Subject: Andy Pero.  
July 11, 2011.

This tells how Andy Pero studied Silva Mine Control. It also mentions the Story Of Cathy O' Brien. She was used to trick diplomates into working with us by taking pictures of them in places like Bohemian Grove, Calif.

Formation Of America

Tranceformation of America. Andy Pero claims to have been created through a combination of genetic manipulation, trauma based mind control and Silva Mind Control training resulting in superhuman feats and psionic abilities. In addition to this, Mr. Pero alleges to have been unwittingly used in covert

a-sassinations as a Manchurian Candidate and also in missions connected to the

Montauk Project, such as

[http://www.bibliotecapleyades.net/esp\\_ciencia\\_timetravel.htm](http://www.bibliotecapleyades.net/esp_ciencia_timetravel.htm)

time travel.

Andy Pero first went public with his story in August of 1998 as a special guest of

[http://www.bibliotecapleyades.net/esp\\_preston\\_moon.htm](http://www.bibliotecapleyades.net/esp_preston_moon.htm)

Preston N-chols while at a lecture series hosted by Bob E-re of Philadelphia, PA. I was so astounded with Andy's testimony, that I interviewed him personally so that his story could be shared with readers of Unknown Magazine. For those who are unfamiliar with me, I have worked for ten years investigating and counseling UFO experiencers, abductees and occasionally survivors of various forms of anomalous trauma, such as ritual abuse and mind control. Because of my background in alien abductions, p-ranormal, the occu-t and anomalous trauma, I recognized Andy as an extraordinary survivor of trauma based mind control, one whose story should not remain hidden.

Andy Pero

EL:

Andy, where are you from originally and when did your training begin? I was born in Fallon, Nevada in November of 1969.

My father was a Lieutenant Commander at the Fa-lon Naval Air Station in Nevada at the time. I believe my first experiences began by the time I was two and a half years old. At five years old my family lived in Munich, Germany and I remember attending two distinct kindergarten classes, one in German that was located on or near M-Graw Army Troop Army Base, and another Kindergarten in English.

I have flashback memories of torture sessions as early as age two where I was subjected to shock treatments with needles inserted in my ears and gen-talia. What they (the controllers/handlers) do is use extreme trauma to separate the mind from the body. They do this to split the mind into several parts that can later be programmed to do things-like superhuman feats. Basically, they disconnect all of the normal human brain impulses, emotions and whatever is normally present, then reprogram in new ones. They do this to remove all fear, so that when they program in new abilities, you will not have the instinctual, "but I can't, I'm afraid..." response. They program you to do, not think. In essence, they treat and program your mind as if it was a computer.

EL: Who are the people running these s-cret programs like the Monarch and Montauk Projects, and where do they conduct their activities? Our own g-vernment. One of my handlers-who tried to brainwash me into believing that he was my father--was basically a N-zi. I nicknamed him Ad-lph because he is very A-yan looking. After WW2 many Na-i scientists were brought over to the US through our

own In-elligence community who formerly worked in mind control research in the con-entration camps. I believe they are a remnant of the Naz- party working in conjunction with different branches of the US gov-rnment and the mi-tary.

Much of my training and torture sessions were done right at the University of R-chester, NY. They used to take me to a private room in the attic or top floor of the library. The big lab where I had most of the programming done to me was at the Rome Na-tional Air Base in Ro-e, NY. I have also been used in the Montauk chair while at Camp Hero, Montauk, L.I. and also in a chair in Atlanta, GA at Dob-ins Air Force Base.

The Montauk facility located in Camp Hero, L.I. was reopened by the Department of the N-vy and is active to this day.

Basically there are underground bases located across the country. Each one has a different function and specialty. There is a facility in Roc-ester,

NY, Paramus, NJ, Dobb-ns Air Force Base in Atlanta, GA, Camp Hero in Montauk, L.I. and many others. In the Paramus, NJ facility is where they do the s-x programming for many of the female agents. For the most part, 99% of them are involuntary se- agents and couriers who were raised in various mind control projects.

EL: What were some of the things the mind control programmers made youk do?

I remember my mother enrolling me in a Silva Mind Control course when I was ten. It is a type of self-hypnosis where you learn to go to different levels of your mind to do self-healing, relaxation, visualization, bending spoons with the power of your mind, things like that. This is also the time when I saw two peculiar m-litary men, who would periodically visit me throughout my childhood, especially sporting events. I did exceptionally well at Silva Mind Control (and sports), so much so that the two milita-y men approached me and said, "I hear you have some very special abilities. Someday you will work for us." At the time I didn't understand, but later the two men figured prominently in all the training I had up all the way through my college years. Of course I didn't realize this until my memories came back. I did very well at sports and demonstrated a genius IQ, but I stuttered so badly until I was in my twenties, that everyone just thought I was a dumb jock. The stuttering was due to all the electroshock treatments.

I recall being subjected to electroshock numerous times, being placed in an enclosed water tank and told to breathe underwater. Consequently, I drowned several times and would revive because of my self-created healing pool in my mind. I learned to create my own mental laboratory through Silva Mind Control, replete with a super powerful healing pool that could heal any injury. I was forced to endure suffering beyond belief to accomplish superhuman feats of strength and survival.

EL: Tell me more about the various superhuman abilities you discovered you had.

The trainers would put me into a trance whereby I'd be told I could jump off a ladder of minimal height. In my mind, I believed that I was only jumping off a footstool or a short ledge. In actuality, I was progressively led to jump higher and higher heights to the point of successfully jumping off buildings and even out of planes without a parachute.

When under mind control, I could do whatever I was instructed to do as long as I believed them. I would do 200 or more push ups in perfect form, sometimes as long as a half hour straight, or until I was told to stop. I weight lifted 545 lbs. on a barbell and squats while attending college and much more (500-1500 lb.) while I was under the mind control in the training laboratory not far from Roch-ster, NY. In my jumps, it was as if I was falling like a cat, calm and cool with no fear, focusing like a laser only on the landing.

EL: Are there others like yourself who have had similar training and experiences? I think there are thousands of other children and people who are used and many end up missing. Many d-e in the process. They are considered expendable. The ones who can survive the most rigorous programming live on to become what are known as the Montauk boys.

Duncan C-meron is such a person. In general, the boys and young men are trained to be couriers, ass-ssins and super soldiers and even ps-chic ki-lers. The women are mostly used as se- agents. Cathy O' Brien's story is an example.

EL: What kinds of special missions or time travel experiments do you remember taking part in? There were times I remember being at the small Ro-hester airport, being picked up in an F-16 fighter plane and ending up in some southwestern desert terrain either for special mili-ary training and obstacle courses or assa-sination missions.

Andy Pero.
