Subject: Coment on Elenin, "Nibiru"

Elenin or Nibiru?

Many have asked for me to comment on comet Elenin. I was given in meditation a big event is coming. I was also given the time line Sept. 26th have to be fully self sufficient away from the coasts seeking shelter in high ground away from any active fault lines or volcanoes. I also find it odd that the so-called comet "Elenin" is geo effective at that time passing between the Earth and the Sun. The Swiss Franc depicts this event, <http://www.redicecreations.com/article.php?id16211> The N.-.O. and powers that be or were have prepared extensive underground facilities at our expense for them and their families leaving all others topside to fend for themselves. This has always been the plan with those we have entrusted to take care of us, they always take care of themselves. Look at Social Security. The V-tican has spent millions if not billions into tracking what they call wormwood. Many call this incoming! ! body planet X, Nibiru, and it is referred to as the winged globe or the red dragon; which seems to pass by every 11,000 years give or take. In the early 80's this object was found, it hit the headline news and they said we don't have to worry about it a while. That while is here. The Mayan Calendar talks about the end of a major cycle in Oct. the 28th to be exact. This is the second passing as it leaves our system. NA-A otherwise known as never a straight answer has not been forthcoming on UFOs, off world visitors they have had meetings with and which have been working with along with other major corporations. Insiders say not one of our missions to the moon or in space was not monitored by off world craft. Or was it out own b-ack projects? They have also not been forthcoming about our own bl-ck projects with bases on the moon and mars as well as the s-cret space fleet and would rather keep the charade going sending astronauts up on giant firecrackers hoping they make it. Their job is to provide window dressing and maintain the status quo so I would not depend upon them for any truth concerning Elenin aka any other incoming objects. There is just to much evidence to the contrary of their official story as in most official stories.

The bottom line is what is your gut telling you? What is the Earth doing? Why all the unprecedented volcanoes and earthquakes? What is with the weather? What is perturbing the planet? A major event is around the corner, something big. The Earth is ascending to the next level, we are entering a highly charged place in space, We are coming into alignment with Galactic plane and there is more space debris as well as cosmic bursts of energy hitting than ever before. The standard, Nothing to see here folks, keep shopping is not going to cut it much longer and it turns my stomach to see these old grandfather bought scientists come on the air and lie with a smirk. Why the smirk? Because they know and have their tickets to the underground facilities and want to be sure and get there before all h-ll breaks loose. As I said they take care of themselves first.

Be well

James G. And Nibiru.
