Subject: A Big Mother Ship.
April 19, 2011.

This tells where Nibiru is now and when It will return.

.....
.....

If we can stop thinking of other planets and civilizations as all good or all bad and with only one agenda or belief system, then we will end a lot of the fear that is generated because of this all or nothing way of thinking. And let's keep these c-anneled agendas in perspective. It is not that they are incorrect, it is that they represent the agendas and beliefs of a only a certain group. So if a group is saying that there is a whole planet wanting to take over earth, it is best to ask who on that planet is wanting that takeover instead of just assuming it means everyone.

What is Nibiru's purpose?

Nibiru has many purposes. I will outline a few of them:

1. Peace keeper - Nibiru's main overall purpose is that of a galactic peace keeper. As a peace keeper Nibiru's duties are many. One of the most important duties is to move around the galaxy and negotiate treaties and alliances among the many evolving and advanced r-ces. This includes negotiating peace between w-rring ra-es.

2. Genetic Upgrading - Negotiating peace sometimes involves using the laboratories aboard Nibiru to create new hybrid rac-s. These new -aces and the genetic upgrades involved, in some cases provided the means to end w-rs since many wa-s were started over genetics. Just like children need to learn to share so do evolving r-ces.

In rac-s that are ready to be introduced into the galactic community, genetic upgrading is facilitated through processes being sent to the planet.

That is why there are many people who are writing books on DNA Recoding, providing various process and also facilitating workshops to provide training and support. The Beings who send the information will in most cases be GF members and also have starseed children on earth that they are attempting to assist.

This also explains why there are many different techniques being given for DNA Recoding.

Each rac- has a particular genetic make up and recoding their DNA may require certain processes that are not needed by other r-ces. But in all cases some things are the same.

Emotional clearing is the key to DNA Recoding and that holds true for every ra-e represented on earth.

The Galactic Federation'a Mission Control Planetary Ascension Programs.

- Though the main operations of any planetary ascension plan are located at the GF headquarters in the Sirius star system, having an orbiting satellite office makes carrying out the many tasks involved much easier and efficient.

Since Nibiru's orbit traverses our galaxy and is a the GF's key flag ship, it is the perfect location for organizing and carrying out ascension programs for planets and civilizations connected to the GF.; Since most of the planets

in our galaxy are seeded by Federation member ra-es that may or may not be in close proximity to the planet, having a starship available to carry out critical tasks such as genetic upgrading is vital to success.

Nibirufriendorfoe Earth's ascension program is being coordinated through Nibiru with each starseed -ace having representation on and in the many councils of Nibiru.

With the council's working together to complete our ascension plan, we are in good hands and can rest assured that every measure is being taken to protect and ensure our success and eventual entry in the galactic neighborhood.

The Mission Control center for Starseeds and Walk-ins.

- Among the many responsibilities of Nibiru is that of training, support and guidance for Walk-ins and Starseeds. For Walk-ins, Nibiru provides mission plans, and assigns support staff to watch over and protect the s-ul being sent to earth. For starseeds, they are given guidance on which templates are to be created to assist their home worlds in their s-iritual e-olution to the next step.

There is much more to this but suffice it to say that the beautiful settings with moving sidewalks, the slender Grecian-like columns and the singing, tele-athic dolphins (some of which walk upright) is the setting on Nibiru where the walk-ins and starseeds are trained. Many report being in classrooms during the dream state. Though this is common among Grey and Zeta abductees and the ships are different, Nibiru also has classrooms. The difference I have come to understand is most often the setting. This is a very serene setting with music, and other worldly colors. Very peaceful.

When I go there in the dream state, I don't want to come back.

Who is in control of Nibiru?

Nibiru receives its orders from the central command of the Galactic Federation's

<http://www.nibiruancouncil.com/html/aboutus.html>

Greater Nibiruan Council.

The Greater Nibiruan Council, as we have discussed before, was established to handle the management duties and responsibilities of the GF. This includes

giving assignments to various Federation starships of which Nibiru, though the

GF's Flagship, is only one. This means that whenever Nibiru is sent on assignment to a planet or star system, it was sent there by order of the GF. Nibiru is in essence a field office just like Deep Space Nine was a field office of

the Galactic Federation in the TV show. Don't remember exactly what they called that GF.

What role does Nibiru play in our ascension?

Nibiru remains our trigger for awakening. Once it gets close enough to us, uncloaks and shows itself, it will bring about a universal shift in consciousness. Mankind will then wake up to the fact that they are not alone in the universe and will begin to search for the reason and purpose behind this great planet/ship. It is then that the ancient knowledge suppressed by the r-ligions and g-vernments of earth in order to control the people, will come to light.

Mankind's true identity will be made known to them and they will have the opportunity to embrace it on a global scale.

Nibiru's effects are already being felt. Due to its massive size, Nibiru is already affecting our weather, our planetary frequency and our sun. Once again, I am not a scientist so I cannot give you this information in those terms. I will give you what they show me.

Nibiru is affecting our sun.

Because of the pressure being exerted by its mass moving closer to us, it is creating pressure on the sun. This pressure is like squeezing a tomato until it begins to rupture. These ruptures are the solar flares and emissions

from the sun. The sun is changing and emitting more light. Much like going from a 75 watt bulb to a 150 watt bulb. This changes our DNA and activates the dormant codes within it to begin the transmutation of our bodies from carbon-based to crystalline-based.

Let's Get Real about Ascension Part I. and

<http://www.nibiruancouncil.com/html/realaboutascension2article.html>

Part II)

Though uncomfortable, this transmutation is necessary to move into a higher dimension i.e., 5D.

Where is Nibiru now and when will it return?

Nibiru is in our solar system and headed towards earth on its routine run through our galaxy. That is why we are feeling its effects. N-SA and other go-ernmental groups know this very well. Nibiru was first spotted by our scientists back in 1987. We have been feeling its effects since 1996. As for when it will return, I will state again that it is up to us. Nibiru is waiting on us to get our heads out of the sand, so to speak, and accept that we are not alone in the universe. When enough people have reached this level of understanding, Nibiru will uncloak and reveal itself. This could be next year, or in 2003, 2005, 2010, or 2012. We hope at the very latest that it will be by 2012. So, once again, we are in charge of when it will occur. Nibiru is there to serve us and assist in our ascension. That is why the GF is sending it to this remote little corner of the galaxy. It is time for us to move up to galactic citizenship.

Part 2.
