Subject: Two Sisters Meet The Space People. Part 2.
16, 2011.

Sept.

This talks about the effects of radioactivity.

.....
.....

Then with Zelas and Benen I returned to the craft receiving room and entered again a smaller craft with them. I do not know exactly what series of air locks the craft enter and leave the mother craft, but there was a large dark section upon the floor in the receiving room and as we entered the smaller craft to leave Zelas pointed it out and told me that was the area where the craft left. The trip back was quick and short, and as we drove back to St. Louis I recounted in my mind all the things I had seen. Being alone, I wanted to be able to tell anyone else as much as I could; however, we decided that we would not then tell everyone else of our experiences until we had enough information to relay to the public. Last year at the Buck's Convention we were called upon to speak, but we were neither prepared nor expecting that we would be called upon for a speech. I did, however, say a few words and since that time we have delivered several lectures to various groups.

A few weeks later we were contacted by the Brothers and were told that the Martian Council had requested us to speak of the powerful effects of the A and H b-mbs and also the future of those responsible for their e-il. When we were told these requests we asked, for information to give Earth's people, and the following is what they gave us. It was prepared by one of the Brothers known as Sigt. I will go directly into his message and then would like to take up a subject that many people have questioned us about such subjects as evil flying saucers and evil space people, also strange phenomena that seem to defy natural law will be spoken of. Now, I would like to give you Sigt's message:

"Earth's scientists are creating around planet Earth the most deadly condition to material man than ever. The explosions of the A and H bo-bs are placing the residue particles of radioactivity into all the materials of Earth. Each human being upon Earth now carries a certain degree of radioactivity in their bones and systems. Why should it be significant to hear of this when you cannot see the radioactivity, nor hear it as it does much destructive work?

"In the advanced laboratories of Mars we have proved the destructibility of such uncontrolled energy. Radioactivity drops, upon the grass, buildings and people after being carried by the air currents around an explosion. This energy is in minute particles that have the effect of deterioration to the molecules of all material things. This radioactivity settles around an object or body and penetrates the outer area of the surface or skin. What does radioactivity look like you may wonder.

"As an explanation, many of you have seen small dust spirals along the streets or in a dusty area that swirl around and around in circles that then seem to disappear. Radioactivity has the same effect and looks very similar as it settles around a body. The small particles are caught up in a swirling counter-clockwise motion that causes them to be driven down into the surface of the body cells. This energy, once inside the body, offsets the balance of the normal cell and causes it to become either agitated into more activity as it tries to cast back out of the system, or else the radioactivity attacks cells that are already weakened by illness, and immediately sets up a destruction of them.

"When this new activity occurs in a normal cell a powerful microscope would reveal the atomeal structure of the cell is creating a counter offensive action that is clockwise as compared to the counter-clockwise motion of the radioactivity. When this occurs, there is eventually a breaking-down of the cell's motion, for as the explosions of the A and H bom-s continue the action of the radioactivity is strengthened by this and overpowers the clockwise motion of the body cells that are attempting to throw off the radioactivity. Thus, the body cells are forced to become activated in the same manner. This creates a drawing together or construction of the cells and creates abnormal

conditions and illnesses. As the radioactivity increases the rate of motion increases around each body living on Earth. This changes the cell formation and in the next generation this inherent condition is accentuated by the accumulated mass of more radioactivity. In the second and third generations these changes are visible as definite deformations of the body, and this in turn, if not controlled, will lead to a generation of mutants.

"What does radioactivity sound like? I will try to explain. Many people are receptive to certain high vibratory sounds that are derived from the atomic explosions, and are the elemental changes in the atmospheres of Earth. These high pitched sounds are very serious, for they can almost pierce the very subtle consciousness, and cause changes there. The consciousness of Man is being affected every day by these vibrations that these explosions have created, and unless these are altered or until the explosions of this nature are stopped the Mind of Man will be changed in drastic measures. Some of these notes can cause a perfectly healthy person to develop a fatal illness, some can affect the mental processes terribly, other of these vibrations, if not altered within the consciousness of the individual, can cause one to commit acts that otherwise would not be done. But most serious indeed are the changes in the atomic structures of the atmospheres of Earth. Here the greatest battle of all is arising. The Earth wants to separate with this activity, but the consciousnesses of the higher evolved here upon Earth and in Space are preventing this, until Earth can adjust.

"How can you stop this from happening? The answer is simply stop the unnecessary tests of these bombs. For those who maintain it is necessary to show the military strength, we can only say what strength is there to be shown that deprives the people, vegetation and animals of a perfectly beautiful and attainable future otherwise. Is it truly possible that the deceptibility of such destructive weapons can replace sane, sound actions of better living? It is necessary now for the Space People living upon Earth to take protective measures or otherwise suffer the same effects from radio activity as the citizens. It is not possible for us to give Earth's people enough of the protectors without the co-operation of the governments, and such cooperation is at present unattainable. The continuance of these tests are affecting all responsible for them, and if one accepts reincarnation as an answer it would be definitely seen why no one here or responsible for these tests would want to re-live again in mutated bodies of the future generations. If reincarnation be unacceptable to the average person, then the knowledge that these tests are mutating their children and their children's children should be sufficient reason for stopping them. Our warning to Earth is cease your tests and save your future."

What the Space People are trying to make clear in this message and many others similar to this is that Earth is now in a most perilous situation, and faces self-destruction of humanity. In the two years we have contacted the Brothers they have been concerned and talked most frequently about the destructibility of the A and H bomb. Speaking of this destruction, the questions I mentioned earlier come to my mind, and that is concerning the evil flying saucers and evil space people. First, we must consider the evidence presented. There have been saucers that were reported as having a negative effect upon people by burning them or causing nausea, etc. And in some instances there have been cases reported where people have been assaulted by beings that have emerged from some saucers and actually attacked them. The descriptions of these beings have been generally of a small type of people who were unusually crafty or mischievous and who actually grasp people and attempted to drag them into their craft. Where do these beings come from, and why are they entering this system? No doubt most of you will agree there is a tremendous battle going on between the good and the bad, which concerns all thoughts, actions and influences. From thousands of years ago to the present age this battle between right and wrong has been waged against civilization and has balanced first in favor of the good and righteous, and then turning and swaying in favor of the wicked or evil. This strange course of events has been necessary for certain conditions to prevail upon Earth, so that beneficial results would come about. The devastating bubonic plague that swept Europe in the Dark Ages was indeed a terrible thing and was judged to be just that by the people, but this negative condition actually paved the way for more sanitary conditions. All evil will give way to the good, and all wrong has a right.
