Subject: Extraterrestrials. Part 5.
May 19, 2011.

This talks about the Greys.

.....
.....

This is why those humans seen working with the Greys (implanted and programmed drones, whether willingly or unwillingly) have appeared lifeless and emotionless to the witnesses who observed them. The Zeta's or Greys live in the Constellation "Reticulum" by the Star "Zeta 2 Reticuli" a planet was discovered there and then suddenly taken off the list!

Further descriptions on Greys

PRIMARY PHYSICAL CHARACTERISTICS OF THE GRAYS:

The larger Grays apparently have some vestigial reproductive capability, and some of the hybrid species that have been cross-bred with the [taller] reptilian species have full reproductive capability. The brain capacity is estimated to be between 2500 and 3500 cc, compared to 1300 cc for the average human. Due to the cloning process, the neural matter is artificially grown brain matter, and the Grays have known technology that enables them to insert memory patterns and consciousness into clones in any manner or pattern that they wish. The Greys consume nourishment through a process of absorption through their skin. The process, according to abductees who have witnessed it, involved spreading a biological slurry mixture that has been mixed with hydrogen peroxide [which oxygenates the slurry and eliminates bacterial] onto their skin. Waste products are then excreted back through the skin. Many abductees have noted that the Greys have a distinct series of odors... The larger Greys have a more pronounced nose... According to some government sources, these extraterrestrial biological entities called themselves the EBAN. It is with the larger Grays that elements of the government made a series of diplomatic agreements in the 1950s, 60s and 70s...

MORE ON THE GREYS:

The Greys are involved in the stockpiling of humans [including children] for use as a food source for the Reptilian species [and as a lesser food source for themselves?]....

PHYSIOLOGICAL CHARACTERISTICS OF

SOME GREY-REPTILIAN SPECIES -- AUTOPSIED BY U-ITED STATES

GOV-RNMENT:

Alien Life Form

ALF: Term used by the government to describe the Greys in terms of being a malevolent life form. The deal with the Greys is that their field around their body is different to ours to the point where merging of the fields ends up creating physical symptoms [the "body terror" mentioned by people like Whitley Strieber]. The field around them is in direct opposition to ours. It is an ANTI-LIFE field, as these specific species are on a devolutionary spiral. They are akin to soldiers of fortune, and offer their advanced technology in trade for things they require. They are experts at manipulation of both the human body [through manipulation of the fields] and the human mind. They require blood and other biological fluids to survive. They abduct humans and animals in order to acquire these fluids. They implant small devices near the brain which potentially gives them total control and monitoring capability. These devices are very difficult to detect.

The analysis of the devices by technical staff has produced a description that involves use of crystalline technology combined with molecular circuitry and these ride on the resonant emissions of the brain and the various fields of the human. Information is entrained on the brain waves. It appears that all attempts to remove the implants [1972] have resulted in the death of the human...

(This is usually due in part to the fact that the implants are attached to major nerve centers, and once attached the nerve tissues grow in and around the implant essentially making the implant a PART of the nervous system.

When relatively unsophisticated medical procedures are used in

an attempt to remove the implants, major nerve centers are damaged as a result, causing severe injury or even death. - Branton

Various descriptions of the ALF's relate the following characteristics: Between 3 to 3 1/2 feet in height, erect standing biped, small thin build, head larger than humans, absence of auditory lobes [external], absence of body hair, large tear-shaped eyes [slanted proximately 35 degrees] which are opaque black with vertical slit pupils, arms resembling praying mantis [normal attitude] which each to the knees, long hands with small palm, claw-like fingers [various number of digits -- often two short digits and two long, but some species have three or four fingers], tough gray skin which is reptilian in texture, small feet with four small claw-like toes, organs that are similar to human organs but have obviously developed according to a different [mutational] process; a non-functioning digestive system; two separate brains; movement is deliberate, slow and precise; alien subsistence requires that they must have human blood and other biological substances to survive. (Other indications suggest that originally they did not require human blood, but once having used human blood for this purpose they have since acquired a racial addiction to this vital substance. This goes far beyond just mere physical hunger, since the Greys/Reptiloids tend to feed off the human life-energies resident within human blood plasma, in what may be considered a vampirial type of hunger for human vital fluids. - Branton). In extreme circumstances they can subsist on other [cattle] animal fluids.

