Subject: How To Fix The Big C.  
June 25, 2011.

Here are some people who think they know how to get rid of the Big C.

.....  
.....

Canadian researchers find a simple c-re for c-ncer, but major pharmaceutical companies are not interested.

Researchers at the University of Alberta, in Edmonton, Canada have cu-ed ca-cer last week, yet there is a little ripple in the news or in TV. It is a simple technique using very basic d-ug. The method employs dichloroacetate, which is currently used to treat metabolic disorders. So, there is no concern of side effects or about their long term effects.

This drug doesn't require a patent, so anyone can employ it widely and cheaply compared to the costly can-er dr-gs produced by major pharmaceutical companies.

Canadian scientists tested this dichloroacetate (DCA) on human's cells; it ki-led lung, breast and brain cance- cells and left the healthy cells alone. It was tested on Rats inflicted with severe tumors; their cells shrank when they were fed with water supplemented with DCA. The d-ug is widely available and the technique is easy to use, why the major dr-g companies are not involved? Or the Media interested in this find?

In human bodies there is a natural ca-cer fighting human cell, the mitochondria, but they need to be triggered to be effective. Scientists used to think that these mitochondria cells were damaged and thus ineffective against c-ncer. So they used to focus on glycolysis, which is less effective in curing c-ncer and more wasteful. The drug manufacturers focused on this glycolysis method to fight ca-cer. This DCA on the other hand doesn't rely on glycolysis instead on mitochondria; it triggers the mitochondria which in turn fights the canc-r cells.

The side effect of this is it also reactivates a process called apoptosis. You see, mitochondria contain an all-too-important self-destruct button that can't be pressed in c-ncer cells. Without it, tumors grow larger as cells refuse to be extinguished. Fully functioning mitochondria, thanks to DCA, can once again d-e.

With glycolysis turned off, the body produces less lactic acid, so the bad tissue around can-er cells doesn't break down and seed new tumors.

Pharmaceutical companies are not investing in this research because DCA method cannot be patented, without a patent they can't make money, like they are doing now with their A-DS Patent. Since the pharmaceutical companies won't develop this, the article says other independent laboratories should start producing this dru- and do more research to confirm all the above findings and produce dr-gs.

All the groundwork can be done in collaboration with the Universities, who will be glad to assist in such research and can develop an effective dr-g for cur-ng ca-cer.

You can access the original research for this canc-r here.

This article wants to raise awareness for this study, hope some independent companies and small startup will pick up this idea and produce these dr-gs, because the big companies won't touch it for a long time.

**\*Making A Killing: The Untold Story of P-yhotropic D-ugging\***

Psychotropic dru-s. It's the story of big money-dr-gs that fuel a \$330 billion psy-hiatric industry, without a single c-re.

The cost in human terms is even greater-these dru-s now k-ll an estimated 42,000 people every year.

And the de-th count keeps rising. Containing more than 175 interviews with lawyers, mental health experts, the families of victims and the survivors themselves, this riveting documentary rips the mask off psy-hotropic

dru-ging and exposes a brutal but well-entrenched money-making machine.

Before these dru-s were introduced in the market, people who had these conditions would not have been given any dr-gs at all.

So it is the branding of a d-sease and it is the branding of a dr-g for a treatment of a dis-ase that did not exist before the industry made the dis-ase.

.....Message From Different Groups.

.....  
Isis; Message of the Day

"Time is relative, which means it is relative to the time-zone in which it operates. You live in a dimension where time is measured by the movements of your planet and the wear and tear the effect of the continual journey of matter through space has on your physical body. Do consider, dear things, you live on a permanently moving space vehicle which in itself is stress inducing. When you undergo an experience that evokes considerable emotion, such as a horrendous d-ath, severe fright, or great physical agony prior to making your exit from one time-zone to another, the sheer power or energy generated by that emotion is etched deeply on the Inner Time point of departure and communicated to your other essence-fragments wherever they may be throughout timelessness."

Dear ones. We are aware of the pain people are feeling. We wish you could feel our w-ngs as we wrap them around you. Know that you are loved. There is more to the world than you can see. We continue to meet those who have crossed over. This is a time when people may feel isolated. Reach out to each other. As you give comfort to each other, know we are also providing comfort. We send you blessings. Be at peace.

SaLuSa:  
You have reached the Cross Roads--Your Destiny is Your Choice  
June 24, 2011  
You may be anticipating many of the changes that are on the verge of taking place, but it is necessary for you to live day to day and wait until you know exactly what they are.  
There has to be an orderly and sensible process of change and clearly it requires your full co-operation. Just know that as things are planned, it is with a view to making it as easy as possible. Indeed the speed of changes will certainly please you and they are possible because of the amount of

careful planning that has been put in. The answer in all matters that require a decision is to trust your intuition, and do not allow your ego to distract you. Ego wishes what is best for you but it is often selfish and self-centered. Hopefully those of you who are already on your s-iritual path will be used to lifting your thoughts to the higher levels. As you raise your vibrations your outlook on life changes, and your thoughts and actions reflect the extent to which you have moved into the Light. You will find that you will be distancing yourself from things associated with the old mindset. They will no longer have the same attraction, or give you any satisfaction. It can lead to changes in your choice of music, reading and subjects of general interest. Most importantly you will seek friends that have much more in common with you, as normally the further you progress you have need to discuss your beliefs with those who are of a like mind. You may be different to most people, but you are certainly as normal as anyone else.

The Golden Rule is not to force your opinions or knowledge onto another person, and rather wait for them to approach you when they are ready. As we mentioned recently, in the not too distant future Lightworkers will be called upon to share their knowledge. Once the truth starts to come out it will result in many desiring to know more, and visualize centers opening where information can be found. Naturally quite advanced Beings will come forward with their knowledge, and you will have a number of the Masters leading the groups that will be formed. At present there are numerous people that claim to have the truth, but it is too fragmented and unreliable to completely serve others. If it is going to be accepted, the truth must equally serve all people and be sufficiently reliable to withstand scrutiny. With our backing we believe it will carry the ring of truth and we can support it with absolute proof if necessary.

Part 1.
