Subject: Underground Bases Blown Up. Part 3.
Sept. 20, 2011.

This talks about the reading on a certain seismic chart.

.....
.....

THE W-R ON T-RROR WAS OBVIOUSLY A FAKE

BF: In any case, the South Koreans told the Chinese that an ass-ssination order was out for me. This was because of my publicly calling for the Asians to stop spending their savings on this vast m-litary machine.

You have got to remember, during the Cold War they actually had this anti-Comm-nism excuse.

But, the Wa- on Te-rror was so obviously fake that it was just ridiculous to anybody who does any serious research or investigation.

DW: Right.

CHINESE SEC-ET SOCIETY OFFERS PROTECTION

BF: I got invited to join a Chinese s-cret society that offered me protection from this assa-sination order and that's how I found myself in this sec-et world of financial power.

The group that offered me protection was the group that was behind the non-aligned nations.

It crosses borders. If you think in terms of countries, you don't understand how these people work.

They have big factions in China, in the US and in Europe both against and for them. It crosses borders.

If you think in terms of nation-states, you won't understand how these groups work.

CHINESE FIGHT FINANCIAL BATTLE BY BUYING REAL ASSETS

In any case, a financial battle started. There were many, many public salvos.

In 2006, the Chinese wanted to use their dollars to do something other than buy Treasuries.

They tried to buy the o-l company U-ocal. C-ngress passed a law saying they could not.

So then they took their dollars and they went to Africa, South America and everywhere, and started spending them on real things like mines and agricultural land and commodities.

Not virtual things like fancy and impossible to understand derivatives products, which are basically con jobs.

DW: Ponzi schemes. Yeah.

BF: Yeah.

FOOD AND OI- PRICES INCREASED BY C-BAL

The other group tried to retaliate by jacking up food and oi- prices.

Remember there were hunger riots in 33 countries at one point.

DW: Yeah.

BF: It was an economist at the World Bank who pointed out the reason people were going hungry was that they were paying farmers to grow -il [ethanol made from corn] instead of food.

That put an end to that.

2008 L-HMAN SHOCK WAS ASIAN COUNTER-ATTACK

Then there was a counter-attack.

The [leaders of the ca-all] were told that we would no longer accept dollars printed within the U-ited States.

That's what you know of as the Le-man crisis.

76 PERCENT DROP IN JAPANESE CAR EXPORTS TO THE US

You can check this in the public record.

If you look at Japanese export statistics, from October or November 2008, after the Le-man shock, you will see something like a 76 percent year-to-year drop in Japanese car exports to the US.

This was the Japanese and other people saying, You can no longer use paper to buy stuff from the rest of the world. You have to trade with real things.

Of course, your public was not let in on this.

DW: That's where I think people's brain is going to get busted. Nobody publicly knows that this Leh-an shock had anything to do with Asia.

BF: Yeah, I know. The way you can check it is to look at the export-import statistics after the Leh-an shock.

The other way to check it is to look at the Baltic Dry Index. That's the price of shipping.

90 PERCENT DROP IN THE PRICE OF SHIPPING

You will see that the price of shipping dropped 90 percent right after the Leh-m-n shock.

DW: Wow.

BF: That's because the ships were no longer going to the US, full of stuff, and then leaving empty [with nothing but worthless paper and IOUs].

These are ways people can verify what I'm saying with public-record information.

DW: Good. Okay.

NORWAY SHOOTING WAS AN ATTEMPT TO EXTORT 1.50 TRILLION

BF: Getting back to the blowing up of the underground bases, this group was being cut off more and more at a high level, and they were running out of money.

They were trying to extort money from various countries.

They k-illed the youth group of the ruling party in Norway that was the Norway attacks because they were trying to extort the 1.5 trillion-dollar o-l fund the Norwegian govern-ent controls.

They were saying, Hey, we're going to ki-l you if you don't hand over your money.

DW: [They were] just desperately trying to find cash.

BF: Yeah. They invaded Libya to take over their o-l fields, because the Libyans told them, We're not going to give you oi- for your paper anymore.

DW: Hmmm.

N-CLEAR B-MB S-UGGLED INTO JAPAN WITH 70 KILOS OF M-RIJUANA

BF: In the case of Japan, again, I have sources who are actually dr-g smug-lers. They have been selling drugs in Japan for 70 years.

These are C-A types. The CI- dr-g-smu-gling division.

They told me that a nu-lear bo-b had been brought in with their latest shipment of dr-gs.

