Subject: Is Comet Lenin A Mother-Ship? Part 4, 2011.
Sept. 8, 2011.

This talks about The Quickening.

.....
.....

This earth version will degrade into greater 3d-density and separation from the Source, after the shift has taken place and the 5th dimensional earth has

already ascended with a substantial part of the enlightened human population.

The 3d-earth, which will remain under the control of the current Powers That Be, will e-olve into greater density and separation from the higher realms - from G-d. This is the experience that some i-carnated entities have chosen to have on earth at this time. Purely for this reason, there is a huge battle

between the dark and light forces on earth for the s-uls of the sleeping majority. Its outcome is not predictable with respect to the number of harvested so-ls on both sides.

The alternative is - paradise or h-ll. The final date of Ascension is however a

done deal and independent of the actual outcome of this battle for human so-ls. By the way, this battle was depicted allegorically by John in his R-velations as the battle between Gog and Magog at the time of the appearance of the Antich-ist, respectively the Beast. This was an allegory for the dark forces, constituting of Greys and Reptilians, and their human proxies on earth.

However, there is one additional unknown variable in this cosmic drama. Some small Greys (zeta reticuli) are not very happy with the arrival of the Reptilians on Planet X, because they know that they will have to become soon or later their slaves, as these Reptilians are more powerful than them. Some Greys are inclined to help the humans get liberated from the Reptilian influence. In this respect the landing of the Reptilians from Planet X on earth B is not yet certain.

However, it will pass near the earth's orbit and this will have a huge devastating effect on the remaining 3d-earth, where life will become intolerable very soon after the Shift. This planetoid will not affect the ascended 5th dimensional earth."

I have quoted this email on Nibiru in some length in my answer to you, as it explains the true role of this planetoid in the End Times.

Currently there is much confusion about this celestial object. This information is almost one year old, but it is now brilliantly confirmed by my latest news from the causal worlds. Of course, the ultimate proof will be given in the next two months.

I have made in this interview with you the most precise and specific forecast that I have ever seen in Internet or published in the New A-e literature. If nothing happens, as predicted by myself, it will be the greatest

blunder in my whole life. However, I am firmly confident in the accuracy of my information from the causal worlds. I have never received such a precise information, unless it is absolutely correct and its realization (materialization) is around the 100%-range of certainty.

I am working with astral probability alternatives since the year 2000 and have established in the meantime a fairly robust method of assessing the probability range.

The events that I am discussing in this interview will certainly happen, because such is the divine plan for this planet. They will happen in this fall, as the portal 11.11.11 is the deadline for these events. That is why Elenin will approach earth in this time. However, I cannot tell you the exact sequence of events with a 100% certainty. Except from that, everything fits into my scenario for this fall, as I have predicted it more than an year ago - actually as early as 1998, when I was first informed by the causal worlds that I will be the first Ascended M-ster in the End Times.

And now let me explain to you the causal relationship between Elenin and Nibiru. Elenin is the good comet, the harbinger of Light and Ascension. Nibiru is the bad comet - the comet of Darkness and further en-lavement of the remaining mankind on the catastrophic earth B. It makes sense, doesn't it? It does not make any sense only to those, such as the c-annel

Mathew and his followers, who do not assume the further existence of a debased earth B. Mathew is omitting this fact from a psychological point of view, as he does not want to scare the many light workers, who are reading his messages. However, he is doing a disservice to their enlightenment, as they do not have the full picture and cannot interpret the current events in a correct manner. Hence the importance of this interview, as I put all the pieces together and complete the final cosmic mosaic of earth in the End Times.

By the way, the arrival of two comets in the End Time is a recurrent motif in many old prophecies, such as those of the Hopi.

The Galactic Federation knows very well the intentions of the Reptilian faction on Nibiru for the End Times and for that reason it has sent Elenin, so that it can arrive before Nibiru and create a "fait accompli" on earth, before this planetoid nears our planet and harvests those souls that will remain on planet B. By launching Elenin, the Galactic Federation will hinder these reptilians to influence the outcome of the Ascension process that will begin to unfold on a global and visible scale during this fall and will soon encompass the whole humanity.

This will lead to an enormous spiritual boost that is currently circumscribed as the "Quickening", although this process has begun in the year 2000. Those few incarnated souls, who have decided in their soul contracts to stay on the catastrophic earth B, will most probably reject or neglect the occurrence

of such dramatic events as the coming of Elenin, the splitting of the two earth versions, the first wave of ascended human masters, etc. Instead, they will experience in their fear-driven timeline the collapse of the old economic order, with which they identify themselves, and the many natural catastrophes that will peak in the remaining 15 months prior to mass Ascension as part of the final cleansing of mother earth from the rest dark energies. These devastating events will determine their future life on earth B.

The split of humanity in these two timelines will officially begin with Elenin in October 2011.

Around September 9 -11, 2011, a new, very powerful high frequency cosmic wave will sweep over earth and humanity.

It will merge with the already existing high frequency energies that flooded this planet in July and August. Their combined effect will be felt after September 20. The new energetic situation will no longer support the old world order, so that all its financial, political, and social structures will crumble within a very short period of time.

As you see, I am giving you an all-round picture of the Ascension scenario in the coming several months.

Now let me explain one central question, around which a lot of confusion has arisen among all light workers in the last several years. The term "Ascended Master" is not really understood by most people. You may remember that we have discussed this issue on several occasions in the past. Now I would like to summarize this topic.

Essentially, there are two different forms of Ascension - individual and mass

Ascension. The individual Ascension is independent of the planets' alignment of the 11 ascended civilizations from the Galactic federation with earth and the central sun of the galaxy, which will be the future 12th member of this organization some time after Ascension. This celestial constellation will trigger Mass Ascension on December 21, 2012.

The individual Ascension presupposes that the person has gone through all stages of the light body process and has augmented the frequencies of his physical, biological body to that of the crystalline 144-grid of earth. In this case, his body is also of crystalline nature. When this level is reached, the individual can transform his physical vessel into light body and

leave the material 3d-plane. He will no longer be visible to the other people

that remain on this planet and will soon move to the new template of the ascended earth that already exists in the 5th dimension. (Important novel information for advanced physicists: The 144-octave of universal Creation vibrates with a time period, which is equivalent to the Planck's time of the big bang. I have explained this fundamental natural constant in volume I and volume II on physics.).

Now, according to my information from the causal worlds, it is not even necessary for the individual to have augmented the frequencies of his physical vessel to the 144-octave of universal Creation in order to ascend, as the new blueprint of the ascended earth vibrates in the lower second level of the 5th dimension, which still contains some form of physicality. The vibrational octaves of these levels are below the 144-octave.

In this case, the ascended entities will permanently move to the 5th dimension and will not be able to show up in the still existing 3d space-time of earth.

There will be other individuals, who have elevated the frequencies of their physical bodies beyond the 144-octave, as is the case with me. I have reached this octave on October 13, 2010, when I temporarily ascended in the higher realms.

Because of that I was able to return once again on earth and to continue with the augmentation of my body frequencies in the 3d-space-time. By the end of February, my soul informed me that I have reached the 190-octave, which is equivalent to the 6th dimension of pure ideas.

Part 4.
