Subject: The Life Of Ellie. Part 2.  
May 9, 2011.

This tell what Ellie has been in previous lives.

.....  
.....

Pleiadian cities are also crystal, as are cities on our own Mental Planes. She said that her Father will permit her and Plen time, several hundred years if desired, to reconnect and readjust before tasking them with their new mission. But at some time she will step into his shoes. She characterized herself as being in training for a position of counselor or facilitator.

(I wonder if Plen will walk three paces behind her? Just kidding. She said he will more likely be hopping and skipping ahead of her, eager to be on to new, exciting adventures!)  
I think one of my jobs is to get us used to thinking about hierarchy and wean us from our bad memories of earthly kings and queens. Ellie is anything but an Earthly queen. She sees herself as a simple, aging Okie granny.

Ellie's Son Jerry

Ellie says her contract was up in 1982 but she stayed on to continue her work of grounding the energies of love, light, and balance on Earth. She was told she would be taken up to the ship at some point where she could watch events unfold on Earth or she could choose to return to Earth for six months she now believes that was referring to her getting the cloned body as it was expected her original Earth body would not last much longer past her Mother's leaving.

Ellie's Pleiadian body is in stasis on the ship. She has been told for about 40 years that she will not d-e a physical d-ath, but will ascend to the ship in physical to be s-ul transferred back into her Fifth Dimensional body. She hopes that proves to be the case because she doesn't want to burden her relatives with having to dispose of her Earthly body. Ellie was supposed to have returned to the ship with her mother, but she remained in part for Jerry's sake. He's currently incapacitated from a car accident that happened back in 2004. He has a bulging disk in his lower back, pinched and damaged nerves in his neck and shoulders, a bone that pops out in the lower part of his neck that causes him to black out, and a-thritis

the full length of his spine, but he has been denied disability because he is too young (53 yrs old) and, in their opinion, can still hold a pencil and phone for a job. So he spends his days taking care of Ellies needs and working around the house and yard. She says she doesn't know what she would do without him!

Ellie calls Jerry a genius who can fix anything that plugs into a socket - is becoming quite a mechanic as well - and considers our technology to be so primitive, it is as simple as playing with Tinker Toys. But he cannot even write with his nerve damage and is in constant pain so he can't do full time work. He works for a computer shop one day a week for about 3 to 5 hours which helps with his personal needs. He is very disappointed that his skills are being wasted by not being able to work as he loves what he does.

She tells the story of having received a very large TV once, which must have weighed 300-400 lbs. It had been left behind by her daughter's family after they moved. Ellie needed to get it up off the floor and onto a stand. Jerry told her to turn around, don't look and don't ask! Even though he had all these circumstances going on with him, when she turned around again, the TV was on the stand. She doesn't know how he did it but suspects he and Plen l-vitated it.

The Pleiades and Things Pleiadian

She said that Pleiadians live in crystal cities, which is the same as we do on the Mental Planes. And of course the Pleiades that she comes from is on the Fifth Dimension, which is our equivalent of our Mental Planes.

In the Pleiades, people live in total trust and love. There is no deceit as everyone is connected t-lepathically.

Ellie said that she was born into her Earth human body with full capabilities but had to have the blinkers applied because she was so trusting as to be gullible. Her memories were blocked so she couldn't be so easily deceived. I said it sounded like being dumbed down and she agreed that it was much like that. She was to use her feeling or inner knowing - this time around.

She related the story of how she was visiting a friend and his wife in New York back in 1995 they were taking her to see Niagara Falls as she had never been there before. Almost at their destination, he told her Oh! Sorry! This is the day they turn off the Falls so they can clean the rocks! We'll have to come back another time! And she believed him! Of course, after a good laugh, they did show her the Falls which was a very memorable experience.

#### Pleiadians, Money and Attitude Towards Wealth

Ellie said the Pleiadians have no need for money as they materialize what they need. I asked her why the Pleiadians didn't just materialize g-ld for her and she said that would defeat the purpose of this lifetime. They don't understand our fixation on material things, money, etc. She said Pleiadians are in perfect balance (most of the time) and follow the Law of One.

She told me about a recent Earth life in which she and her Earth husband had been wealthy but her husband was not s-iritual and said that this lifetime they came together again in a life of poverty to so as to connect and grow spi-itually. It worked!

She said it is her choice, at this time, to live by faith, not material wealth. She said this lifetime was, in part, an experiment designed to show her, and others as an example, that G-d provided for her daily needs in an Earthly setting and so far Go- has. She told me about a PayPal donation that had come in that very morning, after she had had a thought that she needed something. It covered exactly what she needed.

She said she always received what she needed when she needed it, that her needs were supplied daily. She confessed however that sometimes it is difficult to remain in the now without financial concerns, but when assistance comes, it is always confirming and reassuring for her.

She drives a 10-year-old Volkswagen that was given to her. She said that Plen had modified it so it gets 52 miles to the gallon. Really! Her TV, computer, etc. were also given to her of course, the computer is necessary for her work and contact with other Lightworkers and the TV provides light entertainment when she needs a break from serious work.

She said the Pleiadians have no needs, no pain, etc. (We know that M-tthew has also said that we will have no pain, no sickness, etc., in the Fifth Dimension, where nothing untoward can exist.) She said that Plen's constant advice is DON'T WORRY! BE HAPPY! And live in the NOW.

Later she told me about another reason he gave her that advice it has a negative reaction on her body. Every time Ellie gets a little pain, she says ouch

and Plen is there fixing it.

She said she was protected in other ways as well. She told me stories about visiting the b-ack, or segregated, part of her home town as a small child after her mother told her stories about a little bl-ck boy and girl she

called Sarah and Jimmy to keep her from squirming around while her mother cut her hair. Ellie would go to the bla-k area to look for those storybook children and sit there all day watching for them. And on Sundays, she loved sitting on the grass in front of a c-urch, listening to the loud, joyous singing of the -lacks. She was the only w-ite person permitted to be there. Other wh-te children would be pelted with rocks when they came near the community.

She related a story of having to walk home from the movie theater late one night when her mother was detained in a non-injury car accident and couldn't pick her up when the movie was over. A man and his dog followed her home in what she is sure now was a protective gesture. She related other situations of danger in which nothing happened to her.

#### Ellie's Lives on Earth

Ellie says she has been born into Earth lives 2,365 times in different dimensional 3D levels and different fragments, not necessarily a sequence of 2,365 times. She says that Earth time is faster than Pleiadian time. She remembers many of her past lives. She related lives in harems, a life in a temple, serving as High Priestess, a lifetime as a druid, lives being sold to men, and a life when, as a male, she opposed g-vernment and had her eyes burned out so she could not see their e-il deeds and her tongue cut out to

prevent her from speaking out against corrupt go-ernment o-ficials. She said she has met three men on Earth that she's had karma with. She met the man whose harem she was in and he was again attracted to her but this time, he did not have control over her and they developed a good friendship. She told about one man she worked with, a supervisor who demanded she lie for him to his fianc when he was meeting other women for lunch or whatever, she confessed to a co-worker that she could not think of one positive thing to say about him the friend reminded her that his breath provided carbon dioxide for the plants. So Ellie accepted that as the one and only good thing she could say in his behalf.
