO research. The bulk of the collection consists of correspondence, in chronological order, with friends, family members, singers, actors, and UFO researchers, including Leon Davidson, Isabel Davis, Donald E. Keyhoe, James W. Moseley, Edward J. Ruppelt, and Leonard H. Stringfield. Bloecher's journals document the daily life of a gay man, primarily in New York City, with reference to the impact of the AIDS epidemic. Writings include an unpublished musical comedy, Something in the Air, a research paper, a memoir describing a summer spent in Provincetown, Mass. in 1951, and poetry. Chronological reference files documenting his membership in the New York City Gay Men's Chorus include official publications, minutes, programmes, reviews, ... [Read More](#)

[J. Allen Hynek \(1910-1986\) Papers 1925-1988](#)

Northwestern University

14.00

Astronomer J. Allen Hynek led Northwestern's Astronomy Department into the Space Age and became the nation's foremost expert on unidentified flying objects (UFOs). He oversaw the significant expansion of Northwestern's Astronomy Department and made important contributions to his field, most notably by successfully incorporating television technology into telescopes for the first time. However, he was best known for his work on UFOs. His work inspired the film "Close Encounters of the Third Kind." The Hynek Papers provide a record of Hynek's professional life but offer scant insight into his personal affairs. The papers include biographical materials, clippings, reports relating to Hynek's work on Project Stargazer, and some materials pertaining to Hynek's UFO work and his work at Northwestern.

Chief Dan Katchongva correspondence to Helen Addison Howard [manuscript materials].

Katchongva, Dan, Chief.

Autry National Center - Museum of the American West

0.1 linear feet (1 folder)

This collections predominately consists of letters from Chief Dan Katchongva to Helen Addison Howard, also known as Mrs. Ben Overland, from 1970 September 4 to 1974 November 27. Most of the correspondence was written by Nonnie S. Skidmore, corresponding secretary, on behalf of Chief Dan Katchongva. The letters discuss the Hopi Purification Day prophesy where all the land will be returned to the Hopi, as well as flying saucers. The collections also includes copies of letters to political leaders from Katchongva, newspaper clippings, and ephemera.

Joel Carpenter Collection on Richard B. Russell's 1955 Trip to the USSR 1955

University of Georgia - Richard B. Russell Library for Political Research and Studies

1.0 folder

The folder contains one nine-page Air Intelligence Information Report and six photo slides. The report details the Senator's observations during the trip, including the sighting of a pair of unidentified flying objects ("flying saucers") by Senator Russell and two others; descriptions of Dnieperpetrovsk airfield, passenger and military aircraft, and radar receivers near Moscow; observations on Russian trains, railroad mechanisms and procedures; and hand-drawn diagrams of a Russian jet bomber and a railroad gauge switching operation. Slides depict Senator Russell with companions at a war memorial in Baku, beside a train carriage, at the Intourist Hotel, and in Tbilisi or Sochi; and passengers standing by the train between Baku and Tbilisi.

[Ivan Terence Sanderson papers, \[ca. 1920-1973\] Circa 1920-1973](#)

American Philosophical Society

27.0 Linear feet Ca. 17,000 items

This collection consists of correspondence, manuscripts, drawings, diaries, notebooks, and photographs. Sanderson began his travels in the jungles of Asia and Africa before starting his formal schooling at Eton and Cambridge in the late 1920s and early 1930s. His papers reflect his interest in animals, jungles, and natural history. Late in his life Sanderson's interest turned to UFO's and he was the director of the Society for the Investigation of the Unexplained.

Washburn Observatory.

American Institute of Physics - Public Center

Includes the personal and departmental correspondence files of the directors, Albert E. Whitford, 1948-1958 ; Arthur D. Code, 1958-1965; including Joel Stebbins, 1946-1948. Some material relates to Dr. Whitford's activities as a member of the National Astronomical Observatory, the National Science Foundation and the Advisory Committee on the Office of Naval Research (ONR). Regarding the ONR, the University in association with the Astronomy Department had a research contract with the United States Navy to explore the theory of radiative equilibrium in stellar atmospheres using the photoelectric technique. Dr. Whitford was the Principal Investigator in this project. Among his personal and professional correspondence are many inquiries regarding atmospheric phenomenon such as unidentified flying objects, solar eclipses, etc.

Ihde, Roy C., 1929-.

Wisconsin Veterans Museum Research Center

2 sound cassettes (ca. 80 min.) : 2 sound cassettes (ca. 80 min.) : 50 p.

Roy C. Ihde, a Peshtigo, Wisconsin native, describes his career in the Air Force from 1946 to 1966 during the Cold War. Ihde touches on family military history, enlisting in the Air Force after his house burned down, basic training at the San Antonio Aviation Cadet Center (Texas), radar school at Boca Raton (Florida), primary and basic pilot training at Randolph Field (Texas), and single-engine fighter pilot training at Williams Field (Arizona). He reflects on his love of training and recalls reasons other people washed out. He talks about his assignment to the 4th Fighter Group, 336th Rocket Squadron at Andrews Field (Maryland) and duty as a P-80 jet pilot and athletic officer. Ihde comments on flying the F-84 Thunderjet. He recalls a three-year tour based in Furstenfeldbruck (Germany), speaks of defending U.S. air space, and states he often had to intercept civilian airliners. He shares his impressions of the destruction in Munich and talks about going to the opera. Sent to ... [Read More](#)

About ArchiveGrid

ArchiveGrid is a collection of over three million archival material descriptions, including MARC records from WorldCat and finding aids harvested from the web. It's supported by OCLC Research as the basis for our experimentation and testing in text mining, data analysis, and discovery system applications and interfaces. Archival collections held by thousands of libraries, museums, historical societies, and archives are represented in ArchiveGrid.

ArchiveGrid provides access to detailed archival collection descriptions, making information available about historical documents, personal papers, family histories, and other archival materials. It also provides contact information for the institutions where the collections are kept.

ArchiveGrid data is primarily focused on archival material descriptions for institutions in the United States but now also includes information about collections in Australia. This reflects the contribution patterns for descriptions of materials under archival control in WorldCat, which make up the majority of descriptions in ArchiveGrid. We may extend ArchiveGrid beyond its current scope if it is necessary to support OCLC Research experimental objectives.

ArchiveGrid illustrates OCLC's interest in advancing issues important to the archival community. Our work within ArchiveGrid gives OCLC Research a foundation for collaboration and interactions with others in the archival community. We expect to share the results of MARC and EAD tag analysis, provide discovery system analytics for contributors, document investigations of text mining and data visualization, participate in community working groups pursuing improvements to description and discovery, and more. To support those interests and objectives, we'll continue to build this extensive and current aggregation of archival material descriptions, within the constraints of OCLC Research's committed and on-going support for this project.

OCLC previously offered ArchiveGrid as a subscription-based discovery service. The subscription service was discontinued in 2012. While the freely-available OCLC Research ArchiveGrid interface is not a full production service, it shares some of the same attributes. Researchers can expect to use it for discovery of archival materials, and archives can work with OCLC Research to have their materials represented in the aggregation in a reliable and persistent way.

If you have questions about your collection descriptions in ArchiveGrid, please [get in touch](#) with us. Interested in contributing? Please [let us know](#) that as well.

Frequently Asked Questions

How do we get our finding aids in ArchiveGrid?

Your role in getting your finding aids into ArchiveGrid is simply to give us permission harvest and use them. There are no costs involved, beyond the time and effort on your part to provide us with a way to harvest your finding aid documents. We harvest your finding aids from a webpage you provide to us, and index them in ArchiveGrid. About once every six weeks, we update the ArchiveGrid index by removing all finding aid content, re-harvesting, and re-indexing. Any changes you make on to your finding aids, such as adding, editing, or removing finding aids, will be reflected in ArchiveGrid in its next index update.

Can I contribute finding aids even if I don't belong to OCLC?

Yes you can; OCLC membership is not required to contribute your finding aids to ArchiveGrid. There is no cost to contribute your finding aids, and we can accept them in EAD, HTML, or PDF formats.

Where do you get your collection descriptions?

We index finding aids harvested directly from contributors, and we also include MARC bibliographic records from WorldCat which we identified as Archival material. These WorldCat records describing archival materials constitute about 90% of the collection descriptions in ArchiveGrid.

How do you select WorldCat records for inclusion in ArchiveGrid?

There isn't a simple way to identify a MARC record that describes the types of materials held in archives, manuscript collections, and special collections. In order for a WorldCat record to be extracted into ArchiveGrid, it needs to meet the following criteria:

Has only one library holding symbol attached (though we relax this rule for NUCMC records)
Has a value of b, d, f, g, i, j, k, p, r, or t in MARC Leader byte 6 , or the value "a" (language material) in Leader byte 6 and the value "c" (collection) in Leader byte 7, or the value "a" (archival) in Leader byte 8
Has no value of any kind in MARC 260 subfield "a" or "b" (to filter out published works)
Does not have "Bibliography" in the beginning string of a MARC subject heading subfield "a" or "v"
Does not have a MARC 502 field (Theses or dissertation note)
Does not have a MARC 015 field (National bibliography number)
If the record has the material type "book" or "serial", has no value in the MARC 008 or 006 "Nature of Contents" bytes (to eliminate theses, reference works, and other non-archival materials)

This filter isn't always successful. Especially for minimally-cataloged materials, we sometimes see descriptions of unpublished manuscripts of various kinds filter through. But we continue to evaluate and improve the filter as best we can.

Why does the same collection sometimes have two different entries in the ArchiveGrid index?

Duplicate entries result from harvesting finding aids and extracting WorldCat MARC records for the same collection. While we continue to work on a way to effectively cluster or de-duplicate these two forms of the collection description from the same contributor, we have hesitated in favoring one over the other as each includes access points not found in the other. We are trying to maximize access and discovery, so in this situation we've decided to favor recall over precision.

What about copyright?

OCLC does not claim copyright ownership of individual collection descriptions contributed to ArchiveGrid. More information on rights and responsibilities and a legal statement are available on the web page where you can [request to include your collections](#).

How many institutions contribute?

Collection descriptions from around 1,000 institutions - libraries, museums, historical societies, etc. - are included in ArchiveGrid.

Why is ArchiveGrid a free service?

We transitioned from a subscription-based service to a freely available system in 2012, in order to make the index available to everyone - faculty, scholars, family history researchers, students, and others. ArchiveGrid

remains an OCLC Research project, allowing us to improve archives and special collections research through studies of researchers, description, and discovery.

What do you know about your users?

When ArchiveGrid started in the late 1990s as a way to test if EAD finding aids from different sources could work well together in one search system, we mostly had faculty and college students and genealogists in mind as our researchers. We later gathered data about these user groups from studies, and we continued to make system design improvements based on their needs. In a study conducted in 2012, we surveyed archives and special collections users and learned that primary source research is still an important focus for faculty, students and genealogists, but it also plays a role for people motivated to search for archival materials by something in their personal and professional lives. This important segment of archives and special collections include filmmakers, writers, designers, hobbyists, and much more.

What are your site visit statistics like?

We use Google Analytics to track site visits and show selected current statistics [here](#). We recognize that discovery frequently begins with search engines, so we put special effort into promoting ArchiveGrid's collection descriptions in Google, Yahoo, Bing, and other popular services.

The ArchiveGrid Team

Bruce

[Bruce Washburn](#) is the lead developer and software engineer for ArchiveGrid. More accurately, he is ArchiveGrid's only developer. He's grateful for all the other software engineers in OCLC Research that make it possible to work so easily with WorldCat MARC records, and of course to all the ingenious and helpful staff at ArchiveGrid contributing institutions that help us harvest their finding aids. Bruce works in the San Mateo, California office of OCLC Research.

Ellen

[Ellen Eckert](#) is primarily responsible for keeping the ArchiveGrid wheels turning. She's the front-line for questions, comments, and problem reports that we receive via email, and is your expert help when you have questions about how to contribute your finding aids to ArchiveGrid. In addition, Ellen is the editor of the [ArchiveGrid blog](#) ... you should follow that, it's always entertaining. Ellen works from her home office in Portland, Oregon.

Merrilee

[Merrilee Proffitt](#) is a senior Program Officer at OCLC Research and the guiding light of the ArchiveGrid project. Whether it's setting priorities for the discovery system, thinking about how best to connect ArchiveGrid with other systems, or developing projects to study users or to analyze archival materials metadata, Merrilee points the way. Merrilee works in the San Mateo, California office of OCLC Research.

Statistics

Last Updated May 12, 2014

ArchiveGrid Index Growth

Null value ×

Interpreting These Statistics

The growth of MARC records in the last year represents identification and inclusion of additional contributors of data to WorldCat, and the on-going growth of WorldCat in general. While there has also been a concerted effort to increase the number of finding aid contributors, that form of archival description is a relatively small percentage of the entire aggregation. And some MARC records may be removed from the current set, as we improve our selection algorithms to identify archival collection descriptions.

ArchiveGrid Weekly Visits, November 2011 - May 2014

Null value x

- 576,298 Sessions
- 474,405 Users
- 1,498,378 Pageviews
- 2.6 Pages/Session
- 86% Visits referred by search engines
- 7% Visits via links from other websites
- 7% Visits via direct links

ArchiveGrid Contributors

By Country

Requested map does not exist. x

By State in the United States

Requested map does not exist. ✕

Interpreting These Statistics

ArchiveGrid contributing institutions are currently hard to count. In some cases, what might be considered as one institution may be represented in ArchiveGrid by several different contributors, one for each archive or special collections department affiliated with the larger institution. But in other instances, one contributing institution provides descriptions for a great many more individual archives (for example, the NUCMC records contributed by the Library of Congress). Until we can more accurately identify and count these contributors, the current count of contributors will be much lower than the actual number of institutions represented.

How to Search

You can apply Boolean search logic to your keywords and terms, using AND, OR, NOT, and parentheses. You can also use specific indexes for your search terms.

To broaden your search:

Put an upper-case OR between your keywords. For example, **dust OR bowl** retrieves records containing either dust or bowl.

To narrow your search:

- Put quotes around your keywords to find records with an exact phrase. For example, **"dust bowl"** retrieves records with the words dust and bowl together, but would not match a description where those two words were not adjacent and in that order.
- Put an upper-case NOT between your keywords. For example, **dust NOT bowl** retrieves records containing dust, but not bowl.
- Put a ~ and a number between 1 and 4 at the end of your exact phrase. For example, **"dust bowl"~4** retrieves records where dust and bowl appear within four words of each other.
- Put parentheses around your search terms. For example, **(dust OR bowl) NOT oklahoma** retrieves records containing either dust or bowl, but not Oklahoma.

Can I combine indexes?

Though you don't need to do anything special in your search if you are using the default "keyword" index, you can use more specific indexes for your search terms. For example, the search **("mark twain" OR "samuel clemens") NOT location:virginia** will match descriptions that include the phrase Mark Twain or Samuel Clemens, and where the archival institution is not in Virginia.

Collections from land down under now aboard ArchiveGrid

Posted on [May 13, 2014](#) by [Ellen](#)

A century-old story of the British Antarctic expedition and the Australian photographer who documented it needs to be told before going into detail about our most recent ArchiveGrid index update.

100 years ago, against the backdrop of the early stages of World War One, the national heroes in Great Britain and Norway were men who had been on expeditions in Antarctica, the world's final frontier at the time. Like the 1960s United States/Russia race to the moon, Britain wanted to beat Norway to the South Pole. Roald Amundsen took that honor for Norway in 1911, easily beating Britain's Robert Falcon Scott with superiority in skiing and dog sledding.

As a sort of consolation prize, 40-year-old Sir Ernest Shackleton, who contracted scurvy while on Scott's first polar mission 12 years before, was determined to re-capture England's glory by being the first to cross Antarctica.

Shackleton made sure that members of his expedition had the best of everything. Outfitted in Burberry aboard the new Norwegian [barquentine](#) "[Endurance](#)," the men, along with 69 [sled dogs](#), left a south Atlantic whaling station on Dec. 5, 1914, bound for the [Weddell Sea](#). Their plan after crossing the continent was to catch a relief ship, the Aurora, in the Ross Sea.

Strong tents, big and hearty dogs, a disease-preventing nutrition plan, and a ship built of Norwegian fir to [withstand ice](#) were supposed to help the Shackleton Expedition succeed. Instead, ice packs [trapped](#) the Endurance, [crushed her](#), and [marooned the crew](#). They didn't touch land for 497 days and they turned to eating their dogs, [penguins](#), and seals for survival. Their survival was a testament to Shackleton's leadership.

Some funds the Irish-born Shackleton raised for the cross-Antarctic expedition came from news and film rights sales. That's where Australian photographer Frank Hurley comes into the picture. He provided the images that would cement what went from an

ambitious undertaking to one of the most compelling stories of [human survival](#). Not only did they help pay off debt Shackleton owed after the expedition, they are still held in high regard for their [beauty](#) and storytelling power.

Photo-journalists today can learn from Hurley's [innovation](#) and courage to [push the limits](#) for the best shots, get close to his subjects, and leave no angle unconsidered. Hurley's preservation technique of soldering negatives in metal casing is how his work incurred little damage during the expedition.

Gone is discovery done the Shackleton way, marked by hunger, strain, animal deaths, and rugged perseverance. But now you can discover photographs from the [Shackleton Expedition in ArchiveGrid](#). New Australian contributors and collections of Hurley's work were brought aboard during our most recent index update. The National Library of Australia's collection of digitized glass plate negatives of photos taken during the expedition are just part of the collections that are newly included in [ArchiveGrid](#).

We [recently expanded the filter](#) that selects WorldCat records for inclusion in ArchiveGrid to include more collections of images and both visual and audio recordings. After that expansion we needed to also broaden our horizons for institutions that we register for inclusion in ArchiveGrid. WorldCat contributors in Australia and New Zealand that weren't previously registered as ArchiveGrid institutions have now been added, including:

- [Art Gallery of New South Wales](#)
- [Australian National University](#)
- [Central Queensland University](#)
- [National Gallery of Australia](#)
- [National Library of Australia](#)
- [National Library of New Zealand](#)
- [State Library of New South Wales](#)
- [State Library of Queensland](#)
- [State Library of South Australia](#)
- [State Library of Victoria](#)
- [State Library of Western Australia](#)
- [University of Melbourne](#)
- [University of Sydney](#)

We were excited to see how rich these collections from Down Under are, especially the materials related to the history of South Pole exploration. We are also excited that these collections are more "discoverable" for researchers. Isn't excitement what drives people farther than they imagined? Who else on Dec. 5, 1914 felt more excitement than Sir Shackleton? Maybe, by seeing the uncharted future through Hurley's lens, we can feel a bit of that excitement, too.

With the addition of these significant collection descriptions to ArchiveGrid, the Shackleton Expedition records are just the tip of the iceberg, in terms of collections you can explore. We invite you to share your discoveries with us!

Images of McCullough's bridges in ArchiveGrid

Posted on [April 30, 2014](#) by [Ellen](#)

Highway 101 north of Gold Beach, Ore., crosses the Rogue River on a concrete arch bridge with art deco obelisks – a design that seems out of place with the industry and resort towns 101 passes through, but not out of place with the history of Oregon's coastal bridges. The bridge, which is on the National Register of Historical Places, is one of more than 20 Oregon bridges designed in the 1920s and 1930s by [Conde McCullough](#), an Oregon Department of Transportation engineer and civil engineering professor at Oregon State University. McCullough's distinct bridges still stand along U.S. Route 101. [In ArchiveGrid](#), collections of images of these bridges under construction and the towns they're in can be found.

Chicago's Wrigley Field centennial is a nostalgic grand slam

Posted on [April 23, 2014](#) by [Ellen](#)

Nowhere else in professional sports do joy and pain intersect more than for the the Chicago Cubs, the longtime residents of Wrigley Field, the venerated Major League ballpark on Chicago's north side.

Wrigley Field opened as Weeghman Park on April 23, 1914, 100 years ago today.

In the heat of summer, nothing is better than the view east from

Image source: <http://fanfoodie.blogspot.com>

“the friendly confines” of Wrigley, passing layered brick buildings and L-trains and ending where the dark sky and a serene Lake Michigan, dotted with white sails, meet.

But the Cubs haven’t won the World Series since 1908, including the 100 years at Wrigley. And still fans of “the Lovable Losers” crowd sidewalks, L-trains and parking lots to [see their team play](#).^[1] Perhaps the most famous fan in Cubs history is Steve Bartman, whose interference with a catch in 2003 cost the Cubs a playoff series.

The rustic charm of the Major’s second oldest park (after Boston’s Fenway) fosters loyalty. Ivy adorns the brick wall surrounding the outfield, and rooftops on buildings across Waveland Avenue host raucous viewing parties. Wrigley boasts a manually operated scoreboard, real organ music, minimal advertising and all the odors of old-timey baseball. Even the location is quaint, squeezed into an irregular grouping of homes and businesses affectionately known as “Wrigleytown” in the residential Lakeview neighborhood.

How many times in the last century have people consumed all these sights, smells and sounds? A lot if they had Cubs seasons tickets – a 1929 hallmark of Cubs executive and female sports industry pioneer [Margaret Donahue](#), who will be honored during Wrigley Field’s decade-themed centennial celebrations this season. Its namesake, Wrigley, is indeed the chewing gum guy – [William Wrigley Jr.](#)^[2] owned the team in 1926 when it was renamed after him.

The greatness of the game itself is etched in the park’s history. Pitcher Ferguson Jenkins, third baseman Ron Santo and shortstop Ernie Banks led great Cubs teams of the 1960s. Pitcher Bruce Sutter in the late 1970s helped define the role of the modern closer and second baseman Ryne Sandberg shone in the 1980s. All are in the Baseball Hall of Fame, but none ever earned a championship ring as a Cub.

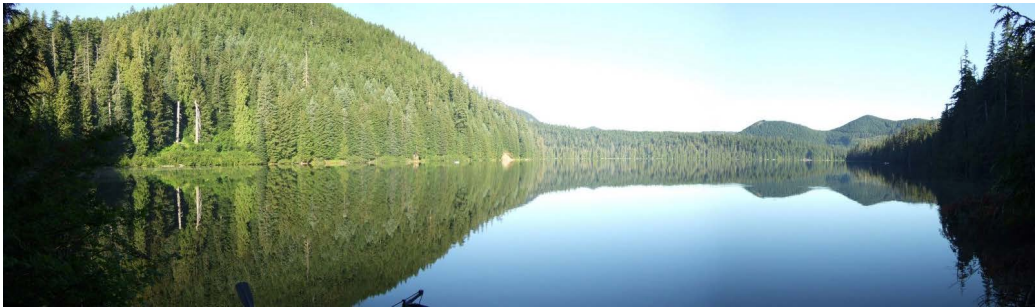

In 1998, Cub Sammy Sosa hit 66 home runs as part of a famous duel with St. Louis Cardinal Mark McGwire to break Roger Maris’ old single-season record of 61. McGwire eventually ended up winning that battle by hitting 71 bombs of his own. Both were later disgraced by allegations of steroid use to enhance their performances.

1. From ArchiveGrid record, [“Crowd at Cubs Park, July 27, 1929 \[graphic\].”](#)
2. From ArchiveGrid record, [“William Wrigley watches his team work \[graphic\].”](#)

For Earth Day, find historical photographs in ArchiveGrid of car-free commuting

Posted on [April 22, 2014](#) by [Ellen](#)

Transportation, and how much energy is consumed to get people around, is an environmental topic workers can address for Earth Day today by trying cleaner commutes. Personal automobile alternatives like walking, bicycling, and shared transport can cut carbon emissions, count toward the day’s exercise, and connect with early ways of getting around. However, according to 2012 United States Census Bureau [survey data](#), zero-emission commutes still rank low in how the American workforce gets to and from work: Less than one percent rode a bicycle and nearly three percent walked.

Since I work from home and don’t commute, my Earth Day act is to find historical photographs in ArchiveGrid of car-free commuting. Here are five:

[Hemet, Calif., 1899](#) (from a collection at [Los Angeles Public Library](#))

[Eastern Montana, 1904](#)

[Arcata, Calif., 1990](#)

[Oregon, 19th century](#)

[Seattle, Wash., 1906-1947](#)

What can you find?

ArchiveGrid jogs historical memory of women in the Boston Marathon

Posted on [April 18, 2014](#) by [Ellen](#)

This Easter weekend, athletes are getting ready to run the Boston Marathon on Monday the 21st. It was also on a Monday in April 1897, when the first Boston Marathon was run – 10 years after the Boston Athletic Association was established.

As the Boston Marathon has grown in prestige, so has its [historical significance](#) in women’s sports – running in particular. Roberta Gibb in 1966 was the first woman to run the race, although she participated unofficially that year and again in

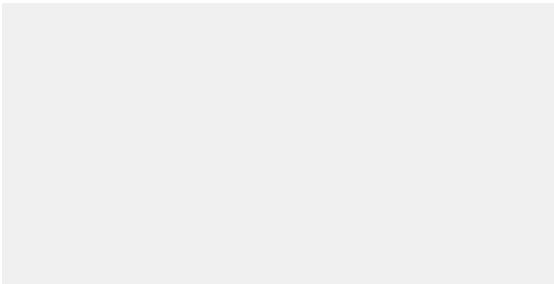

Image source: <http://highergearchicago.com>

1967 and 1968. Women weren't allowed to officially sign up until 1972. However in 1967, Kathrine Switzer registered herself under a vague name and despite efforts to physically remove her from the course, she officially completed the marathon. The next year she earned her master's degree from Syracuse University, where [her papers](#) are held. Gibb in 1981 wrote about her experience for Ms. Magazine and that piece is in [a collection at Radcliffe College](#) of letters to the magazine.

In the early 1980s, Joan Benoit Samuelson became the first person to win the Boston and Olympic marathons. Also an author, her books include [Running Tide](#), and [Running for Women](#). New England University in Maine, her home state, houses a collection of her [newspaper clippings and articles](#). Crowning her achievements in 1996, Samuelson was on a Wheaties cereal box commemorating the Boston Marathon's 100th running. Radcliffe College has a box in a collection of [female sports ephemera](#).

Other collections at Radcliffe College around the history of women in America include one for Hazel Hitson Weidman, a medical anthropologist who served in World War II. [The finding aid](#) includes details about her correspondence with family members, including her daughter-in-law running marathons barefoot – in 2013, she was about a mile-and-a-half out from the Boston Marathon finish line when terrorist bombs exploded.

What do repeat race runners do with their collections of race shirts? Diane Sherrer made a quilt out of hers, and it's in a collection at Cornell University of other materials [spanning 40 years](#) of her competitive running and journalism career. Her years at the Boston Marathon are recorded in that collection. Can't remember what the race's 1999 shirt looked like? There's one in the collection.

Weed woes inspire a 'dandy' ArchiveGrid search

Posted on [April 9, 2014](#) by [Ellen](#)

Libraries holding too many materials and gardens exploding with dandelions both need [weeding](#). While working evenings this week on weeding the latter, I wondered what a search in ArchiveGrid for the springtime invader would retrieve, and if grouping my favorite results

here would help me learn to love the weed, commiserate with past efforts to abate it, or offer a new way to look at garden weeding.

Hopefully this list will achieve all three goals:

- [A picture](#) circa 100 years ago shows a band playing while students dig dandelions at [Nebraska Wesleyan University](#) in the Lincoln. Weeding is better with some company, or a playlist.
- That dandelions are edible doesn't keep them out of my yard debris bin, but cooking them is recorded in a [Northwest folklore archive collection](#) at University of Oregon as both a custom and a superstition. And although I could search online for some dandelion recipes, I would like to see the ones in [a collection of pamphlets](#) published last century by Cornell University's New York State College of Agriculture for the state fair commission.
- Can dandelions be used to make rubber? A retired Michigan State Archives reference archivist wanted to know and a subject that his collection at Central Michigan University covers is dandelions as an emergency source of post-World War II rubber, according to [the finding aid](#).
- Collections of dandelions in artistic expression aren't hard to find in ArchiveGrid because they are vivid and symbolic in their nature. [William E. Stafford](#) referred to them in two of his poems, which are held in a collection at Lewis & Clark College. [This photograph](#) by a scientist who worked in weed control shows what happened when he fertilized part of an invaded lawn (which looks like parts of my lawn). Also in [the collection](#) is a photograph of a what is probably a beautiful-looking, dandelion-covered field.

Missing flight collections found in ArchiveGrid

Posted on [March 31, 2014](#) by [Ellen](#)

Missing Malaysia Airlines Flight 370 may permanently join history's record of other vanished flights. What archival collections surrounding these unsolved air mysteries exist and can be found in ArchiveGrid? Here is a quick list:

Amelia Earhart – There are files at [Radcliffe College](#) of the FBI's investigation into her 1937 disappearance over Pacific Ocean, as she tried to be the first woman to fly

around the world.

Bermuda Triangle – A former Arizona State University librarian's [papers](#) include research sources for his books about Flight 19 – a fleet of bombers that disappeared over the Bermuda Triangle in 1945 – and other vanishings in that area. They include the Star Tiger in 1948 (Lincoln Memorial University has [an item](#) relating to one of the crew members) and the Star Ariel a year later.

Alaska – At University of Alaska in Fairbanks are the papers of Democratic Congressman [Nick Begich](#), who disappeared in 1972 with Louisiana Representative Hale Boggs during a flight over Alaska.

The 21st packs March birthday madness

Posted on [March 21, 2014](#) by [Ellen](#)

It's fun to learn who shares your birthday. Here is a list of historical figures who share my birthday today and have related collections in ArchiveGrid:

- Legendary German Baroque composer [Johann Sebastian Bach](#) died in July of 1750 at age 65. I can't be more proud to share a birthday with who was behind the majestic [Toccata and Fugue in D Minor](#).
- Another musical legend born today was [Florenz Ziegfeld](#), who wrote the musical Show Boat and was behind the Ziegfeld Follies and Broadway revues. He died in July of 1932 at age 65. [University of Texas](#) has a Ziegfeld collection, and materials relating to a his life when he was married to stage performer Billie Burke is at [New York Public Library](#).
- Forty-six microfilm reels at [University of Texas](#) contain the papers of [Benito Juarez](#), Mexican national hero and president, who lived from 1806 until July of 1872 when he died at age 66.
- A fellow native Oregonian, [Phyllis McGinley](#) was a Pulitzer Prize-winning poet, writer and author of juvenile books. [Syracuse University](#) has an extensive collection of her papers. In 1906, exactly one year after McGinley was born, [John D. Rockefeller III](#) was born in New York City, where McGinley would later live. They

Image of Johann Sebastian Bach courtesy of Wikimedia. Stanford University houses an engraving of Bach.

both died in 1978, both at age 72. She died in February and he died in July. The Rockefeller Archive Center has the [family's archive](#).

- [Arthur Honegger](#) was a 20th century Swiss composer whose works include a piece named for his country's patron saint Nicholas of Flue, who lived five centuries earlier and died on his March 21 birthday in 1487 at age 70. University of British Columbia's archives has [a recording](#) of the piece.
- A collection at [New York Public Library](#) of Lola Maverick Lloyd, an international activist for women's rights, includes materials having to do with [Alice Henry](#), who was born today and died on Valentine's Day in 1943 at age 85. She was an Australian journalist and promoted women's suffrage and social reform.
- In 1960, an oral history was made at of [Maurice Farman](#), a French aircraft designer and manufacturer who lived from 1877 to February of 1964. He was 86. [Columbia University](#) houses the transcript.

Faneuil Hall led new world forums

Posted on [March 14, 2014](#) by [Ellen](#)

Today in 1743, America's first recorded town hall meeting was held in [Faneuil Hall](#) in downtown Boston, according to the [New York Times](#). At the University of Virginia are materials about its architect, [John Smibert](#). He was a Colonial artist who had moved from Europe to New England, opened an art supplies shop in Boston, ran a gallery, and still painted portraits.

Faneuil Hall's original mixed-use design with a public gathering space above ground-floor retail was inspired by English country markets, but I wonder how much Smibert's design was influenced by his earlier life in London when he lived in an apartment in [Covent Garden](#).

Nearly four decades of pieces of Smibert's life are contained in his [journal](#), and [ArchiveGrid](#) has other records as well for related images and collections. Knowing what Faneuil Hall looked like when it was finished in 1742, and what was said during those first meetings, may be a scholarly mystery.

However, what Faneuil Hall paved for the future of the American public meeting space can be traced in other gems in ArchiveGrid for researchers to discover, such as [announcing the death of a president](#) and [lottery results](#).

Posted in [Collection Close-ups](#) | [Leave a comment](#)

With MARC filter-flexing, ArchiveGrid index exceeds 3 million records

Posted on [March 11, 2014](#) by [Ellen](#)

While March came in like a lion weather-wise in many places, the saying meant good news index-wise for ArchiveGrid. This week we updated the index and once again, the number of collections and items represented in ArchiveGrid spiked. In [January's update](#), the index grew by around 600,000 records and reached 2.4 million. Now we're over 3 million.

