Subject: The Volunteers. Part 3.

Mar. 29, 2011.

I have put on the bottom who to give credit to for this material.

.....
.....

The Branches of the Twenty-Four

Other planets and races involved with the star seeding of planet Earth include races such as the Alteans, whose specialty are the various mental aspects of existence. They are about as tall as an average human, with blue eyes in the shade of a clear blue sky. Their appearance, however, is translucent or iridescent, kind of like the aliens in the movie, Cocoon. Although it was the Hoovids who first settled Earth, the Nine say that the actual physical human seed came from Altea. The 'human' template is fairly widespread in our galaxy and the many galaxies which surround us. Altea has no sun as we have a sun; they are in the zone of cold. That is why they could tolerate the cold ice ages going on here when they came. Remnants of their unintegrated species still reside in places such as Norway and Iceland.

The Ashans and Zeneels, on the other hand, do not have a humanoid form, while Aragon is a race that works towards perfecting the health of humankind. Zeneel works with interplay or interchange - the creating of order in the color energies. According to the Nine they are the alchemist of the civilizations.

Now we can perhaps begin to see that these root races have a direct link to the political machinations that have occurred and are occurring on the planet right now. For instance, the people of China were the result of one seeding while the Tibetans were the direct descendants from another civilization which was the soul of the Chinese people. The problems between them existed long before coming to this planet, and what is going on here now is only a reflection of something that previously existed 'out there'.

Again, if this is all beginning to sound as if Earth at one time was something like the bar scene from Star Wars, you've probably got a good idea of what it might actually have been like. It is for the very same reason Man's favorite pastime is to sit somewhere crowded and watch people coming and going for therein lies the fascination of this planet with the great difference between and even within the races.

If you also begin to recognize some of these individual traits in you, you may be able to work out some of your own planetary roots as well. A recent television movie in which the all too human-looking alien was confronted with the fact of his striking resemblance to earthlings echoed this theme. His response to the line: "It's amazing how much you look like us" was simple "No," he countered, turning slowly to face the woman speaking, "YOU look like US!"

As Kryon puts it, "Don't be surprised one day when the entity that gets out of a UFO to greet you looks very much like you."

Star seeds from the planet Ashan have been responsible not only for great art upon this planet, but have also been heavily involved with genetic seeding throughout much of Asia and Polynesia as well. The Ashans are related to the legendary Muses of Greek mythology. According to the Nine, however, they are "not always capable of discipline." The Chinese show their influence, as do the Scandinavians, and also the Phoenicians.

It is the blending of these three primary civilizations, Altea, Hoova, and Ashan, which brings together the connection and the coupling of the planet Earth with the Universe. This is a product of the Light and Sound as it is encoded in our DNA that connects us through the cosmic Sound Current to the So-1 consciousness known as the Sugmad, and through IT to the FATHER. In The Pleiadean Mission, this is explained as our connection to Creation:

"On our sp-iritual side, we also have the ability to be in connection with Creation through the gemut. When our spir-t-form was created, our connection to the Creation was made through this special sensor. While our -pirit is listening to our thoughts and accepting wisdom into the subconscious, it always has the ability to use the gemut to check out our ideas with Creation. It is like an open line that is always there for us, and it can only be felt through the spi-it. Our spiri-ual self will not accept any wisdom to be added to our accumulated consciousness unless it first checks with Creation through the gemut to be sure it is in line with the truth. It is Creation that lays down the laws of evo-ution and creates the framework for man to live by. If man could learn to think with his conscious mind, using these laws of conduct provided by Creation, not only would his life be easier, but his ev-lution as a s-irit-form would progress much faster. In re-igions and different belief structures there is always the faith factor, for it is not possible to prove that G-d really exists. It is something that we take on faith because our parents or the priest at our ch-rch told us so.

"If you want to prove to yourself that Creation exists and that it is the ultimate source of love and understanding which can provide all knowledge that is necessary for life, then you have only to make your connection to the Great Eternity through the Gemut. Here you can feel and experience for yourself the ultimate feeling of the life force that guides all things, and it is available to you at any time you choose without going through any ceremonies, spi-itual leaders, guides, or forms of wor-hip. You are always connected to it, for you are part of it."

Unfortunately, it also for the potential that lies within our DNA that Mankind has been seriously abused by members of the Opposition and by other less powerful individual rac-s such as the Grays. This point is stressed in a piece by Anna Hayes from her Voyagers; The Sleeping Abductees, about the Zetan (Greys) agenda here on Earth:

"The plan for the selected Earthseeds involves the eventual contamination of food, water and air supply with certain elemental components that would repress the emotional facilities and thus cut off the possibility of the individuals to link with their Host Matrix families - a biological block to the frequencies or the Host Matrices. Those who are not selected are intended to be removed through dramas created by holographic inserts . . .

"Here the Earthseeds are regular human beings, while 'Host Matrix families' in everyday language is our s-ul and our so-l's connection further up the dimensional ladder.

"The members of your species that were not imbued with the gift of the Zionites, who do not carry the Silicate Matrix within their "junk DNA" and So-l Matrix codes, are known as the Earthseeds. Though all of your species originated from the 12 tribes of the Turaneusiam sub-prototype, not all of you were selected for the Zionite experiments and resulting accelerated genetic strain (the original selection of the first encounter was random). This does not mean that one group is superior to the other in terms of innate value, as all of you are needed for the fulfillment of the Turaneusiam imprint. But the Starseeds are "ahead of their time" so to speak, and so they carry with them the burden of the sleeping Earthseeds, and the responsibility of helping them to awaken. The Earthseeds are still connected to the Host Matrix families, they have not yet activated the . . . Codes that would allow them to begin assembly of their original memory patterns. Many of them have not yet passed through the original frequency fence that would allow the reassembly process to begin. These humans are the most vulnerable to manipulation through holographic insert, and it is some of these that the Zeta desire to utilize for the breeding of a "worker ra-e."

"The Zeta have other plans in mind for the Starseeds. The Silicate Matrix within the Starseed genetic imprint is valuable to the Zeta. It is this element for which they search during unauthorized (by the S-ul Matrix) abductions, for they hope to create a stronger more versatile hybrid through humans carrying this code. They view the Starseeds as the potential breeders of a three-dimensional Earth hybrid -ace that they hope will repopulate the planet once the clearing is completed. The unenlightened Zeta also fear the Starseeds, as they possess the potential ability of seeing through the holographic inserts.

"The Starseeds also are able to more easily partake of multidimensional communication, which enables them to "go" above the frequency fence "the Zeta are working now to "erect" within the human

DNA code (remember, the frequency fence is a type of sound technology that utilizes contrived frequency modulation). Because the Starseed is already re-linked, to some degree, to its original So-1 Matrix the Zeta cannot perform a forced matrix transplant upon a Starseed without first dismantling the -oul Matrix. This is very difficult to do with the technology they have available. And the Starseeds are protected multi-dimensionally by the Zionites, as well as by other groups (enlightened Zeta, Aethien, Ranthin, Sirian, Pleiadean, Breneau and many other presences). The Starseeds are the greatest threat to the old Zeta agenda, and so the Zeta try to find other ways in keeping them out of operation.