This was a 70-kilo shipment of adulterated Thai ma-ijuana that was brought in through Okinawa.

They found a nuc-ear bo-b mixed in with it.

And of course, with these guys, smug-ling d-ugs is one thing, but s-ugling nu-lear we-pons is another.

They told the police, and they told me. I made it public.

They followed the bo-b as far as the North Korean citizens association headquarters in Tokyo.

FOUR N-KES S-OLEN FROM THE RUSSIAN SUB K-RSK

I have independent confirmation from a Mr. Paul L-ne, of Pe-tagon mi-itary int-lligence he was a part of the Men Who Stare At Goats group that four nu-lear wea-ons were st-len from the Russian submarine Ku-sk after it sank.

I think it was in 2000 or something.

It was one of those nu-lear we-pons that was smuggled in [to Japan].

DW: Stolen by who, though?

BF: This is the O-essa group. The Na-i group. The one that was trying to set up a fa-cist world go-ernment a Fourth R-ich.

DW: Okay. How did they get to the Ku-sk to get these nukes out?

BF: I don't know the technical details, but they have submarine bases in various parts of the world. I assume it was from one of these submarine bases.

WHY STEAL NUKES IF YOU CAN BUILD YOUR OWN?

DW: The next question, then, would be why would they need to get it from the Kurs- if they are powerful enough to make their own?

BF: The public nuclear devices are under strict safety protocols. You can't just take them and then blow them up somewhere. There are too many people involved in the chain of command.

They tried to do that.

M-NOT AIR F-RCE BASE INCIDENT: FAILED SMUG-LING ATTEMPT

There were incidents where [the good guys] just barely stopped a nuc-ear -----

DW: Right. Like the Mi-ot Air Fo-ce Base incident.

BF: Yeah, exactly.

DW: The soldiers did a mutiny and would not commit this Broken Arrow. That's what they called it in code terms.

[Insiders attempted to smu-gle out a nuc-ear weapon from Mino- AFB. Several of these heroes d-ed as a result of standing up against this plan and refusing to allow the nuc-ear wea-on to be stolen.]

BF: There you go. What they needed was some nucl-ar weap-ns that were not under any official gove-nment control.

DW: Okay.

JAPANESE SHIP DRILLING TEN KILOMETERS AT EXACT EPICENTER

BF: There was a J-panese drilling ship known as the Chikuyu M-ru that can drill ten kilometers into the seabed.

They were drilling at the exact epicenter of the earthquake.

We had an article from January 17 in a local paper saying they were

drilling there.

They put the bo-b in the seabed.

HAND OVER THE CASH OR TOKYO WILL BE NEXT

This was an attempt to extort money, through te-ror, from the Ja-anese.

DW: So they warned Japan that they put the n-ke in [the seabed] before they asked for money?

BF: No, they asked for money afterwards.

DW: Oh, wow.

BF: If you don't do it, next it's Mount Fuji.

DW: For people who don't know, Fujiyama is right around Tokyo, which is the largest population center of Japan.

BF: Yes. That's right.

DW: So basically they are saying they would nu-e Tokyo, which is how many million people? Thirty or forty million?

BF: Thirty million or so.

DW: Right. Okay.

JA-ANESE PRIME MINISTER HANDED OVER 20 BILLION

BF: The Jap-nese prime minister [Naoto] K-n originally was so c-wardly, he just said, Oh yeah, all right, we'll sign over money.

He handed over something like two trillion yen, which is about 20 billion dollars. And they gave him a big b-ibe.

MAJOR B-TTLE WAS TRIGGERED IN JAPAN TO REMOVE THE C-BAL

The evidence that this was not a natural disaster began piling up.

The result has been a ba-tle here in Japan to remove these people from control.

WHY DO YOU THINK THIS WAS NOT A NATURAL EARTHQUAKE?

DW: Some people might not realize there is any evidence that F-kushima was not a natural disaster. Could you just briefly touch on a couple of points that you think are the most significant?

[Right before the disaster, I published dream data warning of a huge catastrophe that was about to happen. It was stunningly detailed and accurate.

<http://www.divinecosmos.com/start-here/davids-blog/921-bouncingback>

The original prophecies were posted here and

<http://www.divinecosmos.com/start-here/davids-blog/925-japanowo>

the analysis appeared here.

BF: If you look at the seismic chart, you will see a sudden explosion.

It's not like a natural earthquake, where you have pre-shocks. It was just suddenly huge, and then it started fading down.

Part 3.