Here's why:

MARC records from WorldCat represent at least 90 percent of ArchiveGrid's descriptions. Since no particular MARC record field tells us "Hey! Include me in ArchiveGrid," we use a combination of elements. In the "recall vs. precision" performance metric, we've tended to err on the side of recall. Details on how we filter WorldCat records for inclusion in ArchiveGrid are [here](#).

A snow-drizzled "Fortitude" guards one side of the New York Public Library entrance, while "Patience" (not pictured) guards the other. Image source: Flickr Creative Commons

Twice this year, we tuned the filter we use to extract MARC records from WorldCat to include more record types based on the MARC Leader byte 6 value. January's update brought in records with the value of "k" (two-dimensional, non-projecting graphics). This update includes records with the value of "g" (projected medium), "i" (nonmusical sound recording), or "j" (musical sound recording). We think these adjustments allow more descriptions of the types of materials ArchiveGrid searchers could expect to find, without overloading the index with records we'd prefer to filter out: irrelevant materials or published works, items held in multiple locations, etc. So we expect to continue adjusting the filter and see the total number of records change as we get more precise.

Here are some highlights of what valuable primary sources the added g, i, and j indexes in ArchiveGrid have to offer:

- Around 1,800 sound discs, tape reels, and cassettes of nearly all of Duke Ellington's commercial and non-commercial recordings and also some radio broadcasts. Collected by Joseph Jeffers Dodge, Harvard University acquired [the collection](#) in March 1998.
- A [live 1963 recording](#) in Germany of John F. Kennedy's "Ich bin ein Berliner" speech, at Ball State University.
- A May 2, 2003 [VHS recording](#) of the "Service of death and resurrection for Fred McFeely Rogers, or Mister Rogers, at Pittsburgh Theological Seminary.

Another addition with this update is documentation for ArchiveGrid indexes. We use a number of “hidden” indexes in ArchiveGrid for testing and trouble-shooting, so in a new [how to search](#) page, we explain what these indexes are and how they can be used in a search. This should be considered a work in progress, so if you have suggestions for improvements or questions about how the indexes work, please let us know.

ABOUT ARCHIVEGRID

ArchiveGrid is a collection of over three million archival material descriptions, including MARC records from WorldCat and finding aids harvested from the web. It's supported by OCLC Research as the basis for our experimentation and testing in text mining, data analysis, and discovery system applications and interfaces. Archival collections held by thousands of libraries, museums, historical societies, and archives are represented in ArchiveGrid.

ArchiveGrid provides access to detailed archival collection descriptions, making information available about historical documents, personal papers, family histories, and other archival materials. It also provides contact information for the institutions where the collections are kept.

ArchiveGrid data is primarily focused on archival material descriptions for institutions in the United States but now also includes information about collections in Australia. This reflects the contribution patterns for descriptions of materials under archival control in WorldCat, which make up the majority of descriptions in

ArchiveGrid. We may extend ArchiveGrid beyond its current scope if it is necessary to support OCLC Research experimental objectives.

ArchiveGrid illustrates OCLC's interest in advancing issues important to the archival community. Our work within ArchiveGrid gives OCLC Research a foundation for collaboration and interactions with others in the archival community. We expect to share the results of MARC and EAD tag analysis, provide discovery system analytics for contributors, document investigations of text mining and data visualization, participate in community working groups pursuing improvements to description and discovery, and more. To support those interests and objectives, we'll continue to build this extensive and current aggregation of archival material descriptions, within the constraints of OCLC Research's committed and on-going support for this project.

OCLC previously offered ArchiveGrid as a subscription-based discovery service. The subscription service was discontinued in 2012. While the freely-available OCLC Research ArchiveGrid interface is not a full production service, it shares some of the same attributes. Researchers can expect to use it for discovery of archival materials, and archives can work with OCLC Research to have their materials represented in the aggregation in a reliable and persistent way.

If you have questions about your collection descriptions in ArchiveGrid, please [get in touch](#) with us. Interested in contributing? Please [let us know](#) that as well.

[Interview with Ethel Hack, witness of the Falling Stones Phenomena, 1955-1956, at Myanup, W.A. \[sound recording\] / interviewed and recorded by John Meredith.](#)

Hack, Ethel, 1908-.

National Library of Australia

1 digital audio tape.

Hack describes the Falling Stones of Mayanup as it developed centred around the Gilberts' home, how she had heard a low mournful whistle and the dog would go mad at the time of these incidences, how the neighbors would all help, describes the mysterious lights that also appeared, how news of these incidences attracted more and more visitors and viewers including spiritualists and psychic investigators, discusses the period of 1955-1956, mentions the local Aboriginal Jannicks family as another site, how the phenomenon consisted of flying onions and then potatoes, how the flying objects did not roll after landing, other objects included falling bottles, thrown dirt, showers of stones, how the witch doctor was called in but there was a later reoccurrence, describes the whistle sounds.

Robert Wheeler Rand Collection, 1912-2004

University of California, Los Angeles - Louise M. Darling Biomedical Library

5 cartons (7.5 linear ft.) 2 boxes (1.0 linear ft.) 2 flat boxes (3.0 linear ft.) 2 card file boxes (0.8 linear ft.) 1 small lantern slide box (0.25 linear ft.)

A collection of documents, publications, 35 mm and glass slides, and films chronicling Dr. Robert Rand's career as clinical neurosurgeon, researcher into innovative techniques of cancer treatments and microsurgery, and entrepreneur of medical equipment. Textual coverage of his extensive publications and lectures is sparse, except for the volumes of "Autobiography..." and "Academic History..." written by Rand. The visual material is extensive, however, consisting of circa 4500 35mm slides and 13 films. Some papers, mementos, and glass lantern slides belonging to Carl Wheeler Rand, M.D., father of Robert Rand and also an eminent neurosurgeon, are part of the collection.

Titian Ramsay Peale Sketches 1817-1875

American Philosophical Society

550.0 Item(s)

The youngest son of Charles Willson Peale, Titian Ramsay Peale was an accomplished artist, naturalist, and explorer. This collection of ink, pencil, and watercolor sketches, with some engravings and lithographs, forms the bulk of Peale's artistic output. The drawings can be grouped into several periods of artistic output: pre-1818 (primarily watercolors of butterflies); from the Stephen Harriman Long Expedition to the American west in 1819-1820, on which Peale traveled as zoologist (there are views of animals, Indians, landscapes, etc.); for his 1821-1838 interlude period, spent primarily on the east coast (insects, animals, moose hunting in Marine, his trip to South America in 1830-1831, coin and

medal designs); his period as a naturalist on the worldwide U.S. Exploring Expedition under the command of Charles Wilkes, 1838-1842; from the 1849-1873 period when he sketched around Washington, D. C. and in New Jersey; and there are more than 160 undated sketches of: animal skulls and ... [Read More](#)

Catalina Island Views, California, ca. 1900-1909

University of California, Berkeley - Bancroft Library

29 photographic prints in 1 album; black and white; 18 x 26 cm. 27 digital objects

Scope and Content This album contains 29 black and white photographs likely taken in the first decade of the 20th century by the photographers Schattman, Swenson and other unidentified photographers. One photograph is dated 1900. The views are of Santa Catalina Island located 27 miles offshore southwest of Wilmington, near Los Angeles, California. The island is one of four Catalina Islands and is part of Los Angeles County. The island is 21 miles long and varies in width up to 8 miles with mountains as high as 2,100 feet. The town of Avalon was developed for tourists by William Wrigley Jr. and his son, two of several private owners of Santa Catalina. The photographs include bay views showing the shore of Avalon with its sailing vessels, housing, and mountains. Various recreational and tourist attractions are depicted, such as the Santa Catalina Island Marine Band, people bathing on the shores, a stage coach, tent camping at the isthmus, people posing with a giant fish they caught, ...

[The Records of an Unbroken Friendship but the Mortal Severance, 1907-1924](#)

University of California, Berkeley - Bancroft Library

Circa 410 photographs of various sizes, compiled in album measuring 24 x 38 cm.; circa 30 loose items (photographic prints, drivers licenses, U.S. registration cards) of various sizes; 1 panorama photograph, 26 x 123 cm. 80 digital objects

Scope and Content The Records of an Unbroken Friendship but the Mortal Severance album contains approximately 410 photographs apparently created as a memorial to Taizo Kato, a Japanese-American who died in 1924 at the age of 36. The album title implies that it was compiled by one or more of Kato's friends. The collection also contains circa 30 loose photographs and other items and one photographic panorama. Kato was an amateur photographer and painter, and several of the photographs refer to his involvement with these practices. Although only four of the prints bear either Kato's signature or embossed stamp, it is possible that a large percentage of the work in the album is his. There is at least one self-portrait by Kato. With Kamejiro Sawa, Kato was the proprietor of a Los Angeles photo, art and stationery goods business. This business, named The Korin, is featured in some of the photographs. Sawa is likely one of the friends appearing throughout the album, and may have been the ... [Read More](#)

New York Public Library

1 videodisc (NTSC) (70 min.)

David Helfand, chair of Columbia University's Astronomy Department, delivers a slide lecture on cosmology. This recording shows only the slides and videos, not the speaker. Slides include photographs taken by the Hubble space telescope and computer simulations of galaxies colliding. Helfand begins by speaking about how astronomers gather information; the nature of light (wavelength and velocity), the extremely limited portion of light that human eyes are capable of seeing, and how light traveling from great distances reveals the past. Helfand then discusses the structure of the solar system, the distances between objects in space, the life cycles of stars and galaxies, and the nature of space and time. The lecture is followed by a question-and-answer period, in which Helfand responds to questions about wormholes in space, the big bang theory, black holes and dark matter, the extent of the universe and possibility of multiple universes.

This collection is arranged alphabetically by type of material into nine series, then chronologically within each series, where applicable. The series are Books; Correspondence; Literary Productions; Maps; Photographs; Printed Material; Prints and Drawings; Realia; Scrapbook. Primarily, the collection contains materials documenting Marjorie Hunter's time as a student at Elon College in the late 1930's, early 1940's as well as her career as a journalist/reporter for the Washington Bureau of the New York Times. The information is documented through correspondences, interview transcripts, newspaper articles, and pages from Hunter's personal scrapbooks. Not only does this collection shed light into the world of one of the greatest female journalists/reporters, but also provides unique primary sources relating to media coverage and United States history.

[The personal and political papers of Senator Barry M. Goldwater \(1909-1998\), 1880s-2008.](#)

Goldwater, Barry M. (Barry Morris), 1909-1998.

Arizona State University Libraries

1180 linear ft. (970 boxes)

Background : This collection remained largely unprocessed through the years. Serial deposits varying in volume and format from 1959-1998 were made from Goldwater's Washington office, Phoenix office and home. The collection also had been moved several times and the boxes re-numbered. There had been numerous attempts to organize and re-folder the materials resulting in various arrangement schemes. Although inventory sheets were created, locating specific correspondence, photographs and legislative documents was reportedly difficult. Public access varied widely. Additional findings as follows.

2 videodiscs (70 min.)

While gem dealer Horace K. Arlington frets over the safety of his newly purchased diamond collection, which is being shipped from Europe, Dave Hanlon ingratiates himself with Horace's daughter Arlene and plots with his three cohorts to steal the jewels. As part of the scheme, Dave hires Jerry Lane and Pierre Potkins, whose carnival act includes an airplane amusement ride, to pick up the stolen gems in a seaplane. Although Pierre is scheduled to meet with his parole officer that afternoon, he and Jerry accept the job and, unaware that their seaplane belongs to the police department, retrieve from the ocean what they believe to be harmless photographs. When Pierre inspects the package, however, he discovers the jewels, as well as a box of cocaine. After becoming intoxicated from the powder, Jerry, whose only knowledge of flying has come from reading books, crash lands the plane in the Arlingtons' backyard. Horace, seeing the police insignia on the plane, assumes the two men are ... [Read More](#)

Peale-Sellers Family Collection, 1686-1963 1686-1963

American Philosophical Society

19.0 Linear feet 38 Boxes; 147 Volumes

The Peale family is best known as a family of artists; however, family interests and activities were much more wide-ranging. The best known Peale is Charles Willson Peale (1741-1827, APS 1786), who produced more than one thousand paintings, including hundreds of portraits of leading Americans during the colonial and early national periods. Peale was married three times, to Rachel Brewster (1744-1790), Elizabeth de Peyster (1765-1804), and Hannah More (1755-1821). He had eighteen children, eleven of whom reached adulthood. Three of Charles Willson Peale's sons became artists: Raphaelle Peale (1774-1825), Rembrandt Peale (1778-1860), and Rubens Peale (1784-1865). A fourth son, Titian Ramsay Peale (1799-1885, APS 1833), was a naturalist (who made drawings on the exploring expeditions he accompanied) and pioneer in photography, and another son, Benjamin Franklin Peale (1795-1870), became a naturalist and paleontologist. Peale's daughter Sophonisba Anguisciola was married to Coleman ... [Read More](#)

George Herms papers 1890-2009

Getty Research Institute
231.7 linear feet (380 boxes, 65 flatfile folders)
Southern California artist, writer, and musician George Herms was one of the founders of the West Coast assemblage movement. Influenced by the art of his close friend Wallace Berman, his work brings together discards, beach trash, urban detritus and other "found objects" to create a highly original and personal mix of collage, sculpture, and assemblage. The bulk of the papers comprise full documentation of Herms' life and work from 1960-2000.

Fred Elmadjian Collection. 1946-1997

University of California, Los Angeles - Louise M. Darling Biomedical Library

5 cartons (7.5 lin. ft.) 1 box (0.5 lin. ft.)

This collection documents Dr. Fred Elmadjian's career as a research scientist and science administrator. His scientific work centered mostly on the endocrinology of stress. His administrative services at the National Institute of Mental Health focused on developing manpower for effective research into mental health and behavior. Elmadjian first envisioned, then enabled establishment across the country of interdisciplinary training programs which emphasized both the biological and the psychological knowledge needed for such research. The papers also contain transcripts of 16 audiotapes recorded after his retirement, which provide a rich personal account of his background, education, work, and especially his beliefs about the proper approach for a study of human behavior.

[Merian C. Cooper papers 1921-1977](#)

Brigham Young University - L. Tom Perry Special Collections
9 items 7 cartons (7 linear ft.) 20 oversize boxes (25.5 linear ft.) 2 half boxes (0.5 linear ft.) 75 film reels (56 linear ft.) 43 boxes (21 linear ft.)

The Merian C. Cooper papers cover virtually every aspect of Cooper's life and his varied careers. The papers provide valuable information on documentary and feature motion picture production in the United States from the mid-1920s through the early 1950s, as well as information on world exploration, the United States Air Force (particularly during World War II), and early television. Several Cooper projects that never came to fruition are also documented, especially his unproduced film biography of Lieutenant General Claire C. Chennault of Flying Tiger fame. These projects, commenced in the 1950s, represent Cooper's efforts to stay active in the entertainment business. The papers, for the most part, are housed in standard archival document cases. The designations mean oversized boxes for maps, broadsides, large photographs, and certain publications.

[Lydia Winston Malbin papers 1891-1997](#)

Yale University - Beinecke Rare Book and Manuscript Library

100 boxes (incl. 2 oversize boxes) 45 linear feet

The collection consists primarily of files relating to individual works of art in the Malbin art collection,

in addition to correspondence with artists, curators, dealers, museums and galleries; photographs; documentation regarding gifts and loans; material relating to Lydia Winston Malbin's collecting activities and related projects; a small amount of papers of Malbin's father, Albert Kahn; scrapbooks; and card files. The papers provide extensive documentation of a major twentieth-century collection which is no more and of individual works within the collection; as well as insight into some of the leading artists of this century, and particularly of the Italian Futurists, such as Umberto Boccioni. They also illustrate in detail the practice of art collecting as carried out by Malbin, one of the great American practitioners of that avocation.

[**Snap Shooting Around the Golden Gate International Exposition, 1939**](#)

University of California, Berkeley - Bancroft Library

5 albums (560 photographic prints) 191 digital objects

Scope and Content This collection consists of five albums of black and white photographs taken by P. T. Glass of the Golden Gate International Exposition. The exposition was held from February 18 to October 29, 1939 on Treasure Island to celebrate the recent openings of the Golden Gate and Oakland Bay bridges. More than 10 million people visited the exposition. A reorganized exposition was held on the site May 25 through September 29, 1940. The photographs in albums 1-4, often humorously titled, were taken between February 18 and October 29, 1939 as Mr. Glass, sometimes accompanied by his wife, parents, and friends, returned repeatedly to the exposition. The views are mostly exterior shots of the various structures, landscaping, and exhibits of the exposition. Exhibits pictured include the Court of the Seven Seas, Sun Tower, Court of the Moon, Sunken Gardens, Court of Reflections, Star Lady, Arch of Triumph, and Court of Flowers. Many architectural features are shown, as well as ...

University of California, Los Angeles - Charles E. Young Research Library

166 boxes

Collection consists of American song composer Jimmy Van Heusen's papers and materials, both business and personal. Items include an extensive collection of unpublished music manuscripts and song lyrics, published sheet music, correspondence, personal papers, and business documents. Many materials relate to his interactions with Johnny Burke, Sammy Cahn, Bing Crosby, Frank Sinatra, and others, and to his publishing companies Burke & Van Heusen, Inc. and Van Heusen Music Corporation. Also includes sound and audiovisual materials, including his personal LP collection, unpublished home recordings, and home movies. Photographic material includes both press and personal prints, some negatives, and color slides. Other items include performance scripts, altered lyrics, biographic materials, professionally assembled scrapbooks, and other published materials from his personal collection. In addition to his musical career, the collection highlights his interests in horses and flying, and his ...

[Michael McClure papers : additions 1874-2003](#)

University of California, Berkeley - Bancroft Library
Number of containers: 53 boxes, 14 volumes, 2 oversize boxes, and 13 oversize folders Linear feet: Approx. 23
The Michael McClure Papers: Additions, 1874-2002, (bulk 1949-2002), present a comprehensive view of his work as a writer, spanning the length of McClure's career. The bulk consists of notebooks and writings, including poems, prose, and plays in manuscript, draft and final form. There is very little correspondence. There are also professional papers, which include posters, flyers, and broadsides, many advertising readings by McClure and others, and productions of his plays, including The Beard. There is a small amount of artwork by McClure, his family, and friends; and materials by and about artists Bruce Conner, Wallace Berman, and George Herms from William Jahrmarkt and the Batman Gallery, among others. The small amount of personal papers include records and family correspondence. These papers complement The Bancroft Library's other extensive holdings documenting the postwar San Francisco poetry renaissance and its influence on American literature.

[California Faces: Selections from The Bancroft Library Portrait Collection](#)

University of California, Berkeley - Bancroft Library

1,232 images selected from The Bancroft Library's Portrait Collection ; various sizes 1230 digital objects

Scope and Content California Faces consists of 1,232 photographic and other pictorial portraits of 416 men and women prominent in California's history. The portraits, selected from The Bancroft Library Portrait Collection, offer a diverse selection of artists, writers, businessmen, politicians, scientists, entertainers, and others, primarily from the early nineteenth-century until the present. Individuals from the San Francisco Bay Area tend to predominate since the library's holdings are strongest in this area. Many notable figures from California's pre-statehood and early statehood days are featured: Sir Francis Drake, the earliest Anglo to set foot on California soil; Patrick Breen and Eliza Donner from the ill-fated Donner Party; frontiersman Kit Carson, John Sutter, Lola Montez, and many others. Writers who were either born and raised in the state or who spent significant periods of time in California are included: traditional chroniclers of Western experience (Bret Harte and ... [Mary Agnes Burniston Brazier Papers, 1941-1995](#)

University of California, Los Angeles - Louise M. Darling Biomedical Library
12.3 linear feet (26 boxes)

Mary A. B. Brazier was born in England in 1904 and died in Falmouth, MA in 1955. She received a Ph. D. in physiology and biochemistry from the University of London in 1930, began neuroscience research at Maudsley Hospital, London, and in 1940 came to Boston on a Rockefeller fellowship. She remained at the Massachusetts General Hospital, Harvard University, and the Massachusetts Institute of Technology for twenty years, then moved to the Brain Research Institute at UCLA until her retirement. She was internationally known as an outstanding neuroscientist, historian, author, and editor. This collection consists mainly of materials pertinent to her historical research: photocopies of texts, notes, photographs and negatives of some 500 individuals and 40 institutions important in the development of the neurosciences; there is some emphasis on Russian neurophysiology and on instances of early calculating machines. About a tenth of the collection consists of professional and personal ... [Read More](#)

Fred Elmadjian Collection. 1946-1997

University of California, Los Angeles - Louise M. Darling Biomedical Library

5 cartons (7.5 lin. ft.) 1 box (0.5 lin. ft.)

This collection documents Dr. Fred Elmadjian's career as a research scientist and science administrator. His scientific work centered mostly on the endocrinology of stress. His administrative services at the National Institute of Mental Health focused on developing manpower for effective research into mental health and behavior. Elmadjian first envisioned, then enabled establishment across the country of interdisciplinary training programs which emphasized both the biological and the psychological knowledge needed for such research. The papers also contain transcripts of 16 audiotapes recorded after his retirement, which provide a rich personal account of his background, education, work, and especially his beliefs about the proper approach for a study of human behavior.

Merian C. Cooper papers 1921-1977

Brigham Young University - L. Tom Perry Special Collections

9 items 7 cartons (7 linear ft.) 20 oversize boxes (25.5 linear ft.) 2 half boxes (0.5 linear ft.) 75 film reels (56 linear ft.) 43 boxes (21 linear ft.)

The Merian C. Cooper papers cover virtually every aspect of Cooper's life and his varied careers. The papers provide valuable information on documentary and feature motion picture production in the United States from the mid-1920s through the early 1950s, as well as information on world exploration, the United States Air Force (particularly during World War II), and early television. Several Cooper projects that never came to fruition are also documented, especially his unproduced film biography of Lieutenant General Claire C. Chennault of Flying Tiger fame. These projects, commended in the 1950s, represent Cooper's efforts to stay active in the entertainment business. The papers, for the most part, are housed in standard archival document cases. The designations mean oversized boxes for maps, broadsides, large photographs, and certain publications.

Matkin, Joseph. Collection 84-21

Scripps Institute of Oceanography Archives

Scope and Content: The SIO Subject Files consist of 35 linear feet of material in 88 boxes. The files include both manuscript and archival material dated 1890-1981, but the bulk of the collection includes material which documents the period 1930-1970. Although the files consist overwhelmingly of material documenting the history of the SIO, they also include material pertinent to the history of oceanography in the twentieth century. The Subject Files are divided into two series entitled "S.I.O." ...

[Snap Shooting Around the Golden Gate International Exposition, 1939](#)

University of California, Berkeley - Bancroft Library

5 albums (560 photographic prints) 191 digital objects

Scope and Content This collection consists of five albums of black and white photographs taken by P. T. Glass of the Golden Gate International Exposition. The exposition was held from February 18 to October 29, 1939 on Treasure Island to celebrate the recent openings of the Golden Gate and Oakland Bay bridges. More than 10 million people visited the exposition. A reorganized exposition was held on the site May 25 through September 29, 1940. The photographs in albums 1-4, often humorously titled, were taken between February 18 and October 29, 1939 as Mr. Glass, sometimes accompanied by his wife, parents, and friends, returned repeatedly to the exposition. The views are mostly exterior shots of the various structures, landscaping, and exhibits of the exposition. Exhibits pictured include the Court of the Seven Seas, Sun Tower, Court of the Moon, Sunken Gardens, Court of Reflections, Star Lady, Arch of Triumph, and Court of Flowers. Many architectural features are shown, as well as ...

[Anne Morrow Lindbergh papers 1906-1997](#)

Yale University - Manuscripts and Archives

164.25 linear feet (300 boxes)

The papers consist of correspondence, diaries, writings, childhood, school and college materials, housekeeping and social records, reports, memoranda and correspondence from the many organizations in which Anne Morrow Lindbergh took an active interest. Also included are voluminous mail from members of her reading public and memorabilia, both objects sent by admirers and items collected by her on her travels. The death of Charles Lindbergh in 1974 is documented by mail from friends, members of the public and organizations. Anne Morrow Lindbergh's writings make up the largest part of the papers and include her diaries (1929-1972, 1982-1988), drafts of her books, working notebooks, speeches, articles and stories, and published reviews of her work. Also in the papers are printed copies of her publications. Her personal correspondence with friends and family runs over many years. Correspondence with friends includes letters exchanged with Anne Carrel, Harry Guggenheim, Corliss Lamont, ... [Read More](#)

[**Gordy Motown audio collection Bulk, 1960-1988**](#)

Eastern Michigan University

37.4 Linear feet 29 archive boxes, 2 flat boxes, 1 record center carton

Berry Gordy founded the Motown Record Corporation in 1959. Motown flourished in the 1960s and 1970s due to Gordy's ability to bring talented individuals aboard, such as Smokey Robinson who produced his first record in 1962. The Gordy Motown Collection was established by Esther Gordy Edwards in November 1972 and includes Sound Recordings and Print Materials that document Motown Records and the other labels established by Berry Gordy from the 1950s, 60s through the late 1980s. The collection is arranged in three record groups, Sound Recordings, Print Materials and Exhibitions and Artifacts, and further arranged by artist, label, and chronology.

[**Michael McClure papers : additions 1874-2003**](#)

University of California, Berkeley - Bancroft Library

Number of containers: 53 boxes, 14 volumes, 2 oversize boxes, and 13 oversize folders Linear feet: Approx. 23

The Michael McClure Papers: Additions, 1874-2002, (bulk 1949-2002), present a comprehensive view of his work as a writer, spanning the length of McClure's career. The bulk consists of notebooks and writings, including poems, prose, and plays in manuscript, draft and final form. There is very little correspondence. There are also professional papers, which include posters, flyers, and broadsides, many advertising readings by McClure and others, and productions of his plays, including The Beard. There is a small amount of artwork by McClure, his family, and friends; and materials by and about artists Bruce Conner, Wallace Berman, and George Herms from William Jahrmarkt and the Batman Gallery, among others. The small amount of personal papers include records and family correspondence. These papers complement The Bancroft Library's other extensive holdings documenting the postwar San Francisco poetry renaissance and its influence on American literature.

[California Faces: Selections from The Bancroft Library Portrait Collection](#)

University of California, Berkeley - Bancroft Library

1,232 images selected from The Bancroft Library's Portrait Collection ; various sizes 1230 digital objects

Scope and Content California Faces consists of 1,232 photographic and other pictorial portraits of 416 men and women prominent in California's history. The portraits, selected from The Bancroft Library Portrait Collection, offer a diverse selection of artists, writers, businessmen, politicians, scientists, entertainers, and others, primarily from the early nineteenth-century until the present. Individuals from the San Francisco Bay Area tend to predominate since the library's holdings are strongest in this area. Many notable figures from California's pre-statehood and early statehood days are featured: Sir Francis Drake, the earliest Anglo to set foot on California soil; Patrick Breen and Eliza Donner from the ill-fated Donner Party; frontiersman Kit Carson, John Sutter, Lola Montez, and many others. Writers who were either born and raised in the state or who spent significant periods of time in California are included: traditional chroniclers of Western experience (Bret Harte and ... University of Maryland - Archives and Manuscripts

The Keesing Collection on Popular Music and Culture consists of books, serials, recordings, sheet music, clippings, memorabilia, and teaching and research materials related to twentieth-century American popular music, and to rock and roll music in particular. The materials were collected by Hugo Keesing, a popular culture scholar and former professor of American Studies at the University of Maryland, and by Dr. Keesing's brother, Wouter Keesing. The bulk of the collection covers the period from the 1950s to the 1990s. Serials in the collection include Rolling Stone, Pulse, Discoveries, Goldmine, and many other national and regional music serials. Research and teaching materials include Dr. Keesing's University of Maryland syllabi and class notes, writings, auction lists, catalogues, and price guides. In addition to the books housed with the archival collection, there are an additional 3,000 books that are can be found through the University of Maryland catalog. The collection is broad ... Donald Ryder Dickey Photographic Collection, 1908-1962

University of California, Los Angeles - Louise M. Darling Biomedical Library

72.7 linear ft. (139 boxes)

Struck by a serious heart condition during his senior year at Yale, Dickey returned to early interests in natural history and photography to occupy his mind and hands during the prolonged recovery period. By the time he had regained full strength in 1916, he had also formulated a new life goal: to establish a research center for study of the vertebrate zoology of Southern California, and to build a supporting collection of taxidermy specimens, photographs and books. This finding aid introduces the still photography part and some movie footage of that collection: over 4000 images captured by Dickey and his associates on various formats of film negatives, glass plates and slides. Each entry in the finding aid for the still photographs leads to a Dickey negative and a 5 x 8" reference card which contains a positive image, and identifying information. Three-hundred-and-fifty of the images, from 1911-1929, have been digitized and are viewable online at: ... [Read More](#)

Emmett L. Hudspeth Collection of Elizabeth Olds 1921-1986, undated

University of Texas - Harry Ransom Center
25 boxes, 1 document box, 21 flat file drawers, 21 framed paintings (853 items)
The bulk of the collection comprises original works by Olds: 452 drawings, 109 paintings (oil, gouache, watercolor), 218 prints (lithographs, woodcuts, screen prints), 7 posters, 51 mixed media works, and 9 wood blocks. Included are several works from her studies in Paris during the 1920s, many Depression-era works, and later works from her travels in Canada, France, Guatemala, Mexico, and the United States (especially New England and the Pacific Northwest). There are also nature studies and a few children's book illustrations.

☐ Details

49.45 cubic ft. (50 boxes)

The June O. Parnell files containing questionnaires, correspondence, notes, and other data will be made accessible only to researchers who sign the "Research Use Agreement" restricting their right to record or reproduce the names of any person or family recorded in the interviews.

This collection contains the personal and professional correspondence of Leo Sprinkle as well as articles and manuscripts by other authors, an extensive collection of paranormal-related newsletters, Sprinkle's own published papers, and his original research. Most materials are about UFOs and the psychology of UFO contactees. Other subjects include conventional psychology, paranormal activity, multiple personality disorder, parapsychology, reincarnation, and near-death experiences. All collection dates are approximate.

Ronald Leo Sprinkle was born in Rocky Ford, Colorado, in 1930. Receiving his PhD in Counseling Psychology from the University of Missouri in 1961, he held the position of Assistant Professor of Psychology at the University of North Dakota from 1961 to 1964. He then was hired at the University of Wyoming and served as Associate Professor of Guidance Education, Counselor and Assistant Professor of Psychology, Director of Counseling and Testing, Professor of Counseling Services, and Counseling Psychologist. Sprinkle's major professional interests were counseling and hypnosis, the psychological aspects of UFO research, and parapsychology. In his career, he published extensively on UFOs, served as a consultant for several T.V. programs, and founded the Rocky Mountain Conference on UFO Investigation. He corresponded with many

ufologists and abductees, including Ida Kannenberg. Sprinkle resigned in 1989 to become a professor emeritus and a counseling psychologist in private practice.

Finding aid available in repository.

Philip J. Klass Collection 1948-2000

American Philosophical Society

36.0 Linear feet

An electrical engineer and senior editor for Aviation Week and Space Technology, Philip Klass began investigating UFOs in 1966 after participating in a panel discussion on the subject for the Institute of Electrical and Electronics Engineers (IEEE). From that time forward Klass has investigated UFO sightings in an effort to find a credible prosaic explanation, and became one of the most widely recognized UFO

"debunkers." A founding member of the Committee for the Scientific Investigation of Claims of the Paranormal (CSICOP), serving on the Executive Council and the UFO subcommittee, Klass has authored seven books and numerous articles on UFOs, including the Skeptics UFO Newsletter in 1989. In the early 1970s, he became interested in space based weapons, and began collecting material related to the Strategic Defense Initiative (SDI) for a possible book. The Klass Collection relate to his forty-plus years of investigating UFO sightings, and includes correspondence with many of the ... [Read More](#)

Inventory of the Roy Craig Collection on the
Scientific Study of Unidentified Flying Objects
Papers:

1963-ca. 2002

Descriptive Summary and Abstract

Creator	Craig, Roy
Title	Inventory of the Roy Craig Collection on the Scientific Study of Unidentified Flying Objects:
Dates	1963-ca. 2002
Abstract	The Papers of Dr. Roy Craig, chief field investigator for the "Condon Report," <i>The Scientific Study of Unidentified Flying Objects</i> .
Identification	SCIF MSS 00151
Extent	10 linear ft.
Language	English.
Repository	Cushing Memorial Library College Station, TX 77843-5000

Biographical Note

Dr. Roy Craig was the chief field investigator for the *Scientific Study of Unidentified Flying Objects*, directed by Dr. Edward U. Condon, published in 1965. Dr. Craig attended Fort Lewis College, Colorado State University, the University of Colorado, and California Institute of Technology before receiving a Ph. D. in physical chemistry from Iowa State University. He served in the U. S. Army in World War II. After working in manufacturing nuclear weapons, teaching

physical science at the university level, and technical and environmental consulting, he now raises llamas on the historic La Boca Ranch in Colorado.

