Subject: Tesla. There's Just Something About That Guy. May 10, 2011.

Here is something just in about one of my favorite people called Tesla.

.....

Nikola Tesla powered this all steel frame and body 1931 Pierce-Arrow with electrical energy that was harnessed from thin air.*Not a drop of gasoline or diesel fuel was used.* In fact the internal combustion engine was completely removed. No battery banks were used either. This vehicle was driven to speeds of 90 miles per hour with no fossil fuel and just a single 12 volt battery. This infinite and f-ee energy source produces absolutely zero emissions.

The Electric Auto that almost triumphed: Power Source of 1931 car still a mystery

by A.C. Greene,

January 24th, 1931

It is a mystery car once demonstrated by Nikola Tesla, developer of alternating current, that might have made electricians triumphant.

Supported by the Pierce-Arrow Co. and Westinghouse in 1931, he took the gasoline engine from a new Pierce-Arrow and replaced it with an 80-horsepower alternating-current electric motor with no external power source. From the electric motor trailed two very thick cables, which connected with the dashboard. In addition, there was an ordinary 12-volt storage battery. ("There was a 12-volt Willard battery installed in the car, but it was for the lights only and much too small to run the car. In any case.") The motor was rated at 80 horsepower. Maximum rotor speed was stated to be 30 turns per second (1800 rpm). A 6-foot vertical antenna rod was fitted into the rear section of the car.

This vehicle, powered by an A.C. motor, was driven to speeds of 90 m.p.h. and performed better than any internal combustion engine of its day! One week was spent testing the vehicle. Several newspapers in Buffalo reported this test. When asked where the power came from, Tesla replied, "From the ethers all around us". (Ethers is Electromagnetic radiation. Radio waves is electromagnetic radiation which has the lowest frequency, the longest wavelength, and is produced by charged particles moving back and forth) Several people suggested that Tesla was mad and somehow in league with sinister forces of the universe. He became incensed, removed his mysterious box from the vehicle and returned to his laboratory in New York City.
