NEWSLETTER #106 FROM RUTH AND THE MASTERS OF LIGHT
JULY, 2011

Summer is heavy upon us, with the joy of the outdoors and the warmth of the Sun, but also the storms, fires, and floods. My heart goes out to the many people who have lost homes and treasured possessions. In my area of Arizona, we have been spared so far. The Forest Service has cleared the forests near us of underbrush, and overnight camping and campfires in our forest have been severely limited. We are sincerely grateful!

Payson is still a limited employment area, but family members are doing a little better, although the prospects for employment this winter do look pretty glum so far. A round of intestinal viral flu hit a lot of us after a large family get-together doctors said not from food?? That was fun. Do be careful of the onions, though, trash them when they get soft! Take care of yourselves, keep close watch on the weather forecasts, and move if you have to! I care about our readers you are my spiritual family. Let me know if you have been caught in a bad situation.

Masters, what do you see in July for the world? Flooding in areas where snowpacks have been extremely heavy this winter is a given, of course, and expected, but what about melt from glaciers all over the world will we be seeing the result from this causing rising sea levels and continental rivers overflowing? News now of nuclear power plants being inundated by Missouri flood waters in Nebraska and storage vaults of nuclear waste in danger of fires in New Mexico; do you see either of these situations causing a disaster in any of our plants in the U.S. causing radiation fallout?

The hurricane season is also on the horizon for the Eastern U.S. and Caribbean. Any indication of a really bad hit in Florida or along the East Coast this month? Hearing of cyclones in the Southern seas will they be really bad again this year? Not much in the news regarding earthquakes or volcanic eruptions ; hopefully this will hold true in July? As the seasons change, so do the emotions of humanity slide up and down; will the Arab nations continue to try and change their governments despite the high loss of life? So many challenges now. Thank you for your insights and guidance.

MASTERS: The spiritual watchers and guides of humanity are closer now than in many millennia as the frequencies surrounding the planet and the solar system continue to become stronger. The movements in the earth and its atmosphere are continuing to cause the anomalies in the seasons and weather conditions. The earth's core reacts to this by heating up slightly and by very small shifts, like a huge ball being nudged by the outer movements. This also contributes to the shifting of the continental plates being observed now. Japan's miseries are not over yet the underlying base mountains of the islands are very unstable at this time, and the radiation is very serious. Shifting continues in the plates in the Arctic regions, causing ice floes to melt and break up unexpectedly. This affects the temperatures of glaciers at all higher elevations and melting waters will indeed cause some rise in seas and flood low-lying areas around the northern parts of the world. Earthquakes are on the increase all over the world as the plates seek to settle in new configurations, and this is a natural and on-going part of nature. We

are only seeing huge quakes in South America at this time, but as the earth shrugs, tremors will be felt in many places. Iceland will continue to experience volcanic eruptions as this volcanic ridge is undergoing drastic changes deep below.

As to the nuclear plants in the U.S. under siege at this time, the Nebraska plant will have to deal with flood waters seeping beyond the protective walls, but the situation is being understood and should not have any serious leakage of radiation. The larger problem is the waste in New Mexico; we do see the fires causing a break in a few of the containers and some radiation in the area will be acknowledged in July. Be very careful to keep on top of this.

Because of the increased frequencies hitting your atmosphere, the storms that you call hurricanes and cyclones around the world are reacting in unprincipled ways. What is expected will dwindle out, and sudden whirling winds will strike quickly without too much warning. Forecasters are watching this phenomenon very closely and are aware of sudden changes. The southern seas around the islands and Asia are very full of energy and whip up into huge waves very easily. As to the East Coast of the U.S., it would be wise to move inland very quickly when the forecasters put out an alert for a hurricane. Florida and the Keys are on the outskirts of a huge mass of atmospheric energy that could hit very quickly and forcibly. July is a beautiful month, but also a very dangerous one weather-wise. Boating along the east coasts of the U.S. is not wise this month. Europe and Asia will be experiencing strong storms also, especially in areas where quakes and volcanoes have been moving for centuries. The energy moving through the earth affects all areas where there are old cracks and continental movements everything on your planet is in motion. Be aware of where you are and what you need to do if you feel a movement. Unless you are new to an area, you know what to do or not to do. Awareness of your surroundings now is very important.

The high temperatures you are experiencing across the U.S. will continue to come and go, a bit higher than normal as the atmosphere dances all over the place. Europe will also be sweating this month, even in higher elevations. Enjoy the summer, but be, again, watchful. The Sun's rays are stronger than ever now; protect your skin and keep children covered as much as you can. Important now to eat more vegetables and fruit your systems need them. We are there for you; call on us for help and for the inner guidance that is always within you..

Dear Readers: The Masters have guided me to re-print these most important articles first given to me and printed in the 1995 & 1996 issues of the News letter I was publishing at that time. The articles have been copied and shared internationally for a long time, but since we have so many new readers, it is time to share this s-iritual s-cret with you again. As these coming difficult years are upon us now, this teaching is even more important than ever. Ruth.

THE HEALING ENZYME
BY THE MASTERS OF LIGHT

The Father of all has set all events upon your planet to take place at set times. Within this framework, humankind has had Free Will to experience life as they wished. Wars have erupted over r-ligious points of view, as well as from greed. Nevertheless, G-d's Plan for His creation is still on target, and humankind is working with that Plan as it becomes more and more apparent.

The time has come that the Children of Go- become able to change all of the negative factors that rule your societies and create a better world.

When human beings inherit the full power to heal themselves of physical and mental ailments, the dark forces who act as the second part of the -od-created duality on your world will loose their dominion over humanity by controlling their physical beings and mental egos. Even if there is a population of those who have less food or money than they need, the threat of physical illness or starvation will have been dissolved, worry and resentment will fade away as perfect health presents the better incentive to find other ways and places to live in more desirable situations.

Part 1.