[Return to the Table of Contents](#)

Scope and Content Note

The Roy Craig Collection on the Scientific Study of Unidentified Flying Objects consists of Dr. Craig's working files on all UFO reports studied by the Condon Report project team, including the field investigation notes, case writeups, physical evidence collected, Craig's appointment books for 1966-1968, a copy of the three volume Condon Report, a copy of the Bantam Books mass market reprint edition, additional notes and reports related to the UFO study, photos, recordings, and popular articles and books about UFO studies, and the manuscripts and notes for Dr. Craig's book, *UFOs: An Insider's View*, copies of the score and audio recordings of "The UFO Song," and other related material. The collection occupies approximately 10 linear feet.

[Return to the Table of Contents](#)

Arrangement of the Papers

The collection of papers and artifacts retain the arrangement established by Dr. Craig, with the exception of re-housing of some of the artifacts.

Organization of the Papers

This collection is organized into 1 series:

Series 1. Dr. Roy Craig, 1963-ca. 2002.

☐ Details

32 linear ft. (46 boxes, 61 vols. & 73 scrapbooks)

This collection is located off-site. You will need to request this material at least twenty-four (24) hours in advance to use the collection in the Rare Book and Manuscript Library reading room.

This collection has no restrictions.

Books, magazines, newsletters, reports, pamphlets, and clippings documenting the Unidentified Flying Object (UFO) or flying saucer phenomenon. Mr Davidson used this material in connection with his study for the United States Air Force, entitled "Flying Saucers: Special Report No. 14." (Oct. 1957 & July 1966).

Identification of specific item; Date (if known); Leon Davidson's flying saucer collection; Box and Folder; Rare Book and Manuscript Library, Columbia University Library.

Readers must use microfilm of materials specified above.

Single photocopies may be made for research purposes. Permission to publish material from the collection must be requested from the Curator of Manuscripts/University Archivist, Rare Book and Manuscript Library (RBML). The RBML approves permission to publish that which it physically owns; the responsibility to secure copyright permission rests with the patron.

(Columbia University B.A. 1942, B.S. 1943, M.S. 1947, & Ph.D. 1951).

Material is in English.

Abstract

An electrical engineer and senior editor for *Aviation Week and Space Technology*, Philip Klass began investigating UFOs in 1966 after participating in a panel discussion on the subject for the Institute of Electrical and Electronics Engineers (IEEE). From that time forward Klass has investigated UFO sightings in an effort to find a credible prosaic explanation, and became one of the most widely recognized UFO "debunkers." A founding member of the Committee for the Scientific Investigation of Claims of the Paranormal (CSICOP), serving on the Executive Council and the UFO subcommittee, Klass has authored seven books and numerous articles on UFOs, including the *Skeptics UFO Newsletter* in 1989. In the early 1970s, he became interested in space based weapons, and began collecting material related to the Strategic Defense Initiative (SDI) for a possible book. The Klass Collection relate to his forty-plus years of investigating UFO sightings, and includes correspondence with many of the leading UFOlogists, both pro and con. The collection contains case files, subject files,

and correspondence. In addition, Klass' SDI material is included.

Background note

Philip J. Klass was born in Des Moines, Iowa on November 8, 1919 to Raymond and Ann Klass, and was raised along with his younger sister in Cedar Rapids. Attending Iowa State University, Klass graduated in 1941 with his bachelors of science in electrical engineering and went to work that same year as an engineer at General Electric's facility in Schenectady, NY.

In 1952 Klass became a technical journalist for *Aviation Week & Space Technology* (AWST) magazine, one of the leading publications for the aerospace industry. He remained with the magazine for 34 years, eventually becoming senior avionics editor. Taking semi-retirement in June 1, 1986, he continued on as a contributing editor working from home. During his time with the magazine, Klass kept a workaholic schedule putting in over forty-plus hours a week researching and writing articles. He wrote some of the first articles on inertial guidance technology, infrared missile guidance and detection, and the development of microelectronics. As a result of his work at AWST, he earned the distinction of being only one of two journalists to be named a fellow of the Institute of Electrical and Electronics Engineers (IEEE). He received awards from the Aviation/Space Writers Association in 1972, 1974, 1975, 1977, and 1986; and the Lauren D. Lyman Award in 1989 for his distinguished career. From the Royal Aeronautical Society (London) Klass received the Boeing Decade of Excellence Award for lifetime achievement in 1989.

In addition to his distinguished career as an aerospace journalist, Klass developed a career investigating UFO sightings. Klass began investigating UFOs in 1966 after participating in a panel discussion for the IEEE. Unfamiliar with the subject, he read John G. Fuller's *Incident at Exeter: the Story of Unidentified Flying Objects Over America Today* (New York: Putnam, 1966), which contained reports of glowing fireballs near high-tension power lines, and began looking at the possibility that UFOs could be nothing more than freak atmospheric electrical phenomenon such as ball lightning. When he entered the field of UFO investigation he held the premise that people were honestly reporting what they believed they saw. He soon learned that people sometimes held ulterior motives when reporting UFO sightings. His first investigation in 1966 of a sighting two years earlier near Socorro, NM showed that the report was merely a hoax in an attempt to bring tourism to the economically depressed town.

Klass has gone on to investigate numerous UFO sighting and abduction cases, including the 1975 Travis Walton "UFO Abduction" case, which he concluded was a hoax. Klass also investigated the MJ-12 Papers, which alleged that President Harry Truman created a top secret group called Majestic-12 to deal with the 1947 saucer crash. Klass' investigation demonstrated that the documents were counterfeit. In return Klass has been accused of being an agent of the U.S. government disseminating disinformation in a UFO cover-up, however, Klass doubts the ability of the government to cover up something as large as a crashed saucer in light of the failure to maintain secrecy around events such as Watergate and the Iran-Contra Affair. Admitting that if he obtained information that UFOs did exist he would not hesitate to write the article himself. Klass has the distinction of being labeled one of the leading UFO skeptics, along with Edward Uhler Condon and Donald Howard Menzel.

Out of his investigations, Klass has published seven books, his first being *UFOs-Identified* in 1968. He has also participated in UFO lectures and programs sponsored by both skeptics and pro-UFOlogists. In 1976 Klass was a founding member of the Committee for the Scientific Investigation of Claims of the Paranormal (CSICOP) along with Carl Sagan, Isaac Asimov, Paul Kurtz, Ray Hyman, James Randi, Martin Gardner, and Sidney Hook. The purpose of CSICOP is to support the analytical investigation of paranormal and fringe-science claims from a responsible, scientific point of view, and

provide information to the general public.

Klass began donating his papers to the APS in 1988 with the view that the collection would one day help historians of pseudo-science understand how UFOlogy became so popular in the late-Twentieth Century. Philip Klass died on August 9, 2005 in Cocoa, FL.

Scope and content

The Collection of Philip J. Klass, an electrical engineer and UFO investigator, consist of 36 linear feet of materials documenting his writing and investigations of UFO sightings. Klass used his training as an engineer and technical writer in order to find a credible prosaic explanation for UFO sightings. Producing work on a scholarly level, Klass became one of the leading UFO skeptics along with Edward Uhler Condon and Donald Howard Menzel (whose papers are also at the APS). Klass was also instrumental in founding the Committee for the Scientific Investigation of Claims of the Paranormal (CSICOP), serving on the Executive Council and chairing the UFO subcommittee.

The collection is an ideal source for researchers investigating UFOs from a debunker's perspective, and his interaction with both the pro and con UFOlogy community. In addition, Klass' collection is valuable for the study of UFOlogy in popular culture through newspaper clippings and correspondence with the general public interested in UFOs, who openly expressed their opinions of his publications and public appearances. For historians of science and technology, the SDI material is an ideal source of material that documents the rise and decline of missile defense technology in the realms of public opinion, government policy, and technology. It contains newspaper and magazine clippings, government reports, and organizational material. It should be noted that the Klass Collection documents neither his work as an electrical engineer at GE, nor his career as an editor at AWST. The collection also lacks any documentation of Klass' personal life.

The collection is divided into eight series, and centers on Klass' UFO investigation material. Contained within the collection are correspondence, case files, subject files, material from conferences, periodicals related to UFOs, and audiovisual material.

Series I	Correspondence, 1966-1992	4 boxes; 2 linear feet
Series II	Case Files, 1948-1993	11 boxes; 5.5 linear feet
Series III	Subject Files, 1950-1996	10 boxes; 5 linear feet
Series IV	SDI Material, 1957-1991	9 boxes; 4.5 linear feet
Series V	Conferences, 1968-1992	1 boxes; 0.5 linear feet
Series VI	Periodicals, 1967-2000	22 boxes; 11 linear feet
Series VII	A/V, 1980-1998	10 boxes; 5 linear feet
Series VIII	Annotated Publications, 1975-1998	2 boxes; 1 linear feet

Related material

The APS houses three collections with material relevant to UFO investigations:

In the Edward U. Condon Papers (Mss. B C752), "Series V. UFO Materials" contains documents related to Condon's position at the University of Colorado from 1966 to 1968 as head of the project "the Scientific Study of Unidentified Flying Objects," undertaken by the Air Force Office of Scientific Research to investigate claims of Unidentified Flying Objects. The Donald Howard Menzel Papers concerning UFOs (Mss. 629.4 M52) includes correspondence, articles, newsclippings, photographs, and recordings, concerning Menzel's documentation of UFOs as natural phenomena explainable in scientific terms. One can find material on the National Investigation Committee on Aerial Phenomena, Project Blue Book, the Velikovsky controversy, and a card file of meteor activity, 1946-1961. Ivan Terence Sanderson Papers (Mss. B Sa3) reflect his interest in animals, jungles, and natural history. Late in life, Sanderson's interest turned to UFO's and he was the director of the Society for the Investigation of the Unexplained.

Collection overview

Series I. Correspondence	1966-1992	2 lin. feet	Request Series
Contains incoming and outgoing correspondence, the latter in the form of either carboncopies or photocopies. The series is arranged alphabetically, and then chronologically within each folder, and comprised of folders originally labeled by Klass as miscellaneous. For particularly extensive or relevant correspondence, we have provided individual folders. Among the several folders labeled as "Miscellaneous Correspondence" are materials that relate either to Klass's publications or to other UFO topic. Correspondence related to UFO cases investigated by Klass is located in Series II.			
Series II. UFO Case Files	1948-1993	5.5 lin. feet	Request Series
Series II is comprised of "case files" relating to UFO investigations that were either undertaken by Klass, or that were otherwise of interest. Case files include correspondence, newspaper clippings, government reports, and photographs. Among the most noteworthy material in this series is Klass's extensive correspondence with Bruce Maccabee -- a physicist employed by the Naval Surface Warfare Center and a leading pro-UFOlogist. Klass considered their investigation of the 1978 New Zealand UFO Case (as his most challenging and time consuming investigation. The basis of this investigation is that a TV camera crew flying off the coast of New Zealand filmed a giant glowing ball. Klass eventually determined the object to be the lights from a Japanese squid boat filmed through an improperly installed telephoto lens. In addition to their letters, maps, photographs, nomograms and charts were used to facilitate an understanding of the case's technical aspects.			
Series III. UFO Subject files	1950-1996	5 lin. feet	Request Series
Subject files on UFOs and alien abductions, consisting mostly of newspaper and magazine clippings, opinion pieces, government reports, and some correspondence. Of particular note is the file on the Volunteer Flight Officers Network (VFON) which was created in the mid-1960s by pro-UFOlogist Herbert Roth, a United Airlines employee. The organization was intended to help the North American Aerospace Defense Command (NORAD) refine its computer software for predicting atmospheric reentry of satellites and rockets. Roth secretly hoped VFON might also report UFOs. The file does show that pilot reports of UFOs were greatest during the period public interest, but when interest waned so did pilot reports. The material is semi-unique and may not be available anywhere else unless Roth maintained his own files. The project was ended in the late-1960s when NORAD and United Airlines discontinued funding.			
Series IV. Strategic Defense Initiative (SDI) Files	1957-1991	4.5 lin. feet	Request Series
Material on the Strategic Defense Initiative (SDI) "Star Wars" program, and ballistic missile defense systems. Klass collected this material with the intention of writing a book on space weapons. The series is primarily comprised of newspaper and magazine articles, in addition to government publications. The series is arranged chronologically, with notable works in their own folder. Klass originally had these items arranged chronologically in binders. The original order has been maintained as much as possible. The only non-UFO material in the collection developed out of Klass' work at <i>Aviation Week</i> is the SDI material in Series IV. Klass began covering topics related to space defense weapons for the magazine in the late 1960s-anticipating an arms race in space. He proposed a book to his publisher Random House tentatively titled "Race to War in Space" in 1981 and was turned down. Klass had doubts at to the feasibility of creating a space defense system, and feared it would accelerate a space race. From 1981 to 1991 he continued to collect all			

available material on the subject in anticipation of writing a book until around 1987 when it became apparent that SDI was doomed. In addition, Klass was a long-time friend of Lt. General Jim Abrahamson who headed the Strategic Defense Initiative Organization.

Series V. Conferences and Symposia	1968-1992	0.5 lin. feet	Request Series

Published proceedings, transcripts, and related correspondence for UFO conferences. The series is arranged alphabetically, and then chronologically within each folder. Material and correspondence related to various UFO conferences. Published proceedings from the MUFON conferences have been transferred to the Library's Printed Materials department.

Series VI. Periodicals	1967-2000	11 lin. feet	Request Series

UFO and SDI periodicals collected by Klass, as well as Klass's *Skeptic UFO Newsletter (SUN)*. The series is arranged alphabetically by title, and then chronologically. The periodicals in Series VI range from single issues to complete runs of works published within the United States, as well as international works such as the German pro-UFO publication *CENAP Report*. Also in this series is Klass' own *Skeptical UFO Newsletter* which he began publishing on a bi-monthly schedule in 1989 and has attracted over 300 subscribers.

Series VII. Audiovisual Materials	1980-1998	5 lin. feet	Request Series

Video and audio tapes relating to UFO and SDI programs that Klass either recorded purchased or from television. The audio tapes include recordings of lectures and radio/TV interviews by some of the UFO movement leaders (such as James E. McDonald and J. Allen Hynek), in addition to interviews Klass conducted as part of his own investigations. Finally, most of the printed materials which Klass donated have been transferred to the Printed Materials department.

Due to copyright restrictions, material in this series cannot be copied.

A photograph of Klass demonstrating a manner in which UFO photography can be produced is included at the end of this series.

Series VIII. Annotated Publications	1975-1998	1 lin. feet	Request Series

Contains unpublished works by other authors, gray literature, and galley proofs for Klass' book "The Real Roswell Crashed-Saucer Coverup." Correspondence and other items once folded into published works have been removed and placed in folders in this series, with the published works themselves transferred to the Printed Material Department for storage. For a complete listing of published titles, see the separation report above.

Bound volumes	1989-1995	6 vols.	Volume 1-6 Request Series

Uncorrected proofs or galleys of books on UFOs. Filed at the end of the collection.

Detailed Inventory

Series I. Correspondence	1966-1992	2 lin. feet	Request Series

Contains incoming and outgoing correspondence, the latter in the form of either carboncopies or photocopies. The series is arranged alphabetically, and then chronologically within each folder, and comprised of folders originally labeled by Klass as miscellaneous. For particularly extensive or relevant correspondence, we have provided individual folders. Among the several folders labeled as "Miscellaneous Correspondence" are materials that relate either to Klass's publications or to other UFO topic. Correspondence related to UFO cases investigated by Klass is located in Series II.

Series III. UFO Subject files	1950-1996	5 lin. feet	Request Series
Subject files on UFOs and alien abductions, consisting mostly of newspaper and magazine clippings, opinion pieces, government reports, and some correspondence. Of particular note is the file on the Volunteer Flight Officers Network (VFON) which was created in the mid-1960s by pro-UFOlogist Herbert Roth, a United Airlines employee. The organization was intended to help the North American Aerospace Defense Command (NORAD) refine its computer software for predicting atmospheric reentry of satellites and rockets. Roth secretly hoped VFON might also report UFOs. The file does show that pilot reports of UFOs were greatest during the period public interest, but when interest waned so did pilot reports. The material is semi-unique and may not be available anywhere else unless Roth maintained his own files. The project was ended in the late-1960s when NORAD and United Airlines discontinued funding.

Series IV. Strategic Defense Initiative (SDI) Files	1957-1991	4.5 lin. feet	Request Series
Material on the Strategic Defense Initiative (SDI) "Star Wars" program, and ballistic missile defense systems. Klass collected this material with the intention of writing a book on space weapons. The series is primarily comprised of			

newspaper and magazine articles, in addition to government publications. The series is arranged chronologically, with notable works in their own folder. Klass originally had these items arranged chronologically in binders. The original order has been maintained as much as possible. The only non-UFO material in the collection developed out of Klass' work at <i>Aviation Week</i> is the SDI material in Series IV. Klass began covering topics related to space defense weapons for the magazine in the late 1960s-anticipating an arms race in space. He proposed a book to his publisher Random House tentatively titled "Race to War in Space" in 1981 and was turned down. Klass had doubts as to the feasibility of creating a space defense system, and feared it would accelerate a space race. From 1981 to 1991 he continued to collect all available material on the subject in anticipation of writing a book until around 1987 when it became apparent that SDI was doomed. In addition, Klass was a long-time friend of Lt. General Jim Abrahamson who headed the Strategic Defense Initiative Organization.

Series VI. Periodicals	1967-2000	11 lin. feet Request Series
UFO and SDI periodicals collected by Klass, as well as Klass's <i>Skeptical UFO Newsletter (SUN)</i> . The series is arranged alphabetically by title, and then chronologically. The periodicals in Series VI range from single issues to complete runs of works published within the United States, as well as international works such as the German pro-UFO publication <i>CENAP Report</i> . Also in this series is Klass' own <i>Skeptical UFO Newsletter</i> which he began publishing on a bi-monthly schedule in 1989 and has attracted over 300 subscribers.

Series VII. Audiovisual Materials	1980-1998	5 lin. feet	Request Series
Video and audio tapes relating to UFO and SDI programs that Klass either recorded purchased or from television. The audio tapes include recordings of lectures and radio/TV interviews by some of the UFO movement leaders (such as James E. McDonald and J. Allen Hynek), in addition to interviews Klass conducted as part of his own investigations. Finally, most of the printed materials which Klass donated have been transferred to the Printed Materials department. Due to copyright restrictions, material in this series cannot be copied. A photograph of Klass demonstrating a manner in which UFO photography can be produced is included at the end of this series.

☐ Details

Publication information: c1992.

[11] leaves ; 28 cm.

"Enclosed are three items ... The first item is an update of information on the Federation case since the publication of the third Ohio UFO Notebook. The second item is a report on the Bender disk story, the only UFO story that I know about, other than Jane's grandfather, where a contactee/abductee is given a disk by the aliens. The third item is a very thoughtful and informative letter ... from fellow UFO researcher Robert J. Durant."

Projects and Initiatives of the Special Collections at The Ohio State University

Maps Open House

Join the Ohio State University Libraries for our first-ever maps open house! Pulling from libraries across the university and from documents that span continents and centuries, our map collection is a rich archive of information about parks, cities, and history. The first Maps Open House will be held on **November 20th from 10:00 am to 2:00 pm in Thompson Library room 150**. Join us to view maps from the Rare Books and Manuscript Library, The Byrd Polar Archive, University Archives, the Geology Library, Historic Costume & Textiles Collection, the Gardner Family Map Room, and the Ohio Congressional Archives.

For a list of maps being displayed: <https://osu.box.com/s/y87nx3uyxgmcozj23fjb>

Highlights include:

- 16th and 17th century maps of the World and the “New World”
- Early Ohio Maps
- Subway Maps
- Andersonville Prison Map
- Antique Maps from the Robert E. Oscar Collection
- Railroad Maps

Special Collections Sponsored Open Houses are Back!

Artists’ Book Open House

Come see work by Marina Abramovic and Ulay, John Baldessari, Johanna Drucker, Fluxus, General Idea, The Guerrilla Girls, Hans Haacke, Nancy Holt, Douglas Huebler, Barbara Kruger, Sol LeWitt, George Maciunas, Ed Ruscha, Carolee Schneemann, Richard Tuttle, Lawrence Weiner, Xu Bing, and many more. The Artists’ Books Open House will take place on **Wednesday, the 23rd of October, from 10:00 am to 2:00 pm in Thompson Library room 150**.

We will provide gloves so that you can study the works. Because of the sensitive nature of the materials (such as their designs, paper qualities, and fragility), we will ask that no backpacks or portfolios, food, drink, or wet media be brought into the room with them. Pencils and paper are best!

Maps Open House

Join the Ohio State University Libraries for our first-ever maps open house! Pulling from libraries

across the university and from documents that span continents and centuries, our map collection is a rich archive of information about parks, cities, and history. The first Maps Open House will be held on **November 20th from 10:00 am to 2:00 pm in Thompson Library room 150**. Join us to view maps from the Rare Books and Manuscript Library, The Byrd Polar Archive, University Archives, the Ohio State University Libraries' Rare Geological Collection, Historic Costume & Textiles Collection, and the Ohio Congressional Archives.

Special Collections Open House Schedule for 2013-2014.

All Open House will be held in Thompson Library in 150.

Artists' Books (October 23rd, 2013) 10:00-2:00

Maps (November 20th, 2013) 10:00-2:00

Pop Culture: Science Fiction (February 12th, 2014) 10:00-2:00

Early Modern Printed Book (April 16th, 2014) 10:00-2:00

Internship and Practicum Info

Internships and Practicum Opportunities at OSUL Special Collections

Special Collections at OSUL often have opportunities for students looking for internships and practicums.

PLEASE NOTE: OSUL does not pay for internships or practicums.

If you are interested in pursuing an internship or practicum, please follow these steps:

1. Decide what type of project you would like to do during your internship or practicum. Examples include web exhibitions, processing a collection, creating an education unit for teachers.
2. Review the OSUL Special Collections and determine which fit your interests.
3. Contact the appropriate staff person (listed below) to learn if there is an opening for an intern or practicum student. There may be times when there are no opportunities available. In addition, some areas may require certain course work to be completed before a practicum can be started.
4. The staff person will set up a meeting with you to discuss the project, if your skills and desires meet their needs, and if so when the internship or practicum will begin.

Byrd Polar Research Center Archival Program: Contact Laura Kissel at  kissel.4@osu.edu or 614-688-8173.

Previous project examples: processing manuscript collections, including creation of finding aids; processing artifact collections, including photographing the item, creating appropriate metadata and uploading the images and metadata to OSU's Media Manager; creating digital exhibitions.

Billy Ireland Cartoon Library & Museum: Contact Jenny Robb at  cartoons@osu.edu or 614-292-0538.

Previous project examples: processing collections of original cartoon art using Past Perfect collections management software; processing manuscript collections, including creating EAD finding aids; and creating union lists, digital exhibitions or albums.

William Charvat Collection of American Fiction: Contact Rebecca Jewett at  jewett.36@osu.edu or 614-292-5938

Previous project examples: Processing book collections; performing collection-level surveys related to particular genres or thematic topics.

Hilandar Research Library: Contact Predrag Matejic at Matejic.1@osu.edu or 614-292-0634

Previous project examples: None

Ohio Congressional Archives: Contact Jeff Thomas at thomas.1082@osu.edu or 614-688-8429

Previous project examples: None

Rare Books and Manuscripts Library: Contact Rebecca Jewett at jewett.36@osu.edu or 614-292-5938

Previous project examples: Processing manuscript collections; processing photograph collections; undertaking extensive provenance research on particular collection areas; performing collection-level surveys related to particular genres or thematic topics.

Jerome Lawrence and Robert E. Lee Theatre Research Institute (go.osu.edu/tri): Contact Nena Couch at couch.1@osu.edu or 614-292-9606

Previous project examples: Processing manuscript collections including creation of finding aids; processing original scene and costume designs and theatre technology materials; creating digital exhibitions

University Archives (go.osu.edu/archives): Contact Kevlin Haire at haire.14@osu.edu or 614-292-5769

Previous project examples: Processing manuscript collections; processing photograph collections; creating an online exhibit about university history.

You can see this gentleman from Bulwer's "Anthropometamorphosis" at the Early Modern Printed Book Open House

Special Collections Sponsored Early Modern Printed Book Open House on April 3rd.

The OSU Libraries would like to invite you to the final open house of the school year: our Early

Modern Printed Book Open House! Featuring books, pamphlets, art and architectural treatises, and travel itineraries in English, Latin, German, French, Italian, and Spanish, we're pulling items with substantial visual material that date from the 1400s to the 19th century from our collections university-wide. Among the artists and authors included will be Albrecht Durer, Giorgio Vasari, Leon-Battista Alberti, Andrea Palladio, Giovanni Battista Piranesi, Sebastiano Serlio, Baldassare Castiglione, Peter Paul Rubens, William Blake, and many more. Subjects include History, English, Architecture, Entomology, Herbology, Astrology, and more. Rare Books Librarian Dr. Eric Johnson will be on hand to explain the making and materials of these objects, as well as to help with on-the-spot Latin translations. The Early Modern Printed Book open house will take place on Wednesday, 3 April, from 11 to 2 in Thompson Library room 150.

Patrons with freshly clean hands will be able to handle the items gently. Because of the sensitive nature of the materials (such as their age, designs, paper qualities, and fragility), we will ask that no backpacks or portfolios, food, drink, or wet media be brought into the room with them. Pencils and paper are recommended for note-taking and sketching, and photography is permitted. Feel free to bring your classes or to encourage your students to stop by! For highlights of the Open House visit a list on [Buckeye Box](#).

King James Bible Digital Exhibit Now Live!

At long last, our digital repackaging of our 2011 physical exhibition, ["Translation... openeth the window to let in the light: The Pre-History and Abiding Impact of the King James Bible,"](#) is live! Please visit the exhibit to see this great online show, complete with medieval manuscripts, early-printed books, fine press Bibles, steel engravings, original art, comic books and strips, literary classics, and much much more!

Special Collections Sponsored Artists' Book Open House Back by Popular Demand

The OSU Libraries had a great response from our Fall semester Artists' Books Open House. And so, by popular demand, we're bringing it back this semester! Come see work by Marina Abramovic and Ulay, John Baldessari, Johanna Drucker, Fluxus, General Idea, The Guerrilla Girls, Hans Haacke, Nancy Holt, Douglas Huebler, Barbara Kruger, Sol LeWitt, George Maciunas, Ed Ruscha, Carolee Schneemann, Richard Tuttle, Lawrence Weiner, Xu Bing, and many more. The Artists' Books Open House will take place on Wednesday, the 20th of February, from 11:00 am to 3:00 pm in Thompson Library room 150.

This semester we're also thrilled to include a selection from the Billy Ireland Cartoon Library and Museum's Dylan Williams Collection of small press and self-published mini-comics, which showcase unique formats and binding techniques from underground cartoonists to contemporary self-publishers. If you are interested in homemade comics and the art of the book, this is a unique opportunity to examine these objects up close and to really understand how they're made. The Cartoon Library curator Caitlin McGurk will also be available during the open house to discuss the materials and their construction. We will provide gloves so that you can study the works. Because of the sensitive nature of the materials (such as their designs, paper qualities, and fragility), we will ask that no backpacks or portfolios, food, drink, or wet media be brought into the room with them. Pencils and paper are best!

Open House for Artists' Books 2012

Special Collections Celebrates American Archives Month

October is American Archives Month, and Special Collections conducted two programs to highlight our archives.

Tamar Chute, University Archivist, and Kevlin Haire, Archives Librarian, conducted tours focusing on the history of the buildings on the Oval on October 11th and 17th.

Tamar and Kevlin conducting an Oval Tour

Special Collections also held a program entitled "Voices from the Vault: Unique and Amazing Finds from Special Collections" on October 29th. The program highlighted items from The Ohio State University Archives, The Jerome Lawrence and Robert E. Lee Theatre Research Institute, the Byrd

Polar Archive, the Billy Ireland Cartoon Library and Museum, and the Floyd and Marion Rinhart Collection of Photographs.

Attendees view the items on display. The Milton Caniff life mask from the Billy Ireland Cartoon Library and Museum is in the foreground.

Visitors enjoy the stereogram viewers and daguerreotypes provided by the Rare Books and Manuscript's Rinhart Collection.

A new addition to the Jerome Lawrence and Robert E. Lee Theatre Collection.

For more information on these events, please contact Melanie McGurr, Instruction and Access Librarian for Special Collections at 247-4689 or at mcgurr.2@osu.edu.

Medieval Slavic Summer Institute (Hilandar Research Library)

From June 27 to July 25, ten participants in the 2011 Medieval Slavic Summer Institute (and the sixth such since 1999) participated in four weeks of daily three-hour lectures, additional practical exercises, and afternoon hands-on work with actual medieval Slavic Cyrillic manuscripts and other resources of the Hilandar Research Library. The 2011 MSSI was the first to be held in the "Jack and Jan Creighton Special Collections Reading Room" in what were enhanced, superb teaching and research conditions with original materials. For the first time, related materials in other special collections were also used.

The premise behind the MSSI is to use and share the unique resources at Ohio State to provide opportunities to graduate students to receive practical training and expertise in handling, reading, and understanding Slavic manuscripts, their component parts, tradition, and cultural significance. The

Slavic Cyrillic manuscript tradition dates from the 9th to the 20th century.

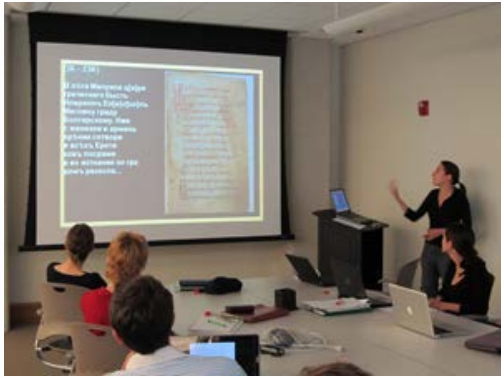

The MSSl was conducted by Daniel E. Collins, Department of Slavic Languages and Cultures, and Predrag Matejic, Curator of the Hilandar Research Library, who presented lectures on "Readings in Church Slavic" and "Practical Slavic Paleography." Additional guest and occasional public lectures were provided by professors of other universities, most of whom have themselves conducted lengthy research in the Hilandar Research Library.

While OSU graduate students, especially those in Slavic, Linguistics, and History are the most frequent participants, the MSSl

was envisioned to also provide needed instruction and training to graduate students of other universities. The 2011 MSSl had guests from Michigan, Brown, Arizona State, and the Pontifical Oriental Institute in Rome.

For more information on the Hilandar Research Library and the related Resource Center for Medieval Slavic Studies, see <http://cmrs.osu.edu/rcmss/>.

"Picturing History: Editorial Cartooning in America, 1754-2011," an Ohio Humanities Council Summer Institute

(Billy Ireland Cartoon Library & Museum)

August 1-5, 2011

Ohio 8th and 10th grade teachers explored the history of American editorial cartooning at the Billy Ireland Cartoon Library and Museum in August, 2011. Jenny Robb and Lucy Caswell served as co-directors of the Institute. [More information](#) is available on the Ohio Humanities Council web site, as well as  [a brochure](#) listing other topics and locations.

Festival of Cartoon Art (Billy Ireland Cartoon Library & Museum)

The Festival, a celebration of cartoons and comics, took place **October 14-17, 2010**.

About the Festival:

This was the tenth triennial Festival organized by the Billy Ireland Cartoon Library & Museum (formerly the Cartoon Research Library). An academic symposium kicked off the Festival events. **Humor, Play and Identity: Academic Perspectives** took place on Thursday, October 14 at the Ohio Union and ended with a keynote address on George Herriman by author [Michal Tisserand](#). That evening, all Festival participants were invited to celebrate the 100th birthday of Krazy Kat at a special exhibition reception and birthday party.

Creators who were scheduled to present at the Festival on Friday, October 15 and Saturday, October 16 included [Steve Breen](#), [Roz Chast](#), [Tony Cochran](#), [Jan Eliot](#), [Matt Groening](#) and [Tom Gammill](#), [Dave Kellett](#), [Paul Levitz](#), [Dan Piraro](#), [Jen Sorensen](#), [James Sturm](#), and [Gene Luen Yang](#). The Festival also featured a special tribute panel to Jay Kennedy, the late Editor in Chief of King Features Syndicate. Kennedy was a collector and scholar who bequeathed his extraordinary collection of underground comics to the library. Panelists included [Brendan Burford](#), [Bill Griffith](#), [Matt Groening](#), and [Patrick McDonnell](#).

In addition to these events, **Wexner Residency Award Recipient** [Art Spiegelman](#) gave a special presentation on Sunday, October 17.

