****Mythbusters**** proved for the most part that conspiracy theorists were wrong in their assertions of the moon landing pictures being a hoax....they say it was real, and NOT SLOW MOTION

Re: MOON LANDING - A HOAX?

VIDEO.....get it, they tried it in SLOW MOTION VIDEO,
and they got the same results as the vacuum tanks they walked in.....just
like the 1/6th SLOW MOTION VIDEO.

The only myth they couldn't see is that the footprints on the DRY
moon are did not match the footprints of the Buzz Boot Sole.....SLOW MOTION
VIDEO does not compensate for that.....
