What Kind Of Ascended Master Would You Be? By Mother M-ry
Ch-nneled through Natalie G-asson 08-08-11

My dear beloved ones upon the Earth, I have come forward to you with my expansive and ever flowing love. Upon my wave of love I send one question to you which I hope will allow your mind to expand further and enlightenment to pour like a golden liquid into your awareness. Enlightenment is akin to a h-aling balm, the more we can become aware of our energies, habits, attitudes and being the easier it is for us to heal ourselves completely and become one with the Creator. It is my greatest wish for the souls presently in manifestations upon the Earth to achieve complete and absolute hea-ing within all area's levels and aspects of their beings. This is possible and healing is taking place right now. Believe and know that it is true and you will acknowledge the results of this h-aling process.

The question I wish to put to you is, 'What kind of ascended master would you be?' this is a simple question although I feel it is not one that is asked very often. It is as if I am asking you to create a cartoon or film character for yourself. This character would be an ascended master and can be male or female, of any age or energy. The character would have a name and even a color of light. The ascended master would also be well known for the qualities that they express as well as their s-iritual abilities and service to the Earth. The ascended master would also have a being upon the inner planes that guided their spir-tual development and oversaw their growth, anchoring the energy of the mentor into the ascended master.

You may be asking me why I am encouraging you to create an ascended master character for an imaginary film or cartoon, there are many reasons and many lessons in this one question which I have presented you.

Firstly, you are all ascended masters upon the Earth; time is only an illusion created to bring order to the world, so the past, present and future exist simultaneously. Therefore you are all that you desire to be spir-tually and can link into the energies to bring it into fruition. When you are ascending or growing spiri-ually, all that you are doing is tapping into your true energy or complete connection with the Creator. You as an ascended master already exist, and so in order to become this energy and awareness you simply must accept it. After all, to be an ascended master is simply an awareness of self, the Creator, and the Earth which is aligned with the truth of the Creator. If you understood or was even able to view yourself as an ascended master, you would be able to identify the pathway to becoming an ascended master. While it is possible to view yourself as an ascended master and you can ask your guides or soul to demonstrate this to you in meditation, many people are not given this privilege as it would be too much for them to accept or comprehend. Another reason would be that they themselves limited themselves from connecting with the information.

Through the practice of imagining yourself as an ascended master you can begin to build a picture of the energies you wish to hold, the wisdom you wish to comprehend and the practices you wish to be able to achieve. By creating purely with your intuition and imagination an ascended master character for yourself, you will begin to understand so much about your current level of spiritual growth -- where lessons still need attention and even in what direction you need to lead yourself. Through this practice you can understand whether the ego is still present or whether your awareness is focused upon the pure energies of the Creator.

Would your character be full of glamour where everyone adored and praised you or would you be devoted to your services to the Earth and ascension in an invisible way? The type of ascended master character you create tells you a lot about your spirit-al growth because you can begin to give your character a form and question it in many ways. Why does it hold a

certain color? Why doesn't it wish to be known to others? Why does it choose to spread light or accept certain abilities? If your character is quiet, question why; if your character is powerful, question this also.

You are actually questioning yourself because the character that you have created is a form of your being.

What you will actually create is a form that holds some of your truth and true ascended master self, some energies which manifest because of your current level of awareness while another part of your character will be from your imagination. With this in mind you can begin to decipher what is the truth, what is a product of your earth experiences, and what is your imagination. You can realize energies that are good, holding onto them, and others that need to be released. You can also begin to question whether you would wish to become this character or how you could take a few steps closer to becoming an ascended master. There are endless possibilities of discovery through this simple process of wondering what type of ascended master you would wish to become. It is valuable to ask this question to other like-minded people around you; let them meditate upon it; you may find that the results you gain are very similar or very different, leaving you with something to contemplate.

It also allows us to beg the question, does an ascended master have a character, or is this a man-made concept? Are ascended masters just a consciousness and energy or are they in living form in a similar way to you are a human being upon the Earth?

Every s-ul wishes to ascend from the Earth and be united with the Creator whether they are aware of it or not, therefore if you begin to understand what ascension means to you or what you would manifest-as, then you are a step closer to realizing yourself as an ascended master.

For fun, let us imagine some ascended

master characters so that you can see the type of questions you can begin to ask.

The first character could be of male energies, holding a vibrant red light which denotes power, active energy and passion. We will name this ascended master character Master Ben. Master Ben is a renowned hea-er, he is known by every so-l on the earth as one who cu-es all negative energy and aligns sou-s with the Creator's s-ul. He is extremely humble and does not wish for fame or glory but simply holds a great joy in sharing light and removing negativity. We could ask Master Ben if he has dissolved his ego? Why he become a renowned he-ler? In which way does he hea-? Why are the qualities he holds so active and potent? Are there any qualities of energies that Master Ben would need to progress along his spiritua- path?

Essentially this is a game that I wish for you to indulge in, but life in itself can be seen as a game. When we inject energies of joy, happiness and laughter into our realities, we begin to understand the real process or growth that is occurring on the Earth and our realities.

Let us for fun imagine another ascended master character. We will call our character, Lady Ammra, she is a being of pure light, gentleness, kindness, compassion. She works with crystals to h-al the Earth and receives much wisdom from the animal kingdom, even codes which can be placed in crystals upon the Earth. Her color is of a sky blue and her guide is Mary Magdalene. She tells every one of her work and how it places much strain on her energy but that she is happy to do it. If this was your character what questions would you ask her? Maybe how did she build her connection with the animals and crystal kingdom? Has she let go of her ego? Why her energies are under stress? Is it to do with wanting attention, or does she need to adopt certain qualities?

Essentially by creating your ascended master character you are acknowledging what you desire for yourself in the future, in your spir-tual growth and ascension. Every so-l can ascend and still exist on the Earth, so think of your character in this way. When you have created an impression of your ascended master self, you can connect and link into its strength allowing yourself to become this energy, manifesting it in your own energy.

So in meditation or times of quiet thought let yourself hold the question in your mind of 'what ascended master would you become?' It is a question that opens up many possibilities to you and allows you to think outside of the lines of limitations that you create for yourself.

I extend such tremendous blessings and love to you,
We are connected as one,

Mother Ma-y
