Subject: The Volunteers.
Mar. 29, 2011.

This probably should be called "How We Got Here" Part 9 but we will now call it "The Volunteers".

This tells about how certain people volunteered to come to Earth to try to save it.

.....
.....

He'd bring along at least a squadron with him."

"Kuralla gave her crew strict orders to remain on board and to defend the ship for as long as they were able. It was her plan to try to buy Shakarr and her crew their freedom if she could. Giving the sobbing Shakarr a final embrace, Kuralla stepped out of her hatch with dignity and courage, doing her best to remember that she was not only the Queen of Galaxitron, but an A-gel from the Celestial realms where these sort of terrifying events must be regarded as mere illusions.

"She was instantly encircled by hordes of weird looking beings. Their bodies, of a semi-transparent grayish white, were short and skinny making her tower over them. Kuralla did her best to emanate detached authority while she stared at them with repressed revulsion. One of the worst things about them were their oversized, elongated heads containing large black eyes focused upon her, were mirrored reflections upon mirrored reflections of herself. It was truly bizarre!

"What are you doing on our planet?

"What are you doing on our planet?

"What are you doing on our planet?

"Why did you come to Reticulum?

"Why did you come to Reticulum?

"Why did you come to Reticulum?

"How dare you enter where you have not been invited!

"How dare you enter where you have not been invited!

"How dare you enter where you have not been invited!

"The weird beings reproached her in a din of metallic echoings. They seemed to speak several stepped down forms of language which made them confusing to listen to.

"Can you please answer me on just one vibrational level? It's very hard to communicate with you otherwise." Kuralla spoke in a tone of friendly arrogance, hoping it would give the desired impression of strength." I came to this planet because I was invited here by Commander Quintron of the UNA Command who surely must be a friend of yours. Is he here yet?"

"We have never heard of anyone named Commander Quintron, never, never! Therefore, you must be lying to us, so we will take you prisoner," they replied impassively.

"Although not thrilled with the course this conversation was taking, Kuralla was somewhat relieved that, at least, they were speaking through only one step down station."

To get a part of the bigger picture of who's who in the Galactic W-rs that have been raging for so long, and who is aligned with the Dark side and who is aligned with the Forces of the Light one almost needs a program. Fortunately, an Awareness from the Higher Dimensions

that is in alignment with the Light helps us understand some of that bigger picture. Along the way it also brings into more focus how serious the issues are on this planet right now, including the dominant influence of Lucifer, and how what happens here affects the entirety of Creation itself:

The Structure of Alien Government (Rape & Pillage Allowed)

"The Orion Alliance creates structures on the planets run by hierarchy and controlled by money systems and the Reptoids enforce the allegiance to these structures and control the masses, and for this they (Zeta Reticuli) are allowed what may be termed "rape and pillage" privileges. This Awareness indicates the Zetas support the Reptoids and the Reptoids support and derive authority from the Orion Empire.

(Revelations Awareness 92-14/NO.398)

"Humanity in the meantime is semi-oblivious to all this and simply goes along on their daily pursuit of pleasure/pain behavior life-styles. This Awareness indicates that there are a very few people in the human population who understand much about the overall picture in regard to the alien presence on earth or the agendas of the alien presence and its overall intent.

(Revelations Awareness 93-14/NO. 423)

Getting the Alien Federations Straight

"A clarification about Orion: This Awareness wishes to make some clarifications in this respect; that the majority of those known in Orion are of a negative nature, but that there are some planets and sectors of Orion that are positive in nature. Clarion is a planetary system, a star and planetary system that is of a positive nature. Betelgeuse and some of those stars in that general area are filled with planets that are of negative nature. This Awareness indicates that there are some hundred and thirty planets in that area.

"This Awareness indicates that there is also, besides the Orion Empire, the Draconian Federation. The Draconians have absorbed those from Zeta Reticuli and have brought these entities as mercenaries, but the Reticuli do not think of themselves so much as part of the Federation, -they refer to themselves more as a network. The word "Reticuli" means network, and that is a traditional classification in their history, which they do not easily shed. The Draconian Federation considers however the Network as part of their Federation, subordinate to their controls. The Draconian are able to control the Reticuli through treaties that have been formed some hundred thousand years back, when they helped to rescue the Reticuli from their dying planet (from excessive exposure to radiation) and infused it with new life, and then, in return, gained control over the entities of the Reticuli.

"The Reticuli hail from a binary star, that is, two stars that rotate together, and live on planets close to these stars which are highly unlivable to humans, being very heavy in heat and desert. The Reticuli, in coming to earth prefer desert areas where the climate is quite warm. This Awareness indicates that this in part is favorable because of their insect genetic qualities, which makes up part of their total being. This Awareness indicates that the Draconians also being cold-blooded Beings, prefer the warm climates. This Awareness indicates as to the concept of the Confederation, this is not a common term used in describing the amalgamation of these planets from the Pleiades, Vega, or the Sirius system, but has been borrowed from human tongue and from the persistent use of the term by c-annals to describe the amalgamation of these planets working together in this galaxy to try to hinder the spread of Draconian influence.

The Intergalactic Confederation is Defined

"This Awareness indicates that the so-called Intergalactic Command or Intergalactic Confederation, this may be thought of more a grouping or alliance of highly evolved spiritual beings of different star systems who have united in their common purpose of hindering the Orion Empire and Draconian Federation from capturing and enslaving other planets outside their already held Federation and Empires. This Awareness indicates that those from Vega have pledged their efforts to help prevent the Empire and the Federation from taking control of Earth. Their methods are not to intervene directly in the affairs from humans, and the humans have allowed the Draconians and Orion Empire representatives to have bases on Earth, therefore the Vegans, Lyrans and Pleiadeans must honor the human decision and treaties with the Draconians and Orion Empire and Reticuli Network to have positions on

Earth, until the humans choose otherwise.

How Vegan & Pleiadean Volunteers Work on Earth

"In the meantime the Vegans, those from Lyra and those from the Pleiades have also chosen ways to influence the human movement toward throwing off these would be oppressors. The Vegans send some of their most advanced beings to be born on earth with earthly parents and to grow and develop and do their work to help prevent this take over of the planet by these Empire, Federation and Network aliens. This Awareness indicates that the Pleiadeans have also their volunteers. There have been those who came in space ships and met directly with individuals (BillyMeier) and met directly with individuals who were open and desirous of meeting with them. These entities even gave warning about the Orion Empire and sought to prevent the treaties (with the US Gov-rnment), but failed to do so*. (* In Behold A Pale Horse page 202, William C-oper speaks also about a rac- of humanoid aliens --author)

"Therefore, while they seek to help in whatever ways they can to hinder the Orion Empire in its conquest or the Draconians in their various i-vasion plans, they avoid direct interference in the affairs pertaining to these entities on Earth. They are even careful not to talk about these entities as being dangerous or enemies of theirs or of mankind. Those from Lyra also i-carnate into human form to help change the vibrations and instill a sense of spi-itual meaning into the lives of those whom they come in contact with. These are the ways whereby the amalgamation of star systems works together to help Earth in its struggle for survival and for spiritual enlightenment.

(JW I have been told that in recent years that all of these bad guys are now working for the light. Let's hope it is true. We still have the Illuminati to contend with.)
