This is a collection of Material from the book "Matrix III" (The Psycho-Social, Chemical, Biological, and Electronic Manipulation of Human Consciousness), from Valdamar V-lerian, First Edition Printing May 1992, Copyright 1992 Adress: Leading Edge Research, P.O. Box 7530, Yelm, Washington State 98597.

**MONTAUK AND THE S-CRET G-VERNMENT**  
Introduction

This report was constructed from over 9 hours of video interviews, personal interviews and individual commentary. It is structured in an open question-answer format, without regard to who is asking the question and who is answering; this format also allows insertion of other data in the later part of the report in the same open Q&A format. The data is not proven or verified, but is reported as received. This report contains information on the following: The Philadelphia Project, or Project Rainbow, Phoenix Projects 1-3, origins of the Radiosonde and connections with the work of Wilhelm Reich, government weather control programs and hidden agenda, the Montauk Mind Control projects, the deliberate murder of thousands of American children in mind control research and time tunnel experiments, government time-tunnel projects and operational procedures, how Nikola Tesla and Von Neumann contributed to these projects, the "martyrdom clause", mind control by individual signature, technical ways to produce planetary holograms and Matreiya effects, the explanation behind closed time loops, government rationale and plans for the confinement camps and slave labor, Project Dreamscan, Project Moonscan, the Airborne Instrument Labs, Project Mindwrecker, the alien groups known as the Kndrashkin and their interaction with US Government mind control programs, the Kamogol II and Giza Groups, the negative Sirians, Soviet satellite waponry, Orion Group manipulations, 6th root race incarnations, telepathy producing drugs and their use and suppression, the F-A and zero-time generators, technical spin-offs from the Philadelphia project, the International Aerospace Alliance, cross-section of implant device, Wilhelm Reich and mind control, Reichian Orgastic-type programming and its use by the US Government and Sirians, the Psi-Craps, Alien soul-trading, Montauk and the aliens from the Antares system, the Leverons, the Eohim Group, the US Navy and time-tunnel projects, the US Government and the Greys, electronic life support, systems of the Reptilian Humanoids, new life form masses over the poles and their relation to yearly outbreaks of flu-like disease, AI-S and Fort Dietrick (N-A), Maglev trains and the US underground tunnel network, the missing human genes, buried spacecraft and alien technical archives under the Giza pyramid, the coming new money, the "Black Nobility", Nordic and human copper based blood systems and physiology, the technology of cloning and the development of synthetic humans and political replacement programs, the Middle East situation, Congressional awareness of drug and alien agenda, the M-B, the US Army and the black helicopter forces, government mobile mind disruption technology, nature and purposes and the Orion Group, fourth density transmutation of the human race, geological changes, Sirian Mind Control technology, and more, along with illustrations gleaned from witnesses with photographic memory and a lot of courage. This information is supplementary to that in Chapter 7 (Matrix III).

The Interviews

Where do you want to start?

Let's start with the Phoenix Project.

It was a project that evolved out of the Philadelphia Project. it was a project that the Na-y did in the 1930's and 1940's in an attempt to make ships invisible. They threw the switch one eventful day and the ship went into hyperspace. They had all sorts of problems with the people on the boat. It was a huge success as well as a huge failure - then they shelved it. Around 1947 it was decided to re-activate the project and it was moved to Brookhaven National Laboratories with Dr. John Von Neumann and his associates. Out of Phoenix I came Stealth technology, which I cannot talk about because of my job. It also produced all sorts of energetic little toys like the radiosonde.

What is a radiosonde?

Well, in all appearances it was a little white box that they attached to a balloon and sent up into the atmosphere. The government told people that it involved gathering weather data. It used a very unusual type of pulse modulation. In most cases they used a CW (continuous wave) oscillator and pulsed the signal. This turned out to be a very efficient conversion of electrical energy to etheric energy. I very recently started collecting radiosondes.. I never saw a receiver. I found out that they were designed up at Brookhaven National Labs. I started to talk to people at Brookhaven and ran into a retired gentleman who used to work there. He told me that the design was originally done by Wilhelm Reich. That peaked my interest. The story goes that in about 1947 Wilhelm Reich handed the US Government a weather control device, a device that would do DOR-busting. Reich thought that if he could decrease the amount of DOR that storms would not be so violent. (DOR is the result of orgone energy coming into contact with an enclosed radioactive source. This produces a Deadly Orgone Energy - DOR - which threatens life. It is also produced in the atmosphere through other processes. The government sent the device up there into a storm and it did reduce the intensity of the storm. The government liked it, and they started another phase of the Phoenix project where they designed these "radiosondes" and started launching them in large numbers, maybe 200 to 500 per day. The radio in these things had a range of about 100 miles. If they used so many of them, one would think that receivers for them would be common-place. I used to be a collector of radio receivers. I have over 100 in my personal collection. I have never seen a radiosonde receiver. I have heard of them but I have never seen them.

What are the frequencies used?

The frequencies used are 403 MHz and 1680 MHz. They used two different frequencies.

They are both on at the same time?

No. One or the other was used at any one time. The earlier ones used 403 MHz plus or minus 2 MHz. The later ones used 1680 MHz, plus or minus 6 MHz. The "thermistor" in them had gold, silver, platinum and iridium in it. Reich used sensors that had gold and silver in them. The humidity element is a plastic plate with silver around the rim and conductive lines going across the plate. They put a very unusual mixture of chemicals on this plate. Unlike most humistors, the resistance went up as it got damp.

What we're theorizing at this point is that the "thermistor" (temperature sensing) rod acts like a DOR antenna out-of-phase. The "humidity sensor" acts as an antenna for the orgone; The pressure sensor is essentially what they call a barrel switch, which is a pressure sensitive cycling switch. The device would destroy DOR and build up the orgone. The transmitter consisted of two oscillators, one of which would run at the carrier frequency (403 or 1680) and a second one which was a 7 MHz oscillator hooked into the grid of the carrier oscillator. The result was that the 7 MHz oscillator would pulse on and off.

How does all this relate to what was going on with these other projects?

The government could not tell the public these were weather control devices..

What we are seeing here is actually the genesis of what became the Montauk project, which was a combination of Wilhelm Reich's work and the Philadelphia Experiment. There were two separate projects going on in Phoenix One.

You had the invisibility aspect and you had the development of Wilhelm Reich's weather control. Toward the end of the Phoenix project, by using

Montauk.

some of Wilhelm Reich's concepts and some of the transmission schemes used from the "radiosonde" project, they found that you could combine the two -factors and use them for MIND CONTROL. Government circles would have me say "mood alteration", but mind control is what these idiots were doing.

That's what the Montauk project was?

No. Phoenix One. After political circles found out about it they wanted it shut down. The people that were running it went to the military and proposed that they could use it to "influence the minds of the enemy". The military loved the idea, and let them use the old Montauk Air Force Base. Among the equipment requested was an old SAGE radar unit, which was on the base. The base was shut down and everything was auctioned off. The group then moved in from the Brookhaven Labs. That began what we call Phoenix Two. They spent the first ten years, from about 1969 to about 1979, researching pure mind control. They started out by taking the output of the SAGE radar, modulating the special wave that Reich had showed them from the weather control process, and combined that with something noticed from the Philadelphia Experiment work. They transmitted about 406 MHz. It would hop around frequencies and change in phase. They used the amplidine concept where you have many stages pulse-modulated. BRF was from 10 cycles to 750 cycles. The pulse width could be varied anywhere from 10 to 75ms. The center frequency was 406MHz generated from a stay-low type function which was referenced from a zero-time function.