Two cartoon exhibitions were on display during the Festival. **Ireland of the Dispatch**, a retrospective of the work of Billy Ireland, was held in the Exhibition Gallery of the spectacular and newly-renovated Thompson Library. **Scenes of My Infint-hood: Celebrating the Birth of Krazy Kat** was exhibited in the Cartoon Library & Museum Reading Room Gallery.

Avant Writing Symposium (Rare Books & Manuscripts Library)

In Memoriam Thomas L. Taylor

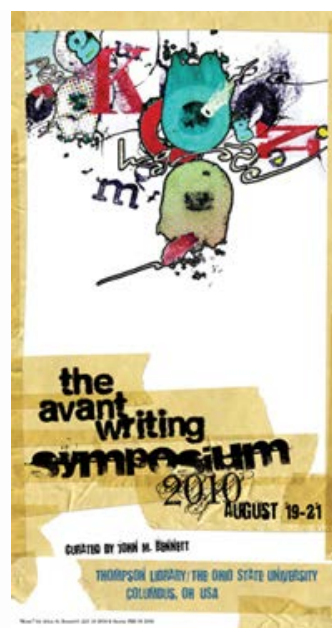

August 19-21, 2010, the Thompson Library was invaded by an exciting horde of writers, scholars, artists, and others for the 2nd Avant Writing Symposium. There were some 50 presentations, performances, papers, readings, installations, exhibits, and other events, and an untold number of observers, fans, scholars, and kibitzers. Sponsored by The Avant Writing Collection and the Rare Books & MSS Library, with additional support from The Department of Spanish & Portuguese and The Center for Latin American Studies, the attendees and presenters came from all over the United States, Latin America, and elsewhere; all with a focus on various of the Avant Gardes

active in the world today, primarily those using language in some form or other. Events took place in the Thompson Library, at OSU's Urban Arts Space, and at Skylab in downtown Columbus. In addition to the presentations and performances, there were exhibits in the Thompson Library, and at Skylab, and a room dedicated to continual presentations of electronic and digital poetry and literature.

The previous Symposium, in 2002, was a huge success, and is still being talked about. The 2010 symposium provided another great opportunity to learn about literary innovation and experimentation, avant garde writing, electronic and digital literature, multi-lingualism, visual poetry, performance poetry, Fluxus poetry and texts, collaborative writing, sound poetry, international networking, artist's books, cut-up text, concrete poetry, found poetry, mail art, video poetry, and much much more.

For complete schedule and poster please see:

<http://library.osu.edu/find/collections/rarebooks/RBMSnews/avant-symposium/>

Rare Books Academy (Rare Books & Manuscripts Library)

On **July 13-15, 2010**, the Rare Books & Manuscripts Library hosted its first "Rare Books Academy" for children. Fifteen students—from Columbus and as far afield as Morgantown, WV—enrolled and spent three days learning how manuscript books were made in the Middle Ages, how books were printed in the hand-press period, and how librarians and conservators today help to ensure that old and rare books will continue to survive for years to come. The students didn't just learn things about the history of books, however; they also learned how to make their own manuscript and hand-printed products. They practiced the medieval technique of "pouncing," a method of illustration in which the artist lays a picture on top of a piece of parchment, pricks holes around its outline piercing both the illustration and the parchment beneath, and rubs colored chalk over the pierced illustration that passes through the pricked holes onto the parchment to form dots that the artist then connects to complete the illustration. Students also printed their own sheets on hand-presses at the Logan Elm Press, experimented with calligraphy, learned how to bind their own manuscript booklets, and lent a hand in the Libraries' conservation lab by treating old paper with a deacidifying spray-gun.

The students produced and bound their own sheepskin booklets, including pounced and free-hand illustrations, decorated initials, short stories and more. All fifteen booklets are currently being highlighted in a ten-day long "Rare Books Academy" exhibition in the Special Collections display area on the first floor of Thompson Library (through 1 August). Like the manuscripts and old books they're modeled after, each of these booklets has its own unique qualities and charm that reflect the interests and preoccupations of their makers. More importantly, they all also embody the thoughtfulness, creativity, effort—and fun—that goes into the design and use of books.

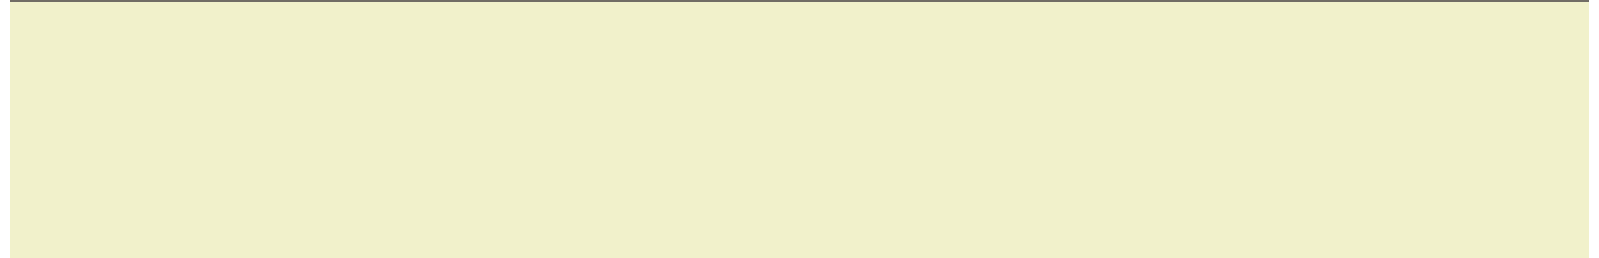

(more photographs of the event on our blog at: <http://library.osu.edu/blogs/rarebooks/2010/07/22/rbms-hosts-first-rare-books-academy-for-children/>)

Carlos Allende papers, 1943-1994

Allende, Carlos.

[University of Wyoming - American Heritage Center](#)

Contact an Archivist or Librarian to learn more about access.

[Contact Information](#)

☐ Details

2.28 cubic ft. (4 boxes)

The collection contains documents and materials used by Carlos Allende for his research on the "Philadelphia Experiment", Unified Field Theory, interstellar space travel, and UFOs. Documentation includes letters to and from Allende and various authors and professors in the scientific community, newspaper clippings, his military history with discharge forms, a letter of presidential commendation from Harry Truman, his personal writings, government documents, and other printed material. Much of the collection is photocopied.

Carlos Allende served in the Marines from July of 1942 to May of 1943. He claimed to have witnessed the disappearance of the U.S. destroyer escort USS Eldridge while serving aboard the SS Andrew Furuseth in what became known as the "Philadelphia Experiment". The story of the supposed event emerged through Morris K. Jessup, author of "The Case for the UFO". Allende researched interstellar space travel, UFOs, and Einstein's Unified Field Theory. He was described as an eccentric and intelligent individual. He died in March of 1994 at the age of 68.

Finding aid available in the repository.

3 scrapbooks ; 30 x 25-28 cm, in box, 13 x 34 x 47 cm

1 CD-ROM ; 4 3/4 in.

Series III. Project Sign, Project Grudge, and Project Blue Book were U.S. military projects investigating the UFO phenomenon. The sightings reported occurred throughout the United States and in several European locations.

Cameron K.F. Pack is the Volunteer Assistant State Director, Virginia Mutual UFO Network and President of the UFO club of Virginia Beach. He had his own encounter with a UFO in 2003. He has made numerous FOIA requests to various police departments, the FBI, and to every US Air Force base in the world seeking UFO sighting reports.

Jack D. Pickett papers, 1950s-2006.

Pickett, Jack D.

[University of Wyoming - American Heritage Center](#)

Contact an Archivist or Librarian to learn more about access.

[Contact Information](#)

☐ Details

2.8 cubic ft. (4 boxes)+ 4 folders.

Collection contains materials pertaining to Pickett's research on UFO sightings and experimental military aircraft. Consists largely of Pickett's research files, which contain clippings, correspondence, photocopies of government documents, and photographs. Also contains audio-visual materials including a CD-ROM, an audio cassette tape, a CD, and several video tapes. Collection also holds a model of a U.S. Air Force disk plane.

Jack D. Pickett was a UFO researcher and an expert on experimental aircraft. A native of Cooper, Wyoming, Pickett served in the U.S. Army Air Force during World War II and later became a publisher. Between the 1980s and 2000s, Pickett did extensive research on UFO sightings. He argued that alleged UFO's were actually experimental aircraft flown by the military. In the process of doing his research, he became an expert on experimental and unconventional military aircraft. Pickett was the author of the article "Flying Saucers-For Real", which was published in Search Magazine in 1982.

No finding aid available in repository.

ARCHIVEGRID

Bill Ellis research collection on contemporary legends, 1918-1996

Ellis, Bill, 1950- collector.

[Pennsylvania State University Libraries](#)

Unrestricted access.

[Contact Information](#)

[Online finding aid](#)

☐ Details

3 cubic feet.

In Rare Books and Manuscripts, University Libraries, Pennsylvania State University, University Park, Pa. 16802 (#1999-0289R).

Unrestricted access.

This collection contains primarily books, pamphlets, booklets, newsletters, and newspaper clippings about topics of contemporary legends, including the occult, paranormal, religious and phenomena of extra-terrestrial origin, crop circles, animal mutilation, and other UFO-related phenomena.

There are books about Satanism, witchcraft, black magic, faith healing, and a variety of other occult phenomena including werewolves; books covering survivalism and conspiracies; booklets dealing with legendary phenomena such as Bigfoot or Sasquatch, and one concerned with schizophrenia and the spirit world that addresses the phenomenon of hearing voices from a spiritual perspective rather than a clinical one.

The majority of books and other material deal with UFOs, and included are conference proceedings from major UFO-interest groups as well as a large number of newsletters from interested organizations. The newspaper clippings cover a controversial case of sexual ritual abuse from the Orkney Islands in Scotland,

organized according to date. Additionally there are newspaper clippings, 1993-1996, about cases of sexual abuses of horses in Maryland, Great Britain, and Denmark.

Bill Ellis is associate professor, English and American Studies, Penn State Hazleton. Ellis is widely published on rumor-panics and his papers have appeared in publications like Western Folklore and the Journal of Psychology and Theology; and have been presented at conferences held by the American Folklore Society and the Fortean Society. He edited FOAFTale News, the newsletter of the International Society for Contemporary Legend Research (ISCLR), from 1988 to 1994, and served as President of the same society from 1995 to 1999.

The Special Collections Library is located on Penn State's University Park Campus. Here, researchers can find more than 200,000 printed volumes, more than 25 million archival records and manuscripts, and another million photographs, maps, prints, and audio-visual items. Our mission is to provide primary source materials for researchers from Penn State and around the world.

ARCHIVEGRID

Statement on sighting of an unidentified flying object in 1896, recorded in 1961.

Palmer, Silas H.

[Stanford University](#)

Contact an Archivist or Librarian to learn more about access.

☐ [Contact Information](#)

[Finding aid available online](#)

☐ Details

2 leaves.

Statement gives the details of his sighting of a Zeppelin-like object near Forest Hill in Placer County, California, in the summer of 1896; the statement was typed, witnessed, and notarized in July 1961.

Silas H. Palmer was a successful construction engineer, builder, and financier; he was a partner in the firm that helped to build the Stanford Stadium in 1921. He endowed a professorship in civil engineering at Stanford University.

Special Collections Unbound

Project South coordinator revisits collection 50 years later

On April 24th, the University Archives was pleased to welcome back to the farm Jim McRae ('68), coordinator of the KZSU-sponsored [Project South](#), which interviewed civil rights workers during the summer of 1965. Jim (seen here examining interview transcripts) sat

down with us to talk about the project and even provided some personal photographs (below) and [documents](#).

During the summer of 1965, eight students from Stanford University spent ten weeks in the southern states tape-recording information on student participation in the Civil Rights Movement. The eight interviewers -- Mary Kay Becker, Mark Dalrymple, Roger Dankert, Richard Gillam, James McRae, Penny Niland, Jon Roise, and Julie Wells -- were sponsored by KZSU, Stanford's student radio station, and their original intent was to gather material suitable for rebroadcasting in the form of radio programs. Northern college students who were working in the South for the first time were the major focus, although many other topics were also investigated. To find out why these students decided to go to the South to work for the movement, what they expected to find there, what they did find, the pressures they experienced, their reaction to these pressures, what they accomplished, and what they planned to do in the future (both near and distant), they interviewed as many students as possible. What is planned is a series of programs expressing in the volunteers' and workers' own words, their motivations and their feelings towards the many aspects of the South and of the Civil Rights Movement experienced that summer.

UFO collection, ca. 1947-1969.

Condon, Edward Uhler, 1902-1974.

[American Philosophical Society](#)

Contact an Archivist or Librarian to learn more about access.

[Contact Information](#)

☐ Details

22 linear ft.

The Air Force files were obviously copied as background material for Condon's use, but it is unclear how complete they are. Many are duplicates from the Air Force archives at Maxwell Air Force Base in Montgomery, Alabama, which have been microfilmed for research use by the National Archives.

This unsorted collection of materials on unidentified flying objects contains copies of early Air Force investigation files (for Project Sign, 1947-1949; Grudge, 1949-1951; Blue Book, 1952-1967), and also the files for the Colorado project, or the Condon Report as it was popularly known ("Scientific Study of Unidentified Flying Objects," 1968). There are 14 boxes relating to this project, 7 of which contain files of the actual cases investigated, and all of which contain drafts of the published chapters, with supporting documentation and correspondence.

Edward Uhler Condon was a physicist who served as director of the National Bureau of Standards (1945-1951). In 1966, the Air Force urged and sponsored his research on unidentified flying objects and in 1968 he presented his Condon Report.

[Opera Hrosvita, illustris virginis et moialis....nuper a Conrado Celte inventa](#) (Nuremberg, 1501), is the first edition of the "comedies" and other writings of Hroswitha of Gandersheim, who was a Benedictine nun in Lower Saxony born sometime between 912 and 940. Her work enjoys the distinction of being the first collection of modern or non-classical dramas to appear in print. Her manuscript was discovered and later edited for this first edition by the great German humanist Conrad Celtes. The book features 8 full page woodcuts,

including two by Albrecht Durer. The one seen here represents Celtes presenting his book to the elector Frederick the Wise of Saxony.

[Contact Information](#)

☐ **Details**

1 item (49 p.)

Privacy restricted; permission to use item must be obtained from the Folklore Archivist.

Barrus analyzes personal narratives about alien encounters or experiences with Unidentified Flying Objects. Discusses the idea of government conspiracy to cover up evidence of aliens and UFOs. Describes the opinion held by some that aliens created human beings or helped them to advance as a species. Identifies common elements in alien encounter or abduction stories.

These materials are part of the William A. Wilson Folklore Archives.

Barrus was born in Albuquerque, New Mexico and raised in San Diego, California. She was very interested in UFOs. Barrus attended Brigham Young University.

Frank Scully papers, 1924-1985.

Scully, Frank, 1892-1964.

[University of Wyoming - American Heritage Center](#)

Contact an Archivist or Librarian to learn more about access.

[Contact Information](#)

☐ Details

15.25 cubic ft. (34 boxes)

Collection contains personal and professional correspondence; campaign materials relating to his run for public office in California; materials regarding his work for the California Department of Institutions; the manuscripts for several of his works; and miscellaneous other materials. The collection also includes 27 reel-to-reel audiotapes of recordings discussing the magnetic propulsion of flying saucers; fan mail, newsletters, magazine and newspaper clippings, and pamphlets regarding unidentified flying objects; and the manuscript and research notes for "Behind the Flying Saucers."

Scully graduated from Columbia University in 1927 and began working for the "New York Sun" as a reporter. After working briefly for the "Chicago Tribune" and "Variety," Scully ghosted a book on the life of George Bernard Shaw for Frank Harris. He ran unsuccessfully for the California Legislature's 57th District from 1934-1948 and served as secretary and administrative assistant of the California Department of Institutions from 1937-1941.

Scully also authored several gag books for patients confined to bed, including, "Fun in Bed" and "More Fun in Bed." Scully's other works included the children's book "Blessed Mother Goose," his autobiography "This Gay Knight," and "Behind the Flying Saucers," a book on the existence of unidentified flying objects.

Finding aid available in repository.

☐ Details

0.25 linear feet (3 folders, 1 oversized folder)

Collection is open for research. Appointments to view materials are required. To make an appointment please click above link or contact library staff at room@theautry.org.

Processed by Glenna Schroeder, circa 1977-1981. Finding aid completed by Anna Liza Posas, 2013. Final processing of collection and publication of finding aid made possible by a grant from the National Historical Publications and Records Commission (NHPRC).

Chief Dan Katchongva (1860-1972) was born in Old Oraibi, Arizona. He was a traditional leader and Hopi Chief at Hotevilla, Arizona. This collection consists of material primarily created between 1970-1971. They include photocopies of correspondence from Chief Dan Katchongva to tribal, church, and government leaders; press clippings; and posters related to unidentified flying object (UFO) sightings near Prescott, Arizona and its relation to a Hopi prophecy.

This collection consists of photocopies of correspondence from Chief Dan Katchongva to tribal, church, and government leaders; press clippings; and posters. The press clippings and posters relate to unidentified flying object (UFO) sightings near Prescott, Arizona and its relation to a Hopi prophecy. In the letters, Katchongva demands return of stolen lands, opposes the Hopi Tribal Council and the Peabody Coal

Company, and describes true Hopi religion and warns of the "Great Day of Purification" coming soon. All letters written and signed via Katchongva's secretary, Nonnie Skidmore.

Chief Dan Katchongva Collection, 1970-1971, Braun Research Library Collection, Autry National Center, Los Angeles; MS.502; [folder number] [folder title][date].

Copyright has not been assigned to the Autry National Center. All requests for permission to publish or quote from manuscripts must be submitted in writing to the Autry Archivist. Permission for publication is given on behalf of the Autry National Center as the custodian of the physical items and is not intended to include or imply permission of the copyright holder, which must also be obtained by the reader.

Hopi Prophecies Collection, 1961-1974, Braun Research Library Collection, Autry National Center, Los Angeles; MS.1136.

Chief Dan Katchongva (1860, January 1 to 1972, February 22) was born in Old Oraibi, Arizona. He was a traditional leader and Hopi Chief at Hotevilla, Arizona.

Libraries and Archives of the Autry

Watercolor by Eva Scott Fenyes, THE MISSION OF SAN GABRIEL ARCANGEL, circa 1900, Autry National Center; FEN.14

The Libraries and Archives of the Autry hold unique, rare and significant primary and secondary resources focusing on the peoples and cultures of the American West. Our two library collections, the Braun Research Library and Autry Library, contain rare books, serials, maps, photographs, artwork, sound recordings, and manuscript collections. The Libraries and Archives also provide research access to the Autry’s artifact collections. Each year, [research fellowships](#) are awarded to support scholarly projects.

Find out more about our research resources when you search our [library catalog](#) and our digital database, [Collections Online](#). Please contact the Libraries and Archives for “Researcher Access” to view additional records room@theautry.org

Appointments for research are available select weekdays, 10:00 a.m. to 4:00 p.m. (holidays excluded). Please see the [research rules and application](#) for more details.

Overview of the Collection

Creator: Roach, F. E. (Franklin Evans)

Title: Roach, Franklin E. Papers

Dates: 1931-1994 (inclusive)

Quantity: 13 cubic feet

Collection Number: USUAFV3-145

Summary: The bulk of the Franklin E. Roach Papers contain his notes, drafts, charts, correspondence, photographs, and publications generated from his research in upper-atmospheric physics. The materials also include Roach's lecture notes, his correspondence files from his work on unidentified flying objects, and some biographical papers.

Repository: University of Alaska Fairbanks
Alaska Polar Regions Collections & Archives
Elmer E. Rasmuson Library
PO Box 756808
Fairbanks, Alaska 99775

Languages: EnglishFrench

Sponsor: Funding for encoding this finding aid was provided through a grant awarded by the National Historic Publications and Records Commission.

Biographical Note

Franklin Evans Roach contributed greatly to the field of upper-atmosphere physics, conducting and publishing many photometric studies of airglow, zodiacal light, and diffuse galactic light. In 1929, he began his early training in astronomy at Yerkes Observatory under Otto Struve. After obtaining his Ph.D. in astrophysics from the University of Chicago in 1934, he began work as the first resident astronomer at the McDonald Observatory in Texas. In 1936, he accepted a position as associate professor at the University of Arizona where he taught astronomy and physics for six years. During World War II, Roach initially worked designing military rockets at Cal Tech and then was reassigned to work on the Manhattan Project. He resumed his civilian research after the war, first, working for the Naval Ordnance Test Station in Pasadena and studying airglow at the Cactus Peak observatory and then at the Fritz Peak observatory at the National Bureau of Standards in Boulder, Colorado. He also helped establish an observatory at Mt. Haleakala on the island of Maui in Hawaii. He retired from civil service in 1966.

Interspersed throughout his career were smaller interesting assignments including studying as a Fulbright scholar in Paris in 1951-52; traveling around the world as an airglow observer for the International Geophysical Year in 1957-9; working as a consultant for NASA in briefing and debriefing astronauts in the 1960s; and working on the Condon Report from 1966-1968, a study sponsored by the Air Force to investigate unidentified flying objects.

Roach published more than two hundred papers and was awarded a Gold Medal for Exceptional Service by the US Department of Commerce. He died in Tucson, Arizona on September 21, 1993.

Content Description

The bulk of the Franklin E. Roach Papers contain his notes, drafts, charts, correspondence, photographs, and publications generated from his research in upper-atmospheric physics. The materials also include Roach's lecture notes, his correspondence files from his work on unidentified flying objects, and some biographical papers.

Notes and AK numbers written in pencil on the outside of most objects are from Roach's family, presumably as an indication that these files were chosen to be sent to Alaska. The files have been arranged either by subject into series or according to Roach's numbering system rather than by the AK numbering system on the outside of each file.

Use of the Collection

Restrictions on Access :

Access limited to Alaska Polar Regions Collections & Archives research room hours

Preferred Citation :

Franklin E. Roach Papers. Box #, Folder #, Archives, Alaska and Polar Regions Collections, Rasmuson Library, University of Alaska Fairbanks.

Administrative Information

Detailed Description of the Collection

The following section contains a detailed listing of the materials in the collection.

Series I: Publication files. , 1932-1991

9 boxes

Roach's publication files consist of reprints of his journal contributions as well as drafts, notes, charts, correspondence, and illustrations used in his research and publications. The reprints, located in the first box, have all been assigned a number by Roach. The R series represent his work from 1932-1942; the A series include publications from 1949-1988; the B series are a collection of his minor contributions, including reviews and an encyclopedia entry; and the M series are his publications pertaining to the subject of Red Arcs while at the National Bureau of Standards in Colorado. Roach also assigned publication numbers to files which contained documents pertaining to that particular publication. Boxes 2-5 contain files pertaining to publications A101-A237. Unnumbered files where the related publication could not be ascertained have been placed in boxes 6-9 along with Roach's card index of his publications.

Container(s)	Description	Dates

9	Publication files, unnumbered	

[^ Return to Top](#)

Series 2. : UFO Files., 1967-1977

1 box

Contains correspondence, charts, and photographs from Roach's work on the Condon Report in 1966-1968 as well as the Association for the Advancement of Science (AAAS) UFO Symposium in 1969. The series also includes roach's correspondence with the general public on unidentified flying objects, some articles on UFOs which reference Roach, and an audiotape of Roach talking about UFOs to the Hawaiian Astronomical Society in January 1970.

[^ Return to Top](#)

Series 3: Lecture files, 1959-1983

1 box

This series contains Roach's lecture notes and examinations from University courses he taught as well as his correspondence, charts, and notes pertaining to lectures he gave for organizations.

[^ Return to Top](#)

Series 4: Photographs, 1931-1994

1 box

Materials include photographs and slides documenting Roach's work. Virtually all of the observatories Roach worked at are covered as well as much of the equipment he used throughout his career. There is also a collection of slides with illustrations from his journal publications; Roach has labeled several of the slides with manuscript numbers. Images also depict many of his colleagues, some personal portraits, as well as a photograph of his gravesite in Boulder, Colorado.

[^ Return to Top](#)

Series 5: Biographical papers, 1941-1991

1 box

Roach's biographical papers include copies of his obituaries, a program from his memorial service, an interview transcript from 1941, and a description of the Franklin E. Roach memorial scholarship at the University of Arizona. There is also a copy of "Musings and Memoirs of Franklin Evans Roach," his autobiography published by his family.

About the Library

Welcome to The Elmer E. Rasmuson Library of The University of Alaska Fairbanks (UAF). Containing more than 1.75 million items, we are the largest library in the state of Alaska. The library is comprised of the main library as well as the [BioSciences Library](#), which is located in the Arctic Health Research building.

The Rasmuson Library has one of the world's finest collections of [Alaska and Polar Regions](#) (APR) materials including books, periodicals, photography, manuscripts, films, oral histories, rare books, and maps. The collections are centered on Alaska but include many items about the Circumpolar North and Antarctica. Subject bibliographers, archivists, anthropologists and historians on the APR staff are available for reference and research assistance.

The [Library Catalog](#) can be used to locate books, videos, government documents, and other materials owned by the UAF Rasmuson & BioSciences Libraries, the Keith Mather Geophysical Institute Library, and other libraries throughout the state.

Librarians and library staff assist students in using library resources and can give guidance on how to best locate research and information resources both in the library and beyond, regardless of format. As always, seeking out help and assistance from reference staff early in the research process can save many hours of frustrating work.

As part of UAF's core curriculum, undergraduate students must demonstrate their library proficiency either by completing LS101 (Library Information and Research) or by passing a competency exam. In LS101, students learn about library research, using the Internet, and about finding information in a variety of subject areas.

For historical information about the library see University of Alaska's [Elmer E. Rasmuson Library](#) page.

ARCHIVEGRID

Ted Bloecher papers, 1950-2000.

Bloecher, Ted.

[New York Public Library](#)

Apply in Special Collections Office for admission to the Manuscripts and Archives Division.

[Contact Information](#)

☐ **Details**

15.5 linear feet (39 boxes).

Apply in Special Collections Office for admission to the Manuscripts and Archives Division.

The Ted Bloecher papers consist of correspondence, personal journals, writings, theater memorabilia, and reference files reflecting the daily life of an actor and singer in New York City, gay life before and after the Stonewall Riots, and thirty years of UFO research. The bulk of the collection consists of correspondence, in chronological order, with friends, family members, singers, actors, and UFO researchers, including Leon Davidson, Isabel Davis, Donald E. Keyhoe, James W. Moseley, Edward J. Ruppelt, and Leonard H. Stringfield. Bloecher's journals document the daily life of a gay man, primarily in New York City, with reference to the impact of the AIDS epidemic. Writings include an unpublished musical comedy, *Something in the Air*, a research paper, a memoir describing a summer spent in Provincetown, Mass. in 1951, and poetry. Chronological reference files documenting his membership in the New York City Gay Men's Chorus include official publications, minutes, programmes, reviews, and fundraising and publicity materials. Annotated playbills and clipped reviews of other theatrical and musical performances he attended are found in correspondence files.

Ted Bloecher (1929-) is a retired actor and member of the New York City Gay Men's Chorus. Bloecher has also written and conducted research on the subject of unidentified flying objects (UFOs).

Collection guide available in repository and on internet.

[Ask a Question](#)

Make an Appointment
[Consult with a Research Specialist](#)

The Division holds over 29,000 linear feet of archival material in over 3,000 collections. The strengths of the Division are the papers and records of individuals, families, and organizations, primarily from the New York region. These collections support research in the political, economic, social, and cultural history of New York and the United States.

The new [archives website](#) searches over 8,000 collections across the Library's Research Centers including the Manuscripts and Archives Division.

Schedule an appointment

If you expect to research archives or have a question about our holdings, please use the [application form](#) to ask a reference question, or request to view archival material. Be sure to include the name of the collection, and box numbers to research if possible.

Initial requests for material should be placed at least one week in advance of your intended visit. Any additional requests are to be submitted in the Reading Room.

Class visits

The Manuscripts and Archives Division welcomes class visits and collaboration with area colleges and universities. To schedule, or discuss class visit opportunities with an archivist, please fill out the [Class Visit Application](#).

To learn more about how to cite collections in advance of publishing research, please contact us directly at: mssref@nypl.org.

About Special Collections and Archives

The Cline Library is honored to serve as the home for a rich array of archival material which documents the history and development of the Colorado Plateau in a variety of disciplines. The public treasures found in Special Collections take the form of several million items including letters, diaries, and ledgers; vintage and contemporary photographs; oral history interviews; films; and maps. The Library is committed to sharing this regional heritage with a global audience in support of education and enjoyment. Collection strengths include:

- [Colorado River and Grand Canyon](#)
- [Native American history and culture \(Four Corners area\)](#)
- [Land use and the environment](#)
- [Economic development](#)

The Library contributes to the body of knowledge related to the Colorado Plateau by offering traditional and Web-based reference services, acquiring and making available new collections, adding to the [Colorado Plateau Archives](#), assisting with curriculum development, interpreting resources through exhibitions and presentations, and by reaching out to users to introduce the excitement of conducting research with original materials.

Special Collections also houses the University Archives -- a collection which captures the story of over 100 years of higher education in northern Arizona -- and the archival collections of the Arizona Historical Society/Northern Division, the Hopi Cultural Preservation Office, and the Grand Canyon Historical Society.

[Hours and Location](#) | [Ordering from the Archives](#) | [Donating to the Archives](#) | [Contact Us](#)

Hours and Location

See hours of operation for Special Collections and Archives from the [library building](#) page.

The library is located at the intersection of Knoles Drive and McCreary Road, almost directly across Knoles Drive from the University Union. See the library's [Location and Directions page](#) for more information, including campus and Google maps.

Ordering from the Archives

- [Fees for Use of Collection Materials](#) (PDF)
Reproduction services include digital black-and-white and color prints or images on CDs, slides, and audio and video tape duplication.
- [Order Form](#)
Request copies of archival images, sound files, and films. If you plan to use the copies for purposes of publication, reproduction, exhibit, or public display, this form must be accompanied by the Application for Permission to Publish/Produce (below).
- [Application for Permission to Publish/Produce](#) (PDF)
Apply to use Cline Library archival reproductions in a publication, slide show, exhibit,

Donating to the Archives

For information about gifts of archival collections, please see the library's [Giving page](#). A [Deed of Gift Agreement](#) is the standard gift instrument used for donating materials to the Cline Library Special Collections and Archives. For more information on contributing to an archive, see [A Guide to Donating Your Personal or Family Papers to a Repository](#) by the Society of American Archivists.

With leadership from Dr. Eugene Hughes, NAU President Emeritus, and Dr. Monte M. Poen, Regents' Professor of History Emeritus, the [Committee to Preserve the History of Northern Arizona University](#) is dedicated to capturing and sharing the history of our university's

contributions to higher education. To learn more, please visit the Committee's website.

Archives

The Local History Collection includes photographs, graphics, maps, clippings, and other archival materials.

You can search for archival collections in the Library catalog. Selected images from these collections are available for viewing on the Web.

Look on this page for quick links to California History Room [archives](#) and [images](#).

Archives

The Library's archival collections contain resources of enduring historical value, often unpublished materials in a variety of formats. They include typescripts, handwritten documents, photographs, scrapbooks, news clippings and printed materials.

Each archival collection and map is included in the catalog. Archival catalog records have detailed information about historically significant collections such as the Edward F. Ricketts Papers, scrapbooks and registers, several photographic collections containing thousands of photographs, historical clipping files, and hundreds of maps.

James Earl Jones papers, 1972-1973.

Jones, James Earl.

[New York Public Library](#)

Contact an Archivist or Librarian to learn more about access.

[Contact Information](#)

☐ Details

.2 lin. ft.

Correspondence between James Earl Jones and Errol John regarding a film Jones had hoped to do. The film, based on John Fuller's book "The Interrupted Journey," would have been about Betty and Barney Hill's account of their encounter with a UFO and their "abduction" by the inhabitants of the UFO, which took place in New Hampshire. Also included are a script for "The Interrupted Journey," and an article and Jones' notes for the film.

Actor (born in 1931) appearing in numerous films, television and the theater. Some of the many titles of productions in which he was featured are "The Great White Hope" (for which he received a Tony Award), "Dr. Strangelove," "River Niger," "The Cherry Orchard," "Of Mice and Men," and many Shakespearean plays.

Statement

Collection Overview

Description

Statement gives the details of his sighting of a Zeppelin-like object near Forest Hill in Placer County, California, in the summer of 1896; the statement was typed, witnessed, and notarized in July 1961.

Background

Silas H. Palmer was a successful construction engineer, builder, and financier; he was a partner in the firm that helped to build the Stanford Stadium in 1921. He endowed a professorship in civil engineering at Stanford University.

