David W-lcock Confirms Benjamin F-lford 3/21/11

You will not see any of this in the I-luminati-controlled mainstream m-dia. We are getting closer to really big positive changes that will benefit the entire planet.

U.S. Troops and occupation forces flee Japan, their lackeys flee Tokyo

Posted by Benjamin Fu-ford

March 21, 2011

The U-ited States occupation forces in Japan are staging a major strategic defeat because they know the Japanese defense establishment knows it was elements of the U.S. m-litary that set off the March 11th tsunami attack against Japan. This attack used n-clear w-apons drilled into the seabed by submarines and not HAARP according to senior P-ntagon Sources. In addition, four months ago they overruled Japanese authorities and placed deadly p-utonium into the number 3 reactor at Fukushima, according to the g-vernor of Fukushima prefecture. This was to provide a nu-lear cover story for the seabed at-mic attack, pe-tagon sources say. Needless to say, the ring-leaders of this attack are now in hiding and know they will be found.

The attack on Japan was orchestrated by the Bu-h / Cl-nton / Ro-kefeller c-bal in an attempt to prevent the upcoming bankruptcy of their c-iminal corporate gov-rnment in Washington D.C. That is why they staged the farcical show of President Ob-ma of the bankrupt U-ited States signing an aid bill for Japan, as if they could t-rrorize the rest of the world into giving them more money. That is also why they are now desperately trying to use their extortionist nation-wrecking International Monetary F-nd as the new vehicle for a global currency.

In addition, Chinese and Russian intelligence now report that Germany's Angela Merkel is the daughter of Adolf Hitler thanks to the use of frozen sperm and the expertise of a N-zi doctor captured by the Soviets. That means she is almost certainly one of the ringleaders of the Na-i faction still hoping for a fascist world totalitarian gov-rnment.

The Pen-agon, for its part, is running out of oi- thanks to a spreading global -il boycott targeting the cri-nal U.S. corporate govern-ent. Bombing Libya will not help their case, just as attacking Japan did not help.

They are whistling in the wind, because the whole world d-spises them and will no longer do business with them, even if this means facing down their threats of additional violence.

Their only hope is to turn over their command and control to General Colin P-well and other decent human beings still to be found within that large, bureaucratic and potentially good organization.

Meanwhile, multiple sources report that ca-alist bankers, U.S. mi-itary forces, corporate propaganda experts and other occupation forces have left Japan or have withdrawn to Okinawa. Japanese workers at U.S. bases say troops have been withdrawn from all bases on the Japanese mainland, although this is not yet fully confirmed. However, we can confirm that agents of the criminal part of the Federal Re-erve board have now left Japan. We would like to bid an especially good riddance to the rapacious b-nkers who have been s-ealing Japanese savings and using them to buy up chunks of Japan's industry.

We can also now say that arch-traitor Heizo Takenaka, the former Finance

Minister of Japan, will be facing multiple criminal charges for his crimes against the Japanese people during his time in power with the mu-derer, Junichiro Koizumi.

One example of his criminality that we can prove in great detail in a court of law is his theft of the company, Misawa Home. Takenaka illegally and unethically forced financially sound Misawa Home into a government-financial restructuring agency, pumped at least \$200 million of Japanese taxpayer money into it and then handed it over to his brother who is now chairman of Misawa Home. Our sources for this include Chiyoji M-sawa, the founder of Misawa Home.

There will also be insider trading investigations into the sudden rise of the stock price of Higashi Nihon House in the month prior to the earthquake. It would only make sense for the share price of that company to rise as it did in the month prior to the tsunami if someone had insider knowledge that a bunch of housing was about to be destroyed. Japan has 3 million empty homes and a shrinking population.

Investigations will also reveal if Takenaka's take-over of Misawa Home was a sign this attack was planned long in advance.

We have also been informed by an astute reader that a Canadian company sent large shipments of Potassium Iodide to South Korea (a treatment for radioactive poisoning) one month before the nuclear accidents in the Fukushima earthquake zone.

A representative of the S-tanists was also told by a White Dragon Society representative that their idea that prophecy of the future was written in the stars and could not be changed was balderdash. We will write our own stars, he was told.

Finally, this writer went to the volcanic Island of Oshima to watch the supermoon on March 19th. The moon appeared a bright gold in color and had the exact same trajectory over the sky as did the sun on the following day. There were plenty of presumably U.S. military observation planes in the sky over Oshima on that night, but they left disappointed. Anything unusual that took place, took place when they were not watching.

This writer would like to add that even if he was given a technology capable of destroying the planet, he would never use it. Using it to save the planet is a different question, but humans already know how to do that.

David Wilc-ck writes

My new article is coming soon wanted to read this before posting it and I was not disappointed. Once again, Ben's sources line up with my own.

There are many angles on this disaster that must be considered in a grand overview of the situation. I am glad I trusted those dreams enough to post them a week before this happened, as they made it clear that although a huge natural disaster was about to happen, we would pull through it.

The dreams also involved oil shooting out of a volcano, and there is now a new 100-mile-wide oil slick floating in the Gulf by where the BP spill was. It does seem as if these negative factions are pulling out all the stops to try to forestall their defeat but what they've done now is so outrageous that it will actually speed up the process much more.

Remember we won't have Disclosure until these guys have been neutralized. My own sources have said the U.S. insiders have already moved all their important belongings into a secure location, in South America, and all they need to do is get on a plane and fly out. All the stuff they need to live in a new house is already in the new location.

This is different than the issue Ben has been discussing, where they're trying to negotiate for a larger bulk of members. This is the elite group and in their case they already have a fortified location picked out and have already moved their stuff into their houses. They are just waiting for the moment to get on the planes and go.

When this happens, it will be an unprecedented crisis in the American government, as many employees will disappear all at once including a wide variety of senators and congressmen. They are ready to do this at any moment that's how close we are, according to reliable insiders.

All the things we were told would be happening during this time are

happening. That also strengthens the case that it is all leading up to a highly positive outcome that these insider groups have no ability to prevent.

(\*\*\*Marvelous sp-ritual insights)

Steve Beckow writes

Messy, confused, ambiguous, uncertain, inactive, disengaged, cautious ... the discussion of President Obama- and "his mission" lurch forward with no public commentator able to grasp what the P-ident is really up to.

What is he really up to? Well, he's up to the real Operation Odyssey Dawn. And what might that be? It has two objects. The first is to close down the Il-uminati. About that, Hatonn told us in November 2010:

◆Media report what they are told, of course, but the truth is, now that [President Ob-ma] knows Earth◆s ascension timetable, he◆s negotiating with powers that be either personally or via safe communication channels to shut down Illu-inati strongholds in his country, Europe and the Orient." (1)

The second is to effect ET/UFO disclosure. Hatonn told us in January 2010:

"[Pr-sident O-ama] strongly favors extensive and speedy disclosure and most of your other principal participants are being squeamish about both. " (2)

We may remember that Pre-ident Ob-ma was primed to disclose the presence of extraterrestrials in 2009, an event which came to naught because s-crecy was broken. SaLuSa primed us for that announcement in October of that year:

Part 1.
