Subject: Montauk. Part 5.  
July 7, 2011.

This talks about mind control.

.....  
.....

Any initial comments about electromagnetics?

Well, are a lot of interesting aspects. There is a explained by most theories. It is not magnetic field only propagates at 0.4 of the electromagnetic field propagates at the speed electric field (according to Maxwells equations) propagates at the rate of c-infinity, which means that it propagates throughout the universe instantaneously. If you understand those basic relationships and how they interlock with higher order energies and fields, like soliton and tensor fields, then you can understand how an antigravity drive will work. It is a fact that the unified field theory was completed by Einstein and given to the US G-vernment. They have it and they don't want anybody to know they have it. It was never released publicly in any books. This kind of knowledge is used as a method of control between and for go-ernments. It's unfortunate. The gover-ment is supposed to be "for the people and by the people". That is what it says in the Constitution. I wonder when the last time the p-esident read the Constitution?

It seems like there are more people involved in s-crecy than there are scientists. Where are all these people?

There are gov-rnment agents and agencies everywhere that are concerned with keeping things se-ret. These days, the secr-ecy is applied more to the applications of hardware than the hardware itself. It's not like it was in the 1950's. As an example, the guidance package for the new Minuteman X missle that was developed for the Air F-rce by Northrop is unclassified. There was no classification on the circuitry and It was so accurate that it could take a missle and drop it down a chimney stack. The applications was capable of was classified.

Isn't a lot of this left out in the open to distract what is really going on?

Of course.

What is the capacity of the gravity craft fleet of the Un-ted States?

I don't know. I know that they have built quite a number of them.

What are the capabilities of these craft?

Well, when our astronauts first landed on the moon in 1969 they were greeted by a fleet of disks sitting on the rim of a crater. The astronauts asked their superiors if they knew about these disks. They were told "yes", that they were A-erican disks. The astronauts were angry at being used as public relations men by the gover-ment.

Why spend so much money on the Stealth bomber when they have had this gravity technology for so many years?

Well, the aircraft combines two aspects for invisibility. One of the aspects relates to the construction and coating applied to the surface. The other aspect relates to an electronic type of invisibility package which is a result of work done on the Philadelphia experiment years ago. Also, the stealth has a secondary drive system which is very advanced and allows it to fly in space. The assistant director of N-SA admitted that this came straight out of alien technology. He admitted this to the public.

He did?

Yes.

That's interesting in view of the government's apparent position with respect to covert technology.

There are breaks in the government secrecy programs that are starting to show up. More and more people are getting totally disgusted with government activities and attitudes and they are beginning to talk.

Maybe it's a deliberate leak.

It could be deliberate. Even M--12 in 1984 was about to break some information to the public about ET's and UFOs. They decided not to release it at that time. John Kennedy demanded that they release it within one year. He also demanded that the CIA get out of the drug business. They assassinated him..

Have you found any resistance to what you have been coming out with?

No. The Navy keeps quiet, but I hear rumblings underground that they are definitely not pleased about it. The so-called .. martyrdom clause" works in my favor. They know that I know why they can't touch me. If they do, they know that there will be real problems in time and space because of it. There are two of us that are holding certain factors in stability. If anything is done to either of us, there could be a rip in hyperspace. The whole reality system will shift. I will give you one guess as to what it will most likely shift to: We won the second world war by a slim margin. German technology was way ahead of us. If the war had gone on another 30 days the Germans would have won it. They had super weapons in production which they were ready to use. They were so close to winning the war that Churchill and FDR were really worried about it. If the system shifts, it could shift to a parallel reality where the Germans won the war.

That's why the government doesn't dare kill either of you?

Right. Because of what we were involved in, it might jeopardize our entire reality system.

Could you explain how a closed time loop works?

Well, one of the problems that has developed is that when you travel through time you cannot come back to the exact point of origin. It has to be later than when you left. If you were to come back to the exact point at which you took off you would be at the same point twice in your lifetime and there would be a very serious problem.

Would you refresh my memory about some of the dates involved with the development of electronic mind control in the US?

The mind control experiments were moved to Montauk about 1969. The hardware phase of some of the later experiments began about 1975; equipment to modify the SAGE transmitter was ordered about 1973.

I-T was the main contractor and sub-contracted portions of the contract out.. Most of the contracts were awarded to firms on Long Island.

So what did they actually prove that they could do when the experiments were over?

What they essentially proved they could do was that they could control a person that they had the "signature" for. This pattern that was unique to an individual could be put into the computer program for the transmitter. A second order wavelength would be transmitted that has a lower attenuation and affects that person's mind directly. There could be a command to do anything focused at the person. Once a device was constructed that illustrated this principle on a wide scale. A mental message was put out that if anybody heard the message they were to call a certain phone number. Over 600 calls came from all over the East coast all the way down to Florida. It works.

That's interesting. There's a fellow who calls himself Lord M-ttreya who says that he is the Christ returned to the planet; that when he links up with the international press he will send a telepathic message to the entire planet in their own language and they will hear it. They also are supposed to receive a visual image. So.. they have that technology?

Yes. There is not only an individual signature. There's a racial signature and also a universal signal for the human race. The government has used all three to target specific individuals. They have also done group

messages targeted on a specific racial or ethnic group. That's common. In Boston and New York they were doing experiments on "mood control" on the cities. Transmitters used no longer exist, but the technology does.

Do targeted individuals perceive what they are receiving as their own thought?

Yes.

Is there any defense against that?

Yes and no. Theoretically no. This is what the government depends on. Practically speaking, they can't get everyone, because some people are naturally resistant, depending on their level of mental and psychic development. Perhaps 5% of the population do not respond to these signals. If they get 95% coverage, they don't care about that 5%. That's what they have the riot squads and the concentration camps for. There is no defense unless you can interfere with that signal. Some people just don't react.

So they transmit a thought signal?

Not exactly. If you were put on an EEG, you would exhibit a certain pattern of electrical responses. These can be recorded and they are unique to you. It can be recorded and stored and replicated on a computer. If they can replicate your RNA/DNA pattern they've got you too - for life.

You mentioned about concentration camps?

Yes. They are all over the United States. There are three in Arizona alone.

So they can control us to the point where we'll just hand over our guns?

That's what they hope. It depends on how effective this equipment becomes, how thoroughly installed it is everywhere, and whether or not people can ferret this stuff out and render it inoperative before that time arrives.

How about the idea of a conflict between moral conscience and what the mental command tells you do to?

You don't have the option not to act as it says the way that equipment is set up - if you are not aware enough to make a connection that it is not your thought. It does not negate choice, it just puts in a strong impulse or command. Those people who responded by calling that number had no idea what went through their heads. Some of this does require preconditioning to a response pattern.

Part 5.