Extent

Guide to the J. Allen Hynek (1910-1986) Papers

Collection Title: J. Allen Hynek (1910-1986) Papers**Dates:** 1925-1988**Identification:** 11/3/5/6**Creator:** Hynek, J. Allen (Joseph Allen), 1910-1986**Extent:** 14 Boxes**Language of Materials:** English

Abstract: Astronomer J. Allen Hynek led Northwestern's Astronomy Department into the Space Age and became the nation's foremost expert on unidentified flying objects (UFOs). He oversaw the significant expansion of Northwestern's Astronomy Department and made important contributions to his field, most notably by successfully incorporating television technology into telescopes for the first time. However, he was best known for his work on UFOs. His work inspired the film "Close Encounters of the Third Kind." The Hynek Papers provide a record of Hynek's professional life but offer scant insight into his personal affairs. The papers include biographical materials, clippings, reports relating to Hynek's work on Project Stargazer, and some materials pertaining to Hynek's UFO work and his work at Northwestern.

Acquisition Information: The J. Allen Hynek Papers comprise several accessions. Most of the clippings and correspondence were transferred to the University Archives by the Office of University Relations as Accession Number 74-44. Biographical information and teaching notes were transferred from the University Archives' Biographical and General Files as Accession Numbers 79-140 and 82-138. Materials relating to the Stargazer Project were transferred to the University Archives by the Department of Physics and Astronomy as Accession Number 88-269 on November 9, 1988. Additional newspaper clippings, notes, reprints, and materials relating to the Corralitos observatory were donated to the University Archives by Mimi Hynek as Accession Number 92-44 on May 4, 1992.

Processing Information: Processor: Dan Schwerin, July 8, 2002.

Separated Materials: One-half cubic foot of duplicate and extraneous material was discarded. The following four of Hynek's books were added to the University Archives' Faculty Authors Collection: Astrophysics. (Hynek, ed.). New York: McGraw-Hill Book Company, 1951. Challenge of the Universe. (with Norman D. Anderson). Washington, D.C.: National Science Teachers Association, 1962. Astronomy One. (with Necia H. Apfel). Menlow Park, Calif.: W. A. Benjamin, 1972. The UFO Experience: A Scientific Inquiry. Chicago: Henry Regnery Company, 1972.

Conditions Governing Access: Conditions governing access: None.

Repository: Northwestern University Archives

Biographical/Historical Information

Astronomer J. Allen Hynek led Northwestern's Astronomy Department into the Space Age and became the nation's foremost expert on unidentified flying objects (UFOs). He oversaw the significant expansion of Northwestern's Astronomy Department and made important contributions to his field, most notably by successfully incorporating television technology into telescopes for the first time. However, he was best known for his work on UFOs. First as an Air Force investigator and then as a lonely voice in the scientific community calling for more serious study of UFOs, he became the most important advocate of UFO research and inspired the film "Close Encounters of the Third Kind."

Like Mark Twain, Hynek was born and died as Halley's Comet passed overhead. The coincidence was particularly appropriate. In an undated lecture, Hynek wrote: "There is one comet that connects the Age of Superstition with our present Age of Science—and that is Halley's Comet." He saw himself as a prophet preaching science to an age still too mired in superstition to tolerate the unexplainable. Halley's Comet was therefore the perfect metaphor for Hynek. At the bottom of the page he scrawled a few lines from Shakespeare's Julius Caesar: "When beggars die, there are no comets seen; the heavens themselves blaze forth the death of princes."

Josef Allen Hynek was born May 1, 1910 in Chicago to Czechoslovakian parents. He graduated from Crane Technical High School in 1927 and went on to the University of Chicago, where he earned a Bachelor of Science degree in 1931. As a graduate student he spent four years at the University of Chicago's Yerkes Observatory in Williams Bay, Wisconsin. He received his Ph.D. in 1935.

In 1936 Ohio State University hired Hynek as an instructor in the department of physics and astronomy. In 1939 he was promoted to assistant professor. He taught summer school at the Harvard College Observatory in 1941. While on leave from Ohio State from 1942 to 1946 Hynek worked on developing a proximity fuse for the Navy at Johns Hopkins University's Applied Physics laboratory. He returned to Ohio State in 1946 as associate professor and director of the McMillin Observatory. He was promoted in 1950 to full professor and became assistant dean of the Graduate School.

In 1948 Hynek began consulting on a new Air Force project at Wright-Paterson Air Force Base in Dayton, Ohio. Its purpose was to investigate reports of unidentified flying objects. Because of his position at Ohio State, Hynek was a logical choice as a scientific advisor to the project. His involvement deepened when the Air Force reorganized its investigation as "Project Blue Book" in 1952.

Hynek took a leave from Ohio State in 1956 to join the effort to put the first satellite into space. As associate director of the optical tracking program at the Smithsonian Astrophysical Observatory (SAO) in Cambridge, Massachusetts, Hynek was part of a team that set up a network of tracking stations around the world to observe the flight of the planned U.S. satellite. Created in 1956 as part of the International Geophysical Year (IGY), the Satellite Tracking Program (STP) established twelve tracking stations around the world, located in Florida, New Mexico, Hawaii, Curacao, Peru, Argentina, Iran, South Africa, India, Spain, Japan, and Australia. Hynek was also involved in the design of a satellite tracking camera that was created by James C. Baker and Joseph Nunn for use in the twelve STP stations. The Moonwatch Division of STP was a program that organized and assisted groups of amateur astronomers who volunteered to collect data on artificial earth satellites.

On Oct. 4, 1957 the Soviet Union announced the stunning launch of Sputnik, the first successful artificial satellite. Hynek, along with his colleague Fred Whipple, conducted two press conferences a day to report on Sputnik's progress and reassure the public of its safety. That same year, Hynek and his colleagues began a partnership with the Air Force to create a balloon-based astronomy program. Eventually dubbed Project Stargazer, the program developed slowly over the next few years, culminating in a few disappointing failures. Hynek would eventually give up on balloons, favoring instead installing a telescope on the moon.

In 1959, Hynek accepted Northwestern's offer to become chairman of its small astronomy department. Hynek brought his pioneering work on image orthicon astronomy, which combined television technology with telescopes, with him to Northwestern. The image orthicon greatly enhanced the telescopes' light gathering powers and the National Science Foundation proposed that this could be the most significant astronomical advance since photography. In 1961 he installed the first working image orthicon telescope at Organ Pass Observatory outside the town of Las Cruces, New Mexico. This observatory, also called the Organ Mountain Observatory and the FAST Observatory, was a former STP station that had recently been purchased by Northwestern. The following year, he installed a second image orthicon telescope at the Dearborn Observatory in Evanston.

Corralitos Observatory was later built on the same property as the Organ Pass Observatory, and both New Mexico observatories were used by Northwestern throughout the 1960s and early 1970s. In 1966 the department received a big boost with the opening of the Lindheimer Astronomical Research Center on the Evanston campus. During Hynek's first years as chairman, the department, which had previously offered only one course, expanded to more than a dozen, hiring twenty new faculty members and attracting increasing numbers of graduate students. Hynek himself was a popular teacher, noted for his humor and his eccentric appearance.

While at Northwestern Hynek continued to consult on the Air Force's Project Blue Book. In March, 1966, he investigated a well-publicized UFO sighting in Michigan. His conclusion that the UFO was nothing more than swamp gas angered many in Michigan, including Rep. Gerald Ford, who hauled Hynek before a congressional committee. The fiasco must have had some impact on Hynek because by October he was publicly calling for serious study of the "persistent and disturbing phenomenon" of UFOs and criticizing his fellow scientists for dismissing all UFO spotters as "hysterics or crackpots or cranks." Newspapers around the country picked up on Hynek's apparent about-face. He intensified his message when the Air Force closed Project Blue Book after a 1969 report by Dr. Edward Condon of the University of Colorado concluded that UFOs did not merit further inquiry. After 1969, Hynek was virtually alone in the scientific community in supporting the continued study of UFOs.

In October 1973, a furor similar to the 1966 Michigan incident erupted in Pascagoula, Mississippi, when two men reported being abducted by aliens. Hynek administered a polygraph test and trumpeted its positive results to the press, which disseminated a sketch of the aliens throughout the country. As in 1966, a rash of new UFO sightings followed, but this time Hynek did nothing to dampen the UFO fervor. Instead, Hynek took advantage of the Mississippi event to launch his Center for UFO Studies in Evanston. Intended as a clearing-house for UFO study and sightings, the Center operated a well-publicized hotline for law enforcement officers seeking help in dealing with sightings.

Largely in response to the Condon report, Hynek wrote *The UFO Experience*, which was published in 1972 by Henry Regnery Company. In the book, Hynek famously laid out the three classes of "close encounters." A close encounter of the first kind is when a UFO is simply observed and leaves no evidence. The second kind leaves physical traces such as burns and broken branches. A close encounter of the third kind is when contact is actually made. In 1977 Director Stephen Spielberg took "Close Encounters of the Third Kind" as the title of his twenty-million-dollar film about UFOs. Hynek served as technical advisor to the film and made a cameo appearance in it.

As Hynek's fame as a UFO expert grew, administrators at Northwestern became increasingly embarrassed by the resulting publicity. They were adamant that Hynek's Center for UFO Studies be kept separate from the University. Hynek retired from Northwestern in June 1978 at the age of 68, devoting most of his time thereafter to the Center. He was forced to move the cash-strapped Center to his home in 1981, however, and to disconnect the toll-free hotline in 1982. In 1981, he persuaded Northwestern to donate the now-closed Corralitos Observatory in New Mexico to a non-profit group he headed, the Corralitos Astronomical Research Association (CARA). In search of funds, Hynek moved the Center for UFO Studies to Arizona in 1984. He died on April 27, 1986 from a malignant brain tumor at Memorial Hospital in Scottsdale, Ariz. He was survived by his second wife, Miriam (Mimi) Curtis Hynek, whom he had married in 1942, and their five children. Mimi Hynek died in 1996.

Scope and Content

The Hynek Papers span the years 1953 to 1988 and fill four boxes. They provide a record of Hynek's professional life but offer scant insight into his personal affairs. Missing are any personal correspondence or private papers that might shed some light on the person behind the media-created personality.

The papers include biographical materials, clippings, reports relating to Hynek's work on Project Stargazer, and some materials pertaining to Hynek's UFO work and his work at Northwestern.

Biographical material includes various curriculum vitas through the years; press kit bios; profiles; obituaries from The Chicago Tribune, The New York Times, The Los Angeles Times, Time, and Newsweek and a 1996 obituary for Mimi Hynek. Also included are a few pieces of promotional material and memorabilia, including a misspelled Trivial Pursuit card featuring Hynek as an answer, and some correspondence.

Clippings from newspapers, magazines, and journals cover the early 1950s to 1988 and are arranged chronologically. Most of the clippings come from the 1970s.

The clippings begin with the "Scanning the Skies" columns Hynek wrote for The Columbus Dispatch throughout the 1950s. Many of the columns are undated. The first dated column is from February 15, 1953 and the last one is dated July 19, 1959, just before Hynek's appointment to Northwestern was announced. "Scanning the Skies" explained astronomical phenomena, tracked the beginnings of the space race, and promoted the construction of a new planetarium in Columbus. While Hynek wrote most of these columns during his time at Ohio State, some were written during his leave at Harvard and the Smithsonian from 1956 to 1960. Of special note is the column from October 23, 1955, which may be Hynek's first public comment on UFOs, and the pieces relating to the launch of Sputnik in October 1957.

Most of the clippings from the early to mid 1960s concern the burgeoning U.S. Space Program, and especially Hynek's unfulfilled vision of a lunar-based or balloon-carried telescope. The clippings from 1966 document the major UFO sighting in Michigan that launched Hynek into public view as a UFO expert, the role that he was to play for the rest of his life.

The bulk of the clippings date from the 1970s, when UFOs and Hynek were most prominent. The 1972 publication of Hynek's book, *The UFO Experience*, the Oct. 1973 UFO sightings in Mississippi, the 1973 founding of the Center for UFO Studies in Evanston, and the Christmas 1977 release of Steven Spielberg's "Close Encounters of the Third Kind" were all major media moments for Hynek and are well documented.

The final clippings relate to Hynek's retirement from Northwestern, his eventual move to Arizona, and his death in 1986.

The last Clippings folder holds undated clippings.

Project Stargazer materials document Hynek's long-running effort to create a viable balloon-based astronomy program. The first twelve folders hold the multi-volume report on the early years of the project written in 1961 by Hynek's deputy at the Smithsonian and former student at Ohio, G.J. Nielson. His report covers the years 1957 – when the Air Force, Hynek, and his colleagues at the Smithsonian began discussing the balloon project – to 1961, and includes extensive documentation for each of its six volumes. The materials in the thirteenth folder add to this record a 1960 proposal and a 1964 pamphlet written by Hynek promoting the idea of balloon-borne astronomical observation. It also contains a scathing final report by Hynek after Project Stargazer lost funding and was shut down in 1966.

UFO files document the publication of Hynek's 1972 book, *The UFO Experience*, and the 1973 founding of the Center for UFO Studies. Several reviews, press releases, and excerpts from the book are included. Also included are issues of the newsletter published by the Center, *The International UFO Reporter*, from 1976 to 1978, and promotional material from the National Speakers Bureau, which organized some of Hynek's UFO lectures.

Northwestern University material includes teaching notes and interoffice correspondence. The correspondence, some of it between University Relations staff about Hynek, mostly concerns his various media appearances and other publicity efforts, including promoting his book. It reveals a tense relationship between Hynek and a university that sometimes found the UFO-related publicity embarrassing. University officials were particularly anxious that the Center for UFO Studies not be identified as a Northwestern project. For his part, Hynek expressed frustration at the lack of support he received. Teaching notes cover a wide range of topics; aside from a few lecture outlines, notes are contained on index cards arranged alphabetically by subject. Of special interest is a note about Halley's Comet, the appearance of which coincided with Hynek's birth and death.

Addition, Boxes 5-7

This addition to the J. Allen Hynek Papers fills four boxes and spans the years 1952 to 1985, with the bulk of the material dating from the early 1960s. The majority of the material in the addition is technical, including budgets, contracts, and inventories. Correspondence and status reports are also included, however, and are more accessible. The addition contains records from two of Allen Hynek's major research projects: Project Stargazer, his effort to mount a balloon-based astronomy program, and Image Orthicon, his groundbreaking marriage of television technology with telescopes. Hynek's Image Orthicon work was funded by separate contracts with NASA and the Air Force, and the files are organized accordingly. The addition also includes one folder and one tube of unidentified (possibly observatory equipment) blueprints.

Addition, Boxes 8-14

This addition to the J. Allen Hynek Papers fills seven boxes and spans the years 1925 to 1982, with the majority of the material dating from the late 1950s to early 1960s. The bulk of the addition consists of biographical materials (most dated earlier than in the original series), records of projects Hynek worked on, and UFO sighting reports.

Biographical material includes press releases, clippings, publications and notes. The newspaper clippings span the years 1956 to 1958 during which Hynek and his colleagues at the Smithsonian Astrophysical Observatory were often cited in news reports on Sputnik and subsequent satellites, as well as the Satellite Tracking Program. Of special note within the biographical materials are several issues of the literary magazine of Crane Technical High School, which contain short stories written by Hynek. Reprints and publications folders include articles from the years 1935 to 1978 including Hynek's 1935 dissertation: "A quantitative study of certain phases of F-type spectra." There are also reprints of articles from 1953 to 1955 in which Hynek is acknowledged or thanked, as well as a folder documenting Hynek's travels and schedule during the years 1958-1960 reflects his role in promoting the satellite tracking program and involvement in various projects.

Subject files consist of six folders in the subject files that briefly cover a few of Hynek's research areas.

During the years following the launchings of the first artificial earth satellites, Hynek collected teletype news reports released by the Soviet news agency TASS. These are arranged chronologically and by topic.

IGY-STP (International Geophysical Year - Satellite Tracking Program) files are divided into three groups: the first section contains general information, correspondence, memos, and press releases regarding STP and the IGY generally. The second section consists of materials relating to the satellite tracking stations: the design of the stations and the telescope cameras, the costs for materials and personnel, and photographs of the stations and the equipment. Of special interest is the folder of Hynek's trip reports, which appear to be transcriptions of audio tapes documenting Hynek's experience traveling to prospective sites around the world (including Iran, Curacao, and Spain) in an effort to establish tracking stations. The last section of STP-related material concerns the Moonwatch division and includes a newsletter for Moonwatch participants as well as a manuscript "A Moonwatcher's Manual," written by Hynek.

Project Stargazer materials provide additional documentation of Hynek's balloon-based astronomy program. This includes three folders of correspondence spanning the dates 1959 to 1966, arranged chronologically. There is also a folder of many photographs, negatives, and contact sheets (both B&W and color images) of the successful launching of the Stargazer balloon in China Lake, California in 1962, in which pilot Joseph Kittinger and astronomer William C. White rose to an altitude of 82,200 feet.

Image orthicon materials include general information on the image orthicon technology used at both the New Mexico observatory and the Dearborn Observatory in Evanston. There are several folders of photographs taken with the image orthicon enabled telescopes of specific events and also general or unidentified images. UFO files are organized alphabetically by folder and chronologically within the folder. This material pertains to Hynek's investigations of UFO phenomena, dating from 1959 to 1971. The first four folders contain correspondence from people reporting UFO sightings as well as a number of letters from school children wanting more information about UFOs in general. The next several folders contain newspaper clippings and publications related to UFO sightings and investigation as well as a small number of photographs of popular depictions of aliens and UFOs. The next thirty-three folders document individual sighting reports and investigations, and are arranged alphabetically by the last name of the person reporting the sighting or the location of the sighting. These folders contain correspondence (mostly with William Powers, Hynek's associate, or with Hynek), sight reports (hand-written notations of what the person saw), calculations, typed reports (mostly by William Powers). [Note: For William Powers, see also Faculty Biographical Files, Archives Room 110.] Some of the reports were written for or published in Project Blue Book (the U.S. Military's files on UFOs). The last two folders contain negatives and photographs of purported UFOs, usually sent to Hynek in letters reporting a sighting or obtained from witnesses of investigated sightings.

The materials relating to Hynek's establishment of the two New Mexico Observatories, Organ Pass and Corralitos, include correspondence between staff based in New Mexico and Dearborn Observatory administration in Evanston, photographs of both observatories, and documents pertaining to the transfer of ownership of the Corralitos Observatory to Hynek's non-profit group, CARA.

The final section of the addition contains miscellaneous Photographs and negatives collected by Hynek, arranged chronologically. They include photographs of colleagues at a colloquium, portraits of visiting professors, pictures of observatory equipment, and unidentified astronomical photographs taken through telescopes.

Arrangement of Materials

The papers include biographical materials, clippings, reports relating to Hynek's work on Project Stargazer, and some materials pertaining to Hynek's UFO work and his work at Northwestern. Clippings from newspapers, magazines, and journals cover the early 1950s to 1988 and are arranged chronologically. Northwestern University materials include teaching notes. Aside from a few lecture outlines, notes are contained on index cards arranged alphabetically by subject.

Our Mission

The Special Libraries Division supports the overall mission of Northwestern University Library to provide information resources and services of the highest quality to sustain and enhance the University's teaching, research, professional, and performance programs.

The specific contributions of Special Libraries to the fulfillment of the mission of the Library as a whole include the creation and management of special, archival, and other curated collections in specific subject areas, uniting rich primary, original, rare, and unique materials in traditional and digital formats--among them text, manuscript, photograph, film, sound, and image--with strong and diverse collections of supporting published materials.

The Special Libraries Division is committed to meeting the needs of the Northwestern community by promoting its resources through all available means and through advocacy of the use of primary and special materials in research and teaching. Essential to the accomplishment of this mission is a robust digitization program which develops customized strategies and platforms to make our collections accessible digitally, worldwide and in perpetuity. Beyond Northwestern, the libraries and the archives of the Special Libraries Division also serve regional, national, and international constituencies in ways appropriate to each.

Collection Summary

Title	Carlos Allende papers
Dates (Inclusive)	1943-1994 (bulk 1957-1984)
Creator	Allende, Carlos
Abstract	Abstract The collection contains correspondence and other materials on theories of interstellar travel and UFOs compiled by Carlos Allende, who claimed to have witnessed the "Philadelphia Experiment" of 1943.
Collection Number	09056
Size	2.28 cubic ft. (4 boxes)
Repository	University of Wyoming. American Heritage Center.
Language(s)	English

Biography of Carlos Allende

Carlos Allende was born May 31, 1925 in Springdale, PA. During World War II he served in the Marines from July of 1942 to May of 1943. He claimed to have witnessed the disappearance of the U.S. destroyer escort USS Eldridge while serving aboard the SS Andrew Furuseth in what became known as the "Philadelphia Experiment," and that afterwards he was personally tutored by Albert Einstein on Unified Field Theory. The story of the supposed event emerged in 1955 after Morris K. Jessup, author of The Case for the UFO, received letters from Carlos Allende informing Jessup of the experiment. Intrigued, yet skeptical, Jessup wrote Allende back requesting any evidence he had to support his claim. Months later, in May of 1955, Jessup received his response from Allende, who had now anglicized his name to Carl M. Allen. Unable to recall any specific dates for the experiment or news accounts his response and assertion of the event has been doubted. In the years after his famous letters to Morris Jessup, Allende reportedly refuted and again reclaimed his assertion of the experiment. He thoroughly researched interstellar space travel, UFOs, and Einstein's Unified Field Theory and was described as an eccentric and intelligent individual. He died in March of 1994 at the age of 68.

Arrangement of the Collection

The collection is divided into three series.

Scope and Content

The collection contains documents and materials used by Carlos Allende for his research on the "Philadelphia Experiment," Unified Field Theory, interstellar space travel, and UFOs. Documentation includes letters to and from Allende and various authors and professors in the scientific community, newspaper clippings, his military history with discharge forms, a letter of presidential commendation (copied) from Harry Truman, his personal writings, government documents, and other printed material. A large portion of the collection is photocopies.

Restrictions

Access Restrictions

There are no access restrictions on the materials for research purposes, and the collection is open to the public.

Copyright Information

The researcher assumes full responsibility for observing all copyright, property, and libel laws as they apply.

Preferred Citation

Item Description, Box Number, Folder Number, Collection Name, Collection Number, American Heritage Center, University of Wyoming.

Processing Information

The collection was processed by Ben Schnake in November, 2008.

Acquisition Information

This material was received from Carlos Allende from 1985-1987 and Diana Wess on May 9, 1995.

Related Materials

There are no known other archival collections created by Carlos Allende at the date of processing.

ARCHIVEGRID

Franklin E. Roach Papers, 1931-1994.

Roach, F. E. (Franklin Evans), 1905-1993.

[University of Alaska, Fairbanks](#)

Access limited to Alaska and Polar Regions Collections research room hours.

[Contact Information](#)

[Finding aid](#)

☐ Details

12 cubic feet.

Access limited to Alaska and Polar Regions Collections research room hours.

The bulk of the Franklin E. Roach Papers consists of his notes, drafts, charts, correspondence, photographs, and publications generated from his research in upper-atmospheric physics. The materials also include Roach's lecture notes, his correspondence files from his work on unidentified flying objects, and some biographical papers.

Permission for commercial use must be obtained from the Archivist.

Franklin Evans Roach contributed greatly to the field of upper-atmosphere physics, conducting and publishing many photometric studies of airglow, zodiacal light, and diffuse galactic light.

Finding aid available in research room; box level control.

[Contact Information](#)

☐ Details

ca. 17,000 items (27 linear ft.).

This collection consists of correspondence, manuscripts, drawings, diaries, notebooks, and photographs. Sanderson began his travels in the jungles of Asia and Africa before starting his formal schooling at Eton and Cambridge in the late 1920s and early 1930s. His papers reflect his interest in animals, jungles, and natural history. Late in his life Sanderson's interest turned to UFO's and he was the director of the Society for the Investigation of the Unexplained.

Ivan Terence Sanderson was a zoologist.

☐ Details

1 linear ft.

Typescripts of The Rampant Age, The Bells of St. Ivan's, The Room Beyond, and photographs.

Author. Born March 26, 1909, in Washington, D.C., died 1994 in Dunedin, Florida. A child prodigy, Carr was published in national magazines at the age of 15 and published his first novel, The Rampant Age (1928), at 17. He only authored two more novels, The Bells of Saint Ivan's (1944), and The Room Beyond. Science fiction works, Beyond Infinity (1951), a collection of stories, and Invaders (1954), were published later. Carr was a prominent proponent of Unidentified Flying Objects and is alleged to have perpetrated major hoaxes, including the notion that alien bodies were recovered from a UFO crash and autopsied by the U.S. government.

Index available.

Abstract

This collection includes correspondence, articles, newsclippings, photographs, and recordings, concerning Menzel's documentation of UFOs as natural phenomena explainable in scientific terms. One can find material on the National Investigation Committee on Aerial Phenomena, Project Blue Book, the Velikovsky controversy, and a card file of meteor activity, 1946-1961.

Background note

Donald Howard Menzel was an astrophysicist.

Collection information

Provenance

Presented by Donald Howard Menzel and family, 1963-1982; accessioned, 10/--/1971. See in-house shelf list for additional accession numbers and dates.

Related material

[Donald Howard Menzel's Autobiography](#) is also located in the American Philosophical Society Library (Mss.B.M522).

James E. McDonald papers, (1904-1997)

Collection Number: MS 412

Collection Summary

Creator:	McDonald, James E., 1920-1971
Collection Name:	James E. McDonald papers,
Inclusive Dates:	1904-1997
Physical Description:	66 linear feet
Abstract:	Papers, 1904-1997 (bulk 1958-1971). Mostly correspondence, cases, reports, interviews, and printed materials relating to James E. McDonald's investigations, 1958 to 1971, into unidentified flying objects and similar sightings.
Collection Number:	MS 412
Repository:	University of Arizona Libraries, Special Collections University of Arizona PO Box 210055 Tucson, AZ 85721-0055 Phone: 520-621-6423 Fax: 520-621-9733 URL: http://speccoll.library.arizona.edu/

Biographical Note

Born in 1920 in Duluth, Minnesota, James E. McDonald was educated at the University of Omaha (B.A. Chemistry, 1942), Massachusetts Institute of Technology (M.S. Meteorology, 1945), and Iowa State College (Ph.D. Physics, 1951). He served in the United States Navy from 1942 to 1945, and, for the following years taught or researched at Naval Aerology School, Iowa State College, and University of Chicago. He married Betsy Hunt in 1945, and they had six children.

He was appointed Associate Director at the University of Arizona's Institute of Atmospheric Physics from 1954 until 1956, and was a professor in that department from 1956 until his death in 1971. His areas of research included cloud physics, weather modification, and micrometeorology. Internationally known, he was a member of the National Academy of Sciences, American Meteorological Society, American Geophysical Union, and other national and international societies. Relentless in his pursuit of knowledge and understanding, Mr. McDonald was an inspiring lecturer and continuously active in university affairs.

He was the author of *Physics of Cloud Modification*, in the fifth volume of *Advances in Geophysics*, and served as contributing editor to *The Glossary of Meteorology*, and contributed many articles to his field of study. His scientific interests also led him to contribute writings and testimony to contemporary issues of his time such as the supersonic transport debates, placement of Titan II missiles around the Tucson basin, and scientific dismissal of unidentified flying objects. His hypothesis that UFOs were extraterrestrial instruments on information gathering missions, and his beliefs that current scientific reports, such as the Condon Report, were superficially done, led him to investigate sightings and combat governmental impediments into his research topics.

Scope and Content Note

Papers, 1904-1997 (bulk 1958-1971). Mostly correspondence, cases, reports, interviews, and printed materials relating to James E. McDonald's investigations, 1958 to 1971, into unidentified flying objects and similar sightings, and governmental investigations, responses and reports, including the United States Air Force's Project Blue Book, and Edward U. Condon's 1969 report, *A Scientific Study of Unidentified Flying Objects*, relating to these phenomenon. Correspondence, 1958-1971, is between McDonald and various government and military officials, other scientific and professional UFO researchers. Case files, 1945-1970, include investigations, mostly in the United States, Canada, Australia, and New Zealand, on sightings by military pilots, tower control officers, law enforcement officers, scientists and citizens.

Contains photocopies of approximately 580 Project Blue Book sighting reports, mostly by pilots, and some with airborne and ground radar verification. Also includes four handwritten journals, 1958-1971, describing UFO investigative activity; papers and talks, 1966-1977, given before conferences, symposia, and groups; research materials, including his 1967 trip to Australia and New Zealand; a referenced outline of an unpublished book; over 80 audio-tapes of interviews, talks, and conversations on UFO topics; photographic materials on various subjects; and supplemental materials.

Organization

This collection is organized into two subgroups. Subgroup one has seven series. Subgroup two has one series.

Subgroup I: UFO Research Files 1904-1971

Series I: General Files, A-Z, 1945-1971

Series II: Project Blue Book Radar-visual Files and Reports, 1947-1968

Series III: Research Files, 1904-1969

Series IV: Publications on Project Grudge, Blue Book, Condon, Others, 1951-1969

Series V: Photographic Materials,

Series VI: Audio-tapes: Interviews of Witnesses by JEM, 1954-1967

Series VII: Supplemental Materials, 1960-1971

Subgroup II: General Research Files 1953-1997

Series I: Research Files, 1953-1997

- 33 Miscellaneous files. , 1970-1971
 - Box 33 contents: files relating to the debate on the environmental effects of supersonic transports, includes his statement before the House Subcommittee on Transportation Appropriations concerning the transport program.

Subgroup 2: General Research Files, 1953-1997

Series I: Research Files, 1953-1997

- box
- 34 Absorption Data - water and ice.

34 Absorption of solar radiation by water vapor.
34 Acoustics.
34 Aerodynamics.
34 Air pollution.
34 Air pollution - pre 1950 clippings.
34 Air pollution - Arizona (2 folders).
34 Air pollution - Arizona - Tucson Daily Citizen.
34 Air pollution - Pima County. , 1969
34 Air pollution - Phoenix and non-Tucson Arizona.
34 Air pollution - Tucson.
34 Air pollution - mining .
34 Air pollution - sulfur dioxide.
34 Air pollution - Los Angeles and other California .
34 Aircraft performance and effects on atmos..
34 Aircraft - airport sequenced approach lights.
34 Aircraft - cabin depressurization effect.
34 Aircraft - Jettisoning of fuel.
34 Aircraft - shock waves on wings.
34 Airglow - astronomy.
34 Arctic.
34 Arid land - colloquium climatology.
34 Arid land - Rockefeller .
34 Arid zone climatology .
34 Astronomy.
34 Selected astronomical data.
34 Aurora. , September 22-23 1957
34 Balloon, near flight records.
34 Balloon dynamics.
34 Balloon inflation back-pressures.

box

35 Banner clouds.
35 Biology, cellular.
35 Bomb phenomena.
35 Bomb phenomena - other than fallout.
35 Brown Mountain Lights.
35 Brownian movement - history.
35 Calendar.
35 Carbon 14 and Carbon Dioxide.
35 Carbon monoxide.
35 Chemistry and composition of the atmosphere.
35 CAT - Clear Air Turbulence.
35 Climatology - general.
35 Climatology - pre 1950 clippings.
35 Climatology - Pleistocene Age.
35 Climatology - Pleistocene.
35 Climatology - Paleoclimatology.

35 Climatology - Paleoclimatology pre 1950 clippings.
35 Climatology - Homogeneity of Records.
35 Climatology - Arizona cloud cover study. , 1957-1958
35 Climatology - Arizona Arizona seasonal precip. Data.
35 Climatology - Arizona diurnal variation of precip.
35 Climatology - Arizona precip. double mass study.
35 Climatology - Arizona precip. correlation studies.
35 Climatology - Arizona precip. length of record study.
35 Climatology - Arizona precip. 10 year moving averages.
35 Climatology - Arizona winter precip.
35 Climatology - Arizona precip frequency distribution of amounts.
35 Climatology - Arizona precip tetrachoric correlation test.
35 Climatology - Arizona diurnal variation of mixing ratio.
35 Climatology - Arizona mountain precip. storage.
35 Climatology - Arizona precipitable water.
35 Climatology - Arizona winter wind directions.
35 Climatology - data Mexico.
35 Climatology - data precipitation deck notes.
35 Climatology - data analysis effects of inhomogeneity .
35 Climatology - desert precipitation rates.
35 Climatology - Southwest secular precip. trends.
35 Climatology - Southwest secular precip. trends.
35 Climatology - Western U.S. precip - 10 year moving ave.
box
36 Climatology - U.S. mean mixing ratios
36 Climatology - U.S. rel. humidity - time x-sections.
36 Climatology - U.S. monthly mean relative humidity.
36 Climatology - U.S. mean precipitable water distrib.
36 Climatology - U.S. temp. precip. relations, wettest vs. driest.
36 Climatology - U.S. precip. seasonal and annual variability.
36 Climatology - U.S. precipitation efficiency.
36 Climatology - U.S. - mixing ratio - cross-section of Southern U.S.
36 Climatology - U.S. precipitable water.
36 Climatology - U.S. upper level anticyclone.
36 Climatic models.
36 Climate modification.
36 Climate modification inadvertent (2 folders).
36 Climate modification inadvertent, La Porte Anom.
36 Cloud condensation level local observ.
36 Cloud modification rainmaking pre 1950s clippings.
36 Cloud photogrammetry K-17, misc. notes.
36 Cloud photogrammetry K-17 IBM data.
36 Cloud photogrammetry K-17 calibration.
36 Cloud physics, general.
36 Cloud photographs, pre 1950's clippings.
36 Cloud photographs.

