Subject: The Life Of Ellie. Part 3,  
May 11, 2011.

This tells how her father put a force field around her house that protects her against tornadoes.

.....  
.....

Ellie described another lifetime in which her son, Jerry, was her wife

Ellie being male in that lifetime, of course. Ellie came back from hunting to find that Indians had burned down her house and k-illed her wife and children.

In another lifetime, she was a boy living in Louisiana, who, at the age of 10, was d-owned while he and a friend were paddling about on a little raft they had put together. Ellie knew how to swim but the friend didn't so Ellie dove in after him when he fell off into the water. The friend became tangled in weeds at the bottom of the pond Ellie would not leave him so they dr-wned together.

That lifetime was meant to be a short one Ellie had wanted to return to a couple who had been recent, adored parents but all had been learned in the previous lifetime spent with that couple and she was to move on to new experiences but she was permitted that brief 10 year reunion with them. In another lifetime, she (as a male of course) was in love with a woman who was forced to marry an older, wealthy man. She loved the woman so much that she never married and the woman threw herself out of a second story bedroom, to her de-th, because she, too, wanted to be with Ellie. It was at the end of that lifetime that Ellie welcomed the de-th experience and found it to be a joyous release from a lifetime of loneliness and longing to be reunited with the true love that had not been available in that lifetime. It was while revisiting or reliving that lifetime that she upset the therapist who was in charge of the past life regression session the therapist was frantically trying to bring Ellie out of the dea-h experience while Ellie, on the other hand, was trying to stay in it to get the full effect of the lovely feeling. When Ellie finally responded, she told the therapist that she had been fine and had just been enjoying the experience of dy-ng.

As for her health, she discussed relatives who were older than her but less supple. A neighbor lady - who is quite disabled and in the beginning stages of Alzheimer's, had been a drinker and partygoer and has both hips and knees replaced - visited Ellie last week and during their conversation, the lady asked Ellie's age when she was told Ellie would be 80 this year, the friend was very surprised! She thought Ellie was much younger than her when, in fact, Ellie was 8 years older than the neighbor!

She asked Ellie if she was ever bored or lonely Ellie said no, she spends many happy hours on the computer, connected to e-mail friends and playing games has one soap opera she enjoys and several sit-coms that keep her laughing and she still works a crossword puzzle a day - in ink!

She said she has a force field around the house, put there by her father, that extends ten miles in any direction. When a tornado comes towards her house, it is redirected to the north or south of her. The last huge tornado that came by her house, a video of which I posted, came within eight miles of the house. She wondered if the force field might be deteriorating because it should have protected her up to ten miles. Her Father did not plan on her being here on Earth this long.

Ellie was worried recently because her son-in-law had built onto the mobile home she is living in while her daughter's family was living in it he built one of the rooms around a big tree instead of cutting the tree down and building over it. Lightning struck 2 trees at the fence line when her daughter's family lived in that home, splitting the trunks down the middle. She knew the force field extended ten miles laterally but did not know

how far it extended vertically and worried that lightning could hit the tree. She is told to not worry about it.

### Levels of Life

Ellie said it is her understanding that there are twelve levels to Earth's Third Dimension possibly to every dimension - and we could have soul fragments alive on all levels. Ellie herself has had eleven other fragments alive in this dimension at the same time three male and eight female. Most of them have now gone back to her Higher Self. She is the original while they are/were the fragments. She has communicated with one of her other selves for several years he lives in Russia and is employed in an educational capacity.

All other selves were manifested because of certain desires for experience that the Higher Self has. All are just thought forms of the Higher

Self. The individual lives are created because there is not enough time for any

one life form to experience everything the Higher Self wishes to obtain information about.

Ellie said that, as vibrations increase, different levels come into view.

This is what Ascension is, an increase in vibrations that brings into view another level of existence, which we then live on.

### What is Ellie's Mission?

I asked her why she came to Earth. She said that she volunteered to bring the 5D Pleiadian light, balance and love to Earth. In regards to balance, she related how she has a vivid memory of when, at age 11, she touched a door frame with her left elbow as she exited the house she was compelled to go back and touch the opposite side of the doorframe with her right elbow to feel in perfect balance. Even that young, she was practicing her balancing mission.

When we returned to the topic later, she said she had come to bring Pleiadian positivity, love and light to Earth. She is equivalent to a conductor that draws down energy, processes it for Gaia's use and grounds it. As a conductor of Pleiadian energy, she must have no resistance, which is the second reason why Plen continuously tells her, Be Happy. Don't worry. Live in the present moment.

She said many Pleiadians, along with Starseeds from other planets, are here on Earth to do the same work. Without them, the negativity on Earth would be amazing, unbearable. They bring in the higher energies and distribute them around the planet. That is their purpose. Some of the older people, she said, are getting somewhat worn out from this task and are leaving. She said that other Pleiadians are being drawn into contact with her through e-mail and by phone to combine their energies to make a stronger flow.

The same applies to all Lightworkers readers who are drawn to this website are being drawn to their kind coming together in the Oneness. I'm not sure that Ellie knows about the 2012 Scenario or Sharell discussion groups, but if she did I'm sure she would say that those consist also of people who are drawn to each other.

She said that she and her Pleiadian friends connect by phone and computer. As long as they use a landline phone for contact, their conversation is protected from the dark, but not if they call by mobile or cell phones as those conversations are transmitted through the air, which can be intercepted by the negative beings.

She has a friend who sees auras and she told Ellie that her aura goes way out through the roof and extends a great distance in every direction, with rainbow colors. Ellie said her spiritual essence is pure blue/white crystalline love. I am love, she said, and have to keep it flaming. Anything negative brings me down. I certainly feel full of love having spoken to her.

Ellie's philosophy is that everything works out for our highest good and every action or incident has a purpose. She believes there are no coincidences and no accidents only learning experiences. She says that she spends each day thanking G-d and blessing everyone.

I asked Ellie why she didn't write down the details of her life and she said she had been a scribe in other lifetimes but not in this one. That is not her task. Her scribe tendencies had surfaced in early life. All she had was a radio and she used to transcribe the lyrics of songs as they were

being sung, producing several spiral notebooks full of them. Classmates would approach her for the words to songs they wanted to learn. She said that, while she lived for a brief time with her Earth father in California where he had moved to when she was 4 years old, she would write letters that were more like small books to her Mother. But she no longer feels this energy and prefers to visit by computer or phone, watch TV, collect and send out her articles, and similar things.

#### The Nature of Earth

From what Ellie has been told through the years from her trusted Source, Earth is the only dual polarity, free will world in this universe, which is why it attracts such a great degree of attention. This level of Earth that we are on is the most dense. She jokingly refers to us as mushrooms that get c-apped on daily. We're in the cr-pper, she joked, the septic tank of the universe.

On this planet, absolute free will is allowed. She said to imagine the Creator saying, I wonder what would happen if I created a free-will world? If I allowed people to do whatever they wished? Now he says, Well, that experiment didn't go well no more absolute free will! From now on, there will be rules, monitoring and some limitations.

This is a learning world, created for that purpose. This is where anyone can experience their desires, provided they can live with the karmic consequences.

On other planets there are limits placed on conduct. If someone has a negative thought on another planet, someone comes along to assist or facilitate them with it. They are never left without help and guidance. (This is how it is on the Astral and Mental Planes as well.)

Pleiadians have a planet where they may send people to if they get too far out of balance. Their mission is to deal with their imperfections before returning.
