Raymond,
I too have seen the inside of these ships. I have had and continue to have similar experiences. Can you elaborate more on the electromagnetic drive used when entering Earth's atmosphere? I was shown blueprints for a device, which I assumed was to be used based on a new structural determination of the atom. But, later when I remembered an equation on the prints referring to light $[L2 \text{ em if } (cv) (hv) (1/2mv^2) L2]$ and how to utilize the contained rest energy within the atom or its isotopes, I realized it was making references to their monopolar technology and our bipolar technology to indicate the difference in the light spectrum. The deficit I found in measure of Planck's constant and Balmer's analysis of hydrogen..which is 10 to the neg. 3 in multiple of .6256. In this, was defined how gravity and refraction are a result of the distortion of light within our electromagnetic grid on Earth caused by mass weights. In otherwords the force of electromagnetism (which we consider as major) is really an anomaly resultant of a counterclockwise 45 degree shift in the angle of that linear to the convex. Earth's spin in lieu of the wobble, does not meet the criteria for a perpendicular crossing of the vertical nature of the speed of hydrogen from the sun, as it should breach Earth's convex and permeable membrane. This allows other anomalies to come forward, which at the atomic level and in subatomic spaces is the degree of radiations effects from isotopic formation, humanity's disease, and distortion of light within our measure of spectrum. Our understanding at this time maintains four forces, but there are only two; the electro-weak and magnetic-strong. A unification arises of these two forces when they occur in a simultaneity...a static e-olution and radiation of the true light as energy is equal to the mass. The degree in deficit arises out of our current elucidation of the atom, the technology derived from that and electricities synergism to the magnetic component of the unified field. When these two forces are in sync or occur with simultaneity, then the monopolar technology of which their propulsion is based shall become apparent to us all. And when you speak of their use of gravity is it that they also use its repelling factor or opposition which is refraction to exit our atmosphere? We believe gravity is always attracting.....but its repelling force is in refraction, a universal characteristic but not a property of light. Earth's angular momentum does not align 90 degrees perpendicular to the light of the sun's vertical velocity...which is the catalyst for their propulsion system. The 45 degree angle at which they leave our atmosphere is based on the electromagnetic spectrum which is within our measure visible to the eye 500 angstrom short. In otherwords, the green band is measured at 5400 A, but in actuality of the true light or that in degree of a vertical velocity to equal the angular momentum should be in measure for our eye to see what is there 5900 angstrom. Once out of our atmosphere they move at higher speeds due in fact to the magnetic monopole (a device at the center of the craft) that powers their craft using light of the sun and elemental constituents of other planets. Earth is the only planet also considered a magnetic monopole, due to the iron core. But as her ballast is now mislaid, probably due to comet impact in the past, she suffers a ferric domain which holds her at this current tilt with 160 year overlay in the grid pattern for light's influence. Within that time frame is set the contained rest at the atomic level or Planck's measure hv. At level of the macro-cosm we define it as the rate of precession, or numerically 25,920 years. Within context of their world and their mechanism for flight they use water for fuel, an H4O2 molecule magnetically extracting hydrogen as catalyst to set nuclear magnetic resonant speeds generated and contained within the magnetic monopole.

Our H₂O molecule also defines this anomaly or degree in deficit suffered on Earth. (It's spectrum displayed in 1/2 arc of the rainbow through water in our atmosphere.)

I was able to view the fuel system within the craft using the evaporative and viscous nature of the water. I observed its physical and mechanical relation to this magnetic monopole. It is the cold fusion we seek. The strange thing was having been a nurse, how their analogy of this used human physiology and the iron in our blood. It suffers the same ill effects. I guess this was to make this stick in my mind. It also made me realize what is the cause for all disease.

So they knew it would be to an advantage in using those terms. You will and should already have recalled more of what you saw or had downloaded into your mind. Your thoughts and silent questions asked of yourself can bring it forward in time and we should speak of these things.

In this craft on a computer screen of sorts, I saw a triangle of green light radiating. Within it moving right to left along the base were Hebrew letters. They moved so rapidly almost to be a blur, yet as they moved I heard many words in my head and will quote these few, though I remember much more.

.. "your thoughts are from the computer which has recorded all of time your DNA the microchip links us and will allow the information we share to unwind"

I sense our evo-ution should be without time. If on our clock we set 30 degrees as each hour, and 12 marks of these in time to be 24 hours, then the 30 degree mark should be 2,000 year increments and 24,000 solar years to equate 360 degrees. At these points or positions on the periphery all will be equidistant from the center or zero point and time as we have known it will no longer exist. For simultaneity of these events to occur the one degree mark must equate to 66.6, as apposed to a 72 year mark. The shadow of disequilibrium arises at 5.4 year overlay at 1 degree and 30 degrees of 2,160 years overlays 160 years based on the 25,920 solar year. It is this measure for which they utilize the electromagnetic drive to enter into our 4th dimension or timeframe. I should like to hear from you in regard to that which was downloaded at the end of your experience on this craft. All I know is that what was stimulated in me at which time I saw the inside of this craft and its propulsion system must have something to do with the information given you. We can build it. Then they should come.

Part 2 of 2.