- 36 Cloud physics 1961 Australian Conference. , 1961
- 36 Cloud seeding - misc.
- 36 Cloud seeding reports - misc.
- 36 Cloud seeding Arizona.
- 36 Cloud seeding Arizona - Flagstaff.
- 36 Cloud seeding Australian experiments.
- 36 Cloud seeding benefit/cost ratio.
- 36 Cloud seeding - California Kern County.
- 36 Cloud seeding Quakers - Bosco.
- 36 Cloud seeding Jeffery.
- 36 Cloud seeding Quakery - Krick.
- box
- 37 Cloud seeding carbon black (2 folders).
- 37 Cloud seeding dry ice.
- 37 Cloud seeding and ecology.
- 37 Cloud seeding evolution and statistics.
- 37 Cloud seeding - fringe cases and quakery.
- 37 Cloud seeding.
- 37 Cloud seeding - Elliott North American Weather Cons.
- 37 Cloud seeding frontal storms.
- 37 Cloud seeding India.
- 37 Cloud seeding legal problems.

- 37 Collision Theory Foote.
- 37 Drop growth by condensation and collection.
- 37 Collision Theory growth of snowflakes by Wake Capture.
- 37 Combustion and flames.
- 37 Combustion process.
- 37 Comets.
- box
- 38 Composition and evolution of earth's atmosphere - Berkner and Marshall.

38 Computers.
38 Computers pre 1950 clippings.
38 Condensation level, study of lifting.
38 Condensation nucleation Twomey.
38 Condensation nucleation.
38 Condensation nucleation homogeneous.
38 Condensation nuclei condensation on Ions.
38 Condensation nucleation on insoluble particles.
38 Condensation nuclei observation and measurement.
38 Condensation due to dynamic effects.
38 Condensation criterion .
38 Condensation criterion.
38 Convection.
38 Convection - numerical modeling.
38 Convection modeling.
38 Values of constants.
38 Contrails.
38 Conolis effect.
38 Coronas and St. Elmos fire.
38 Cosmic rays.
38 Cosmic rays Chapman Effect.
38 Crystallography metals.
38 Cube roots, calculation of.
38 Cumulus clouds.
38 Cumulus clouds squires reprints.
38 Cumulus clouds caused by fires.
38 Deliquescence and hydrates.
38 Deposition paper.
38 Desalination.
38 Desert.
38 Dew.
38 Diffusion.
38 Diffusion Caesar's Breath.
38 Diffusion, atmospheric long range transport.
38 Diffusion coefficient - compensated.
38 Diffusional growth of drops - steady-state approximation.
38 Diffusional growth of drops in an updraft.
38 Diffusional growth of drops - Langmuir.
38 Diffusional growth of particles.
38 Diffusional growth of ice droplets.
38 Diffusional growth of ice crystals.
38 Distribution functions.
38 Drag - parachutes - dynamics.
38 Drop breakup.
38 Drop physics.
38 Drop production by artificial means

38 Drop shape.
box
39 Drop size distributions covering fraction theory.
39 Drop size measurements spattering.
39 Drop size distribution measurement of.
39 Droplets, very small diam <2m..
39 Droughts.
39 Dust devils.
39 Dust and dust nuclei.
39 Dust - stratospheric.
39 Dynamics of cumulus clouds bubble spectra K17.
39 Dynamics of cumulus clouds.
39 Dynamics - drag flow past a cylinder.
39 Dynamics - drag flow past spheres.
39 Earthquakes and earth interior.
39 Ecology (2 folders).
39 Ecology, food and population problems.
39 Ecology - pesticides.
39 Electricity of the atmosphere.
39 Electrostatics of drops and clouds.
39 Electrostatics of clouds and drops - Latham.
39 Empiricism.
39 Energetics.
39 Energy - vertical distribution of internal and potential.
39 Evaporation - lakes, etc.
39 Evaporation kinetic model.
39 Evaporation of raindrops - Cholley paper.
39 Evaporation - precipitation fallacy.
39 Evaporation - precipitation ratio.
39 Evolution.
39 Explosion physics.
39 Fall velocity of drops and snow crystals.
39 Fall velocity of spheres.
39 Fall velocity of small particles.
39 Fall velocity of small particles - Facy Effect.
39 Fallout Met.
39 Filters, Millipore.
39 Fire.
box
40 Fog.
40 Fog dispersal pre 1950 clippings.
40 Fog - ice fog.
40 Fog, numerical modeling of fog.
40 Fog, steam.
40 Fog - drip; collection of fog droplets by plants.
40 Forecasting weather pre 1950's clippings.

40 Free fall parachutes.
40 Freezing nucleation (2 folders).
40 Freezing nucleation homogeneous - thermodynam.
40 Freezing nucleation Fletcher.
40 Freezing nucleation in the atmosphere.
40 Freezing nucleation supercooling.
40 Freezing nucleation due to expansion - pop bottle exp.
40 Freezing nucleation by silver iodide.
40 Freezing nuclei Arizona observations.
40 Freezing nuclei NCAR counter.
40 Freezing nuclei Bowen's Hypothesis.
40 Freezing nuclei from smelter stacks.
40 Freezing nuclei counts. , 1958
40 Freezing nuclei, natural observations and measurements.
40 Freezing nuclei measurements.
40 Friction.
40 Game Theory, etc.
40 Geochronology.
40 Geomagnetism.
40 Green flash.
40 Hail.
40 Hail damage.
40 Heat budget of atmosphere latent heat transport.
40 Helium.
40 History of cloud physics.

box

41 History of cloud physics Bergeron Hypothesis.
41 History of cloud physics - James Espy.
41 History of cloud modification.
41 History of diffusional growth of cloud droplets.
41 History of rainmaking (2 folders).
41 Hornet light.
41 Humidity measurement psychrometry.
41 Hurricanes misc.
41 Hurricanes pre 1950 clippings.
41 Hurricanes influence on Arizona.
41 Hurricane in Arizona. , 1970
41 Hydrology.
41 Hydrostats of other atmospheres.
41 Ice and snow crystals.
41 Ice crystals in clouds.
41 Ice crystals, capacitance.
41 Ice - fall.
41 Ice crystal growth in water.
41 Ice crystals iridescence.
41 Ice physical properties.

☐ Details

1 folder.

The folder contains one nine-page Air Intelligence Information Report and six photo slides. The report details the Senator's observations during the trip, including the sighting of a pair of unidentified flying objects ("flying saucers") by Senator Russell and two others; descriptions of Dnieperpetrovsk airfield; passenger and military aircraft, and radar receivers near Moscow; observations on Russian trains, railroad mechanisms and procedures; and hand-drawn diagrams of a Russian bomber and a railroad gauge switching operation. The slides depict Senator Russell with companions at a war memorial in Baku, beside a train carriage, at the Intourist Hotel, and in Tbilisi or Sochi; and passengers standing by the train between Baku and Tbilisi.

Joel Carpenter collection of Richard B. Russell's trip to the USSR, Richard B. Russell Library for Political Research and Studies, University of Georgia Libraries, Athens, Georgia, 30602-1641.

Joel Carpenter is an aviation historian and author with degrees in history and industrial design. He has written several works about UFOs and their relationship to post-WWII experimental aerospace projects. He is a member of the National Investigations Committee on Aerial Phenomena.

Richard B. Russell, Jr. (1897-1971), lawyer and politician, born in Winder, Georgia. Served as State Representative (1921-1931), Georgia Governor (1931-1933), and U.S. Senator (1933-1971).

Actor (born in 1931) appearing in numerous films, television and the theater. Some of the many titles of productions in which he was featured are "The Great White Hope" (for which he received a Tony Award), "Dr. Strangelove," "River Niger," "The Cherry Orchard," "Of Mice and Men," and many Shakespearean plays. Correspondence between James Earl Jones and Errol John regarding a film Jones had hoped to do. The film, based on John Fuller's book "The Interrupted Journey," would have been about Betty and Barney Hill's account of their encounter with a UFO and their "abduction" by the inhabitants of the UFO, which took place in New Hampshire. Also included are a script for "The Interrupted Journey," and an article and Jones' notes for the film.

Ted Bloecher (1929-) is a retired actor and member of the New York City Gay Men's Chorus. His papers (1950-2000) consist of correspondence, personal journals, a memoir and other writing, theatre memorabilia, and his New York City Gay Men's Chorus files. The papers document daily life of a struggling actor and singer in New York City, gay life before and after Stonewall, and thirty years of UFO research.

BIOGRAPHICAL/HISTORICAL INFORMATION

Ted Bloecher (1929-) is a retired actor and member of the New York City Gay Men's Chorus. He came to New York City as a scholarship student in Fine Arts at Cooper Union. But after having the opportunity to act in small parts for the Provincetown Players during a summer spent on Cape Cod, Bloecher decided on a stage career. He appeared on Broadway and in the national touring company of the musical *Oliver*, as well as in the national touring companies of *My*

Fair Lady and *Hello, Dolly*. He also acted in a variety of summer stock productions. However, for much of his life he had to support himself through other employment.

During the 1950s Bloecher developed an interest in unidentified flying objects (UFOs) and began a research project documenting all of the known UFO sightings of 1947. He cofounded Civilian Saucer Intelligence of New York in 1954, and served as an officer of the National Investigations Committee on Aerial Phenomena. He is the coauthor with Isabel Davis of *Close Encounter at Kelly and Others of 1955* (Center for UFO Studies, 1978) and collaborated closely with most of the major researchers in the field.

In 1985, Bloecher joined the New York City Gay Men's Chorus. He sang as a tenor with the chorus, as a member of its pops ensemble "Uptown Express" and acted as its music librarian.

Since his retirement he has served as a volunteer at the Metropolitan Museum of Art.

SCOPE AND ARRANGEMENT

The papers consists of Bloecher's voluminous correspondence and personal journals, a memoir of a summer spent in Provincetown in 1951 and other writings, theatre memorabilia, and his New York City Gay Men's Chorus files. The collection document the daily life of a struggling actor and singer in New York City and gay life, chiefly in New York City, before and after Stonewall. They also include significant coverage of Bloecher's involvement in UFO research.

The Ted Bloecher papers are arranged in four series:

- **Series I. Correspondence**

1950-2000

Series I consists of Bloecher's correspondence with friends, family, fellow singers and actors, and UFO researchers. Correspondents include Isabel Davis, cofounder (with Ted Bloecher and Lex Mebane) of Civilian Saucer Intelligence of New York in 1954, James W. Moseley, President of Saucer And Unexplained Celestial Events Research Society (SAUCERS), Len Stringfield Director of Civilian Research, Interplanetary Flying Objects (CRIFO), Major Donald Keyhoe, head of the National Investigations Committee on Aerial Phenomena (NICAP), Capt. Edward J. Ruppelt ("Project Blue Book") and Leon Davidson.

Following the correspondence for most years is a folder of printed material containing covers of playbills for musicals, plays, and concerts he attended. Most are annotated with a brief remark summarizing his thoughts about the performance. In addition there are clipped reviews and/or feature articles about the shows.

- **Series II. Journals**

1950-2000

Bloecher' s journals cover fifty years of his life, beginning in his late teens. The journals document the daily life of a gay man in the United States, primarily in New York City, including reports on his sexual activities and relationships and the impact of the AIDS epidemic. However, there is little mention of the homophile or gay rights movements.

- **Series III. Writings**

1975-1999

Bloecher's writings include an unpublished musical comedy "Something in the Air" (1994), a research paper, "The Stonehenge Incidents" (1975), a memoir, "Coming of Age in Provincetown," and his poetry (1995-1998). His memoir describes his experiences as a young man spending the summer in Provincetown, Massachusetts in 1951.

- **Series IV. New York City Gay Men's Chorus**

1985-2000

Materials documenting Bloecher's membership in the New York City Gay Men's Chorus include copies of the handbook, constitution and by-laws, board minutes, fundraising materials, performance programs and reviews, and publicity brochures for public appearances by the Chorus.

**The Randall V. Mills
Archives of Northwest**

Folklore is a repository
of fieldwork collections
and research materials
on folklife in Oregon, the
Pacific Northwest, and
beyond. Collections
include books and
periodicals; student and
faculty research papers
and fieldwork projects;
fieldwork photographs
and sound recordings;
and documentary
videos.

As part of UO Folklore
Program, the Archives
supports students in the
study of folklore and it
provides training
opportunities in the
management of cultural
collections. The
Archives also makes
collections available to
the public for study and
appreciation.

Guides to collections are published in the [Northwest Digital Archives](#).

Selected items in collections are available online in the [Northwest Folklife Digital Collection](#).

The Archives of Northwest Folklore is a member of the [Oregon Folklife Network](#).

Customer Service Mission Statement

We, the University Library staff, are committed to providing world-class service which consistently meets and exceeds the needs and expectations of our customers.

Service Commitments:

> We provide excellent service.

> We provide professional and technical expertise.

> We offer accurate, complete, diverse and current resources.

> We continuously seek and implement innovations to benefit our customers.

> We provide policies, procedures, and structure to accommodate individuals.

> We teach our customers transferable information literacy skills which enable them to independently locate and identify quality resources.

Collection of esoteric and metaphysical literature.

[Michigan State University Libraries - Main Library](#)

Contact an Archivist or Librarian to learn more about access.

[Contact Information](#)

☐ Details

Publication information: [1970-1976].

280 items (4 linear feet)

Dr. Bruce P. Tracy began in the 1970s to collect various materials pertaining to esoteric and metaphysical studies following his doctoral work on the inner consciousness at Michigan State University. This collection consists of many different subjects within the esoteric and metaphysical sphere. Some of these topics include pseudo-sciences such as astrology and parapsychology, oriental and alternative medicines, meditation, spiritual healing, UFOlogy, and the philosophies of various religious traditions, primarily in the California area. This collection contains 280 pieces, consisting of pamphlets, brochures, flyers, newsletters, book catalogs, and other documents.

Overview of the Collection

Creator: Salisbury, Frank B.

Title: Frank B. Salisbury papers

Dates: 1943-1997 (inclusive)

Quantity: 234 linear feet

Collection Number: Accn1778

Summary: The Frank B. Salisbury papers (1943-1997) deal with the work of Salisbury (b. 1926), a professor of plant physiology. This collection contains correspondence, personal papers, and projects Salisbury was involved with. It also contains books Salisbury authored and the work he did in editing the *Journal of Plant Physiology*. Also prevalent in the collection is Salisbury's work on UFOs.

Repository: J. Willard Marriott Library, University of Utah
Manuscripts Division
Special Collections
295 South 1500 East
Salt Lake City, Utah 84112-0860
801-581-8864
<http://www.lib.utah.edu/collections/manuscripts.php>

Languages: Collection materials are in English.

Historical Note

Frank Boyer Salisbury was born in Utah in 1926. He served in the U.S. Army Air Force in 1945, and was a representative for the Church of Jesus Christ of Latter-Day Saints in German-speaking Switzerland from 1946 to 1949. From 1949-1950 he was a photographer for Boyart Studio and till present has remained s part-time portrait-commercial photographer. He graduated from the University of Utah with a B.S. (1951) and M.A. (1952). He received his Ph.D. from the California Institute of Technology (1955). He was an assistant professor of botany at Pomona College from 1954 to 1955, then assistant professor and professor of plant physiology at Colorado State University from 1955 to 1966. He served as the NSF Postdoctoral Fellow in Tübingen, Germany, and Innsbruck, Austria from 1962 to 1963. He served as a professor and head of the Department of Plant Science at Utah State University from 1966 to 1970. Between 1970 until his retirement in 1997, Salisbury worked in a number of distinguished positions including: Professor of Plant Physiology (1966 to present), Botany (1968 to present), and Distinguished Professor of Agriculture (1987, honor) at Utah State University. He was on the Board of Trustees at the Colorado State University Research Foundation from 1960-1962 and was a technical representative in Plant Physiology for the U.S. Atomic Energy Commission (now the Department of Energy) from 1973-1974. He was also guest professor at the University of Innsbruck, and Lady Davis Fellow, the Hebrew University of Jerusalem, 1983. He served as Financial Secretary for the Ohio Columbus Mission (LDS Church) from 1997-1999.

Content Description

The Frank B. Salisbury papers (1943-1997) consist mainly of research materials and drafts for Salisbury's writings, as well as information on UFOs. Administrative and teaching materials, correspondence, and other papers are also included.

Carton		
23		
Folder		
1	NASA Meeting	1963
2	Los Angeles	1963

3	Minutes of RMA-W-63 Technical Committee	
4	Sigme Xi Meeting	1963
5	Moscow Report	1963
6	Trip from Germany and Austria	
7	Bioengineering Symposium	1964
8	Colorado-Wyoming Academy	1964
9	Symposium on Phototronics	1964
10	Botanical Congress Internation	1964
11	AIBS Meeting	
12	Caltech Meetings	1964
13	BSCS	1964
14	New Science Symposium	1965
15	Unmanned Exploration	1965
16	Colorado-Wyoming Academy	1965
17	AIBS Meeting	1965
18	Symposium on the Exploration of Mars and Venus	1965
19	Editor's Day at CSU	1965
20	Summer Visits to Boulder	1965
21	NASA Conference	1965
22	Michigan State University	1965
23	New York State University	1965
24	Polytechnic Institute of Brooklyn	1965
25	American Astrological Society	1965
26	Montana State University	1966
27	NASA Conference	
28	Exobiology and the Flying Saucers	
29	NBC, UFO Panel	
30	Conference on Plant Growth Regulators	
31	New York Academy of Science	
32	Gordon Research Conference	
33	Man in Space Symposium	
34	NASA Maned Orbiting Lab	1966
35	Manned Space Station Meetings	
36	Utah Science Teachers Association	
37-38	Visiting Scientists	1966
39	Nevada Astronomical Society	
40	AIBS/NASA	
41	Visiting Biologist	
42	Experiment Station Research	1967
43	Colorado-Wyoming Academy	1967
44	Ricks College	1967
45	12th Annual Colorado-Wyoming Science Fair	1967
46	Visiting Biologist	1967
47	Galveson Morl Meeting	
48	AIBS/ NASA Council No. 2	1967
49	Planning a Symposium	
50	AIBS	1967
51	Logan Area Education Week	1967
52	Florida Trip	1967
53	Denver Morl Meeting	1967
54	Easter Seal Society	1967
55	Talk Show, KSXX	1967
56	Religion in Life Series	

57	MORL Meeting	1967
58-59	Agronomy Meeting	1967
60	Pro Hardware Dealers	
61	MORL Meetings	1967
62	Utah Historical Society Meeting	1967
63	Lanners Short Course	
64	Delta Kappa Gamma	1968
65	Photoperiodism Symposium	
66	Purdue University	1968
67	Visiting Biologist	1968

Meetings and Trips, 1968-1971

Container(s)	Description	Dates
Carton		
24		
Folder		
1	Sigma Xi Talk	1968
2	Temple Buel Collage	1968
3	Trip to Reno National Academy	1968
4	NABT First National Convention	1968
5	LDSSA Fireside Talk	1968
6	University of Arizona	1968
7	Phoenix Executives Club	
8	Irvine, California	1968
9	BYU Seminar	1968
10	Visiting Consultant, University of Idaho	1968
11	Trips	1964-1965
12	Western Society of Crop Science	
13	AAAS and American Society of Plant Physiologists	1968
14	Meeting with County Agents	
15	Sugarhouse Region Youth Conference	
16	Photobiology Congress	
17	BYU, Logan Education Week	1968
18	Agronomuc Administrators Roundtable	
19	Astronomical Society of Nevada	1968
20	Soil Conservation Service	1969
21	Impact of Plant Science on World Food Production	
22	Fort Lewis College	1969
23	Seattle Pacific College	1969
24	Farming on Mars, Seminars	
25	Biochronometry Symposium Organizing Committee	
26	University of California	
27	College of Southern Utah	
28	AIBS, Visiting Biologist	1969
29	Calgary Centennial Planetarium	
30	Trip to Colorado Springs	1969
31	National Armature Astronomers Inc.	
32	XI International Botanical Congress	
33	Biochronometry Symposium	
34	Meetings and Trips	1969
35	BYU, Logan Area Education Week	1969

36	IBP Plant Specialists	1970
37	AIBS Annual Meeting	1970
38	Department Head Conference at Jackson Hole	1970
39	BYU, Logan Area Education Week	1970
40	Youth Conference on Atom	1970
41	University of Iowa	
42	Ohio University	
43	Colorado College	
44	College of Southern Utah	
45	Visiting Biologist	1971
46	U.S. Australia Seminar	1971
47	Review of the Plant Science Department	1971

Meetings and Trips, 1984-1987

Container(s)	Description	Dates
Carton		
29		
Folder		
1	England and Austria	1984
2	Sunstone Symposium	
3	Dairs Meetings	
4	Winter Ecology Conference	
5	Finland	
6	Switzerland	
7	South Africa	
8	NASA	
9	Meeting with President Cazair	1984
10	Trip to San Antonio	
11	NASA, CELSS	
12	Providence, Road Island	
13	NASA, CELSS	
14	Big Rock Candy Mountain	
15	Ag Media Day	
16	Panel Meeting NASA	
17	APS Meeting	1985
18	Prepare for LSAC Meeting	
19	LSAC, NASA	
20	Israel	1986
21	AIBS, Kennedy Space Center	
22	Rutgers University	
23	Carmel Valley Meeting	
24	LSAC, Washington DC	
25	Space Growth Chamber, Workshop	
26	Kiwanis Club	
27	Plant Physiology Meeting	
28	University of Arizona, NASA	
29	COSPAR Meeting	1986
30	Copper Mountain	
31	Space Symposium	1980
32	Talk at Blake's Missionary farewell	
33	LSAC Meeting, Washington DC	
34	Pathology Symposium	

35	Gravitational Space Biology	
36	University of Utah, Mormonism	
37	Creationism v. Evolutionism	
38	LSAC in Washington DC	
39	Workshop on CELSS	1986
40	Space Station Users Committee	
41	Mexico	
42	How to Prepare a Presentation	
43	Kennedy Space Center	
44	LSAC	
45	Plant Growth Chamber for CELLS	1987

☐ Details

Publication information: 1961-1974.

0.1 linear feet (1 folder)

Collection is open for research. Appointments to view materials are required. To make an appointment please click above link or contact library staff at room@theautry.org.

Processed by Braun Library Staff, 2000 June. Final processing of collection and publication of catalog record made possible by a grant from the National Historical Publications and Records Commission (NHPRC).

This collections predominately consists of letters from Chief Dan Katchongva to Helen Addison Howard, also known as Mrs. Ben Overland, from 1970 September 4 to 1974 November 27. Most of the correspondence was written by Nonnie S. Skidmore, corresponding secretary, on behalf of Chief Dan Katchongva. The letters discuss the Hopi Purification Day prophesy where all the land will be returned to the Hopi, as well as flying saucers. The collections also includes copies of letters to political leaders from Katchongva, newspaper clippings, and ephemera.

Chief Dan Katchongva Correspondence to Helen Addison Howard, 1961-1974, Braun Research Library Collection, Autry National Center, Los Angeles; MS.1136.

Copyright has not been assigned to the Autry National Center. All requests for permission to publish or quote from manuscripts must be submitted in writing to the Autry Archivist. Permission for publication is given on behalf of the Autry National Center as the custodian of the physical items and is not intended to include or imply permission of the copyright holder, which must also be obtained by the reader.

Chief Dan Katchongva Collection, 1970-1971, Braun Research Library Collection, Autry National Center, Los Angeles; MS.502.

Chief Dan Katchongva (1860, January 1 to 1972, February 22) was born in Old Oraibi, Arizona. He was a tradional leader and Hopi Chief at Hotevilla, Arizona.

Joel Carpenter Collection on Richard B. Russell's 1955 Trip to the USSR

Descriptive Summary

Title:	Joel Carpenter Collection on Richard B. Russell's 1955 Trip to the USSR
Creator	Carpenter, Joel.
Dates	1955
Extent	1.0 folder
Repository	Richard B. Russell Library for Political Research and Studies
Abstract	The folder contains one nine-page Air Intelligence Information Report and six photo slides. The report details the Senator's observations during the trip, including the sighting of a pair of unidentified flying objects ("flying saucers") by Senator Russell and two others; descriptions of Dnieperpetrovsk airfield, passenger and military aircraft, and radar receivers near Moscow; observations on Russian trains, railroad mechanisms and procedures; and hand-drawn diagrams of a Russian jet bomber and a railroad gauge switching operation. Slides depict Senator Russell with companions at a war memorial in Baku, beside a train carriage, at the Intourist Hotel, and in Tbilisi or Sochi; and passengers standing by the train between Baku and Tbilisi.

Administrative Information

Preferred Citation

Joel Carpenter Collection on Richard B. Russell's 1955 Trip to the USSR, Richard B. Russell Library for Political Research and Studies, University of Georgia Libraries, Athens, Georgia, 30602-1641.

[Back to Top](#)

Admission

The Russell Library and Russell Galleries are free and open to the public.

Directions

The Russell Library is located in the Richard B. Russell Special Collections Building located at 300 South Hull Street on the western edge of the University of Georgia campus.

[Google Maps](#) - [MapQuest](#) - [Windows Live Maps](#) - [Yahoo Maps](#)

Disabled or Limited Mobility Access

All public areas of the Russell Special Collections Building are accessible to visitors with disabilities. Handicapped parking is available in the Hull Street Parking Deck, one block from the Russell Special Collections Building and in the Tate Center Parking Deck, located approximately 4 blocks from the Special Collections Building. Visit <http://www.parking.uga.edu/> to view this parking deck on a map.

[Back to Top](#)

Parking

Visitor parking is available in the Hull Street parking deck. Enter at the south entrance near Baxter Street and take a ticket. Before leaving the Special Collections Libraries, present your ticket at the security desk located in the lobby and sign for a token. **There is no parking attendant so you must have a token to exit.**

Please note: UGA faculty, staff, and students who have parking privileges elsewhere on campus will be ticketed if they utilize visitor parking in the Hull Street Deck.

Handicapped parking is located on Level 3 of the deck as well as a pedestrian bridge connecting the parking deck to the quad in front of the Special Collections Library.

Extra visitor parking is offered at the Tate Center Parking Deck for an hourly fee. The Tate Center Parking Deck is located one block south of the intersection of Baxter Street and South Lumpkin Street. See: [Parking Locations and Fees](#). All University of Georgia affiliates must abide by parking regulations set forth by UGA Parking Services. For more information about visitor parking, please visit the [Parking Services website](#) or call 706-542-PARK (7275).

Bicycle Parking

Bike stands are available next to the Russell Special Collections Building.

Public Transportation

Access to the UGA Special Collections Libraries is via public transportation through **UGA Campus Transit**. The East-West Route makes stops by the building on both Waddell Street and Hull Street and runs from 6:30AM – 1:00AM. UGA buses on the Orbit and Family Housing routes can be accessed one block east at the corner of Lumpkin and Wray Streets. The Milledge Avenue bus can be accessed one block north of the Special Collections Libraries on the corner of Broad and Hull Streets.

Athens Transit has several bus stops near, but not adjacent to, the Special Collections Library. The stops are on Broad Street, Baxter Street, and Lumpkin Street. The Multi-Modal Transportation Center, where all Athens Transit buses stop, is located 0.8 miles from the building and is an estimated 15 minute walk.

Research Visitor Information

Located in the Russell Library, the Reading Room serves visitors using manuscripts, books, audiovisual materials, visual materials (photographs), maps, artwork and graphic materials, and electronic records.

- Access to the Russell Library is free and open to all.
- Researchers may bring a laptop to conduct research.
- Digital Cameras are not permitted in the research room.
- Fees for photocopies are \$.25 per page and are subject to restriction according to access policies of the Library.

Back to Top

Exhibition Visitor Information

The Russell Gallery is free and open to the public Monday through Friday from 8AM to 5PM and on Saturday from 1PM to 5PM. A regular tour of the Special Collections Libraries Galleries takes place every Tuesday at 2 P.M.; no reservation is required for this tour.

For information on scheduling group tours of the gallery space, please visit the **Exhibits page**.

The **Harrison Feature Gallery** is home to rotating exhibits that focus on specific themes or historical moments from the Russell Library's key collecting areas. The gallery rotates every six to twelve months, and the exhibition on display ties into ongoing programs and events.

Other galleries include the History Lives Showcase Gallery, Willson Media and Oral History Gallery, the re-created Office of Senator Richard B. Russell, and the Reflection Room. For more information on these spaces please visit our **Permanent Galleries page**.

Back to Top

Group Tour Information

The Russell Library welcomes groups and school field trips. To schedule your visit,

please complete a tour request form or call 706-542-5788. Two to four weeks advance notice is advised.

Events Visitor Information

The Russell Library offers public programs throughout the year in its facility and at other venues around the Athens area. To learn more about programs, visit the [events calendar](#). The Russell Forum for Civic Life in Georgia, a civic engagement program of the Russell Library offers monthly deliberative community forums on issues of public interest. Information about these forums is available on the [Russell Forum for Civic Life in Georgia homepage](#).

Abstract

This collection consists of correspondence, manuscripts, drawings, diaries, notebooks, and photographs. Sanderson began his travels in the jungles of Asia and Africa before starting his formal schooling at Eton and Cambridge in the late 1920s and early 1930s. His papers reflect his interest in animals, jungles, and natural history. Late in his life Sanderson's interest turned to UFO's and he was the director of the Society for the Investigation of the Unexplained.

Background note

Ivan Terence Sanderson was a zoologist who travelled extensively, collected animals, and published a number of books.

Collection information

Provenance

Presented by Sabina Sanderson and accessioned, 1977 (1977 457ms). See in-house shelf list for

additional accession numbers.

Processing information

Only maps and photographs are noted.

General physical description

27 linear feet.

Indexing Terms

Corporate Name(s)

- Eton College.
- University of Cambridge.

Genre(s)

- Diaries.
- Drawings.
- Notebooks.

Geographic Name(s)

- Africa--Description and travel
- Asia -- Description and travel.

Subject(s)

- Natural history.
- Unidentified flying objects.
- Zoology.

[Contact Information](#)

☐ Details

Includes the personal and departmental correspondence files of the directors, Albert E. Whitford, 1948-1958 ; Arthur D. Code, 1958-1965; including Joel Stebbins, 1946-1948. Some material relates to Dr. Whitford's activities as a member of the National Astronomical Observatory, the National Science Foundation and the Advisory Committee on the Office of Naval Research (ONR). Regarding the ONR, the University in association with the Astronomy Department had a research contract with the United States Navy to explore the theory of radiative equilibrium in stellar atmospheres using the photoelectric technique. Dr. Whitford was the Principal Investigator in this project. Among his personal and professional correspondence are many inquiries regarding atmospheric phenomenon such as unidentified flying objects, solar eclipses, etc.

Book delivery to Main and Petherick Reading Rooms

We operate closed book stacks and this means readers can't browse the Library shelves to retrieve material. Instead, readers use the Catalogue to find and order what they need from our collections. That material is then delivered to the relevant reading room within the time frames given in our [collection delivery service schedule](#).

Public holiday opening hours

The Library building is closed on Good Friday and Christmas Day. Other public holiday opening times are outlined below:

Reading rooms

The Main, Petherick and Newspapers and Microforms Reading Rooms are open from 9.00am-5.00pm on all public holidays except Good Friday, Christmas Day, Boxing Day, and New Year's Day.

The Pictures, Manuscripts, Maps and Asian Collections Reading Rooms are closed on all public holidays.

Galleries

The Treasures Gallery and the Exhibition Gallery are closed on Good Friday and Christmas Day. On all other public holidays the Galleries are open from 10.00am-5.00pm.

Foyer, Bookshop and cafés

The Bookshop and Foyer are closed on Good Friday and Christmas Day. On all other public holidays the Bookshop and Foyer are open from 9.00am-5.00pm.

The bookplate café is closed on Good Friday, Christmas Day and Boxing Day.

Collection delivery service

On public holidays, the [collection delivery times](#) are the same as on Saturdays.

2014 Public holidays

- Tuesday 1 January - New Year's Day
- Monday 27 January - Australia Day (substitute for Saturday 26 January)
- Monday 10 March - Canberra Day
- Friday 18 April - Good Friday
- Saturday 19 April - Easter Saturday
- Monday 21 April - Easter Monday
- Friday 25 April - ANZAC Day
- Monday 9 June - Queen's Birthday
- Monday 29 September - Family & Community Day
- Monday 6 October - Labour Day
- Thursday 25 December - Christmas Day
- Friday 26 December - Boxing Day

☐ Details

0.72 cubic ft. (2 boxes 26 x 13 x 32 cm.) + photoprints and negatives

Douglas County History Research Center material is non-circulating, requires staff retrieval and is available by appointment during normal library hours.

