Subject: Is The Comet Lenin A Mother-Ship? Part 2.
Sept. 9, 2011.

This explains some of the functions of Elenin.

.....
.....

The impact of the Mother-ship of the Galactic Federation, known as Elenin, will not be at the gravitational level, as it has been intentionally disseminated by N-SA specialists, but at the high-frequency levels, which currently cannot be measured with material instruments. In this respect all astronomical data that have been given by NA-A are irrelevant.

I have proved in my scientific books that there is an upper limit of discrimination, which material devices cannot overcome. This is the famous Planck's constant h , which is the smallest quant of energy that can be currently measured. This fact is in the center of present-day failed quantum mechanics and is known as the Heisenberg; Uncertainty Principle or the Copenhagen Interpretation of the breaking of the wave function. I am quite specific on this issue in my answer

to you, as I want to counter-balance the scientific fraud of NAS- with sound scientific arguments.

The Planck's constant is the basic action potential of the electromagnetic spectrum. All the information, which humans acquire from the universe, is limited to the electromagnetic spectrum.

This is illustrated by the constant speed of light c , which is the carrier of all information at the micro- and macro-level. However, the high frequency realms

are not limited by the speed of light. Their simultaneity and synchronicity is the proof that all energetic interactions in these realms occur immediately without any speed limitation.

The limited speed of light is the basic camouflage for the hallucinatory perception of 3d-space-time by the narrow human senses. In this respect -ASA only reiterates the global human illusion as to stir confusion and create

new fear with respect to the End Times. It is very important to understand this fear-mongering strategy of the dark Cabal, as it will be the greatest hindrance to Ascension in the coming days.

Before I proceed with my elaboration on the positive effects of Elenin, one last proof for N-SA's policy of fraud. Several days ago, the Orion Empire launched a massive nuclear strike against Elenin, as I was informed by the causal worlds. The missile exploded in the stealth shield of this mother-ship

of the Galactic Federation, but had no effect on its orbit.

There was a huge explosion that was observed by many astronomers. To cover-up this attack, the Cabal propaganda of the paid deivers in NA-A announced last week that Elenin will intercept with the coronal mass ejections from the sun and this will cause an explosion three days later. How did they know it in advance, except that they were informed about this assault, is not explained. And how such a singular explosion could occur with the sun flares physically remains still a mystery. NAS- has given no explanation to it. This is the greatest nonsense that has ever been distributed in the mass media, and it defies any reasonable scientific mind. But this latest awkward fraud also shows in what a precarious situation -ASA currently is.

Now back to my sound scientific explanation of Elenin's impact. As I said already, all our information comes from the electromagnetic spectrum, Humans are essentially "eye-animals", as I call them. This holds true for all astronomic information. This information is systemically flawed. What all humans still do not truly understand, is that there is no difference

between electromagnetism and gravitation.

I have proved this for the first time, after I discovered the Universal Law.

The proof can be found in volume I and volume II on physics. But I can explain the unity of electromagnetism and gravitation with a simple example.

The Germans developed the magnetic train in the 70s, but never realized it in this country. The company that developed this technology comes from Munich, where I live. However, they built the first and only magnetic train in

China, Shanghai. This train is based on the following energetic principle:

Huge magnets establish alternating electromagnetic fields between the rails and the body of the train, which are opposite in direction to the gravitation and offset its force. The train is elevated and slides like a hovercraft without any resistance upon this electromagnetic field.

This is a simple practical example which shows that the two forces are interlinked precisely, they are manifestations of one primordial energy, which is All-That-Is. This is the basic statement of the new physical theory of the Universal Law.

At this place I must make your readers aware of the fact that according to the standard model, which is the most advanced theoretical model of present-day f-iled physics, gravitation cannot be integrated with electromagnetism and the other two fundamental forces.

This i-norance of conventional physics brings into a focus all the bogus argumentation of NA-A with respect to the effects of Elenin. This ign-rance can also be seen in W-ikipedia, which does not mention in its essay on gravitation that this force cannot be integrated with the other three fundamental forces in the standard model. Everywhere, one looks upon a topic more closely, one only finds igno-ance. This is the deplorable situation on earth prior to Ascension.

Hence the necessity for the new Theory of Ascension of the Universal Law to reach finally humanity.

Elenin's First Function

The actual effect of Elenin will be in the high frequency astral levels, beyond

the detection of material instruments, which are limited to the electromagnetic

spectrum. In the first place, it will augment the wobbling of the earth, which

is in a process of mitosis, to use this term from biology, describing the division of growing cells from the original one. The same phenomenon is also observed with earth in the End Times. This wobbling of the earth has begun after the last portal 10.10.10 was opened and is now gaining momentum. The earth wobbling causes the split of the two earth versions - the ascended

earth A and the catastrophic earth B. This wobbling will reach a preliminary peak after

October 16, when Elenin is nearest to the earth and will subside in the following months. This peak will lead to significant consequences for mankind

and earth, which I will discuss below.

During the time between October 16 and November 11, the veil between 3d-space-time of earth and the high frequency realms of the so-ls, defined as 5th and higher dimensions, will become very thin for a short period of time.

During this time, Elenin and the other cosmic forces that manage the Ascension of our planet will establish numerous interdimensional portals on many places on earth. These portals will remain throughout the next year, when mass Ascension of humanity is scheduled to take place in December 2012. Some of these portals will stay after that and will link the catastrophic earth B with the ascended earth A for some time, so that some laggards will still have the possibility to ascend after mass

Ascension. They will be like a driver on a highway, who has missed the right exit and takes the next one, but still arrives at his final destination with a minor delay.

Purely for this reason, the period between October 16 and November 11, 2011 is the ideal time for the First Wave of Ascended human M-sters to take place. This is will be the most dramatic event in the history of mankind.

It will be the actual "First Contact" with us - we will encounter us for the first time as immortal, multidimensional beings. This insight will profoundly

change human perception of mankind as a transgalactic civilization. The subsequent appearance of representatives from the Galactic Federation, the Inner Earth Agartha, etc. will be of secondary importance, contrary to the current aspirations and expectations of many light workers.

With the First Wave of Ascended Ma-ters, the Time of R-velations will begin. Mankind must be informed about the insidious role of the Powers That Be from the Orion Empire that have controlled this planet and humanity for more than 10,000 years. The collapse of the financial system, the stronghold of

these dark forces, will precede this event and will contribute to their demise and expose.

Elenin's Second Function

In this respect Elenin will be also a relay station for some ascended human entities, before they establish themselves firmly in the 5th dimension and help

prepare the already existing blueprint of the new humanity for the arrival of

billions of ascended human beings at the end of 2012. From this

mothers-ship,

the members of the Galactic Federation will be also able to lower their frequencies and to acquire a human-like light body that will enable them to communicate with the earth people. Since most of these galactic

civilizations

dwell in the 8th and higher dimensions, it is very difficult for them to

lower directly their energy as to appear in a physical vessel on earth. They need such

relay stations as Elenin to perform their energetic transformation in a

stepwise

manner.

This is the second function of Elenin in the public manifestation of the End Times on earth.

Part 2.
