Subject: DK And David I. Part 5.  
May 27, 2011

This tells about the three warnings that have been given us.

.....  
.....

Cosmic Awareness: Must be aware of it being fresh coconut oil and not rancid. Coconut oil should be used for frying but this Awareness would always stipulate that one must be aware not to bring it to the highest heat, but to low heat and to make sure that it is not rancid coconut oil.  
No closing message.

The Law of Gratitude is offered.

COSMIC AWARENESS CONSULTATIONS

These are way beyond a 'reading' it's a life experience.  
Personal Cosmic Awareness Consultations, Regression Therapy to past l-ves, Addiction Therapy, working at deep multidimensional levels, Huna Techniques.  
You can get 'readings' everywhere today but here you can talk for 60 minutes directly with Cosmic Awareness Itself. Rates: \$-00 for nonmembers, \$-00 for CAC members, US dollars. All by phone paid by Will. You also get a DVD copy.  
Make a quick call to Will B-rlinghof at 403-286-5248 to arrange an appointment or send him mail at [Bridges20@shaw.ca](mailto:Bridges20@shaw.ca)  
He will call you back.

CAC General Reading 3-19-11 (March 19, 2911 Will B-rlinghof Interpreter, Joan M-lls, Questioner & Energizer  
Unity-Consciousness

Questioner: Does Awareness have an opening message please?  
Cosmic Awareness: This Awareness has an opening message about the situation in Asia, specifically the situation in Japan.  
It has been a week since the disaster in Japan, the catastrophic earthquake and tsunami, and the subsequent rupturing of the reactors, the explosions in the reactors.  
In a manner of speaking, the catastrophe in the power plant is on a different scale than the natural catastrophes that occurred with the earthquake and tsunami but, of course, the two are tied in.  
This issue was one that was to bring the plight of Japan not only to the attention of the rest of the world but to begin a process by which individuals can start to comprehend at a much deeper level that all are interrelated, that no nation is independent, no person independent from other nations and other individuals, that humanity is a family and that in times ahead, the concept of nations must include that awareness and understanding that one and all are interconnected, interrelated.  
This way of thinking will lead to Unity Consciousness, will lead to global awareness, and will lead to the higher e-olved state of understanding of how all is interconnected.  
The n-clear power plant disaster that has released radioactive energies into the stratosphere so that they can be blown around the world is seen as a threat to many.

There are many who are panicking at this time in the U-ited States of A-erica, for traces of radioactivity have reached those shores.  
This Awareness sees that this will not be detrimental to the peoples of the Un-ted St-tes of Ame-ica for the levels at this time are not at a high enough level to cause physical harm or lethal doses.  
But what is important to realize is that this has brought it home so to speak. This has made it more obvious that what happens in another country can affect other nations, even those thousands of miles away.  
This new understanding is that which will be kindled within the consciousness of humanity and those who are here to raise the bar,

to understand the interrelatedness of all, are seeing these events in a completely different manner, for they will take this experience and this lesson into the future, and new concepts of responsibility will start to formulate in the future.

The concept of a nation being independent in its actions to another nation is an outdated concept that will start to change as Ascension draws nearer, especially after many different versions of Ascension occur.

The-building-of-nuc-ear-reactors-is-a-cr-me-against-other-nations  
In the future, all will understand that a nation has a responsibility to other nations, other brother/sister nations.

The building of nucl-ar reactors in an earthquake-prone country is a cri-e against the other nations of the world in that if an event such as has occurred occurs again, other nations will be affected, and other nations will also bear the brunt of this irresponsibility that in the future will no longer be tolerated.

This is all as this Awareness has just said, movement towards that which is a Unity Consciousness, not simply dualistic thinking. At this time dualistic thinking states that it would be all right for a nation to do for itself what is needed and that other nations have no say in this matter, but the curiosity is that they would also say that another nation should never do anything that could be harmful to their nation and yet the other nation would not be in agreement, for they, in their dualistic thinking would also be doing what was correct for their nation and their people in accordance to their own thought process on the matter.