Collection arranged following the original order of the creator. The series "Legends & oddities" are comprised of Kirby's research, research notes and scripts for the Legends and Oddities film series produced by Douglas County Television. Research subjects include the following subjects as they related to Douglas County: B-17 bomber accident, ghosts, unidentified flying objects, Paleo-Indians, tuberculosis, gold mining, and ghost towns. A large part of the Legends & oddities research is photocopied newspaper articles and information from the Douglas County History Research Center. The Legends and Oddities research includes photographs of the B-17 crash site from 2002. The collection also contains a folder of his correspondence, photos and research about the architecture of Douglas County, minutes from the Douglas County Historic Preservation Board, and an unpublished document titled Wildflowers of Castlewood Canyon.

William Kirby papers, 1997-2004. Douglas County History Research Center, Douglas County Libraries, Castle Rock, Colorado.

The collection is used in the presence of Douglas County History Research Center staff. Some items may be fragile and may only be duplicated with the permission of the Center's staff.

Transcript : 50 p.

Interviewed by Ellen B. Healy on June 6th, 2008 in Green Bay, Wisc.

Roy C. Ihde, a Peshtigo, Wisconsin native, describes his career in the Air Force from 1946 to 1966 during the Cold War. Ihde touches on family military history, enlisting in the Air Force after his house burned down, basic training at the San Antonio Aviation Cadet Center (Texas), radar school at Boca Raton (Florida), primary and basic pilot training at Randolph Field (Texas), and single-engine fighter pilot training at Williams Field (Arizona). He reflects on his love of training and recalls reasons other people washed out. He talks about his assignment to the 4th Fighter Group, 336th Rocket Squadron at Andrews Field (Maryland) and duty as a P-80 jet pilot and athletic officer. Ihde comments on flying the F-84 Thunderjet. He recalls a three-year tour based in Furstenfeldbruck (Germany), speaks of defending U.S. air space, and states he often had to intercept civilian airliners. He shares his impressions of the destruction in Munich and talks about going to the opera. Sent to Belgium on TDY, Ihde describes duty as a T-33 and F-84 instructor in the Belgian Air Force, touring the battlegrounds at Bastogne, and visiting the Soviet war memorial in Berlin. While stationed at Ladd Field (Alaska) to cold-test the P-80, he details flying with Charles Lindbergh and

meeting him again later in Paris. While in Alaska, Ihde recalls seeing wildlife, flying over the Arctic Circle, and seeing the Ester Gold Fields. Assigned to the 27th Fighter Escort Wing based at Bergstrom Air Force Base (Texas), Ihde talks duty as the range control officer, practice with the low-altitude bombing system, and side-duty as a T-6 Texan Trainer instructor. He recalls meeting Paul Tibbets, the Enola Gay pilot who dropped the atomic bomb, and expresses his admiration of him. Ihde speaks about Air Force life and side trips to visit Indian battlefields. Assigned to Dow Air Force Base (Maine), he speaks of flying the new F-84F Thunderstreak with the 506th Strategic Fighter Wing. In 1954, he discusses flying air defense over Hokkaido Island (Japan), protecting reconnaissance aircraft from Russian planes, testing Russian fighter launch response times, and being impressed with how polite the Japanese were. While based at Malmstrom Air Force Base (Montana), Ihde talks about his work with FICON (Fighter-Conveyance), duty in the 71st Strategic Reconnaissance Wing, and reassignment to Larson Air Force Base (Washington) where he saw a UFO. He touches on flying and talking with Senator Barry Goldwater, who was in the Reserves in 1964. Ihde mentions attending Special Weapons School at Luke Air Force Base (Arizona), the secrecy surrounding the A-bomb, and Escape and Evasion training in the hills of California. He portrays a friend who was shot down during the Cuban Missile Crisis. Ihde talks about working as a civilian pilot, keeping in touch with friends from the service, and attending reunions, and he highlights having a good experience overall.

Copyright owned by the Wisconsin Veterans Museum.

Ihde (b.1929) was born on a dairy farm near Peshtigo, Wisconsin and graduated from high school in Marinette, Wisconsin. He enlisted in the Air Force at age seventeen and, after twenty-one years of service, retired at the rank of major. During his career as a fighter pilot, his service areas included occupied Germany, occupied Japan, Texas, Alaska, Maryland, Maine, Montana, Washington, and Arizona. As a civilian, Ihde flew for the Ansul Chemical Company and for Menominee Rubber. He had three children and eventually settled in Green Bay (Wisconsin).

Forms part of: Wisconsin Veterans Oral History Project, conducted by the Wisconsin Veterans Museum.

Researchers

The Wisconsin Veterans Museum encourages people of all ages, abilities, and interests to learn about Wisconsin military and veterans' history. Search our **Civil War Database**, **browse our catalogs**, use our **online resources**, or contact the **Reference Archivist** to learn from a distance. If you are able, please visit our Research Center, which is open to the public weekdays from 9:00 to 3:30. Please review the **rules and regulations** before arriving.

Learn about the Wisconsin Veterans Museum Research Grant [here](#).

The Research Center collection consists of two main parts - click on the links to learn more about them:

Library & Archives

Books, military manuals, newsletters, maps, posters, prints, and other published materials focusing on Wisconsin and American military history make up the library. Letters, diaries, scrapbooks, photographs, and other original papers and records from Wisconsin veterans and veteran organizations comprise the archives.

Oral History

Recorded interviews with Wisconsin veterans from World War I through the present who describe their experiences in recorded interviews.

Artifact Collections

Artifacts housed in collections storage may be made available for research or viewing by appointment only. Requests will be considered on an individual bases and must be approved no less than 10 business days prior to the desired appointment date. Please contact the **Collections Manager** for information and to schedule an appointment.

Further additions expected.

Permission of an officer of depositing organization required for access to records less than 50 years old.

These records are described in three parts representing four separate accessions. The groups overlap and the same subjects may be covered in all three parts. There are also significant gaps, such as very little correspondence prior to 1915, and large gaps in the records of the treasurer. Most of the surviving documentation on the AAS's founding is in Parts 1 and 2. Membership applications, correspondence, and lists found throughout give details on the growth of the organization. A complete set of minutes (1897-1962) can be found in Part 1, and there is a wealth of information on meetings of the AAS throughout including programs and preliminary announcements, abstracts of papers, meeting attendance signature books, and executive committee minutes. Parts 2 and 3 contain significant records on the founding of the American Section of the International Astronomical Union in 1919 and provide insights into the international relations of the scientific community after World War I. Also included are published versions of constitutions, by-laws, and membership lists, budgets, committee minutes, treasurer's reports, and photographs of groups taken at meetings. Some of the topics include education and employment of astronomers, the organization of scientific personnel in support of the war effort in the 1940s, the participation of women astronomers, UFOs, and George E. Hale on the 100-inch Hooker telescope at Mt. Wilson Observatory.

Correspondents include: Charles G. Abbot, Benjamin Boss, Margaret Burbidge, William W. Campbell, Annie J. Cannon, James McKeen Cattell, Goerge C. Comstock, Ralph H. Curtiss, Charles L. Doolittle, Dugan, R.S., Frank Edmondson, Philip Fox, Fredrick, Laurence, Edwin B. Frost, George E. Hale, William J. Hussey, J. Allen Hynek, Harold Jacoby, Albert A. Michelson, John A. Miller, Simon Newcomb, D.B. McLaughlin, George McVittie, Edward C. Pickering, Henry Norris Russell, Frank Schlesinger, Frederick H. Seares, Joel Stebbins, and Herbert C. Wilson.

Minutes, 1897-1962, available on microfilm.

The American Astronomical Society was founded in 1899 as the Astronomical and Astrophysical Society of America. The name was changed in 1914. Its purpose is the advancement of astronomy and closely related branches of science. The Society became an Associate Member of the American Institute of Physics in 1958 and has been a full Member Society since 1966. It is also affiliated with the International Astronomical Union.

Finding aid in repository; also available on microfiche.

Transcript, 277 p.

Interview conducted as part of the International Project in the History of Solid State Physics.

Interview conducted by Charles Weiner, 17 October 1967 to 12 September 1973.

Family background; early education; influence of high school physics teacher, William Howell Williams, 1914-1918, and later teacher at University of California, Berkeley; interval as boy reporter. Undergraduate years at Berkeley, beginning in 1921 in chemistry department; Ph. D. in physics, 1926; association with Fred Weinberg. Discovery of Erwin Schrodinger's wave mechanics papers; International Education Board fellowship to study quantum mechanics at Gottingen, 1926. Work on Bell Systems technical journal for six months before accepting lectureship at Columbia University; teaching post at Princeton University; Condon and Philip Morse's Quantum Mechanics, result of Columbia and Princeton courses. Relations with University of California; role in persuading Ernest Lawrence to go to Berkeley from Yale University. Recollections of Michigan summer school. Work at Westinghouse on applications of nuclear physics to industry, including completion of Van de Graaff machine, 1937-1940; setting up Westinghouse research fellowships, 1938; Massachusetts Institute of Technology conference on applications of nuclear physics, October 1940; war work on microwave radar. J. Robert Oppenheimer asks Condon to come to Los Alamos Scientific

Laboratory; tour of Los Alamos with Leslie Groves; reasons for leaving Los Alamos after a few weeks. Work as head of theoretical section of Lawrence's laboratory, August 1943-1945; British scientists.

Evaluation of Westinghouse's four million-volt machine. Description of Nimitron, a physical computer, designed for 1939 World's Fair. Discussion of 1928 radioactivity. Reminiscences of Ronald Gurney's later career and his trouble with security. Discussion of postwar events, such as the Quebec Conference, McMahon Act, Moran's book about Winston Churchill. Peacetime development of atomic energy; establishment of the Senate's Special Committee on atomic energy. Directorship of the National Bureau of Standards (NBS), 1945-1951. Work on superconductivity; W. Emmanuel Maxwell and John Pelham. Accomplishments at NBS. Hearings in 1948 and 1952 before the Department of Commerce under Truman's loyalty program; Averell Harriman. Director of Research at Corning, 1951. House Un-American Activities Committee hearing, 1954; J.R. Oppenheimer and Bernard Peters; reopening of clearances, loss of Corning position; becomes Corning consultant. Head of Washington University physics department, 1956-1963; Oberlin College, 1962; interest in modernizing teaching; Joint Institute for Laboratory Astrophysics (JILA), from 1963; editor of Reviews of Modern Physics, 1957-1968; establishment of the National Accelerator Laboratory (Chicago); the UFO story. Comments on his most satisfying and his least satisfying work. Also prominently mentioned are: Raymond T. Birge and Henry Wallace.

10" microfilm reel. Bethesda, MD: Cutting Corp., 1999.

Oral History Interview may be read and quoted by any researcher with an access application on file, and excerpts may be copied.

☐ Details

Publication information: 1984.

1 videocassette (VHS, NTSC) (85 min.) : sd., col. ; 1/2 in.

Camera: Caro Thompson.

Performed by Timothy Daniel Furst (Fyodor), Paul David Magid (Dmitri), Randy Nelson (Alyosha), Howard Jay Patterson (Ivan), Sam Williams (Smerdyakov).

Videotaped in performance at the Ted Shawn Theater, Jacob's Pillow, Becket, Mass., on Aug. 30, 1984.

The program is introduced by Jacob's Pillow director Liz Thompson, who explains why she chose to include the Flying Karamazov Brothers in the Jacob's Pillow series. The performance combines juggling and comedy in a series of short skits. The Flying Karamazov Brothers juggle various objects, including sickles, books, hoops, apples, clubs, and live cats; they perform percussion music while juggling and juggle objects supplied by the audience.

MAPS, DIRECTIONS, AND PARKING

Maps and directions

From Highway 101 North and South:
Driving: Take the Embarcadero Road exit west toward Stanford. At El Camino Real, Embarcadero turns into Galvez Street as it enters the Stanford campus. Stay in the left lane and continue toward the center of campus. Drive past Memorial Way. The Hoover Institution is at the corner of Galvez Street and Serra Street.

From Highway 280 North and South:
Driving: Exit Sand Hill Road east toward Stanford. Continue east, turning right at the traffic light on Santa Cruz Avenue. Make an immediate left onto Junipero Serra Boulevard. Turn left at the second traffic light and onto Campus Drive East. Continue around Campus Drive East and turn left when you reach Serra Street, at the gas station. Follow Serra Street until it ends at Galvez Street. The Hoover Institution is at the corner of Galvez Street and Serra Street.

Parking:
Stanford parking/campus map
Permit parking is generally monitored Monday–Friday, 6am–4pm and metered parking is monitored Monday–Friday, 8am–4pm. Please read posted signs carefully as there are exceptions to these rules.

☐ Details

38.75 linear ft. (77 boxes)

Primarily correspondence (1921-1978) which documents his career from his discovery (with George Uhlenbeck) of the electron spin (1927), through his work as editor-in-chief at the American Physical Society (APS) (1951-1974), to his post as visiting professor at the University of Nevada (1974-1978). The APS correspondence mostly concerns the editing and publishing of THE PHYSICAL REVIEW and PHYSICAL REVIEW LETTERS, including computer typesetting and other innovations. Other correspondence topics are atomic structure, cyclotrons, quantum theory, nuclear physics, spectroscopy, and his involvement with the American Philosophical Society and the Desert Research Institute. Also covers his work during World War II as scientific head of the ALSOS Mission, an American scientific intelligence combat unit whose main objective was to determine German progress in developing an atomic bomb, and the publication of his book, ALSOS. Additional materials include course lectures given at the University of Nevada; speeches on ALSOS and other subjects; reports on the work and attitudes of German scientists during the Nazi regime; research data from Brookhaven National Laboratory, Northwestern University, and the University of Michigan; Goudsmit's notebooks from lectures given by Paul Ehrenfest (University of Leiden, 1920s and undated) and by others; and undated research notebooks. Other areas of interest covered include Egyptology.

Criminology, World War II refugees, parapsychology, UFOs, and philately. Correspondents include: Robert F. Bacher, Gregory Breit, Leon Brillouin, Detlev W. Bronk, Walter and Martha Colby, Dirk Coster, Gerard Heinrich Dieke, Paul Ehrenfest, Enrico Fermi, George Gamow, Werner Heisenberg, Jaap Kistemaker, John R. Kohn, Alfred Lande, Jonathan Logan, Wendell Mordy, Linus Carl Pauling, Harrison Randall, Paul Rosbaud,

George Uhlenbeck, John H. Van Vleck, Joseph Weber, Friedwardt Winterberg, John Wulff, and Pieter Zeeman.

Microfilm as part of the Archive for the History of Quantum Physics.

Microfilm in the Niels Bohr Library, American Institute of Physics.

Physicist (atomic physics) and editor. On the physics faculty at University of Michigan, 1927-1946; on the staff of Brookhaven National Laboratory, 1948-1970, and chairman of physics department, 1952-1960; editor-in-chief of American Physical Society, 1951-1974. Died in 1978.

German in part.

Finding aid, 56 pp. also available on microfiche at repository.

Goudsmit, Samuel Abraham. Alsos. New York: H Schuman, 1947.

Repository	Special Collections, Virginia Polytechnic Institute and State University, Blacksburg, Va.
Collection Number	Ms2010-068
Title	Paul R. Hill Collection, 1936-1996
Physical Characteristics	5.6 cu. ft. 6 boxes, 2 oversize folders

Creator	Hill, Paul R., 1909-1990
Language	English
Abstract	The Paul R. Hill Collection contains material relating to the NASA career of Paul R. Hill. Materials include books, papers, newspapers, lantern slides, NASA publications and memos, overhead sheets, and notes from presentations and talks.

ADMINISTRATIVE INFORMATION

Access Restrictions

Collection is open for research.

Use Restrictions

Permission to publish material from Paul R. Hill Collection must be obtained from Special Collections, Virginia Tech.

Preferred Citation

Researchers wishing to cite this collection should include the following information: Paul R. Hill Collection, Ms2010-068, Special Collections, Virginia Polytechnic Institute and State University, Blacksburg, Va.

Acquisition Information

The Paul R. Hill Collection was donated to Special Collections in 2010 by Julie M. Hill of Norfolk, Virginia.

Processing Information

The processing, arrangement, and description of the Paul R. Hill Collection commenced in 2010 and was completed in January 2011.

BIOGRAPHICAL NOTE

Paul R. Hill (1909-1990) was a renowned NASA engineer and UFO enthusiast. He received his B.S. in mechanical engineering from University of California, Berkeley in 1936. After teaching at the Polytechnic College of Engineering in Oakland, California, Hill began his career with the National Advisory Committee of Aeronautics (NACA) in 1939, which became the National Aeronautics and Space Administration (NASA) in 1958. He worked at NASA until 1970, where he published numerous scientific and technical reports.

Hill was also an adamant UFO enthusiast. Based on his own personal sightings in 1952, Mr. Hill tried to use his scientific and engineering knowledge to understand how UFOs worked and eventually built his own flying platform. His book on the topic, *Unconventional Flying Objects: A Scientific Analysis*, was published post-humously in 1995.

Mr. Hill was married to Frances Hoback Hill (d. 1999) and had one daughter, Julie M. Hill. Hill died in 1990 at the age of 81.

SCOPE AND CONTENT NOTE

The Paul R. Hill Collection contains material relating to the NACA/NASA/Langely career of Paul R. Hill from 1939-1970. Materials include books, papers, newspapers, lantern slides, NASA publications and memos, overhead sheets, and notes from presentations and talks.

Many photographs portray Hill's design for a personal flight device. Other drawings reflect planetary orbits or space station models. Presentation notes accompany a few slide folders.

The collection also consists of various publications and papers written by Hill and other authors. Many of these publications are declassified official NASA reports, and others are NASA publications from award ceremonies and department memorandums. Wherever possible, bibliographies at the folder-level are included in the "Contents List" below. Other publications include drafts of papers reviewed by Hill. A number of books were removed from the collection to be catalogued (see "Separated Materials" below).

Also included in this collection are personal papers of Paul R. Hill. Some of these items include his 1936 voter registration, work evaluations, and correspondence regarding his personal projects. Newspaper and magazine clippings kept by Hill are also included in the collection.

ARRANGEMENT

The collection is arranged in 5 series. In addition, there are two folders of magazine and newspaper clippings. Where possible, collection materials have been kept in original groupings. Other items, such as publications and clippings, have been grouped and arranged chronologically. Undated material is arranged alphabetically, where possible.

Series I: Paul R. Hill Materials Contains personal materials of Paul R. Hill, including correspondence, work evaluations, and his talks and lecture notes. It also contains papers written by Paul R. Hill.

Series II: Subject Files The files in this series have been kept in original groupings by Hill. Contains, papers, notes, correspondence.

Series III: NASA Reports and Publications This series contains official publications from NASA, memorandums and meeting agendas from Hill's time at NACA/NASA.

Series IV: Other Papers and Publications These files contain other publications that were part of the collection. Some of these publications were copies from other sources. Arranged chronologically.

Series V: Images This series contains slides, slide negatives, drawings, photographs, and photograph negatives.

The Magazine Clippings and Newspaper Clippings files contain clippings from various sources.

RELATED MATERIAL

SEPARATED MATERIAL

The following items have been removed and cataloged for the Special Collections Rare Book Collection:

A Class of Unified Explicit Methods for Steering Throttleable and Fixed-Thrust Rockets, 1964
A Course in Electrical Engineering/Vol II: Alternating Currents, 1934
A New Dimension: Wallops Island The First Fifteen Years, 1978
A Short Table of Integrals, 1956
A Superposition Principle for a System of Analytic Ordinary Differential Equations, 1963
A Trajectory Optimization Technique Based on the Theory of Second Variation, 1964
Accounting Principles, 1935
Analytical Mechanics for Engineers, 1933
Air-Age Education Series: Science of Pre-Flight Aeronautics, 1944
Airplane Dynamics, 1951
Airplane Structures, Volume I, 1938
Astronautics Magazine, September 1962
Bacteriology Illustrated, 1965
Bacteriology: Principles and Practice, 1962
Computation Curves for Compressible Fluid Problems, 1949
Design of Machine Elements, 1935
Development of Large Solid Propellant Boosters, 1962
Elementary Pile Theory, 1950
Elements of Chemistry, Volume II, 1853
Elements of the Differential and integral Calculus, 1929
Elements of Heat Power Engineering, 1915
Elements of Heat-Power Engineering, Part I: Thermodynamics and Prime Movers, 1926
Elements of Heat-Power Engineering, Part II: Steam-Generating Apparatus and Prime Movers, Fuels, Combustion, and Heat Transmission, 1933
Engineering Applications of Fluid Mechanics, 1947
Explosions and Combustion Processes in Gases, 1946
Gas Sterilants (Linde), n.d.
Geometry of Engineering Drawing, 1926
History of Wallops Station Part III Volume 1, 1971
History of Wallops Station Part III Volume 2, 1971
Hydraulics: A Text on Practical Fluid Mechanics, 1937

Special Collections is located in Carol M. Newman Library at Virginia Tech. Special Collections includes manuscript collections, rare books, and the University Archives. The collection also contains state, local and historical maps and photographs. Our mission is to collect and preserve unique, historical materials and provide access to them in their original form. When possible, Special Collections also offers materials in digital format.

☐ Details

330 cubic ft. (395 boxes)

The collection contains manuscripts and research files for Gurney's historical writings. Included are "The Library of Congress", "Pictorial History of the United States Army", "Beautiful Washington D.C.", "A Walk in Space", and others. Also included are materials on space flight collected for Gurney's work as public affairs officer for the National Aeronautics and Space Administration.

Gene Gurney (1924-2011) served in the Air Force for 30 years as command pilot with Strategic Air Command. After retiring in 1973, he became a public affairs officer and program manager for the National Aeronautics and Space Administration (NASA). Gurney was also a historian who published fifty-nine non-fiction books. Topics he wrote on included military and aviation history, unidentified flying objects, space flight, the Library of Congress, and Washington D.C.

Preliminary finding aid available in repository.

Collection Overview

Repository:	Archives of American Art
Creator:	Bothwell, Dorr
Title:	Dorr Bothwell papers
Dates:	1900-2006
Quantity:	10.6 linear feet
Abstract:	The papers of California painter, printmaker, and art instructor Dorr Bothwell date from 1900-2006, and measure 10.6 linear feet. Found within the papers are biographical material, correspondence, personal business records, notes and writings, five diaries, art work and 19 sketchbooks, three scrapbooks, printed material, and photographs.

Administrative Information

Provenance

The Dorr Bothwell papers were donated in 1978 by the artist, and in 2002, 2009, and 2012 by the Dorr Bothwell Trust.

Processing Information

The Dorr Bothwell papers were processed in 2011 by Jean Fitzgerald. An addition to this collection was processed in 2013 by intern Claire Norman.

Preferred Citation

Dorr Bothwell papers, 1900-2006. Archives of American Art, Smithsonian Institution.

Restrictions on Access

Use of original papers requires an appointment. Use of archival audiovisual recordings with no duplicate access copy requires advance notice.

Ownership and Literary Rights

The Dorr Bothwell papers are owned by the Archives of American Art, Smithsonian Institution. Literary rights as possessed by the donor have been dedicated to public use for research, study, and scholarship. The collection is subject to all copyright laws.

Biographical Note

Dorr Bothwell (1902-2000) worked primarily in California as a painter, printmaker, and art instructor.

Doris Bothwell was born on May 3, 1902 in San Francisco, and later changed her first name to Dorr in order to more easily enter the art business. Bothwell began her art studies in 1916 with her parents' friend Anna Valentien, a student of Rodin. Between 1921 and 1922, she studied at the California School of Fine Art, and continued her studies at the University of Oregon at Eugene. After attending the Rudolph Schaeffer School of Design in 1924, she established her own studio in San Francisco from 1924 to 1927. Also during this time Bothwell, with eight other artists opened the Modern Gallery on Montgomery Street, mounting her first solo exhibition there in 1927.

Between 1928 and 1929, Bothwell traveled to American Samoa, where she created paintings and drawings, and documented tapa (barkcloth) drawings for the Bishop Museum of Honolulu. She then spent a year of study

in Europe, returning to San Diego, California in 1931 and marrying sculptor Donal Hord. Four years later, they divorced and she moved to Los Angeles where she worked for the pottery manufacturer Gladding McBean, joined the post-surrealist group around Lorser Feitelson and Helen Lundeborg and opened the Bothwell-Cooke Gallery.

Between 1936 and 1939, Bothwell worked in the mural division of the Federal Arts Project of Los Angeles, and learned the art of serigraph printing. She designed dioramas and mechanized exhibitions for the Los Angeles County Museum. In 1940 she also created murals in the Manning Coffee Restaurant in San Francisco.

After teaching color and design at the California School of Fine Art in San Francisco from 1944 to 1948, Bothwell was awarded the Abraham Rosenberg Traveling Scholarship that financed study in Paris from 1949 to the fall of 1951. In 1952 she taught textile design for mass production at the Parsons School of Design in New York City.

Returning to San Francisco, Bothwell taught again at the California School of Fine Art from 1953 to 1958, and at the San Francisco Art Institute from 1959 to 1960. From 1960 to 1961 she took a sabbatical in England and France, creating paintings for an exhibition. In 1962 she was asked to teach at the new Mendocino Art Center and she taught there until 1983. She was also asked by Ansel Adams to teach design and composition for photographers at his Yosemite Workshop summer sessions, which she did from 1964 to 1977.

From 1966 to 1967, Bothwell documented indigo dying techniques, strip weaving, and pottery in Western Nigeria and Tunisia. In 1968, she published her book, co-authored with Marlys Frey, *NOTAN The Principle of Dark-Light Design*. The book was reissued in 1991. Bothwell continued her travels from 1970 to 1971, when she studied 12th century enamels in England, France, and Holland, and conducted a symposium, "Notan Design," for the London Educational Authority. In 1974, she traveled to Bali, Java, and Sumatra, making a slide documentary on batik, woodcarving, and folk design.

In 1977 Bothwell moved to Joshua Tree, California, from Mendocino in Northern California, but moved back and forth between the two studio/residences until 1992 when she moved to her last residence on the desert at Apache Junction, Arizona. From 1979 to 1980, she taught composition at the Victor School of Photography in Colorado and a design course at the Women's Art Guild in Kauai, Hawaii. Following a tour of China with a watercolor artists' group in 1982, Bothwell conducted workshops at the Mendocino Art Center. In 1985, she traveled to Japan.

Dorr Bothwell died on September 24, 2000 in Fort Bragg, California.

Scope and Content Note

The papers of California painter, printmaker, and art instructor Dorr Bothwell date from 1900-2006, and measure 10.6 linear feet. Found within the papers are biographical material, correspondence, personal business records, notes and writings, five diaries, art work and 19 sketchbooks, three scrapbooks, printed material, and photographs.

Biographical material consists of biographical sketches, resumés, identity cards, award certificates, typescripts of autobiographical interviews, address books, and a file concerning UFOs, spirituality, and philosophy.

Correspondence consists of letters exchanged between Bothwell and her colleagues and friends discussing their art-related activities, travel, and birthday greetings. There are scattered letters from Ansel and Virginia Adams, Etel Adnan, Benjamin Chinn, Claire Falkenstein, and Emmy Lou Packard.

Personal business records include teaching contracts, contracts and royalty statements for the publication of Bothwell's book *Notan*, insurance records, income tax records, records concerning a grant from the Pollock-Krasner Foundation, estate records, card files, lists of art work, price lists, exhibition entry cards, receipts for the sale of art work, travel receipts, medical receipts, and consignment/sales records.

Notes and writings include three diaries, two travel journals, guest books, miscellaneous lists, schedules of classes for various organizations and art schools including the Ansel Adams Yosemite Workshop, typescripts of lecture notes, and miscellaneous notes. There are also scattered writings by Bothwell and others.

Seventeen sketchbooks, including several completed during Bothwell's travels, and one dated 1942 illustrated with daily drawings of her activities while preparing for World War II, are found within the papers. There are also miscellaneous drawings, collages, a serigraph *It's Time for a Change*, an etching by Martha Jackson, and a drawing by Charles Howard.

Three scrapbooks contain clippings, exhibition announcements and catalogs, programs, and photographs of art work. Scrapbook 3 contains materials concerning spiritualism and mysticism. Additional printed material consists of clippings, exhibition announcements and catalogs, press releases, brochures for art classes, the sale of art work, travel, and camera equipment, reproductions of art work, picture postcards, programs, books, and miscellaneous commercial business cards.

Photographs are of Bothwell, her mother and brother, her studio/residences, miscellaneous friends and colleagues including her former husband, sculptor Donal Hord, miscellaneous events, and art classes conducted by Bothwell. There are also photographs of art work by Bothwell and others, as well as numerous photographs and slides of travel various forms in nature that Bothwell would incorporate into her art work.

Arrangement

The collection is arranged as 8 series:

Series 1: Biographical Material, 1939-2001 (Box 1, 11, 13, 15; 0.6 linear feet)

Series 2: Correspondence, 1942-2002 (Box 1-3, 13; 2.3 linear feet)

Series 3: Personal Business Records, 1925-2006 (Box 3-4; 0.7 linear feet)

Series 4: Notes and Writings, 1949-1998 (Box 4, 11, 14, 15; 0.8 linear feet.)

Series 5: Art Work, 1920-1994 (Box 4-5, 11, 13, 16, 17; 1.5 linear feet)

Series 6: Scrapbooks, 1926-1979 (Box 5, 11, 12; 0.5 linear feet)

Series 7: Printed Material, 1923-2000 (Box 5-7, 12, 13; 1.8 linear feet)

Series 8: Photographs, 1900-2001 (Box 7-9, 10; 2.4 linear feet)

Names and Subject Terms

This collection is indexed in the online catalog of the Archives of American Art under the following terms:

Subjects:

Artists' studios--Photographs
Art teachers--California
Painters--California
Surrealism
Women artists--California
World War, 1939-1945

Types of Materials:

Awards
Collages
Contracts
Diaries
Drawings
Interviews
Lecture notes
Photographs
Scrapbooks
Sketchbooks
Sketches
Travel journals
Visitors' books

Adnan, Etel
Chinn, Benjamin, 1921-2009
Falkenstein, Claire, 1908-1997
Howard, Charles, 1899-1978
Jackson, Martha Kellogg
Packard, Emmy Lou, 1914-
Pollock-Krasner Foundation

Series Descriptions/Container Listing

Series 1: Biographical Material, 1939-1999

(Box 1, 11, 13, 15; 0.6 linear feet)

Biographical material consists of biographical sketches, resumé's, a handwritten outline of Bothwell's teaching career, identity cards including photocopies of her passport, and student cards from Paris, award certificates, typescripts of autobiographical interviews including one concerning her travel to Samoa, and address books. The recording of Bothwell's memories of Samoa are on five sound cassettes. There is also a file concerning Unidentified Flying Objects, Spirituality, and Philosophy, containing letters, clippings, brochures, and a sheet of UFO stickers.

Series 8: Photographs, 1900-2001

(Box 7-9, 10; 2.4 linear feet)

Photographs are of Bothwell, her mother and brother, her studio/residences in Mendocino and Joshua Tree, California, and in Apache Junction, Arizona, art classes conducted by Bothwell, events including a reception for Danish royalty in Cheverny, France, and of miscellaneous friends and colleagues including her former husband, sculptor Donal Hord, and friend Francis Cooke. There are also photographs and slides of art work including Bothwell's murals for the Valencia Hotel in La Jolla, and for Manning's Coffee Restaurant, miscellaneous paintings, serigraphs, and collages, exhibition installations, and art work by others. Travel photographs and slides are of scenes in New York, California, Mexico, the Caribbean, France, Italy, Corsica, Spain, the Pacific Islands, Western Nigeria, and China. Miscellaneous photographs and slides are of various forms in nature including trees, fruit, flowers, rock formations, and animals that Bothwell would incorporate into her art work.

Abstract

Edward Uhler Condon was a theoretical physicist at Princeton University and Westinghouse Laboratories who later served as director of the National Bureau of Standards (1945-1951), and as the director of research and development (1951-1954) and consulting physicist (1954-1974) at Corning Glass Works. The Condon Papers includes correspondence, notebooks, writings, photographs, and other materials concerning Condon's education, teaching, and his government, industrial, and academic.

Background note

Born in Alamogordo, New Mexico, on March 2, 1902, E. U. Condon spent a life in theoretical physics that brought him into many of the major developments in the field, from the quantum revolution of the 1920s to the nuclear and electronic revolution of the 1950s and 1960s. Making substantial contributions as a scientist and administrator in academia, industry, and in service to the government, Condon also tasted his fair share of controversy.

