Subject: Space People In Death Valley.
April 12, 2011.

I've spent a lot of time in Death Valley myself and here is a lady who says she communicates with the space people in Death Valley.

T-LEPATHIC COMMUNICATION WITH ALIENS, BASED IN DEATH VALLEY

by M-sty

I would like to share this communication, which impressed me deeply. I had not communicated with any aliens since 1984, during which I had daily contact with the local aliens from our solar system which started the day I joined an association based in Oceanside, California called The R-sicrucian Fellowship. I stopped when I left the association. The local extra-terrestrials trained me in esoteric matters for many years previously to 1984, particularly Venusians. It took me about seven years of daily contact (and some conversations lasted for hours) to even know where these ETs were from. I never believed anyone lived on the planets in our solar system consciously, yet with their spaceship sitting in the sky quietly, it didn't seem they were from that far away either. Eventually people convinced me I had an active imagination, and I thought if I don't stop this now I'll have a nervous breakdown just from keeping the information inside and not sharing it. It was difficult enough as it was for me to say what I wanted to sometimes, without announcing I spoke to aliens as well! It's much easier now to say these things, though the problem now is well meaning will tell you stuff like you are a multiple personality and have been brainwashed by the C-A, or have been on d-ugs.

The local aliens used to manipulate my s-iritual vehicles to bring back and forth parts of my higher and lower selves into my consciousness in order to build the qualities each represented into my state of awareness. This included even parts of me which had a dark side, as they needed to be transmuted. They attach two opposing aspects and let them fight it out inside my s-ul, and when I k-lled off the lower aspect then it disintegrated in my body or aura, depending which dimension it originated from. They expected a lot from me and one time I counted up over thirty aspects of my consciousness I was trying to integrate into my so-l. If I didn't have a lot of free time to deal with all these things, I'd have gone a bit c-azy.

Basically their job is to manipulate and integrate all of our sp-ritual aspects and arrange what is needed in our consciousness at any given time in a day. I found out every 24 hours everything we have ever been since we were created passes in and out of our consciousness, depending on the positions of the Sun, Moon and planets in relation to where we live. The local planets carry parts of our consciousness in their spir-tual worlds and we draw them into ourselves when they are in special angles in the sky which cause them to become more energized. This information takes an enormous long time to absorb and understand how the whole process works, because we need to be an a-trologer first, as they communicate in a sort of "astro-speak"

language. Because as-ology contains symbolism and a microcosm of the macrocosm the moment something happens, giving its "fate", they may need to say 'interpret this moment' it has implications for something big which has too many words to describe, but it will be explained in a nutshell if you do a h-roscope for this 'moment' as it may relate to something about to happen later on. I'll write a separate webpage on this type of data, and try to scan some things I put on paper they gave me. But my brain was getting so crammed with data, as they wanted me to understand what existed in each other dimension as well and all of its relation to our destiny on earth, linked with the e-olution of the other planets in our solar system.

They even took me on trips to other planets beyond our solar system, but usually I went in the world of thought, so it wasn't a physical trip. Nonetheless still thoroughly enjoyable and a sort of armchair travel. I had to be conscious at the time. They do these things, and they wish people here to be like them and not be so earthbound, that they don't wonder what others do on their planets. We all work together in the spir-itual worlds of all the planets in our solar system and interact, with not only the other humans living on the other planets, but the visiting ETs, the a-gels, and archan-els etc. If we are not conscious of what unseen hands are pulling our strings, urging us to do this or that, we will have no say in our own destiny. If we can prove we will try to make a perfect job of all we do, this translates into what we do in the spiritual worlds and we can work with them as their assistants. I have had experiences of being conscious in the etheric world, helping people and doing work on manipulating energies which flow around the planet from the parallel universe or etheric dimension. Here are some things I recall. However many people living physically on earth have another secret life living a whole new kind of existence with humans who are far more advanced than those presently on earth. Everyone here physically, has those who work with them spirit-ally and we can even have our own spaceship in the etheric world to get around in when we sleep and are conscious in that world. We may appear as a 'UFO' ourselves if the space ship we operated on was seen by someone living physically, but had some etheric vision. It could well be someone sleeping in the opposite hemisphere to them, but active as a worker with more advanced ETs from our solar system who run the evo-ution of earth without our perception. We need to be asleep to work in the etheric world, as we need our etheric double to be alive and walk about physically.

Eventually I needed a rest, to digest it all and just to not feel strange and lonely. I asked for a year off just to chat to normal people I knew, and they said you need two years to rest your mind. I never spoke to them again.

I was contacted by Je--s spirit-ally in 1984 (a year or two after I decided to stop speaking with them to try and live a normal life, just from sheer frustration of not being able to find others who could understand) I decided to be loyal to Him alone and try to hear Him speaking as in a conversation. I figured, if I could hear the local extra-terrestrials very well by tele-athy, then why not strive to hear Jes-- also? I needed some work on my brain to open my re-igious state of consciousness first. It was finally achieved after about five years of trying very slowly, persistently and deliberately. The telepat-ic ability I needed to speak with the local ETs was put on hold. It can be a bit of a distraction if you can hear too much. I only got one word answers from J--us for years like yes or no, but it was well worth waiting for when I did get whole sentences. I knew if I kept waiting it would surely come. When I was 21 when I first started talking to the local ETs. I was hyperactive in my nerves and could sense the presence of anyone in the parallel universe. But --sus speaks in my ears, with clai-audience, which is different to telepa-hy. I also feel a bit cosmic when He speaks as if He is talking to my higher self in some other realm, and it filters down into my ears.

Regarding the Venusians, I have spent quite a number of past lives on Venus and appear to have most of my spiritu-l vehicles lodged there. I used to go there with the Venusians in the inner worlds, but I can't recall the details much. Only that if I think about it too much, I'll wish I was there instead of here. But I made my choice and am sticking to it to just concentrate on communicating with Jes-- from my heart and I am still extremely grateful for all the stuff the Venusians taught me, but my brain couldn't process any more. My poor heart was atrophying from lack of stimulation with normal people on earth. However, after doing extensive investigation I'm quite sure that the aliens at Death Valley are connected with the Venusians and the

rest
of the human people in our solar system. I do feel their presence
occasionally,
especially when I'm writing something technical, but I have to stick with
one
source and need to feel sure. It is so easy to deceive yourself in these
matters. Before, when I did speak with the Venusians for hours each day in
the 1970's, I was completely open minded. There wasn't much data around
on malevolent aliens and I never came across any, thank goodness. But since
then there seems to be a lot of weird aliens giving people messages, some of
which may cause people to lose their reason. I want to be cautious now in
case any other aliens try to influence me, as there are so many around now.
Some have tried, but they can't get in my mind, as it has a barrier around
to
block them out. This is the protection of Je--s. However, the ones at Death
Valley were worth speaking with and thank goodness I heard them.

The Universal S-curity Force are comprised of intelligence officers from
many
planets in the universe, operating from a central command. This is operative
in all dimensions and is in the center of the universe with J--us who is the
sole ruler/k-ng of the universe. I have been shown the Universal Se-urity
Force 'cloaked' base in Death Valley, which is operative in the physical
world and run by humans, but only in a vision. However, I have been there
before physically while travelling through America in 1973, which was
possibly
why I recognized the place energy. If you go to my story about the parallel
universe, you'll read about my trip to J--us' central place of power
operating
in the next dimension. I've also been to the astral counterpart of this and
hope to write about it next.

Part 1.