There are many now through this latest disaster, this n-clear reactor catastrophe, who are beginning to see this matter quite differently, and who are starting to understand that the use of a power source such as nuc-ear power is not of the highest nature, and not what should be recommended to any nation to use, for the risk is ultimately too high. This Awareness reminds all that this event that has occurred in Japan, which is the result of the natural geographical/geophysical events, the geographical element being the location of Japan on the Ring of Fire, making it an obvious candidate for an eventual earthquake that could create problems in a nu-lear reactor, was such that many could see this event coming.

One did not have to be a ps-chic to simply comprehend that at some point Japan would be hit by a major earthquake, and yet it was still allowed that the nuc-ear reactors were built with the assurance that they would never be affected, even by a strong earthquake.

One can see how bogus this excuse was, this guarantee that all would be okay, and that having seen the results of the actions of the planet itself as she, Mother Earth shifted slightly, and this Awareness must emphasize it was a slight shift on Mother Earth's part that created such a catastrophe.

She will continue her movement and her shifting and there is a high possibility for other events in the future.

This Awareness simply at this time in this opening message is wishing to say that this event in Japan, the destruction of the nuc-ear reactors, the release of radioactive material, is the third warning from S-irit, from the D-vine.

Three-Mile Island was the first ever warning to humanity against the use of nucle-r power. This was followed up many years later by Chernobyl, a much more serious event that had extreme and drastic consequences, and now this third event in Japan.

This Awareness is saying that these three warnings are to help mankind realize how dangerous it is to play in the nuclea- field, how inappropriate it is, how inconsiderate it is towards one's fellow human beings who have the right not to be affected by the actions of a nation that is irresponsible and inconsiderate.

This type of action will soon no longer be tolerated, and if there is a silver lining in the events that occurred in Japan in regard to this nucl-ar accident, it is that the peoples of the world are starting to consider seriously that -uclear power is no longer the sweetheart that it has so long been made out to be, the hope of providing cheap energy to the world and to the countries of the world.

The silver lining is that many will start to reconsider this as a way of producing energy and will look to alternative energy sources as replacement to the highly dangerous energies that are produced through nu-lear fusion.

The risk of nuc-ear fusion and the production of energy through nucle-r fusion is a risk that is much too great to take and that the price is simply too great a price to pay.

Questioner: (Thank you) Was HAARP involved with the n-clear catastrophe in any way?

Cosmic Awareness: This Awareness has stated before that HAARP was not involved with the earthquake itself, but this Awareness does state that HAARP technologies were used on the power plant itself and this is the main reason why the secondary generators failed and the cooling waters and the piping were affected.

It was somewhat covered up of course by the events of the earthquake. The tsunami also was blamed for knocking out the water supply, the pipes carrying the waters and even the generators going down, the backup generators in particular.

But this Awareness says that the HAARP technology was involved and that it was the HAARP technology that destroyed the containment in the nuc-ear plants.

There are those experts who were staggered at how easily the damage occurred, release of the nucl-ar energy taking place because of the exploding containers around the nucle-r reactors, but these were being affected by HAARP technology and this is the real reason why they exploded and why they were destroyed.

Does this answer your question?

Questioner: Yes, and it does give thought to another. Is this going to be a primary target for HAARP energies in the sense of nucl-ar plants?

Cosmic Awareness: It is not seen at this time that this will be a primary use of the HAARP technology. It is to be remembered that those who use the HAARP technologies are still trying to keep this as a se-ret. If many other power plants were affected around the world, many questions would start to rise, especially in the plants where there were no earthquakes involved.

At this time, it is not seen by this Awareness that HAARP technology will be used to affect other power plants.

Furthermore, it must also be stated at this time that there has been a conflict between the Powers That Be, the sec-et c-bal and the secr-t go-ernments of the world with the Japanese Power E-ite.

They have not been on the same page and certain threats were made against the Japanese El-te that if they did not toe the line they would be punished.

There has been suggestion that nucl-ar devices were planted and exploded by those Eli-e of the world who were against Japan and it therefore triggered the earthquake and the tsunami and the power plant failure and the results thereafter.

This Awareness does not see this as so but It does see as valid the argument that there was a power struggle between the Elit- of Japan and the secr-t ca-al of the planet.

Part 5.