After high school, Condon initially set his sights a career in journalism, working at the Oakland *Tribune* during the summer of 1918 to gain experience, and continuing work on the side when he entered the University of California, Berkeley. While enrolling, dropping out, and re-enrolling from college, however, Condon discovered physics and set off on a different course. Receiving a bachelors degree with highest honors in 1924, he entered into doctoral studies at Berkeley under James Franck, and two years later, after a fevered weekend of work, produced a landmark dissertation. In this dissertation, Condon quantified the effect of light on molecular transitions and established the separability of electronic and vibrational motions in molecules which became known as the Franck-Condon principle.

Following the standard rite of passage for an American student of physics in the early 20th century, Condon accepted a National Research Council fellowship to study in Germany during the fall of 1926 and spring of 1927. Under Max Born and Arnold Sommerfeld at Göttingen and Munich, respectively, he applied himself to quantum theory, and after his return to the United States in 1927, took a position in public relations with Bell Telephone Laboratories.

In the spring of 1928, Condon's academic career began in earnest when he was hired as lecturer for two graduate courses at Columbia University (in quantum mechanics and the electromagnetic theory of light). His skill in interpreting the new developments in these areas earned him offers for a permanent position from six different institutions, of which he chose Princeton. He later considered the year 1928-1929 as the most productive of his academic life, capped by his work with R. W. Gurney in the development of the barrier leakage picture of alpha-particle radioactivity and quantum mechanical tunneling. Condon's and Gurney's ideas, which had been brewing simultaneously in the mind of George Gamow, represented the first application of quantum mechanics to the details of atomic structure. At Princeton, he and Philip M. Morse also produced the first English language book on quantum mechanics, *Quantum Mechanics* (New York: McGraw Hill, 1929).

Thus by the age of 27, Condon had earned a sufficient academic reputation to merit appointment as full professor at the University of Minnesota, though he almost immediately returned to Princeton. In this second stint at Princeton, Condon expanded his research interests to work with Gregory Breit and Richard Present on proton-proton scattering, demonstrating charge independence in the strong nuclear interaction and to early work in mass spectroscopy. His *Theory of Atomic Spectra* (with G.H. Shortley, 1936) is a classic in the field.

In 1937, Condon left Princeton to begin a new phase in his career -- industry -- when he accepted a position as associate director of research at Westinghouse in Pittsburgh, where he steered the corporation toward work in nuclear energy, and toward a greater emphasis on primary research. With the war looming in 1940, however, Condon moved to the Radiation Laboratory at MIT to work on airborne radar, and in the winter 1942, was chosen by Robert Oppenheimer to help organize the secret Los Alamos Scientific Laboratory, with the hopes that he would apply his experience in mass spectroscopy to the separation of uranium isotopes. Struggling with Leslie Groves, the military head of the laboratory, to maintain his civilian status, Condon returned to Westinghouse to work on microwave radar in 1943 and to the Radiation Laboratory at Berkeley to work on uranium separation.

After the war, Condon was appointed director of the National Bureau of Standards, where he created new divisions in applied mathematics and electronics which collaborated in the development of the first automatically-sequenced high-speed digital computers, and at the same time acted as science advisor to Senator Brian McMahon, chair of the special committee on atomic energy in the Senate. Condon's influence with McMahon was instrumental in the formulation of the McMahon-Douglas bill of August 1946, which established the Atomic Energy Commission, which safeguarded a civilian role in overseeing the development of nuclear energy and weaponry. His public activities drew the unwanted attention of the House Un-American Activities Commission (HUAC), which publicly accused Condon

of being a liability for national security.

With the zealous prosecution of Congressman J. Parnell Thomas, head of HUAC, Condon was accused in 1952 of being "one of the weakest links in our atomic security." Condon's security clearance was questioned repeatedly, and exonerated equally often, but HUAC refused to retract its allegations. Despite the absence of evidence against him, Condon was compromised in his ability to perform at the National Bureau of Standards, and therefore resigned to become head of research at Corning Glass Works. Even this, however, did not end his troubles with HUAC. In October 1954, the Secretary of the Navy intervened to have Condon's security clearance revoked in connection with naval research being conducted at Corning. Vice President Richard Nixon hinted in campaign speeches that he had been personally involved in the suspension.

As a result of his on-going struggle with the government, Condon returned to academia, teaching at Oberlin for two years and at Washington University for seven before moving to the University of Colorado as professor of physics and fellow of the Joint Institute for Laboratory Astrophysics.

At Colorado, Condon's security clearance was restored, and he was once again consulted by the government. From 1966 to 1968, he headed a project, "the Scientific Study of Unidentified Flying Objects," undertaken at Colorado by the Air Force Office of Scientific Research to investigate claims of Unidentified Flying Objects. The "Condon Report," issued in 1968, confirmed Condon's prior skepticism with regard to UFOs, although Condon (given sole responsibility for the content of the report) and his researchers were not always in complete agreement. Nevertheless, the negative conclusion was quickly supported by the National Academy of Sciences and contributed to the decision of the Air Force to suspend Project Blue Book.

Even in the most turbulent periods of his career, Condon received the accolades of his peers. He served as president of the American Association for the Advancement of Science in 1953 when he was most beleaguered by HUAC, was president of the Society for Social Responsibility in Science (1968-1969), and chair of the National Committee for a Sane Nuclear Policy (1970), and he was a member of the National Academy of Sciences (1944), the American Physical Society (President, 1946), and the American Philosophical Society (1949). He died in Boulder in 1974, leaving his wife, Emilie Honzik, and three children.

Scope and content

The Papers of Edward U. Condon are comprised of correspondence, notebooks, writings, photographs, newspaper clippings, etc., concerning Condon's education, teaching, and his government, industrial and academic work. There is also much interesting material relating to his problems with obtaining security clearances during the late 1940s and 1950s.

The collection includes an interesting but incomplete autobiography, and there are also scattered reflections, such as his recollections of the Univ. of California, Berkeley, and Los Alamos in 1943. Some of the background material and briefs, relating to his security clearance, provide detailed biographical information.

Concerning his own writings, there are copies of many addresses, articles, books (9 boxes relating to his *Handbook of Physics*) and such interesting items as the Los Alamos Primer, which is a detailed technical description of the project, written for the scientists who were arriving there.

Information concerning Condon's student and teaching days includes several notebooks for physics lectures at Berkeley, 1920-1924, and there are course materials (lectures) for classes he taught in

physics, atomic physics, and quantum mechanics (1931). There is a separate series of quantum mechanics lecture notes for the 1930s and 1950s.

The security clearance material is diverse, relating not only to Condon but to other scientists and to what they perceived as the more general threat posed to science. Among the more important files are those for the Eastern Industrial Personnel Security Board; the exhibits on behalf of Condon; Fowler, Levan, Hawes & Symington (legal counsel); Richard Nixon; Security Investigation; and speeches: :The Weakest Link;; U.S. Congress. House Special Committee on Un-American Activities; and U.S. Dept. of Commerce. Loyalty Board. The personal correspondence with Clifford and Virginia Durr is also rich on this topic, and on politics and social issues of the 1950s.

Condon's participation in a number of professional organizations is well, including the American Association for the Advance of Science; American Physical Society; American-Soviet Science Society; Corning Glass Works; Federation of American Scientists; SANE; Society for Social Responsibility in Science; U.S. Atomic Energy Commission; U.S. Dept. of Commerce, National Bureau of Standards (Condon was the Director); University of Colorado; Washington University; and Westinghouse Electric Corp.

Miscellaneous material of note includes folders on the Manhattan Project and an interesting journal, filed with his notebooks, kept during Operation Crossroads, the atomic bomb test conducted on Bikini Atoll on June 30, 1946. There is much on the Robert Oppenheimer case, and also a series on the President's Scientific Board, 1947.

Series I.	Correspondence, 1931-1991	(7 boxes; 3.25 linear feet)
Series II.	Notebooks and diaries, 1922-1946	(3 boxes; 1.25 linear feet)
Series III.	Miscellaneous materials, 1936-1971	(1 box; 0.5 linear feet)
Series IV.	Photographs	(1 box; 0.5 linear feet)
Series V.	UFO materials	(33 boxes; 16.5 linear feet)
Series VI.	Printed materials	(11 boxes; 5.5 linear feet)

Collection information

Provenance

The Condon Papers were deposited at the APS Library by the Estate of Edward Uhler Condon in 1974.

Preferred citation

Cite as: Edward Uhler Condon Papers, American Philosophical Society.

Processing information

Catalogued by Lois Fischbeck, 1998.

General physical description

75 linear feet

Separated material

Printed materials have been transferred to the Printed Materials Department, and can be located through the Library's OPAC, VOLE, and are noted as being "From the estate of E. U. Condon." Please consult a librarian for assistance.

Related material

The APS houses several collections that document the history of the development of the atomic bomb, including the papers of Henry DeWolf Smyth, Stanislaw M. Ulam, and John A. Wheeler for the physics of A-bomb development, and Curt Stern and James V. Neel relating to the genetics. The APS also houses two collections relating to the investigation of UFO sightings, namely the papers of Philip J. Klass, and Donald Howard Menzel.

Collection overview

Series I. Correspondence	1920-1974	128 boxes, 64 linear feet	Request Series
Consists mainly of correspondence to Condon, arranged alphabetically. The Series also contains various papers, addresses, and drafts of works by Condon and others.			
Series II. Notebooks and diaries	1922-1946	3 boxes, 1.25 lin. foot	Request Series
Is comprised of various diaries and date books of Condon, as well as notebooks from different courses, and projects (most notably the Bikini Atoll tests).			
Series III. Miscellaneous materials	1936-1971	2 boxes, 0.75 lin. foot	Request Series
Includes miscellaneous files added to the collection at a later date, along with a small assortment of medals awarded to Condon and identification badges.			
Series IV. Photographs	1922-1946	1 box, 0.5 lin. foot	Request Series
Various personal and professional photographs of Condon, no detailed inventory currently available.			
Series V. UFO materials	1922-1946	33 boxes, 16.5 lin. feet	Request Series
Files and documents from Condon's work on Operation Blue Book for the United States Air Force. No detailed inventory currently available.			
Series VI. Printed materials	1922-1946	11 boxes, 5.5 lin. feet	Request Series
A few miscellaneous printed items. No detailed inventory currently available.

1. Personal Papers

SAD.882/61939 Aug 24

/1-3

Letter from H.L. Roper [H.L.R.] at Port Sudan to his brother E.M. Roper concerning a major washout on the railway line near Kamob Sanha, A.R.P. training at Port Sudan and the sale of his brother's copies of *Sudan Notes and Records*. E.M. Roper served in the Customs Department from 1923 to 1935 and as Director of Economics and Trade from 1935 to 1939

SAD.882/6[ca. 1955]

- 15-7** Detailed review of *The making of the modern Sudan: the life and letters of Sir Douglas Newbold* by K.D.D. Henderson, incorporated in a letter from E.M. Roper to his brother H.L.R.

2. Photographic Material

(a) Photographs

Photographs, mostly of Northern Sudan, taken by H.L.R. during his service with the Customs Department. Many are unidentified.

SAD.877/1[ca.1923]

- 6/1-4** Photographs of Southern Egypt and Northern Province, probably taken during the journey out to Khartoum:
 SAD.877/16View of Abu Simbel, taken from the corrugated roof of a building
 /1
 SAD.877/16Steamer at Shellal
 /2
 SAD.877/16Korosko, from the river
 /3-4

SAD.877/1[n.d. ca.1923 - 1949]

- 6/5-27** Photographs of the Roper family and house at Port Sudan:
 SAD.877/16H.L.R.
 /5-12
 SAD.877/16H.L.R. with Mrs. M.I.B. Roper and their first daughter Priscilla,
 /13 Khartoum or Port Sudan, 1930
 SAD.877/16Mrs. M.I.B. Roper with brother-in-law, E.M. Roper and daughter
 /14 Joan at a swimming pool
 SAD.877/16Ann Roper diving into a swimming-pool at the Sudan Club
 /15-16
 SAD.877/16H.L.R.'s daughter Joan, c.1937
 /17
 SAD.877/16Joan Roper with Julie Castle at the Roper house in Port Sudan,
 /18-20 c.1937
 SAD.877/16Mrs. Roper with small child at Port Sudan house, c.1937
 /21
 SAD.877/16H.L.R., Mrs. Roper, Joan and unidentified British man on a picnic,
 /22 c.1937
 SAD.877/16/The Roper house and garden, Port Sudan, c.1937
 23-27

SAD.877/1[n.d. ca.1923 - 1940]

- 7/1-18** Mostly unidentified views, but probably Red Sea Province:
 SAD.877/17Village scenes: sacks of cotton or grain ready for transport, with
 /1-11 *tukls* in background
 SAD.877/17Preparing to set out on trek
 /12
 SAD.877/17Villagers with donkey
 /13
 SAD.877/17Men carrying sacks into village
 /14
 SAD.877/17Repairing thatch
 /15-16
 SAD.877/17*Tukls*
 /17
 SAD.877/17SS *Llanstephen Castle* arriving at Port Sudan, 18 Oct 1923
 /18

SAD.877/11923

- 7/19-27** Photographs of Sinkat, Red Sea Province:
 SAD.877/17The Roper bungalow, Jul 1923
 /19-20
 SAD.877/17House of the Director of Customs, Jul 1923
 /21
 SAD.877/17American Mission House and Gellatly Hankey and Co.'s
 /22 bungalow, Jul 1923
 SAD.877/17View of Sinkat
 /23

SAD.877/17 Flooded *khawr* , Jul 1923

/24-26

SAD.877/17 View from Sinkat looking towards Summit, Jul 1923

/27

SAD.877/1[n.d. ca.1920s]

8/1-10 Photographs of brick-built buildings, a number of them probably homes occupied by H.L.R. in Red Sea Province

SAD.877/1[n.d. ca.1920s - 1930s]

8/11-19 Photographs of the Red Sea Hills:

SAD.877/18 H.L.R. with Bija tribesmen on hunt

/11-13

SAD.877/18 Hadanduwah hunting party

/14-16

SAD.877/18 General views of the Red Sea Hills

/17-19

SAD.887/1[n.d. ca.1920s - 1930s]

/1-10 General unidentified views, N. Sudan, including a radio mast (SAD 887/1/8) and a *habub* (SAD 887/1/9)

SAD.887/1[n.d. ca.1920s - 1930s]

/11-17 River scenes:

SAD.887/1/ Unidentified views

11-14

SAD.887/1/ *Feluccas* moored at river's edge

15-16

SAD.887/1/ Unidentified dam

17

SAD.887/1[n.d. ca.1920s - 1930s]

/18-21 Photographs of camels, goats and donkeys

SAD.887/1[n.d. ca.1920s - 1930s]

/22-23 Photographs of transport:

SAD.887/1/ Two men standing in front of truck, probably the driver and a policeman, with British woman in passenger seat

SAD.887/1/ Train at station with passengers on the platform

23

SAD.887/2[n.d. ca.1930s - 1940s]

/1-7 Photographs of Khartoum:

SAD.887/2/ Sudan football club ground, match in progress

1-4

SAD.887/2/ Ostrich in Khartoum zoo

5

SAD.887/2/ Interior of the Victory shop

6-7

SAD.887/2[n.d. c.1920s - 1940s]

/8-22 Photographs of unidentified men and women, mostly British officials and their wives:

SAD.887/2/ Group of American missionaries in Khartoum, including Frances Turk, second from right

SAD.887/2/ Portrait photograph of Frances Turk, American missionary

9

SAD.887/2/ Unidentified men and women, on trek, on picnics, etc., mostly in the Red Sea Hills area

SAD.871/1[n.d. ca.1940s]

0/1-2 Group photographs of Customs Department staff, H.L.R. seated centre

SAD.887/3[n.d. c.1930s - 1940s]

/1-11 Unidentified photographs which are not of the Sudan:

SAD.887/3/ Street scenes and women and children, possibly Egypt or Lebanon

SAD.887/3/ Group watching a man dancing, possibly Kenya. H.L.R. is standing to the rear of the group in one photograph

(b) Cinefilms

The following films were taken by H.L.R. in the Northern Sudan during his service with the Customs Department. His intention had been to take a series of "themed" films recording life in the Sudan at that time, but difficulties of obtaining film during the war, and mounting costs, led him to abandon the project after only two films, one covering the theme of "water" and the other "travel". The original 16mm films have now been remastered on to dupe negatives and fine grain positives, with a copy on VHS for ease of viewing.

SAD.765/3[ca.1926 - 1927]

Port Sudan harbour; train leaving station; view from train of desert; Red Sea Hills; village of *tukls* ; station; view of Suakin from the sea; boats in Suakin harbour; Suakin buildings and streets; causeway and Gordon's gate; passengers at station; view from a moving train; Red Sea Hills; British man and woman; loading sacks on to train; engines and rolling stock; Gebeit station; YMCA building; Bija tribesmen raising water from a well; camel herd; street scene; herd of goats; *shaduf* with mud built building in background; *sagiyah* ; Bija tribal sports - sack race, hurdles and camel race; flags flying (British and Egyptian) at sports meeting; mock fighting; shot putt; camel race; high jump. For viewing copy see Video 25
16mm, b & w. Duration: 11 minutes

SAD.765/4[ca.1930 - 1936]

Italian 3-engined aircraft taking off from Kassala runway; raising water from well; aeroplane taking off; row of cars and lorries laden with sacks of barley for Eritrea (ca.1936); lorry driving on rough road; camels at rest; Bija men loading camels, Red Sea Hills in background; camels carrying fodder; railway station; girl selling baskets at station; Omdurman street scenes; tram; shops; Khartoum zoo; travelling over dirt road, Red Sea Hills; euphorbia; British man in car at Erkowit (?); loading cattle on to steamer at Port Sudan (?) For viewing copy see Video 25.
16mm, b & w. Duration: 11 minutes

SAD.Video 25 Time-coded VHS video copy of the films above, arranged as follows:
00.30 to 11.43 - SAD 765/3
00.22 to 11.40 - SAD 765/4

3. Museum Objects

G / S 387/1-4 4 kulbetas, iron axe or throwing knives from the Nuba Mountains or hills south of Roseires. Purchased in the 1930s or 1940s at Wisko in the Southern Funj. Made by local blacksmiths. Commonly carried by Berta tribesmen on the shoulders and flung parallel to the ground. Incised decoration, geometric patterns and animals (giraffes, figures and one has an elephant)

About Special Collections

Please use the links on the left to find out about [opening hours](#) for the Search Rooms at Palace Green Library. There is also additional [information for visitors](#) including access, contact details, location, accommodation and transport. Further links give information [about the collections](#) and [using the collections](#) with details of search room rules and procedures, and guidance on material handling. Enquiries, photocopying and reprographics, commissioned searches and palaeography teaching are covered under [facilities and services](#). There is also a list available of [publications](#) including printed items and postcards.

Two of the University Library's special collections were awarded [Designated status](#) in 2005 in the first round of the Museums, Libraries and Archives Council Designation Scheme.

Opening of the Barker Research Library at Palace Green

On 14 October, full reading room services reopened at Palace Green Library in the splendidly refurbished Barker Research Library in the Pace Building. All Special Collections's books and archives are available there in the searchroom and the

Local Studies and History of the Book collections have returned to open access to readers. All this will be accessible Monday to Friday from 9am to 5pm. The searchroom at 5 The College has reverted to opening three days per week, Wednesday to Fridays from 9am to 1pm and 2pm to 5pm for researchers into the Cathedral's archive only.

Philip J. Klass Collection 1948-2000

American Philosophical Society

36.0 Linear feet

An electrical engineer and senior editor for Aviation Week and Space Technology, Philip Klass began investigating UFOs in 1966 after participating in a panel discussion on the subject for the Institute of Electrical and Electronics Engineers (IEEE). From that time forward Klass has investigated UFO sightings in an effort to find a credible prosaic explanation, and became one of the most widely recognized UFO

"debunkers." A founding member of the Committee for the Scientific Investigation of Claims of the Paranormal (CSICOP), serving on the Executive Council and the UFO subcommittee, Klass has authored seven books and numerous articles on UFOs, including the Skeptics UFO Newsletter in 1989. In the early 1970s, he became interested in space based weapons, and began collecting material related to the Strategic Defense Initiative (SDI) for a possible book. The Klass Collection relate to his forty-plus years of investigating UFO sightings, and includes correspondence with many of the ... [Read More](#)

OCLC Privacy Policy

Respecting your rights while staying in touch

OCLC ONLINE COMPUTER LIBRARY CENTER, INC. PRIVACY POLICY

About OCLC

OCLC Online Computer Library Center, Inc. ("OCLC") is a nonprofit, membership, computer library service and research organization dedicated to the public purposes of furthering access to the world's information and reducing information costs. The following policy describes how we collect and use information we receive from visitors to our site. OCLC is committed to protecting end-user privacy online. If a user submitting personal information is suspected of being younger than 13 years of age, OCLC will delete this information from its records in accordance with the Children's Online Privacy Protection Act (15 U.S. Code, 6501 et seq). Some products may contain additional privacy provisions in their terms and conditions.

How and What Information is Collected

- (1) Personally identifiable information
 - a. Personally identifiable information may be collected in conjunction with necessary processes. This information may include, but are not limited to: (1) First and last name, (2) Address, (3) ZIP/Postal Code, (4) Email address, (5) Telephone number, (6) Affiliated library information, or (7) Credit card numbers and other billing information.
- (2) IP Address
 - a. The OCLC web site logs IP addresses for system administration purposes. Your IP address can help us diagnose service problems and provide session statistics.
- (3) Cookies
 - a. OCLC uses a common feature of Web sites known as a cookie to store your member ID and state information about where you are in the site, as well as to track current and past activity. OCLC does not store any of your personal information in cookies. A cookie is simply a small data file that the Web site writes to your browser. A cookie can't read any other data off your hard drive, pass on a virus, or read cookie files created by other sites. You can refuse cookies by turning them off in your browser, however, the OCLC web site's functionality may be affected.

(4) Registration

- a. In order to take advantage of some features of the site, you must register and create a member account. An OCLC online registration form may require you to provide information such as your name, email address, a User Name, and a password.

(5) Usage and Circulation Records

- a. Any information collected may be used to analyze usage, evaluate service effectiveness and provide training material, and to facilitate library research.

(6) Questions, Comments, and Entries to Open Forums and Reviews

- a. We encourage you to provide personal information ONLY in fields specifically designed for such information such as registration and log-on.
- b. Comments and entries to forums and reviews are posted in real time. Consequently, your entire submission may appear in an open forum or review. Please be aware that any personal information you include within this entry field will be available to the public. OCLC will make reasonable attempts to remove personal information included in submissions.

Why Information is Collected

The majority of the information we collect is analyzed so that we can improve your OCLC experience. This information is not shared outside of OCLC except as described in this policy. If necessary, we will use your information to contact you. Except as permitted by this policy, OCLC does not send unsolicited e-mails

The purposes for collecting information and contacting you are:

- (1) Registration
- (2) Fulfilling requests and orders for OCLC products, programs and services
- (3) Customer service and support
- (4) Providing information and answering questions related to the use and purchase of services.
- (5) Providing updates on goods and services and notification of special offers
- (6) Delivering newsletters
- (7) Providing notification of service expiration dates.
- (8) Facilitating participation in an OCLC Open Forum or Review
- (9) Compiling aggregate statistical and academic analysis

(1) Sometimes OCLC may identify a new purpose outside of the stated purposes listed above and it will provide notification or, if the purpose involves the use of sensitive information, it will seek your consent to use and disclose personal information for that purpose.

(2) Your information will not be used for reasons beyond the scope of the stated purposes and OCLC will never willfully disclose personally identifiable information to a third party outside of the stated purposes unless:

- a. You have violated the Terms of Use or another applicable Agreement, or
- b. We are required to do so by law, or
- c. We provide notification to you

Third Parties

At times, OCLC partners with third parties to complete the stated purposes, and the third parties may require use of personally identifiable information. For instance, information must be disclosed to process orders through the online store, interact with Regional Service Providers, and to market products or services to you. We have taken reasonable steps to ensure the protection of your information, and to prevent the loss, misuse, or alteration of that information.

OCLC uses a third party service for the management and delivery of its opt-in e-mail communication. Their privacy policy can be found at <http://www.whatcounts.com/company/privacy.html>. Information related to the delivery and effectiveness of e-mail communications, such as aggregate open and click-through rates, are provided to and used by OCLC to help deliver the best content to the subscriber.

We currently contract with online partners to help manage and optimize our Internet business and communications. We use the services of a marketing company to help us measure the effectiveness of our advertising and how visitors use our site. To do this, we use Web beacons and cookies provided by our marketing company on this site. The type of information we collect includes pages visited, searches conducted, items selected, and library sites visited. By supplementing our records, this information helps us learn things like what pages are most attractive to our visitors, which designs are most effective for delivering visitors to libraries, and what kinds of marketing efforts our visitors respond to most positively. Although our marketing company manages the information coming from our site on our behalf, we control how that data may and may not be used. If you do not want to help us learn how to improve our site, offers and marketing strategy, you can opt out of our ability to analyze such data by visiting <http://www.omniture.com/privacy/2o7>.

This web site contains links to other sites. Such links do not imply OCLC's endorsement or guarantee of the products, information or recommendations provided by any third party site. Please be aware that OCLC is not responsible for the privacy practices of such other sites. We encourage our end-users to be aware when they leave our site and to read the privacy statements of each and every web site that collects personally identifiable information. This privacy statement applies solely to information collected by this web site.

Opt-Out Features

- (1) To tell us you don't want to receive communication from OCLC, such as email newsletter announcing new features or content, opt out at registration, if available, or send an email to privacy@oclc.org
- (2) You can decline to provide personal information to us or opt out at anytime. However, this may limit your ability to utilize the services on the web site.

Security

We have put in place reasonable measures to protect the personal information contained in our databases. Measures are in place to prevent unauthorized access and maintain appropriate use and accuracy. Furthermore, data that is transmitted in association with our online store is encrypted and is secured by SSL.

Your password is a component of our security system. As such, it is your responsibility to protect it. Do not share your password with any third parties. If your password has been compromised for any reason, you should change it immediately.

Access to Information

OCLC provides links in their e-mail communications and web pages for managing the information that is sent. If you have questions about the information collected about yourself, would like to update or make changes to your information, or are concerned that your information is inaccurate or incomplete please contact privacy@oclc.org. We make a reasonable effort to ensure that information contained in our database is

accurate and, when necessary, current.

Contact and Notice

From time to time, we may update this privacy policy. We will notify you about material changes in the way we treat personal information by placing notice on our site. We encourage you to periodically check back and review this policy so that you always will know what information we collect, how we use it and to whom we disclose it.

If you have any questions regarding our policies, please contact privacy@oclc.org or write to:

Terms of Use

Welcome to OCLC Research's Web page. The terms set forth below (the "Agreement") govern your use of this Web site and/or your use of any of the components found at this Web site ("Site"). By using or visiting the Site, you expressly agree to be bound by this Agreement and to follow all terms and applicable laws and regulations governing the Site. If you do not agree with this Agreement, your sole recourse is not to use the Site.

1. **Proper Use.** The content and software on this Site is the property of OCLC and/or its suppliers or licensors, and such content and software is protected by U.S. and international intellectual property laws. Accordingly, you agree that you will not copy, reproduce, alter, modify, create derivative works, or publicly display any content (except for your own non-commercial use) from the Site. You also agree that you will not use any robot, spider, other automated device, or manual process to monitor or copy any content from the Site unless explicitly stated otherwise. Furthermore, the Site is provided to you for your own use, and it may not be used for any commercial purposes. For example, you may not do any of the following without written permission from OCLC: use the Site to sell a product or service; use the Site to increase traffic to your Web site for commercial reasons, such as advertising sales; take the results from the Site and reformat and display them, or mirror any portion of the Site on your Web site. Any use of the Site that infringes upon the intellectual property rights of OCLC and/or its suppliers or licensors, or that is for commercial purposes will be investigated and OCLC shall have the right to take appropriate civil and criminal legal action. In addition to these terms and conditions, any software that you download may have its own terms and conditions as well.
2. **User Contribution and Privacy.** OCLC encourages community comments and suggestions on our research endeavors, and reserves the right to modify, improve, or otherwise inform ongoing projects as a result of such input. Any such input should be offered without expectation of compensation, partnership, or recognition beyond the association of the comment with its author in the forum in which it is offered. OCLC shall have the right to retain and use any such Information in current or future products or services, without further compensation to you. To the extent such Information is protectable under intellectual property laws, you agree to cooperate with OCLC as needed to provide such protection as OCLC may desire and you agree to assign your rights to such Information to OCLC. The cost of any such assignment will be at OCLC's expense.
3. **No Warranty.** Please note that the services provided as part of this Site are experimental in nature. They have not been tested in any manner, and OCLC does not represent that they are reliable, accurate, complete, or otherwise valid. ACCORDINGLY, THE SITE IS PROVIDED "AS IS" WITH NO WARRANTY OF ANY KIND AND YOU USE THE SERVICE AT YOUR OWN RISK. OCLC EXPRESSLY DISCLAIMS ANY WARRANTY, EXPRESS OR IMPLIED, REGARDING THE SITE OR ITS CONTENT, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. Some states do not allow the exclusion of warranty, so the above exclusions may not apply to you.
4. **Limitation of Liability.** UNDER NO CIRCUMSTANCES WILL OCLC BE LIABLE TO YOU FOR ANY

INDIRECT, INCIDENTAL, CONSEQUENTIAL, SPECIAL OR EXEMPLARY DAMAGES ARISING OUT OF OR IN CONNECTION WITH USE OF THE SITE, WHETHER OR NOT OCLC HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. UNDER NO CIRCUMSTANCES SHALL OCLC BE LIABLE TO YOU FOR ANY AMOUNT. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation and exclusions may not apply to you.

5. **Release and Waiver.** To the maximum extent permitted by applicable law, you hereby release, and waive all claims against OCLC and its employees, suppliers, licensors and agents from any and all liability for claims, damages (actual and consequential), costs and expenses (including litigation costs and attorneys' fees) of every kind and nature, arising out of or in any way connected with use of the Site. If you are a California resident, you waive your rights under California Civil Code § 1542, which states, "A general release does not extend to claims which the creditor does not know or suspect to exist in his favor at the time of executing the release, which if known by him must have materially affected his settlement with the debtor." Residents of other states and nations similarly waive their rights under applicable and/or analogous laws, statutes, or regulations.
6. **Modifications of Terms.** OCLC shall have the right to modify the terms of this Agreement at any time, which modification shall be effective immediately upon posting to the Site. Accordingly, we suggest that you check this page periodically. To make your review more convenient, we will post a version number or date at the bottom of this page.
7. **Violations of Terms.** In addition to any legal remedies that OCLC may have for your violation of the terms of this Agreement, OCLC shall also have the right in its sole discretion to suspend or terminate your access to the Site.
8. **Hold Harmless and Indemnity.** You agree to hold harmless and indemnify OCLC, and its employees, agents and representatives, from and against any third party claim arising from or in any way related to your use of the Site, including any liability or expense arising from all claims, losses, damages (actual and consequential), suits, judgments, litigation costs and attorneys' fees, of every kind and nature. In such a case, OCLC will provide you with written notice of such claim, suit or action
9. **No Assignment.** You shall not assign this Agreement or assign any rights or delegate any obligations hereunder, in whole or in part, whether voluntarily or by operation of law, without OCLC's prior written consent. Any such purported assignment or delegation by you without OCLC's prior written consent will be null and void and of no force or effect, unless otherwise expressly consented to by OCLC at its sole and absolute discretion.
10. **Relationship of the Parties.** Notwithstanding any provision hereof, for all purposes of this Agreement each party shall be and act as an independent contractor and not as partner, joint venturer, agent, employee or employer of the other and shall not bind nor attempt to bind the other to any contract.
11. **Arbitration.** Any controversy or claim arising out of or relating to this Agreement shall be settled by binding arbitration in accordance with the commercial arbitration rules of the American Arbitration Association. Any such controversy or claim shall be arbitrated on an individual basis, and shall not be consolidated in any arbitration with any claim or controversy of any other party. The decision of the arbitrator shall be final and unappealable. The arbitration shall be conducted in Columbus, Ohio, U.S.A., and judgment on the arbitration award may be entered into any court having jurisdiction thereof. Notwithstanding anything to the contrary, OCLC may at any time seek injunctions or other forms of equitable relief from any court of competent jurisdiction.
12. **Miscellaneous.** If any provision of this Agreement is held to be invalid or unenforceable, such provision shall be deemed superseded by a valid enforceable provision that most closely matches the intent of the original provision and the remaining provisions shall be enforced. OCLC's failure to act with respect to a breach by you or others does not waive OCLC's right to act with respect to subsequent or similar breaches. The failure of OCLC to exercise or enforce any right or provision of these terms and conditions shall not constitute a waiver of such right or provision. The section headings and subheadings contained in this Agreement are included for convenience only, and shall not limit or otherwise affect the terms of this Agreement. This agreement shall be interpreted in accordance with the laws of the State of Ohio. This Agreement constitutes the entire agreement between OCLC and you with respect to the subject matter hereof.