Food is converted to energy by chlorophyll by a photosynthetic process [this supports results gained from autopsies at 29 Palms underground base where it was seen that their blood was greenish and the tissue was black]. Waste products are secreted through the skin. The two separate brains are separated by mid-cranial lateral bone [anterior and posterior brain]. There is no apparent connection between the two. Some autopsies have revealed a crystalline network which is thought to have a function in telepathic [and other] functions which help to maintain the group-consciousness between members of the same species. Functions of group consciousness in this species does have a disadvantage in that decisions in this species come rather slowly as the matter at hand filters through the group awareness to those who must make a decision...

MORE ON THE GREYS

The Greys are primarily situated as 4th density beings, although there are a small number that are 3rd and 6th density. To 3rd density humans they appear cold, cruel and heartless. They are, in fact, extremely curious about all aspects of existence, highly analytical and devoid of sentimentality. They can experience emotional manifestations radiated from the terrestrial 3rd density human, and use this ability generally as a mood-elevator. The Greys manipulate humans in order to create situations of conflict or extreme pain and emotion to acquire these sensations. They are, in effect, sensation junkies. The Greys have the ability to pick out our emotions, thoughts and experiences. For them, this is the closest they can come to experiencing feeling. To those beings who have some form of ethical conduct, the Greys appear psychotic and degrading. They are masters of mind-control and mental implantation technique. Their physical attributes reflect their psychotic status - we could easily consider them to have anti-social attributes as well as tendencies toward megalomania and schizophrenia. They have been described by some as being absolutely mad. To make matters worse, they are performing other actions with terrestrial humans that are quite perverse. The Greys are playing a game with us that depends heavily on maintaining a situation where humans view themselves as limited, fatalistic beings with no control over their own destiny. They continually manipulate humans that is playing the domination/control game.

ALIEN TYPE The Greys.

Of this type there are several sub-types. All tend to appear greyish in color and for this reason are referred to as "greys."

GREY TYPE A:

This is the type most commonly referred to as the greys. Also known as Zeta Reticuli from the Zeta Reticular star system (the Bernard star) neighboring the Orion area. They function in a mode that is apparently military in nature with a rigidly defined social structure that holds science and "conquering worlds" to be the prime movers. They are normally about 4.5 ft tall with large heads and black "wrap around" eyes. They have limited facial features, slit mouth and no nose to speak of. They have evolved beyond the need for reproductive systems or digestive

systems and reproduce by cloning.

Their genetics are partly based on insectoidal genetics.

Their science deals largely with the study of other life forms and genetic engineering. They have supposedly had a part to play in the alteration of human genetics over thousands of years. It seems that they may be trying to cross breed with humans in order to create a "mixture race" that would be better than either. (I've read that they are a d-ying species, that have cloned so much that now, with each successive cloning, the species grows weaker. They are trying to infuse new life into their species by creating the mixed breed.) There seem to be two main social classes. One is the more hawkish and is more abrupt, crude and blunt. The more dove-like ones are more refined and capable of a more business-like behavior towards humans, and prefer to use more "diplo

<http://www.angelfire.com/wizard/wizardfl/bodyAlienBLUR.jpg>

matic" behavior to gain control over human's. This type of Grey is what I believe is being referred to as the "Orange" class of Greys. They seem to be emotionless (by human standards) and therefore are seen as cruel in their treatment of human beings. They are able to take human lives without any regard for that individual. They apparently can use certain substances of the human body for their sustenance and therefore appear to be carnivorous in regards to humans. (I also read that they extract fluid from some part of the human brain during intense emotional response [fear] and are able to use it like a recreational d-ug.) It is my understanding that these greys are actually servants to a master r-ce of reptilian-type aliens and are trying to prepare the earth for their arrival by gaining control over the earth through many means. They tend to enjoy the feeling of freedom they have on earth, away from their ma-ters and would desire the help of humans in confrontations with the reptilians...which appears to be a consideration for the near future.
