Subject: I've Just Got Back From Seeing The Movie Cowboys And Aliens. Aug. 3, 2011.

Yes-sir-ree-bob I just back for seeing the movie and it was really great. I highly recommend to anyone who likes science fiction movies, to go see it.

It alluded to a few points that made sense to me and they covered the following.

1. The space people have come to the Earth in the past.
2. Retilians are a mean bunch of dudes.
3. Some people from other planets who are in the 5th or higher dimension can change their frequency and manifest in any form they chose.
4. Some people on other planets are looking out for us and trying to protect us.

I would say it is a great movie in everyway.
